In an unprecedented defeat of the established Democratic organization, and the traditional business-labor coalition, Jane Byrne buried Richard J. Daley's successor Michael A. Bilandic. Chicago will never again be the same.

It was a year of political, social and economic upheavals for the windy city. The on-again, off-again Chicagofest was on to the delight of millions of visitors. And Mayor Byrne, after backing off of Chicagofest because of the expense, added neighborhood fests, an

(Continued on Page 31)

BEST AVAILABLE COPY

(Continued from Page 28)

added neighborhood fests, an autumnfest and winterfest. Pope John Paul II drew record crowds throughout the city, although the exact numbers were a controversy after he left the city.

▪ Chicago's corporate giants participated in the new American business pasttime of mergers and acquisitions. Maremont, an automotive parts manufacturer, was bought out by a Swiss company, Suisse Aluminium.

One of the city's largest banks, LaSalle National, formerly owned by GATX Corp., was bought by the Dutch bank, Algemene Bank Nederland. And the British bank, Midland Bank Ltd., unsuccessfully attempted to buy the giant financial services company, Heller International. Suburban McGraw Edison completed its purchase of Studebaker at the end of the year.

Chicago has a broadbased economy rooted in an historic manufacturing base. After the initial snow setback, a business recovery began and generally continued throughout the year. For example, metropolitan Chicago, a national center for steel production, was operating at or near capacity for almost all of 1979.

Unemployment in September in the Chicago metropolitan area was at 4.8%, more than a full percentage point below the national average. Some of that reflects the move away from manufacturing to service related jobs. In the last 10 years, manufacturing jobs as a percentage of total employment dropped from 38% to 31%.

▪ There were no major business relocations into Chicago in 1979. However, the city's Economic Development Commission began to reap the rewards of a program aimed at keeping business in the city.

Five in-city industrial parks were designated for special economic incentives including land write-downs, reduced real estate taxes and the use of industrial revenue bonds to help keep local industries expanding in Chicago.

Intercraft Industries leased 85,000 sq. ft. in the old International Amphitheater instead of moving out of the city to a suburban site. All of the economic incentives were employed to keep Intercraft.

Reflecting the strength of industrial activity, available industrial space was at its tightest level in three years, according to a quarterly survey by the real estate firm, Arthur Rubloff & Co. Joseph Dillon, head of industrial real estate for Rubloff, anticipated an increase in the cost of local industrial space if the present tight market does not ease up substantially.

▪ Indeed, besides snow, real estate was the big news in Chicago. Nine major new downtown buildings are nearing completion with at least two fully rented before the doors open up. Two more new buildings were announced in the fall. Chicago has been eating up office space in downtown Chicago at a rate exceeding 1,000,000 sq. ft. a year. The average cost for new office space in the Loop now runs around $15 per square foot.

The office boom has also hit the Chicago suburbs in a big way. The northwest suburban Schaumburg area, adjacent to the gigantic Woodfield Mall, now has 10 new buildings, with more than 100,000 sq. ft. each, under construction.

That market has also seen a boom in hotel construction with the latest being the new Hyatt Woodfield, a 476-room hotel now under construction.

Also announced this year are plans for a new Hilton Hotel in Chicago's Loop. It will replace the old Conrad Hilton on South Michigan Ave. That project, however, still has a number of hurdles involving federal funds to overcome before construction can begin.

▪ In residential construction, 1979 will go down as the year of the condominium. During the first half of the year, conversions of existing apartment buildings, especially along Chicago's lakefront, accelerated at a pace probably unmatched elsewhere in the U.S.

No one has exact figures, but condomania was probably best illustrated by the 2,600-unit conversion of Carl Sandburg Village on Chicago's Near North Side. It's touted as the nation's largest condominium conversion.

Indeed, conversions reached such a frantic pace that restrictive legislation became an issue in Chicago's mayoral campaign, although no lasting legislation was passed. Two suburban communities, Evanston and Oak Park, also experienced wholesale condominium conversions.

Everything came to a halt in the fall, however, with the implementation of the Federal Reserve's restrictive monetary policies and the dramatic jump in interest rates. Illinois financial institutions, restricted by a state usury law which kept mortgage rates around 11%, either stopped home mortgage lending altogether or required such large down payments as to make homebuying impossible for most citizens.

That was an abrupt change from earlier in the year when the city issued mortgage back revenue bonds which made it possible for city residents to borrow at rates around 8%. Chicago suburbs also issued similar mortgage bonds. Bell Federal Savings & Loan Assn., which keeps tabs on local housing permits, reported that single family permits dropped more than 50% during the second half of the year.

▪ The new mayor also changed many of the city's economic priorities while watching city bonds being downgraded by Standard & Poors. City employment was cut and she said she would allow the unionization of city employes and collective bargaining.

The mayor jettisoned the much criticized Crosstown Expressway and probably on the way out is a proposed new subway for the downtown. Those funds are supposed to be used for improvements in mass transit and new bus and subway cars. Remaining is the proposed extension of the El to Chicago's O'Hare Airport.

O'Hare, still the world's busiest airport, saw a minor bit of competition from the old Midway Airport on the city's Southwest Side. Midway is now the home of Midway Airlines, a new budget commuter airlines to several midwestern cities.

Airline congestion and severe parking problems still plague O'Hare. Relief may be in sight because the federal government announced it would sell its military facilities at the airport to the city. That means Chicago may see a new international terminal, and expanded domestic terminals, in the next five years.

▪ Although unfinished, the new $17,000,000 State St. Mall opened in October, just in time for the Christmas shopping season. John Colter, of the Chicago Assn. of Commerce and Industry, reports that Chicago is now No. 1 in retail sales of major metropolitan areas. His estimate runs around $31 billion in sales for 1978.

Gas lines appeared briefly in Illinois and the Chicago area with the result that passenger rail traffic increased between 6% and 7%. The Regional Transportation Authority has had little success in convincing local businesses to stagger working hours in order to get better utilization of existing transit facilities. Also, in November, the RTA upped commuter rail fares and Chicago subway and bus fares, by about 20%.

Industry was also angry at the jump in Illinois business income tax. The increase, from 4% to 6.85%, was to replace revenues lost by the elimination of the Illinois corporate personal property tax. Continental Illinois Bank has sued the state, arguing that Illinois now collects more revenue from the increased income tax than it did with the personal property tax.

▪ Chicago continues to be one of the biggest convention centers despite the poor weather. Reflecting the strong business, McCormick Place will be expanded by another 80,000 sq. ft. of exhibit space. That's in addition to Donnelley Hall, which added 360,000 sq. ft. of space to the complex in 1978.

With the increased exhibition space and the new hotels, Wayne Dunham of the Chicago Convention & Tourism Bureau expects Chicago to maintain and increase its position as the No. 1 convention city in the U.S. Convention, trade show and corporate meeting attendance hit 2,500,000 in 1979 up from 2,400,000 in 1978. Those attendees spent an estimated $588,800,000 in Chicago in 1979 up from $524,700,000 in 1978.

Mr. Dunham expects 1980 to be even better because Chicago has lined up some substantial new business. The American Mining Congress is coming to Chicago for the first time in 1980 and the Rotary and the Lions chose Chicago as their 1980 convention site after more than 10 years of avoiding the second city.

Cincinnati

Population	1,389,100
Rank	26th
Personal income	$1,002,300,000
Income '77 vs. '76	+11.06%

The national economic downturn doesn't seem to affect Cincinnati, where employment was up 6.6% by early fall, new businesses are opening and retail expansion continues.

The major employers in the Cincinnati market—the university and Procter & Gamble—are the types of businesses not usually affected by economic fluctuations.

Other major employers also are reported in a good position. According to David Pawn, research manager of the chamber of commerce, the General Electric Co. aircraft plant is in a good contract position as is Cincinnati Milacron, manufacturer of plastics, automobile parts and machinery. This company also is planning an expansion in Clermont County that will add 40,000 sq. ft. to the plant.

▪ Several large projects reported underway last year will be opening early in 1980. Ford Motor Co., for example, is planning a start-up date of March or April for its transmission plant in Clermont County that will employ 3,500 persons, mostly skilled workers.

The company sponsored several days of recruiting workers last summer and, according to business editor Bill Styles of the *Cincinnati Post*, "people flooded in from miles around."

Also opening early in 1980 is a Montgomery Ward's distribution center maintaining a target date of February. The warehousing operation is expected to employ 100 workers, mostly in unskilled categories.

Several of this year's developments point toward more upscale trends. On the cultural side, Michael Gielen, most recently of the Frankfurt Opera and the London BBC Symphony, was appointed music director of the Cincinnati Symphony.

He will begin his fulltime duties in the 1980-81 season, but will conduct two groups of concerts this season. The orchestra has undertaken a mail order campaign for both single ticket and season ticket sales.

▪ In retailing, a project designed to resemble San Francisco's Ghiradelli Square is under way in Cincinnati's Union Terminal. The station is said to be one of the country's finest examples of Art Deco architecture, and is listed in the National Historic Register.

Scheduled for a March opening, the complex will house a posh disco, fancy restaurants, F.A.O. Swartz and Loehman's clothing store, as well as many other retail establishments.

Saks Fifth Avenue, which has been talking for several years about moving into the area, still has not decided whether it will locate downtown or in a wealthy suburban neighborhood.

On the building front, several projects continue, including One Lytle Place, a 200-unit luxury apartment tower on the riverfront; Garfield Place, a 100-unit housing tower downtown, and the Atrium of the Fountain Square South project, where 80,000 sq. ft. of retail space will be available.

The downtown library is being expanded at a cost of $17,000,000, and the city continues to add to its skywalk system, which reported a great increase in foot traffic during the past year.

▪ As part of the Fountain Square South project, Western International has begun building a 450-room hotel to be called Cincinnati Plaza.

Shopping centers development continued on schedule as the Eastgate Mall, scheduled for a March, 1980 opening, added 45 retailers to anchors Sears and J. C. Penney. In northern Kentucky, the Crestview Mall recently saw the opening of its anchor—Mercantile's McAlpins—and will open the rest in 1980.

Last year, the city was excited about the foreign trade zoning that was still waiting for approval. This year, one of the two zones has begun to receive shipments. The chamber of commerce now is working on ways to market the benefits of the zones to area companies.

Cleveland

Population	1,938,900
Rank	17th
Personal income	$16,211,000,000
Income '77 vs. '76	+10.63%

The industry-lined, ship-crowded Cuyahoga River which twists through Cleveland is not expected to catch on fire again, as it did three times in 40 years, most recently in the mid-1960s.

The Cuyahoga's water, once blackened with flammable oil and chemicals, has been somewhat cleansed by new water-treatment plants of Republic Steel and other mills along the busy river. And, as the Environmental Protection Agency noted, some species of fish have returned, apparently no longer afraid of being smothered or boiled in oil.

Antipollution measures have washed the air, too, sharpening Cleveland's skyline, making it easier for city boosters to identify and admire the structures rising in a $200,000,000 construction boom in the heart of the city.

Far above Euclid Ave., ironworkers topped off the girders for the $60,000,000, 35-floor, block-long National City Bank Center, which will contain 780,000 sq. ft. for offices, 95% already leased before the center opens late next year.

At ground level, a 14,000 sq. ft. pedestrian mall at Cleveland's major intersection—Euclid Ave. and East Ninth St.—will await many of the 300,000 persons who are downtown each business day.

At another corner, a sunken garden and a restaurant with outdoor tables will be created in response to pleas that downtown Cleveland be given a touch of New York.

Just across Euclid, ground is to be broken for twin towers, estimated at $50,000,000, in another block-long development that eventually will cost $128,000,000 and devour Cleveland's only remaining downtown film palace, the 72-year-old Hippodrome Theater where, it is said, the high notes of Caruso once flaked gilt paint off the distant ceiling.

▪ Emerging in the same six-block district are a $7,000,000 headquarters for the Regional Transit Authority and a six-tier $3,000,000 parking structure that will provide space for street-level shops, including Julius fine men's wear—the first major retail development north of Euclid Ave. in more than a quarter-century.

The structure is adjacent to St. John's Cathedral, on land of the Cleveland Catholic diocese which it leased to bring income to the diocesan schools.

Also on the Catholic property, a 28-floor, $30,000,000 office tower will be erected by Detroit's Oliver Tyrone Corp., encouraged by the 98% occupancy of Cleveland's downtown office space.

In 10 years, more than $750,000,000 have been invested in downtown construction, including the recently opened 13-story, $26,000,000 State of Ohio regional office building, explains Virginia T. Felderman, information director, Greater Cleveland Growth Assn.

▪ Ms. Felderman says the almost-total occupancy of offices has been significantly influenced by the rapid growth of "business support services"—accounting and advertising, computer, research and development firms, public relations and the like. "We expect them to spread even faster here in the 1980s."

No single industry dominates Cleveland. It is not a mill town, not an auto town, not strictly a factory town. Of the 897,000 jobs in the area last year, only 30% were concentrated in manufacturing, Growth Assn. figures show. "That is probably the reason our unemployment runs consistently lower than the Ohio and U. S. rates," Ms. Felderman said.

Cleveland may be evolving into a new kind of city, said Richard Knight, a professor of urban economics at Cleveland State University, discussing his study of the 39 corporate headquarters in Cleveland, the third-largest concentration in the nation.

Mr. Knight found that although these corporations' manufacturing employment declined between 1962 and 1972, their worldwide sales trebled—to more than $15 billion.

▪ The amount these 39 corporations spent for "advanced services" also more than trebled—to $400,000,000—and $318,000,000 of it was spent in Cleveland.

"It has become evident," Mr. Knight said, "that Cleveland's future depends on whether the region will effectively compete with

(Continued on Page 32)

(Continued from Page 31)

other cities as a base for advanced services. The next five years are critical."

As to Cleveland's general economic health and its municipal debt problems, the Growth Assn. has this to say: "Behind the bold national headlines proclaiming the gravity of the City of Cleveland's default [first on $15,000,000 and later, about $12,000,000], there lies a generally untold story of a metropolitan area that is thriving economically.

"Cleveland's fiscal troubles are centered within the city limits and the political arena. Aside from that, the Cleveland picture is anything but bleak."

Warfare between the city government and the business and financial establishment overshadowed most perceptions of Cleveland in recent years. The defeat of populist mayor Dennis J. Kucinich brings to office a moderate who promises to bridge the gaps and give the city the kind of businesslike management which will earn the confidence of the industrial and financial community.

Columbus, O.

Population	1,088,900
Rank	35th
Personal income	$7,388,000,000
Income '77 vs. '76	+ 11.35%

Early in 1980, Columbus, O., will break a $300,000 advertising campaign in business, industrial and general publications under the headline, "Columbus—We're making it great." In 1979, there was plenty of activity to support that claim.

Construction totaling $20,000,000 is under way at the Busch Corporate Center, a new 155-acre industrial and commercial park, adjacent to the Anheuser-Busch Brewery on the city's northern rim. A subsidiary, Busch Properties, is the developer.

Ten buildings are occupied by 100 firms, including a $1,000,000 car-driving skill game called Malibu Grand Prix, operated by a subsidiary of Warner Communications.

When completed, the Busch center will provide 1,000,000 sq. ft. of business space. It will have a 310-room, $14,000,000 Marriott Inn for business visitors and for those hard-core football fans who roar down nearby Interstate 71 to see whether Ohio State has reverted to the three-yard-and-a-cloud-of-dust strategy of former Coach Woody Hayes.

■ On the city's western edge, the 500-acre, $18,000,000 Westbelt Business Park is being laid out and graded for construction sites. The developers, the Vantage Companies and Prudential Insurance Co., were reported ready to option an additional 800 acres there. Westbelt is near the interchange of Interstate 70 and bypass Interstate 270, a teeming hub for transportation from all points of the compass.

In the same area, the Sears Regional Distribution Center is doubling its capacity, adding 2,000,000 sq. ft. at a cost of $40,000,000—which is viewed as strong evidence that Columbus holds a strategic location.

Downtown, work is reported on schedule at the 28-acre, $67,000,000 Ohio Center of convention facilities and shops, and progressing as expected at the 16-acre Capitol South development. The projects, both on important High Street, will bracket the business area from the north and south.

For the Ohio Center project, Nationwide Insurance is proposing two major office towers, for investment purposes, and a hotel in addition to that project's future 600-room Hyatt Regency in which Nationwide is to be a limited partner. Although 7,000 hotel and motel rooms are listed in the area, convention promoters say rooms are "woefully scarce" downtown.

■ In Capitol South, Western International has taken an option to build a 400-room hotel. A local firm, Banning & Picket, has signed to erect two office buildings. The Highview Co. Development Group said that late this year it would start a nine-floor office building. Cost of the office structures is estimated at $40,000,000.

A peace pact involving $308,000,000 worth of current Columbus construction was announced by 30 management groups and labor unions. They call their convenant Operation MOST—"management and organized labor striving together"—and promise to avoid strikes and work stoppages.

Retail business is reported "soft." But worriers perked up when the Lazarus Co., seldom known to stub its toe, opened its downtown store on Sundays, putting it in step with the five Lazarus branch department stores.

In another act of faith, Lazarus took over the sites abandoned by three of Gamble-Skogmo's Buckeye Mart discount stores, and created three economy merchandise discount stores under the Lazarus Capri banner.

A retailer watcher said, "They are highly attractive basement budget stores set on top of the ground." They had to solve an early, enviable problem—keeping stock ahead of sales.

■ Unemployment in the area was 5.2% in August, up from 4.6% the year before, a rise partially caused by the demise of Federal Glass Co. and its 1,500 jobs. But Columbus stayed below the national jobless rate, 5.5%, and below the state rate of 6.9%.

In housing, a rising demand for rentals and increasing conversions to condominiums cut down the number of available apartments, triggering rent increases and encouraging multifamily structures. In August, Columbus builders started 388 units in multiple residences and 331 single-family residences, as total housing starts dropped 10%.

Condominiums make up 15% of the present housing market and by 1985 will account for 30%, the Columbus Board of Realtors reported. There is also a surge toward old but sturdy houses that are close to downtown.

"They give you more square feet for your dollar," said a chemist who bought and remodeled one, "and they free you of the cost and woe of commuting."

The back-to-the-city migration gains momentum from a renovation project which will brighten a dozen Columbus city blocks, involving 330 houses and 114 vacant lots—65% of the properties in a 100-acre zone touching the Victorian Neil Ave., just south of Ohio State University.

■ The properties, once purchased by the world-famous Battelle Memorial (research) Institute for a prospective but canceled expansion, are being reconditioned and sold under the guidance of a Battelle subsidiary, Olentangy Management Co., in a program that is said to be one of the largest residential renovations undertaken in this country by a private sponsor.

Battelle, a nonprofit charitable trust, provided $12,000,000 and the City of Columbus sought $3,000,000 from the Department of Housing and Urban Development for the residential revival. About 100 born-again houses have been sold to young singles, to corporation executives, Ohio State professors and the like, many of them deserting suburbs for the central city.

A major contributor to the community's cash flow is Ohio State University. To function this year, it will spend $400,000,000, up 8%. Its students will spend $100,000,000 to live and eat and enjoy.

Its spectator sports will yield $9,700,000, a 2% increase, to be used in the athletic department's varsity and intramural programs. Furthermore, football fans attending the home games lay out an estimated $2,300,000 for meals, drinks and lodging.

Elsewhere in the market, Warner Cable Corp.'s two-way cable tv station Qube installed a satellite receiver and arranged to get the signals of WOR-TV in New York, WGN-TV in Chicago and KTTV in Los Angeles.

In another step, Qube is offering its subscribers a service to combat burglary. Qube installs a home terminal that is connected to a central computer, and which—when activated—makes a sweep of the home every 10 seconds to determine if it has been entered.

Dayton

Population	834,200
Rank	45th
Personal income	$6,045,000,000
Income '77 vs. '76	+ 10.49%

No one could blame Daytonians for becoming dejected over the ills that befell their economy during 1979.

Early in the year, General Motors sold its Frigidaire division to White Consolidated, with the bulk of Frigidaire's 6,800 Dayton-area jobs expected to be transferred out of the area. As the year progressed, the summer's lagging auto sales caused significant layoffs at GM's Dayton operations.

As GM reacted to a sluggish market, so local tool and die companies reacted to GM's cutbacks—and the effects were passed on to other segments of the Dayton economy that depend upon these two industries.

Not surprisingly, Dayton's unemployment rate shot up to almost 9% this August, as compared with about 5.5% in 1978.

■ Disturbing as these developments were, upbeat forecasts for the city's economic future helped balance the picture.

The loss of the Frigidaire jobs was offset somewhat by White Consolidated's decision to make Dayton a major headquarters for its appliance operations, an action that will keep about 600 jobs in the Dayton area.

Even more encouraging was news that GM plans to convert the former Frigidaire plant into a facility to manufacture light trucks and diesel engines, a decision that is expected to add approximately 4,500 jobs when the plant opens in the spring of 1981.

Also encouraging is the fact that construction of the long-delayed Arcade renovation project is nearing completion.

Located across the street from the successful Courthouse Square urban renewal project, the one-block downtown area includes five buildings on the National Registry of Historic Places. When renovation is completed in early 1980, the Arcade will house a variety of small specialty shops.

■ The Courthouse Square and Arcade projects are part of a long-term effort to revitalize Dayton's downtown area. In the last decade, some 40 buildings—including the 29-story Winters Bank Bldg., 26-floor Mead Co. world headquarters and the new county administration and federal office buildings—have gone up in the downtown area.

The downtown retail trade has been helped significantly by this construction, but Dayton planners still are dismayed by the lack of residential construction in the downtown area.

Downtown is not the only part of Dayton getting a facelift. During 1979 a large plot of land owned by NCR Corp. also received urban renewal designation from the city.

The property tax abatement that goes along with the urban renewal designation will facilitate development of the land and the plans agreed upon by the city and NCR includes office, parking and hotel developments. Negotiations currently are under way among the city, NCR and representatives of Marriott hotels.

■ Should Marriott decide to build a hotel on NCR land, it will help keep the hotel trade among the fastest growing segments of the Dayton economy. The Dayton Inn, which underwent a $3,500,000 renovation in 1979, was to reopen as a first-class, luxury hotel by the end of the year.

The profitable, three-year-old Stouffers—which is part of a complex that includes a 70,000-sq.-ft. convention center and a 1,500-car garage, surrounded by a city park—continued to do strong meeting and convention trade in 1979.

From 100 to 125 rooms and a 10,000-sq.-ft. ballroom may be added to the complex during 1980.

Detroit

Population	4,286,400
Rank	5th
Personal income	$37,300,000,000
Income '77 vs. '76	+ 12.96%

"Detroit's continued rebirth is not assured," says Henry Ford II, chairman of Ford Motor Co., and a major mover in the showpiece Renaissance Center. "We can't rest on recent successes. In today's economic climate, they're fragile".

Just how fragile Detroit's comeback can be and how dependent on the prosperity of its major automotive employers surfaced dramatically when Chrysler ran into financial trouble and appealed for help this fall. Labor and industry representatives warned that the Motor City would strip its economic gears if Chrysler was allowed to go under.

"To understand what would happen in Detroit, you must imagine a city without the financial means of providing even the most basic services, much less the special needs of a community with depression level unemployment," testified Douglas A. Fraser, president of the United Automobile Workers.

"You must imagine a city without one of its largest taxpayers. And you must understand that there would be a wholly disproportionate and unfair impact on blacks who comprise a remarkably high percentage of the Chrysler work force," he told Congress.

■ A Department of Transportation study echoed the morose response to a Chrysler shutdown, saying the impact could cause a regional depression.

"Volatile auto economics have always had a strong effect here [in Detroit], but this situation is different because it means a permanent loss of the production base. A shutdown could shoot unemployment rates from 8.7% to 16% to 19% immediately recreating the depths of the past recession . . . as a permanent change.

"One needs no strong reminder of previous social unrest in the Detroit area.

And Detroit would get little benefit from production picked up by General Motors and Ford, the report contended. "Even if workers could be reemployed elsewhere, the downtown area of Detroit would be left empty."

■ The Chrysler crisis hits Detroit at a time when things seemed to be moving again. In the same speech in which Mr. Ford was warning that the gains are "fragile," he went on to say that "the city has rounded the corner toward a thorough revival."

That view was mirrored in a survey commissioned for New Detroit, the urban coalition formed after the 1967 riots.

The survey found that nearly two-thirds of the tri-county area residents believed race relations have improved "at least somewhat." Race relations are no longer mentioned as one of the city's major headaches. Crime is now regarded as the biggest problem, with unemployment a fast-rising second, even without a Chrysler shutdown.

The New Detroit research study said the city has experienced a "rebirth of pride in its people and its buildings." Although that feeling of optimism has leveled off among city blacks, suburban optimism rose to nearly the same level as Detroit's.

■ The five riverfront towers of the Renaissance Center are the most visible symbols of the comeback. And then there is Rockefeller Center Inc.'s Ren Cen II, a pair of 21-story high office buildings, a $75,000,000 addition to the original.

"Even Chrysler's storm clouds will not make enough of an impact to break the tempo of the Renaissance Center and the rebirth of Detroit," said Rockefeller Center Inc.'s president Alton G. Marshall.

Growth is enormous. The $225,000,000 Cadillac Square Shopping Center, downtown, is anchored by Hudson's Department store. The $26,500,000 Joe Louis sports and convention arena is nearing completion. It will seat 20,000 as well as housing the hockey Red Wings.

The *Detroit Free Press* has completed a $45,000,000 riverfront printing plant, while the downtown Radisson Cadillac hotel has undergone a $6,000,000 facelift with a 2,500-unit apartment complex planned next door.

GM is helping finance development of a $20,000,000 model residential-commercial neighborhood around its headquarters and the Philip A. Hart Plaza, scene of ethnic festivals, has been completed for $22,000,000.

■ The Washington Boulevard Mall is still unfinished, although the restored trolley line is in operation. Unfinished structural steel gives the street the appearance of a Chicago Loop elevated train line.

Parke-Davis will phase out its Detroit pharmaceutical plant and a plan to phase in a Detroit subway has stalled. The subway pits Mayor Coleman Young against the suburbs and the whole thing now goes to public hearings.

But there's no lack of new plans. Corine Gilb, the new director of the city department of planning, foresees making Detroit a free trade zone (lowering import duties), a tramway over the Detroit river to Windsor, Ontario, and a lessening dependance on the auto industry with increased emphasis on service for tourists, conventions and financial services.

■ Detroit has done pretty well on big events, too. It landed the 1980 National Republican Convention as well as the 1982 pro football Super Bowl to be played in neighboring Pontiac.

Mrs. Gilb also sees a return to

city living as commuting costs increase. Although last summer's gas shortage caused some lines in Detroit and stations went on shorter hours, Detroit motorists have a reserve supply of gas in Windsor, just across the river by bridge or tunnel.

Unlike some other major cities, there's little conflict between Detroit area interests and those outstate. "If we fail to assist Detroit in becoming more prosperous, then every other part of the state would suffer," said Republican Gov. William Milliken.

Democratic Mayor Coleman Young said, "Detroit is the state's core city. There's no such thing as an affluent and successful state if Detroit slides off the map."

Flint, Mich.

Population	521,300
Rank	74th
Personal income	$4,153,000,000
Income '77 vs. '76	+14.98%

Flint, a working man's town, is getting some fancy vittles in its civic lunch bucket. And in a land of automotive nuts and bolts, this includes an Archimedes screw.

It's all part of Riverbank Park, a $14,000,000 flood control project on the Flint River that turned into a beautification effort as well.

The Archimedes screw, an apparatus for raising water levels with an elongated screw in a conduit, is part of the decoration in the park, which includes islands, a walk-around waterfall, moats and market stalls. Concerts have been performed on an island amphitheater with the audience a moat away. A fish ladder is being provided to allow newly introduced salmon to run.

■ The park is one segment of Flint's Riverfront Center, which is being developed through the Flint Area Conference, a nonprofit corporation. Work on a 400-room Hyatt Regency hotel began this fall with a 35,000-sq.-ft. convention hall. Plans are being drawn for a 100,000-sq.-ft. office building nearby and a 70,000-sq.-ft. state office building will be going up. The $30,100,000 hotel will rise 16 stories and have a brick and glass facade, differing from the usual Hyatt glass towers.

A $6,000,000 University of Michigan-Flint fieldhouse will start this spring and a classroom-science building is planned. A $6,450,000 student center opened this fall.

A Flint Area Conference official said one project made another possible. "Hyatt came here because of the Riverfront Center," she said. "They could see it. There is nothing like construction to change viewpoints immediately."

Construction continues elsewhere. River Village, four blocks to the north, combines housing for the elderly and families in highrises and townhouses. Windmills pump water through man-made stream beds. Hurley Medical Center plans a $17,000,000 wing on the hospital and has finished a nine-story, $13,500,000 patient care tower. A medical office building is going up, and a bank will build a 10-story building next to the Hyatt.

Retail activity downtown isn't keeping pace, and there's an admitted need to revitalize stores there. The Genesee Valley Mall has added a new wing with J.C. Penney Co. as the anchor, but developers of a suburban Burton shopping center are running into zoning problems.

■ But Flint still is a company town and that company is General Motors Corp., whose Flint operations make up the largest concentration of GM plants anywhere. GM accounts for 77,000 jobs out of 225,000 (government is second), and it too is expanding in Flint with a $12,000,000 addition to the AC Sparkplug engineering building; a $2,000,000 air cleaner warehouse; a nearly $3,000,000 waste treatment plant; a Chevrolet small engine plant covering 115,000 sq. ft., and a $3,500,000 Buick engine plant for V-6s.

■ The energy crunch hasn't really hit Flint hard—there were no gas lines earlier this year. But the slowdown in car sales—particularly among big cars and light trucks—hurt employment at Buick and Chevrolet truck.

In August, 3,500 GM workers were on indefinite layoff, although that was reduced to 2,800 by the time 1980 models started to roll. Unemployment was a high 12.3% in August, and production workers' pay shrank from an average of $430 a week earlier to $375, and hours dipped from 44 a week to 39.

A sharper impact on the economy came from the threat of an autoworkers strike, which prompted workers to pull back and save money against a work stoppage. But GM and the union settled, and retail activity started to pick up in the fall, although it was below last year's levels.

■ Despite the strike threat, Flint still was a GM town when it came to buying vehicles. In July, nearly 82% of all cars bore GM marques, with Buicks accounting for 21.8% of the market. Chevy and GMC trucks took 71% of the light truck market.

The gas shortage did not deter Flint residents from taking their usual recreation—going to northern Michigan to hunt, fish and drive snowmobiles. Genesee County has the highest snowmobile registration in Michigan and about 55% of adults fish, 44% camp and 35% ride bicycles.

Gary-Hammond-East Chicago

Income '77 vs. '76	+12.92%

Even though the steel industry which is the backbone of the city's economy had its problems in 1979, Gary officials found a great deal to be happy about.

After years of comparatively unsuccessful efforts to revitalize the city's downtown area, a number of programs seem to have jelled in the last year. One of the first bits of good news was the reopening of the 13-story, 300-room Sheraton Inn in late 1978, the closing of which a couple of years ago had devastated the community.

Not long afterwards came even better news—availability of funds for the long-awaited $12,700,000 civic center was confirmed, and word was received that funding for the 30,000-sq.-ft. Civil Rights Hall of Fame that was to adjoin the center would be forthcoming as well.

In addition, Congress approved $25,000,000 for two new Gary exits on the Indiana Toll Road—a development that will help the civic center and downtown Gary by providing them with convenient connections to the limited-access highway—and city planners were assured that funds for a multimodal transportation center for buses, cabs and the South Shore Railroad terminal would be available.

(Continued from Page 33)

The plans for the 142,000 sq. ft. 12,000 seat sports-culture-entertainment-convention center and the improved transportation facilities were credited by city officials as helping to trigger a number of private commitments to the downtown area.

These include a $5,000,000 U.S. Steel office building, a $1,200,000 renovation by Gary National Bank and a $2,500,000 Wendell Campbell Associates office building.

The city has agreed to make public improvements such as off-street parking, street trees, new curbs and sidewalks, planters and urban art forms, while merchants have agreed to dress up their properties.

Negotiations are also under way with a developer regarding construction of a 300,000-sq.-ft. enclosed shopping mall for the downtown area.

More good news was forthcoming from Gary Municipal airport, which was chosen for upgrading by the Federal Aviation Authority in order to ease the load on Chicago's O'Hare International Airport, the world's busiest.

Initially, the airport will be expanded to attract more private and business flights and some commuter service, and city officials hope that secondary and trunk lines will eventually use the facility. A major industrial park is also planned for development on land adjacent to the airport.

- Despite the progress, the problems are far from solved. The Gary-Hammond-East Chicago area still suffers from a lack of industrial diversification and remains prey to the severe fluctuations that can occur in its primary metals industries. The prospects for ameliorating this dependence are not very good, especially since the area lacks large parcels of land for new industries.

The emphasis on heavy industries also has caused significant air pollution problems for the area, and the region still has not met federal air quality standards. According to an Environmental Protection Agency official if the standards are not met, the agency may go so far as to ban any major industrial development that might be a source of further pollution.

The flight from the SMSA's central business districts has helped fuel growth in outlying areas, with the Merrillville area in the south having captured much of the retail and office business.

Home of the giant Southlake Mall, Prudential's Midwest regional headquarters, and an eight-story "branch" of the Gary National Bank, the Merrillville area has attracted many smaller office and retail developments as well.

- Merrillville officials are especially enthusiastic about the Admiral Convention Center and Holiday Plaza that is currently under construction.

This project will include a 100-room expansion of the existing 249-room Holiday Inn; a 13,000 sq. ft. convention center; a Holidome providing year-round recreation with a swimming pool, whirlpool and putting green, and a $5,500,00, 3,100-seat performing arts theater that will feature Las Vegas-type entertainment by such stars as Donna Summer, Mitzi Gaynor, Bill Cosby and Frank Sinatra.

Grand Rapids, Mich.

Population	**585,100**
Rank	**69th**
Personal income	**$4,016,000,000**
Income '77 vs. '76	**+12.97%**

"Were there any survivors?" asked comedian Red Skelton after he saw downtown Grand Rapids where an estimated $130,000,000 is being spent on renewal.

Construction, demolition and remodeling along the banks of the Grand River reached a point last summer where only one bus line could run downtown. If the area resembled a battlefield, it's because that's what it is, a fight against urban decay.

"The majority of the money is being raised privately and locally with some federal funding, so this is strictly a bootstrap operation," said Anthony Jarrett, vp of economic development for the Grand Rapids Area Chamber of Commerce.

Typically, Grand Rapids started to work first and only in September established the kind of umbrella organization many cities start with.

- By that time, the list of projects totaled 35, ranging from a pub to a complete refurbishing of the old Pantlind Hotel for $10,000,000. The Pantlind is a good example of how things are done in the erstwhile "Furniture City."

Amway Corp., the direct selling company headquartered in suburban Ada, bought the old hotel, held a "garage sale" of the old furnishings (including a bed slept in by President Ford, a native son) and modernization started. Amway also plans a second hotel nearby that will come in at $22,000,000.

Amway itself was caught in the snowball effect and bought a 487-acre tract for future development in the suburbs. General Motors broke ground for a 250,000 sq. ft. diesel component plant in Coopersville, 18 miles west of Grand Rapids, that will provide 1,500 jobs.

Part of the area's attraction for business is the "work ethic" and a lot of nonunion help. The median family income is $19,370 and unemployment is 5.2%—both low figures for Michigan.

- But it is the river banks where Grand Rapids was founded 150 years ago that is the magnet. Construction is under way on a $21,000,000 civic center complex that will include a new exhibit hall and 2,310-seat performing arts center for the Grand Rapids Symphony orchestra, the Symphonic Choir, the Opera Association of Western Michigan and the Grand Rapids Civic Ballet.

Across the river will stand the new Gerald R. Ford Presidential Museum, a $6,000,000 project hard by the Ah-Nab-Awen Bicentennial Park that was an earlier effort at restoration.

The Art Museum will move into the old Federal Building next year. A few blocks from Calder Plaza (home of the orange steel sculpture La Grand Vitesse and the scene of summer festivals), Butterworth Hospital is building a $28,000,000 addition.

Monroe Center, a pedestrian mall, right now is $4,700,000 worth of the kind of construction tie-up Mr. Skelton referred to and the kind of disruption that threatens convention dates that pump $18,000,000 a year into the economy.

Downtown is the site of a 15.5-mile footrace that this year drew 2,600 contestants. In another event, some 500 rafts were entered in the 10th annual raft race that drew 25,000 spectators.

- Recreational leagues abound—sports is a family affair in Grand Rapids. The minor league hockey team, the Grand Rapids Owls, last year drew 3,000 persons on average to its matches, up about 300 from the previous year.

Hunting, fishing, sailing and skiing are favorite diversions. Lake Michigan is 30 miles away. Residents still fish in the downtown Grand River on lunch breaks.

The energy crunch didn't slow things down at all. Residents recall the "three days in June" when they had to shop for gas. There's been plenty of natural gas and oil for home and industry. The chamber of commerce even took out ads in trade publications saying so.

Indianapolis

Population	**1,156,200**
Rank	**32nd**
Personal income	**$8,650,000,000**
Income '77 vs. '76	**+11.24%**

When it comes to drumming up convention business, Indianapolis' city fathers want potential conventioneers to know that "there's a lot more here than just a 500 race."

Since the Convention & Visitors Bureau began using its multimedia traveling exhibit last year, convention business is up 143%, with more than 500 conventions drawing 500,000 people.

With a promotion budget of more than $500,000—up from the $150,000 budget of a year ago—the convention bureau is also promoting Indianapolis' attractions in business publications, brochures and direct mailings.

Next March, Indianapolis will host the NCAA basketball tournament at its Market Square arena. It is bidding for the World University Games for 1981, an event involving teams from 100 countries which has never been held in the U.S.

- At present, Indianapolis has an inventory of 12,000 hotel rooms. It remains anxious to revitalize an aborted downtown project which would add 300 to 350 more rooms. Radisson Hotels initiated the project, but withdrew. Sheraton is the city's best hope at present.

The stage is set for the "tallest skyscraper in the city" competition now that construction on the American United Life Insurance building is under way. The 37-story 1,250,000-sq.-ft. headquarter building, a $40,000,000 to $50,000,000 investment is scheduled for completion in mid-1981. The company will occupy about half of the building and the rest will be office rental space—a rare commodity in the downtown area.

Meanwhile, the American National Bank is drawing up plans for a 40 to 45-story, 1,500,000-sq.-ft. building scheduled for groundbreaking when the American United Life building is finished.

Currently the Indiana National Bank building takes honors as Indianapolis' tallest building with 35 stories.

- The downtown area that new office buildings are helping to revitalize, retail sales are off slightly, still unable to catch up with the surrounding shopping malls that have sprung up around the city.

But a downtown shopping mall concept is currently being discussed with a local shopping center developer as a tool to perk up the downtown business.

The U.S. Tennis Assn. is moving into its new headquarters into the newly constructed Indianapolis Sports Complex on the White River. A White River Commission, supported by $10,000,000 in seed money from the state and $5,000,000 from the Lilly Endowment, ponders future development in the adjacent area. Among the possibilities: A stadium as home field for a yet-to-be secured National Football League franchise. Or a Disney theme park.

Indiana University-Purdue University at Indianapolis continues to pump out expansions with new facilities to house the school of business and school of environmental and public affairs under way and a request to the state for $4,500,000 to expand the medical complexes.

- The housing market that was robust just a short time ago has turned down with few new starts. And condominium fever that Indianapolis long avoided, has finally been contacted, especially in the resale market.

Although the latest employment figures show unemployment just over 6%, Indianapolis' two Chrysler plants employ 4,300 workers—many already laid off. The other auto makers also are significant employers so a deep recession coupled with more lay-offs could have widespread repercussions.

What already has changed is the airline service to Indianapolis International Airport as a result of deregulation. There has been some curtailment of service from Indianapolis to nearby intermediary cities such as Columbus, St. Louis, Chicago, Detroit and Cleveland. Some schedules have been dumped completely, such as TWA flights to Columbus.

Concerned with how the reduced service is affecting the business traveler, the city plans a stronger marketing campaign. For the long-term, the city is looking for short-range aircraft and the development of a commuter service to pick up the slack dropped by the major airlines.

The long term industrial outlook, should benefit from the Advance Wastewater Treatment Facility now under construction, a $300,000,000 project funded 80% by a federal grant, with the remainder split between the state and the city. As the largest construction project in central Indiana the facility will assure ample supplies of treated water once it is operational in 1981.

Lansing, Mich.

Population	**457,700**
Rank	**84th**
Personal income	**$3,219,000,000**
Income '77 vs. '76	**+12.83%**

Michigan's state capital keeps changing as the central business district tries to keep pace with suburban commercial growth.

With changes and additions in commerce and industry, mid-year regional employment reached a new record level of 226,100—with advances in construction, manufacturing, trade, services and agriculture.

Recent construction includes a downtown mall, scheduled to be completed in late fall, and the 44,000,000 twin towers of the state department of education, which recently broke ground.

The City of Lansing's plans for the central business district include a $3,000,000 bus transportation center, a $4,000,000 exhibition hall, a $21,000,000 arena with 18,000 seats and a new $10,000,000 police facility.

The Plaza Hotel converted 150 rooms to accommodate commercial tenants and a local law firm converted a vacant downtown building to office space. In addition, Lansing Community College is expanding and the four-story Reed & Reed building, called the World Trade Center, is under construction.

Housing developments in Lansing's center city include a $9,600,000 complex, containing 278 units, that is adjacent to the new Riverfront Park. The $26,000,000 Capitol Commons, a 600-unit project, is awaiting approval.

- J. L. Hudson, a department store owned by Dayton-Hudson, opened a new 100,000 sq. ft. store in Lansing Mall and is trying to win approval for a store or mall constructed between Lansing and East Lansing. But a recent referendum on the question was voted down, reportedly due to a large turnout by Michigan State University students.

The schism between Lansing residents and students apparently is so deep that, earlier this fall, East Lansing homeowners sponsored a petition to de-annex the MSU campus from the city, making it part of Lansing and Meridian townships. But supporters of the de-annexation drive failed to get enough signatures to place the issue on the ballot and the board of commissioners of Ingham County rejected the petition.

Nonetheless, J. L. Hudson plans to proceed with plans for another, perhaps smaller, store. According to Ray Steeb, executive director of Lansing's metropolitan development authority, "They have made some changes and tried to quell objections voters had [to the plan]."

On Nov. 6, East Lansing voters approved the J. L. Hudson plan by a large margin. On Nov. 8, the East Lansing City Council approved rezoning Hudson's property for the project, permitting business, residential or commercial use.

- City hall figures show fuel consumption for cars and home heating is down, and the city is actively promoting energy conservation.

Though electric power capacity seems adequate through 1985, the municipally operated board of water and light urges businesses, industries and home owners to use power efficiently. Its consulting service is promoted via direct mail, newspaper and radio.

Airport, bus and rail traffic is up, and hotel room bookings during the summer of 1979 were 28%

(Continued on Page 36)

100 MARKETS

(Continued from Page 34)

ahead of 1978. The increase is attributed to business meetings that took advantage of mass transit facilities, and responded to the good news that the civic center is now air conditioned.

Major conventions held this year included the U.S. Cheerleading Assn., which drew some 3,000; the Unitarian-Universalist Assn., which drew 1,600; the National Oldsmobile Car Club with 500 afficionados from all over the world who got a glimpse of the R.E. Olds Museum, which is scheduled to open officially next year with 30 to 50 antique Olds and Reo trucks and periodic traveling exhibits.

- To accommodate the influx, new hotels are being built—such as the 100-room Motel Six, the 100-room Knights Inn and Midway Motor Lodge and Hoffman House Restaurant—and existing facilities, such as the Hilton Inn, are adding 100 rooms.

Tax incentive legislation continues to encourage growth. Oldsmobile division of General Motors had its highest sales in history and a new $200,000,000 diesel engine plant is under construction in Delta Township, with plans for 1,600 new jobs following on the heels of a new Cutlass plant and GM parts facility just completed.

The local Fisher Body plant, one of the largest facilities of its kind in the world, completed a 780,000 sq. ft. addition with more construction to be announced soon, according to city officials.

Motor Wheel Corp., the area's third largest industrial employer, is constructing a $3,000,000 wastewater treatment plant, while other improvements by the city, state and federal government—totaling $5,100,000—are planned.

Milwaukee

Population	1,417,200
Rank	24th
Personal income	$11,282,000,000
Income '77 vs. '76	+11.47%

While the nation was reporting generally flat economic indicators in late summer, the four-county Milwaukee metropolitan area posted a 3.3% gain in employment in August, setting a new record for the fifth month in a row, and a 3.4% August unemployment rate, down from 4.2% in August, 1978. The seasonally adjusted rate of 3.7% was far below the national rate of 6%.

Despite high interest rates, mortgages in August advanced to the second highest level in 10 years. While new dwelling unit permits were off 50% in July, total construction contracts that month were up 30% from the year before.

Through the first eight months of 1978, 10 of 15 economic indicators compiled by the Metropolitan Milwaukee Assn. of Commerce improved over the first eight months of 1978.

- Manpower Inc., the Milwaukee-based international temporary help company that monitors hiring plans, found that about 30% of the employers in the area plan to add new workers during the final quarter of 1979, compared with 31% the year before.

If hard statistics don't dissuade skeptics, there is brick and mortar evidence of economic strength. The Hyatt Regency hotel, the first major redevelopment effort in downtown Milwaukee, is running ahead of schedule and expects to open in September, 1980.

The Hyatt is expected to bring a surge of convention business to the city, which has had a severe shortage of first class hotel rooms. It also is expected to spark new public and private projects downtown, including a four-block mall, another hotel and a new federal office building.

Port of Milwaukee leaders also are mapping expansion programs, partly because of the growing export business of Milwaukee manufacturers and partly because of the misfortunes of the ports of Chicago and Duluth-Superior.

- With the dollar situation improving the competitiveness of Milwaukee-made machines overseas, many manufacturers are expected to shift their focuses overseas if the domestic market slows. They will be assisted in their efforts by the Milwaukee Foreign Trade Zone, which is currently constructing its first manufacturing building.

The director of the Port of Milwaukee last spring advanced the idea of a new grain terminal building, a project which advanced to center stage in the summer when grain handlers struck the ports of Chicago and Duluth-Superior. Trucks, which normally loaded in the struck ports, lined up 75 deep in Milwaukee, and ships queued up waiting to take on the cargo.

Creating instability in the industrial transportation picture has been the continuing financial problems of midwestern railroads. But even in the case of the troubled Milwaukee Road, solutions to the line's financial problems seem to give priority to southeastern Wisconsin over unprofitable western routes.

Airline deregulation, which resulted in some lines pulling out of metropolitan areas, has been a boon to Milwaukee's Mitchell Field. Hughes Air West, Western Airlines and Braniff have come into Milwaukee since deregulation, supporting the thesis that Milwaukee has the potential to be an alternate to Chicago's overcrowded O'Hare field.

In August, according to the Assn. of Commerce, 334,692 persons passed through Mitchell Field's metal detectors, up 25.5% from 12 months earlier.

Retail business in the Milwaukee area appeared to be flashing a caution light in early fall, which is not surprising considering the continuing inflation. Credit bureau reports in August rose only fractionally from the year before.

There must have been some continuing strength on the retail side, however. Sears, Roebuck & Co. chose Milwaukee as the first test market in which it would accept Visa and Master Charge cards. That experiment began in July and by early fall was the subject of extensive advertising.

Milwaukee area residents apparently have stepped up their spending for leisure activities this year. An increasing variety of sporting and cultural events have been highly successful, perhaps because the high price of gasoline has kept residents closer to home.

- The Milwaukee Brewers did not disappoint the more than 1,900,000 fans that trooped to their games. The turnout, highest since 1958 when the Milwaukee Braves were reigning world champions, saw the Brewers finish second in the strong Eastern Division of the American League.

Hopes for the resurgence of the Milwaukee Bucks are expected to fill the Milwaukee Arena this fall. Sidney Moncrief, high scoring guard from the University of Arkansas, is counted on to bolster the already strong National Basketball Assn. entry.

On the negative side of the sports ledger, both the Green Bay Packers and University of Wisconsin

When a man's into skiing,

What a man does with his leisure time tells you a lot about how he spends the rest of his time. What he surrounds himself with. How he socializes. The places he travels.

Take Ziff-Davis Network men.

Whether they're *schussing* down a mountain slope, or perfecting a technique which lets them maneuver a tricky inlet or challenge the open sky…their intense involvement is a natural outgrowth of their need to enjoy the best that life has to offer.

These are men who take pride in their performance. Who take pride in themselves—in everything they do—in every product they buy.

For example, if you bought Skiing, Boating and Popular Photography you'd get a greater concentration of men who participated in one or more sports activities in the past year, drank imported wine in the past month or used a hair conditioner 4 or more times a week than Playboy, Newsweek, Time, Sport, Penthouse, Sports Illustrated, or U.S. News.

To reach these upscale customers, the Network offers 99 combinations of three or more magazines with a total audience of 10 million men° who have what it takes to buy what you're selling: 72% are

football teams are off to dismal starts. Still, near capacity crowds flock to the games in Milwaukee, Green Bay and Madison.

Toledo

Population	**775,800**
Rank	**53rd**
Personal income	**$5,684,000,000**
Income '77 vs. '76	**+10.69%**

Toledo seems content with its long and prosperous relationship to its industries, notably the automotive and glass-making plants.

But, while keeping old friends, Toledo is hoping to make some new ones—principally, the services industries that help business to function.

▪ "It has been years since a major new industrial plant located in Toledo, and prospects for one do not look encouraging" according to an economist for the city's Port Lawrence Title & Trust Co.

"Law and accounting," he continued, "and other specialized business-support services are growing impressively here, a healthy sign that our economy will diversify. The service sector is booming and creating additional incentives for investment in downtown Toledo."

Headlines say that a downtown rebirth is assured. Skeptics are invited to look at the scenario and the steam shovels.

▪ A huge cavity near Toledo's heart holds the piers on which Owens-Illinois is erecting a new world headquarters, a $94,600,000 building of 29 floors and 875,000 sq. ft., more than twice the space in the present Owens-Illinois building.

The tower will anchor a corner of a 14.5-acre development named SeaGate Center. The second SeaGate settler will be Toledo Trust Co., which broke ground in October for a $10,000,000 building.

In April, the State of Ohio will start a $50,000,000 building to anchor a corner of SeaGate and house state branch offices. Additional space will be leased to Toledo municipal and Lucas County governmental divisions.

A short boulevard will be created on Jackson St. A parking facility for 1,200 cars—enclosed parking for 700—will be provided. Fifteen drab acres along the nearby Maumee River will be transformed into a decorative park.

These improvements are being financed by a federal Urban Development Action Grant of $12,000,000—an investment expected to attract additional investors.

Other indications of downtown revival are obvious. All the Class A buildings in the central business district are 100% occupied. The 100,000 sq. ft. building abandoned by the Lamson department store has been remodeled and named One Lake Erie Center. Its upper four floors are for offices and its ground floor is reserved for specialty shops and a restaurant.

The old is blended with the new in a development called Fort Industry Square, which includes more than a score of row-type buildings erected before 1900.

These are being repaired and groomed to hold offices, boutiques and a restaurant of Gay '90s decor.

In addition, several Toledo investors are taking over and refurbishing a 250-room downtown Holiday Inn.

▪ An important reason for the downtown resurgence, according to the Title & Trust economist, "is a growing comprehension that the downtown acts as a central marketplace serving the human need to congregate. The accidental personal contacts we make on downtown sidewalks, almost every day, often generate productive and important business discussions."

Furthermore, the growing downtown corps of the business-support people, by their diversity, will tend to keep employment stable, said Edward J. Schulte, research director for the Toledo Area Chamber of Commerce.

For economic momentum, however, Toledo still depends heavily on the seven of the "Fortune 500" companies based in the city—three glass manufacturers (Owens-Illinois, Libby-Owens-Ford, Owens-Corning Fiberglas) and four automotive parts and equipment companies (Champion Spark Plug Co., Dana Corp., Questor Corp. and Sheller-Globe Corp.) employing a total of 21,000.

Furthermore, American Motors, Chrysler, Ford and General Motors operate Toledo plants producing original and replacement equipment and employing 14,000. Their payrolls might shrink quickly, however, if a gasoline crisis causes car sales to drop dramatically.

▪ In the first half of 1979, total Toledo employment averaged 307,329 jobs a month, up 3.3% from the first half of 1978. Manufacturing employment increased only 1.8%.

With its 1,000-some companies, Toledo is said to have the most diversified industrial base in Ohio. No company in Toledo employs more than 3% of the total work force. This spread of jobs is said to cushion Toledo from capricious dips in the economy and from work stoppages.

When it is free of problems and operating, a new nuclear power plant east of the city—jointly owned by Toledo Edison Co. and a Cleveland utility—has provided as much as 35% of the electricity used in Toledo. The plant is scheduled to expand.

At Toldeo's airport, deregulation was welcomed, as five additional airlines, including TWA, Air Florida and Air Wisconsin, came in quickly, ostensibly to test the market in which only four lines operated previously.

"We may frown later, when and if a shake-out comes," an official said.

Youngstown-Warren, O.

Population	**543,800**
Rank	**72nd**
Personal income	**$3,804,000,000**
Income '77 vs. '76	**+10.52%**

Youngstown in the past year continued its recovery from the sharp economic jolt it received two years ago when Lykes Corp. shut down its Campbell steelworks, throwing 4,000 out of work.

Unemployment in the Youngstown-Warren area, which peaked at 9% in March, 1978, hovered around the 7% level for the past 12 months, as most of the laid off steelworkers managed to find employment with other major employers who continue to expand in the Mahoning Valley—General Motors (Packard Electric division), Republic Steel and Copperweld Steel.

And further relief may be on the horizon: Commuter Aircraft Corp. executives announced this past summer that the company will build a $60,000,000 plant to produce the CAC-100, a 44-passenger prop-jet commuter aircraft.

Construction of the 250,000 sq. ft. assembly plant that will provide up to 1,500 new jobs could begin in 1980 if federal grant requests are approved. The plant, to be built on

a 90-acre site adjacent to the Youngstown Municipal airport, could be completed by the end of 1981.

■ Other industrial operations have contributed to the recovery effort. For example, East Ohio Gas Co. announced a $2,900,000 capital improvements project for its Youngstown-Warren division; Republic Steel, already involved in a $380,000,000, five-year expansion program, announced it would also construct a $1,000,000 office building in Warren, and General Motors began a 200,000 sq. ft. addition to its Lordstown assembly plant. And, amidst a flurry of expansion moves by GM's Packard Electric, a $7,000,000 GM satellite plant in nearby Cortland Village is a possibility.

On the retail front, a $10,000,000 expansion of Eastwood Mall and adjacent Great East Plaza was announced. The project includes a new J.C. Penney store, extension of an enclosed pedestrian mall and an additional 25 retail shops. Also, Strouss' department store at Eastwood plans a $2,100,000 remodeling program.

Other retail developments include a $300,000 remodeling by Seafood Express, plans for a Hanover Trail Steak House in Warren and an announced Best Products 65,000 sq. ft. catalog store to be built near Great East Plaza.

Retail sales in the market area rose 7%, from $412,562,000 in 1977 to $441,983,000 in 1978.

■ A 16,000-seat stadium and sports complex is due for completion next year at Youngstown State University. Ground was broken on the project last fall.

Housing statistics indicate relative health for the area. In the first six months of 1979, single family dwelling starts climbed 14%, from 367 to 417, with valuation climbing from $14,448,000 to $17,351,000. For multiple-unit dwellings, 47 buildings with 182 units were started, compared with 28 buildings with 230 units in the first six months of 1978. Valuations rose slightly to $4,031,000.

Meanwhile, schemes continue to pop up for the utilization of the closed Campbell steelworks facility. A plan by religious and community leaders to reopen the plant under the control of a worker-management team now seems dead, but in October a group called CASTLO said it had secured a $2,800,000 loan from the state to turn the facility into an industrial park. The funding was contingent upon the group finding enough tenants to lease space in the plant.

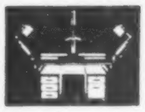
the slidemagic multi-image slide system has it all!

new SS-F2 PIN REGISTERED CAMERA

Slidemagic now offers 2 cameras
1) The new Pin Registered SS-F2
2) The original precision SS-F2 with option to add pin registration later
Both cameras feature the time saving Slidemagic Optical Grid System, fast film roll-back, portability for precision off-stand work and the BEST VALUE!

the universally needed SOFTWARE SYSTEM

Slidemagic has packaged the software production aids producers want most. System coordinated colors, technique and type setting guides, stock graphics ready to customize, technical and special effects data, plus many other vital time and money saving production tools.



sophisticated multi-image CAMERA SYSTEM

No other Camera System compares with the total versatility for producing professional 35mm multi-image slides. Features include: A choice of SS-F2 cameras, copies originals up to 26"×38", enlarges up to 4X, produces corrected and contrast controlled duplicates. Options: special effects kit, reticle projection lamphouse, micro stage with X+Y movement and much more.

PROFESSIONAL ON-SITE TRAINING COMPLETES THE TOTAL SYSTEM!

Kansas City

Population	1,325,200
Rank	28th
Personal income	$10,195,000,000
Income '77 vs. '76	+11.87%

Kansas City, home of three professional sports teams—the Chiefs, the Royals and the Kings—is becoming the "sports capital of the country."

That's what James Monroe, head of business and economic development for the Greater Kansas City Chamber of Commerce, says, but it's not because of the athletic success of the hometown teams.

Mr. Monroe points out that three years ago Kansas City began a major marketing effort to attract national sports trade associations. Since the advent of the program, six national associations have relocated their national headquarters to metropolitan Kansas City.

That program was capped in October when the American College of Sports Medicine announced it would move to 20,000 sq. ft. of offices in Kansas City. They will join, among others, the U.S. Track & Field Assn., the Fellowship of Christian Athletes and the National Collegiate Athletic Assn., which all have relocated to metropolitan Kansas City.

■ The impetus behind these association moves parallels the reasons other industries have found Kansas City to be a good place to locate, Mr. Monroe maintains. He notes that the city is centrally located, making it convenient to reach, especially by airplane.

Indeed, Kansas City has been among the cities to benefit from airline deregulation. Flights in and out of the city's sparkling new airport are on the increase. In late 1978, for example, United Airlines added new, nonstop flights between Kansas City and both coasts.

And in October, a new budget commuter airline, Midway Airlines, began low-cost flights between Kansas City and Chicago's Midway Airport.

Besides being a sports capital, Kansas City is becoming an international business center. This year Grimsted Products Co. of Denmark built a new, 200,000 sq. ft. manufacturing facility in Kansas City.

Frankona Reinsurance Co. of Munich, Germany, established its U.S. headquarters in the midwestern city and, significantly, the Japanese government chose Kansas City as a site for a consulate this year, reflecting the city's increased international importance.

■ In total, 27 companies established new operations in Kansas City during 1979. They employ more than 1,600 workers and take up more than 1,200,000 sq. ft. of office and industrial space in the metropolitan area.

These figures are confirmed by the tight vacancy rates reported for Kansas City in Coldwell Banker's quarterly survey of available industrial space.

The California-based real estate company estimates that the vacancy rate for industrial space in metropolitan Kansas City dropped to 0.6% during the second quarter and recovered to only 1.2% during the third quarter. That compares with a national average hovering around 3%, making Kansas City one of the nation's tightest markets.

Among other business newcomers to Kansas City during 1979 was Kemper Insurance, which consolidated its central division operations, and Braniff Airlines, which established a new reservation center.

Also, Mercury Marine added a 73,000 sq. ft. distribution center and construction is nearing completion on a $40,000,000 expansion of Sears' catalog center. Uniroyal also finished a 300,000 sq. ft. distribution center.

Electric utilities benefit from Kansas City's accessibility to the low sulfer coal in the western U.S. Also, local natural gas companies are taking on new commercial and industrial customers.

Kansas City's agribusiness segment benefited from an excellent harvest this year. However, the continuing problems with the availability of railroad cars to ship grain was compounded by the Rock Island Railroad's labor and financial problems this year.

A subsidiary of the Mormon church, Beneficial Development Corp., acquired 4,300 acres of prime land in suburban Kansas City, just northeast of the city. Now in the planning stage is a giant industrial, commercial and residential development for the site.

Mirroring the industrial advances, George Kirkland, president of the Convention and Visitors Bureau of Greater Kansas City, reports that the city hosted 540 conventions this year, which pulled an estimated 637,000 visitors to the city and produced more than $132,000,000 in revenue.

■ Another boost to the city's convention business will be the completion of the new Hyatt Regency Hotel next October. That hotel, in Crown Center, will add another 750 luxury rooms to the city's stock. Also pending is a federal grant that will allow the construction of a new Hilton hotel in downtown Kansas City, adding 650 rooms.

Kansas City has not been able to escape the housing slowdown. Housing permits are down to 5,061 from 6,752 in 1978. The decline is mostly in construction of single-family homes. Mortgage money is also tight caused, in part, by a usury rate that now limits home mortgages to 11.4%.

(Continued from Page 40)

der construction.

The building continues to pump fresh vitality into the already resurging downtown of Minneapolis and the reawakening downtown of St. Paul. Retailers and hotel managers have reaffirmed their faith in the downtown districts by committing to a host of new stores and hotels.

- Unemployment, meanwhile seems anchored at the 3% level.

But the fuzzily defined national question of energy comes into sharp focus in the Upper Midwest. Winter can begin to wrap its icy fingers around this part of the country in early November and keep its frigid grip until April.

The Twin Cities may fall prey to a severe energy pinch if Canada makes good on its plan to halt shipments of crude oil before new pipelines can make their way to Minnesota from the West and the South.

"Energy is probably the biggest concern we have right now," said Sung Won Son, economist and senior vice-president at Minneapolis' Northwest National Bank.

He noted that 55% of the region's crude oil now comes from Alberta, Canada, via the Lake Mead pipeline. Canadian authorities are intent on shutting off that flow, although the date of the termination is still a bit clouded.

Currently, Canada intends to stop the pipeline in 1983, but the cutoff date has been pushed back in the past and observers feel that U.S. authorities would not allow the region to be left dramatically short of oil.

- Two crude pipelines from other parts of the U.S. are battling their way toward the Twin Cities, but both are still mired in disputes over state and local permits and it is unclear when they will begin pumping supplies into the region's refineries.

One is the Northern Tier pipeline, which is snaking east from Washington state. It would carry crude from Alaska's North Slope oil wells.

The other is the Northern Pipeline, which would carry supplies north from Illinois through Iowa to Minnesota.

St. Paul, meanwhile, is planning an energy experiment in the downtown area through the newly created St. Paul District Heating Development Co. The group, composed of business, labor and government leaders, is working on a proposal to use steam excess from downtown factories to heat other buildings nearby.

- For the short term, Mr. Son thinks the Twin Cities are well buttressed to withstand the recession.

"This is a white-collar, headquarters town, with companies like Pillsbury, Honeywell, 3M and the Northwest Bancorporations, which owns this bank," he said. They don't lay off white-collar workers the way they lay off blue-collar workers in a downturn.

"This is really the only metropolitan area in the Upper Midwest," he added. "It is the service and distribution center for the nation's breadbasket."

Yet many observers of the Twin Cities economy, including Mr. Son, are concerned about the effects of what is called "the business climate." Mr. Son pointedly refers to it as "the tax climate" in the state.

- The chief executives of Minnesota's 50 biggest companies banded together a year and a half ago in an organization called the Minnesota Business Partnership to raise the issue of the business climate in last year's elections. At that time, some of the state's biggest corporations, such as Burlington-Northern, were making ominous noises about moving their headquarters out of the state.

The deeply entrenched Democratic Farmer Labor Party gave up both U.S. Senate seats, the governorship and its overwhelming state legislature majority in the elections and many business leaders feel the corner has been turned on the state's high tax rates.

This year, the legislature enacted a $750,000,000 tax cut, reducing the maximum state income tax bracket from 17% to 16% and raising some key taxpayers credits and deductions. High workers compensation rates and hefty property taxes in many communities continue to pose obstacles, but concern about a potentially worsening "business climate" has subsided.

- Commercial vacancy rates in downtown Minneapolis have shrunk to 2%. For space on the city's skyway system, connecting downtown buildings on the second-floor level, it is just 1%.

The skyway system now connects 18 city blocks and, when the buildings already announced for downtown Minneapolis are completed, some 25 blocks will be included.

One full city block will be the new City Center, a $150,000,000 project including a new Donaldson's department store, a 27-story office tower, the Northwest National Bank and a 600-room Western International Hotel.

Pillsbury is erecting a 36-story, $100,000,000 headquarters building with 1,760,000 sq. ft. of office space.

When the buildings now announced or under way in Minneapolis are completed, they will add some 3,000,000 sq. ft. of office space to the current total of 18,000,000 sq. ft.

- In St. Paul just across the Mississippi River, some $209,900,000 in new buildings are under way and another $211,500,000 have been announced.

The centerpiece of the St. Paul boom is the $50,000,000 Seventh Plaza Complex, which incorporates a new Radisson Hotel, an atrium office building and another Donaldson's department store.

St. Paul is still struggling, however, to get its ambitious Lowertown rehabilitation project off the ground. It would renovate a declining section of the city's downtown area, adding 1,500 housing units and 8,000 jobs through a mix of public and private funds.

The Presidentially sanctioned drive toward deregulation in airlines has threatened to cut off service to some areas, but it has only strengthened the Twin Cities' role in air travel. Northwest Orient Airlines is already based in the Twin Cities and this year, Minneapolis-based North Central merged with Southern Airways to form Republic Airlines. The new carrier, serving the Midwest and the Southeast, keeps its base in Minneapolis.

Omaha

Population	581,700
Rank	70th
Personal income	$4,038,000,000
Income '77 vs. '76	+9.82%

Omaha's prosperity depends a great deal on how agriculture does. This year, the city has every reason to be optimistic. Projections for the 1979 harvest indicate that the yield should be at least as high as last year's, which was better than Nebraska had seen in some time.

Corn and soybeans are expected to have a good harvest, and the latest figures for grain receipts indicate that wheat is up 51.8% from last year.

On the negative side, the meat packing industry is declining—the latest monthly livestock processing reports covering cattle, hogs and sheep says that processing is down 19.5% from the same period last year, reflecting smaller herds. Some of the smaller meat packing houses have closed as a result of the spring beef shortage.

- According to Steve Jordan, business writer for the Omaha *World-Herald*, the region is in good shape in the face of fuel shortages. On the home heating front, Mr. Jordan said, almost all of the area uses natural gas for fuel. "Our natural gas supplies are pretty good," he said. "There is not a great demand for fuel oil.

"Our only worries here are diesel fuel," he added. Despite diesel shortages, the area fared well this summer because there was enough rain so that irrigation machinery was not much in use, hence there was not a taxing demand on the diesel fuel supply.

Regular gasoline can still be found at about 94¢ a gallon in the area.

On the business front, an unemployment rate of 3.9% is little changed from last year's 3.6%. Expansion of local businesses as well as some new companies entering the Omaha community this year have helped contribute to these statistics.

Seventeen companies have announced expansion plans with a total investment of $11,904,000. In addition, eight companies are moving into the area, including Sears, Roebuck & Co. Sears plans to establish a service training and credit card center.

- Plans also are being formulated for the expansion of Omaha's Eppley Airfield. Construction will start next year on a new wing for ticketing passengers, and future construction over the next 10 years will include a new garage, terminal and concourse.

Still under construction in the downtown area are Northwestern Bell Telephone Co.'s 16-story, $26,000,000 headquarters; Mutual of Omaha's $15,000,000 underground building to house the parent company and its subsidiaries, and the State of Nebraska and University of Nebraska-Omaha's building at a cost of $14,000,000.

The city government appears to be trying hard to revitalize the downtown area. The Central Park Mall, a park with hills and creeks that will eventually extend to the Missouri river, is now partially completed. A new library project also is under way.

Sources say that the Rouse Co., which has aided other cities in the redevelopment of their downtown areas, has been under contract for preliminary studies on the revitalization of downtown Omaha. The studies reportedly have been completed, but not yet released. Rouse Co. also has a division that finances redevelopment, and one source indicated, "In the back of Omaha's mind, is the hope that Rouse will also finance these projects."

Despite inflation, however, retail sales are up only 5.6% for the first six months of 1979. In 1978, sales for the same period showed an 11.5% gain. Aside from the thriving Old Market area in the city—a warehouse area that now houses restaurants and shops—suburban shopping centers continue to capture a good portion of the retail dollars.

The nation's tallest monument, the Gateway Arch, dominates the St. Louis skyline.

St. Louis

Population	2,385,900
Rank	12th
Personal income	$7,905,000,000
Income '77 vs. '76	+10.18%

The idea of recession throws a scare into many St. Louis business leaders.

St. Louis is a mainly blue-collar town that tends to get the bumpy part of the ride when the economy starts heading downhill.

In the 1973-74 recession, for instance, when employment dipped by 2.5% nationally, St. Louis employment fell 4.1%. In 1970, when the national employment level sagged by 1.5%, St. Louis dropped by 3.4%.

It's a factory town, where the residents go to work and make things. When consumers stop buying these things, St. Louis factories cut back or shut down and the whole local economy shudders.

- Auto makers are here in force. All of the Big Three American auto makers have plants in the St. Louis area. General Motors has a Chevrolet plant, Ford Motor Co. has a Mercury plant and Chrysler turns out Dodge vans and Chrysler cars.

In the summer and fall, Chevrolet closed down one of its production lines, the Dodge van plant closed down one line and the Mercury plant laid off 400 workers.

Last fall, the three auto makers together rivaled giant McDonnell-Douglas Corp. as an employer in the St. Louis area. The three car makers had 29,700 employes to McDonnell-Douglas' 31,000. But by this fall, the car makers had cut back to barely 20,000 employes and the disappointing early sales of 1980 models cast doubt over the prospect of reversing that trend.

St. Louis has been working to shift its economy to a less cyclical, more white-collar, service-industry base. One example is the drive for a bigger share of the convention and tourism business.

- The city recently completed a $25,000,000 convention center and it is using that center to bolster its efforts to attract conventions to St. Louis. It has mounted an aggressive campaign for "St. Louis—the Meeting Place."

That campaign has started to pay some hefty dividends. Some 421,000 conventioneers visited St. Louis in 1978 to spend $98,000,000, up from 288,000 conventioneers who spent $67,000,000 in 1977.

St. Louis also has struggled to present an image as a corporate headquarters town. It is home to such corporate giants as McDonnell-Douglas, Anheuser-Busch, Monsanto Corp. and Ralston Purina.

In seeking to attract more recession-proof office workers, the city plays its historical trump card, geography. In the frontier era, St. Louis was the "Gateway to the West," signified by the St. Louis arch. Today, the city boasts a central location allowing for good, inexpensive transportation and the lowest Bell System rates for nationwide WATS service in the country.

- The benefits as a headquarters city translate into tangibles such as the $96,500,000 that McDonnell-Douglas budgeted for capital investments in the area for 1979 alone.

But big St. Louis-based corporations such as 7UP Corp. and Pet Inc. have been picked off in the last couple of years by bigger companies in Chicago, New York and elsewhere.

Construction projects are pumping money into the St. Louis economy. The 31-story First National Bank building, a $48,000,000 project is under construction. It will add 900,000 sq. ft. of office space to the downtown supply. Funding for the tower comes from the First National Bank, IBM and the Equitable Life Assurance Society.

In the public sector, the $432,000,000, 1,200-ft. lock and dam project on the Mississippi was approved by Congress last year. The eight to 10 year project promises to add 10,000 jobs.

It also clears the way for expansion of the port, a move that is expected to add 16,000 new jobs, with another 16,000 jobs created indirectly by the work.

- Also in the public sector is the strengthened Scott Air Force Base, located near Belleville, Ill., just across the river from St. Louis. The full impact of the 2,000 new military personnel in the area is just now being felt.

Also on the military front, McDonnell-Douglas is a major supplier to the U.S. Air Force. While its DC-10 airplanes have been the focus of serious design and construction criticism, its military products have not been affected.

McDonnell-Douglas' St. Louis-area plants turn out military products, such as fighter-bomber jets and missiles. The company's commerical aircraft assembly plants are located in Southern California.

Wichita

Population	401,900
Rank	95th
Personal Income	$2,929,000,000
Income '77 vs. '76	+9.41%

A shortage of manpower remains Wichita's most pressing problem. The unemployment rate is a mere 2.8%, down from 3.2% a

(Continued on Page 44)

(Continued from Page 42)

year ago. According to Gene Dickinson of the city's public relations office, scraping for people to fill jobs "is a nice problem to have."

The city's larger employers, however, have found the situation so bad that they are going outside Wichita to build new plants and facilities.

The Coleman Co. is now building a new 150,000 sq. ft. factory outside of San Antonio to manufacture its Polylite plastic coolers, canoes and machine parts. "We can't find enough people in Wichita [to man it]," said Coleman's Charles McIlwaine. "It is a real problem."

Beech Aircraft agrees. The company is opening a new plant in Selma, Ala., that will make modifications on planes built in Wichita and going to the Japanese Maritime Command.

"The shortage of manpower is primarily why we opened in other markets," a company representative said. Beech has expanded its operations in Newton, Salina and Liberty, Kan., and Boulder, Colo. "We decided to go to other places and draw on the people there," he said.

■ To alleviate the tight labor market situation, the city government has come up with a recruiting campaign. The push, launched last spring, is comprised of three parts: Recruitment, retention and training programs.

Wichita's Chamber of Commerce collected 3,800 responses to a series of ads it ran to lure people to the city. The responses and resumes went to 750 local businesses, according to Mr. Dickinson.

Employment in Wichita has increased by 45% since 1970 with 68,150 people added to the payrolls. Of that number, 15,750 persons were added last year and 11,400 in the months from January to July, '79.

The city is also working to identify and recruit untapped labor forces within the city, such as housewives. And it has launched a program targeted at high school seniors and college students and designed to convince them of the benefits of staying put in Wichita.

■ Manpower problems aside, business has been good in Wichita.

In 1978, Coleman Co.'s sales were up 10% to $283,600,000. The company broadened its canoe line, introduced a new six-pack sized "Little Oscar" and a new inflater that plugs into a car lighter, and recorded phenomenal sales of such energy saving devices as the Coleman heat pump. The company's biggest soft spot has been the machinery it provides the recreation vehicle industry.

Sales for Wichita's aircraft industry continued to soar in '78. Beech Aircraft's sales in '78 were $527,511,000 or 1,444 planes and in '79, early tallies predicted sales of $607,000,000 or 1,643 planes.

The company introduced a new Beechcraft King Air F-90 and a two-place training airplane, dubbed Skipper. The company's total payroll increased to 10,895 from 10,395 persons a year prior.

■ Cessna also chalked up impressive sales increases. In '78, company sales were $759,354,000 or 9,179 planes, up from '77's total of $620,472,000 or 8,430 planes. The company built a new propeller and accessories plant in Dayton, O., as part of its McCauley Accessories division.

It is currently in the midst of adding 20,000 sq. ft. to its commercial jet marketing division in Wichita—an addition slated to be complete in the spring of 1980.

Cessna introduced a new agriculture plane called the Ag Husky and a retractable four-place airplane named Cutlass RG. The Wichita payroll has been increased to 15,300, from the 12,000 employed the year before.

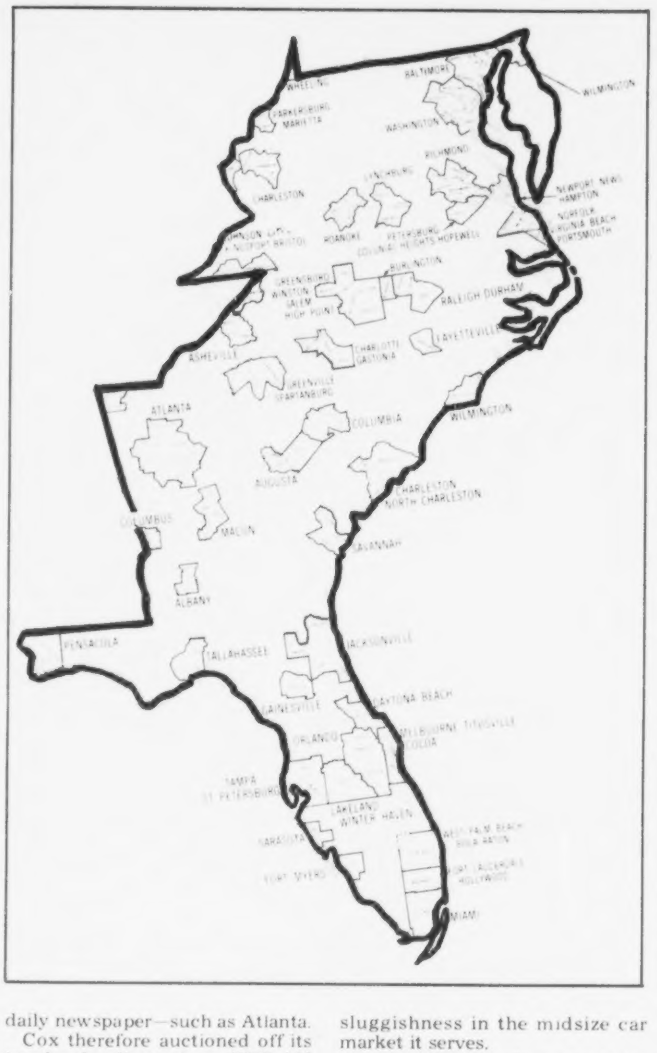
Target Stores came to the city last year with two stores, each about 100,000 sq. ft. One is adjacent to the Town East shopping mall, the other to the Town West mall. The Town West mall is now being built with Montgomery Ward as one anchor. The other retailers in the 100,000 sq. ft. center have not yet been announced.

■ New businesses in town include the Lubrication Engineers (manufacturer of various kinds of oil and grease products, employing 50 persons) and Continental Trailways. Trailways has started construction on a plant that will service from 100 to 200 buses a day.

There is a new amusement park in town called Fantasy, replete with water slide and rides. Coming this summer is a swimming pool with a wave-making machine.

A foundation has been formed to put together a plan to salvage downtown Wichita. Heading up the group is Gene Lambert, former publisher of the *Wichita Eagle*. The group was expected to get going in November.

And "every time you turn around, there is a new restaurant or new building," one Wichita resident said. "It's a little ole' pocket of prosperity here. Except for the hard-core unemployed or if you didn't want to work, there is no way you couldn't get a job here."



South Atlantic

Atlanta

Population	1,851,500
Rank	18th
Personal income	$13,465,000,000
Income '77 vs. '76	11.88%

The list of mergers and acquisitions of Atlanta companies this year was long and somewhat unusual—even in this age of acquisition. Included were some of the city's oldest and most venerable firms.

Heading the list was the acquisition of Life of Georgia, founded in 1891, by the Nationale Nederlanden NV, the largest insurance holding company in The Netherlands. Another large Atlanta insurance firm, Coastal States, was also acquired by an international group, Sun Life of Canada.

The long-planned merger of Southern Airways and North Central Airlines finally gained approval from the Civil Aeronautics Board this year, and Republic Airlines was formed. However, this was a marriage that turned out to be not very beneficial to Atlanta as most of the new airline's operations were shifted to North Central's Minneapolis base. Two of Southern's top executives decided they didn't want to leave and started their own airline consulting business.

Barton & Ludwig, one of Atlanta's oldest and biggest residential real estate firms, was acquired by Coldwell Banker, the largest real estate company in the U.S., which is expanding its presence in the Southeast.

■ A merger that continues to have repercussions throughout the city is that planned by Cox Broadcasting and General Electric's broadcast division. Before giving final approval, the Federal Communications Commission ordered Cox to divest itself of all properties in cities where it also owns the major daily newspaper—such as Atlanta.

Cox therefore auctioned off its two local radio stations, WSB-AM and FM. Metromedia purchased the AM station while a local black-oriented company purchased WSB-FM and announced plans to turn its beautiful music format into disco.

The fizz of acquisition also spilled over into Atlanta's important soft-drink industry. Coca-Cola U.S.A., purchased controlling interest in the Atlanta Coca-Cola Bottling Co., one of Coke's first locally owned independent bottlers. And Peter Eckes, a giant West German distiller, bought a 50% interest in Atlanta-based Moxie Industries.

"All of this activity is somewhat predictable," said an Atlanta investment counselor. "The middle tier of Atlanta companies—those that rank below national giants like Delta and Coca-Cola—include some very healthy, growing companies that are attractive to larger companies looking for investment. I can see this kind of thing going on for several more years."

■ It hasn't been all one-way, however. Fuqua Industries, a widely diversified conglomerate based in Atlanta, continued its program of acquiring companies. One that didn't work was the attempted purchase of Hoover Co., maker of vacuum cleaners. Hoover stockholders repulsed the attempt and sent company head J. B. Fuqua packing.

In addition to the flurry of acquisitions, foreign investment in Atlanta continued to grow. Canadian companies and individuals flooded the market, and a heavy Arab presence continues—one bought the Atlanta Townehouse Hotel and renamed it the Ladha Continental.

Atlanta's healthy economy showed some signs of a slowdown toward the end of the year. Ford Motor's Hapeville plant has been operating at an average of one week off for every three on since last spring—an indication of the sluggishness in the midsize car market it serves.

And while the real estate market was booming all summer, the tightening of money and the forecasts of problems in the near future have caused builders to pull in their horns, and bankers to clamp down on loans.

■ Yet building in downtown Atlanta continues apace. Southern Bell and Georgia Power are both working on new office towers; Coca-Cola is ready to move into its new North Ave. building; the Atlanta City Council is trying to decide which, if any, major redevelopment plans to approve for the south-central downtown area linking Rich's Department Store with the Omni complex, and everyone is anxiously awaiting the unveiling of architect John Portman's plan for the Great Park, a several-hundred-acre tract of abandoned highway right-of-way east of the city.

Underneath it all, construction of the Metropolitan Atlanta Rapid Transit Authority system also continues and finally began to pay off this year. The first seven-mile leg of the newest subway system in the U.S. opened with great fanfare in July and a second section is scheduled for opening in late December. They may be tearing up Peachtree St. again, but Atlantans are finally beginning to see some results.

Atlanta's biggest problem continues to be the growth of crime in general and murder in particular. The number of homicides increased almost daily during a long and bloody summer.

Atlanta's police are undermanned and divided over an ongoing battle between two policemen's labor organizations, one predominately white, the other black. The city's leaders are unable to bring an end to the impasse and several court suits have prohibited additional hiring. Instead, Atlanta's political leaders have been reduced to complaining—often rightly—about the excess publicity Atlanta's murder problems have received on a national scale.

Mayor Maynard Jackson has pledged an intensive lobbying effort in next year's state legislature for tougher gun control measures—which will be difficult to pass. Failing that, he has said he will enact tough measures of his own at the city level.

Baltimore

Population	2,145,200
Rank	14th
Personal income	$15,362,000,000
Income '77 vs. '76	+8.57%

Baltimore is moving into high gear. The air is charged with anticipation and the sweet smell of success. A glance at the Inner Harbor area reveals intense development activity.

The city's facelifting began over 10 years ago. To date, 34 major buildings have been completed with an assortment of new structures in varying degrees of completion. There's activity from one end of the finger piers to the other.

Internationally acclaimed architect Moshe Saftie was asked to weave wonders on the old Power Plant situated on Pier 4, eventually turning it into a 300-room hotel. Another pier was temporarily blacktopped to supply 540 badly needed parking spaces.

The $18,000,000, 10-story prize-winning design Aquarium on Pier 3 is quickly taking shape, completion due in 1980. And, in the prime location at water's edge, Rouse Co.'s Harborplace construction is bringing 154 new retail shops to a Quincy-Market-style mall.

■ Radiating from the harbor is a bevy of activity. In cooperation with the National Housing Partnership, a Washington, D.C., developer broke ground on Inner Harbor West's 199 subsidized housing units for the elderly, as well as townhouse units near the University of Maryland's downtown branch. Eventually there will be 450 units.

A major new apartment complex started this winter to the south of the McCormick Bldg. with 250 luxury rental flats and parking facilities. The city bought Quille's parking garage across from the World Trade Center and plans to develop one of the few remaining available open tracts as an office building attached to the garage.

The city and the Chessie System agreed to a major $24,000,000 rehabilitation effort to reclaim the 22 acres at the B & O Railway Station, warehouse and surrounding property west of the Inner Harbor. The 10 to 12-year project will include office buildings, residential units, hotel, restaurant and parking facilities.

The General Service Administration went on record advising all federal agencies to consider locating in Baltimore because Washington's office space was limited and extremely expensive. This meshed with the city's own promotion of a Baltimore-Washington common market concept which gained momentum when the Baltimore-Washington regional market committee was formed.

■ The Equitable Trust Bank nears completion of its 18-story headquarters tower, housing Hutzlers department store and a series of retail outlets.

Nestled across the street is the newly opened $45,000,000 Convention Center. Nationwide media covered the center's opening in August when President Carter addressed the Sons of Italy.

The ripple effect from the Convention Center is just beginning to be felt in the city. Baltimore has been inhibited in attracting tourist dollars by limited hotel facilities. The Hyatt Regency saw the potential and broke ground in August for its $33,000,000, 500-room luxury hotel.

The downtown Hilton, fallen into disrepair, received a much-needed transfusion when Kuwaiti investors bought it, changed management and poured revenue into refurbishing the interior. Company ownership changed hands: Heidelberg Zement of Germany purchased Lehigh Portland Cement; Hess Shoe Co. merged with Goertz Corp. of Germany; Crown Central bought Continental Insurance Co., and G. Heileman Brewing Co. of Wisconsin acquired Carling National Beer.

▪ The downtown retail market has been Baltimore's Achilles heel. Two years ago Hochschild-Kohn closed its downtown branch, followed this year by Stewarts department store. Hutzlers closed half of its display space downtown, leaving only the Hecht Co. in dismal and depressed surroundings.

Three events in the depressed retail district should dramatically change the economic forecast for downtown. In the northern portion, Social Security prepares for a winter opening for 5,000 employes at its new administrative building, with provisions for 25,000 additional personnel in the future.

Construction on the downtown subway which has marred the city for the past few years, will be completed by 1982. And, in preparation for these changes, the American Cities Corp. (subsidiary of Rouse Co.) has been retained to analyze the downtown area and give recommendations for massive redevelopment.

There are even more hopeful signs in the retail arena. Woodward & Lothrop, Washington, D.C., announced plans to invade the Baltimore market with at least three stores, the first one to locate at Rouse's White Marsh Mall in Baltimore County.

That mall boasts the first five-store anchor mall. Bambergers, also making its first entry into the Baltimore market, will locate there along with Hutzlers, Sears and J.C. Penney.

Bloomingdale's is rumored to be considering a Baltimore site while Hoshchild-Kohn looks for a buyer and Stewarts looks for some relief from financial troubles.

▪ A pro-business aura seems to have filtered up from the city to the state with the election of Harry Hughes as governor. The state repealed a 2% manufacturers tax on the purchase of machinery and repealed the tax on profits from foreign subsidiaries.

It lifted the 10% ceiling on mortgage rates and set up a Commercial Redevelopment Fund. The state issued its largest advertising contract for promoting its image and appointed an experienced secretary of economic development, James Roberson.

Baltimore is still leading the way in innovation, however. The famed $1 housing concept was replaced by on-the-job training of CETA employes who turn delapidated, repossessed hovels into livable shells that are then sold to homesteaders on the open market.

Business got a big boost when, in a pilot program, Baltimore's largest commercial banks, savings institutions and a life insurance company committed over $51,000,000 to provide long-term financing for the small and medium-size businesses.

In addition, the city will have its first planned office park, compliments of Hewlett-Packard, one of the world's largest regional electronics firms. The company announced plans to construct its regional distribution center at Caton 95 Business Park with a 50,000 sq. ft. sales/service building and plans to eventually relocate electronic and technical personnel to the site.

▪ Among others reporting large industrial expansion are Indiana Grain (division of Indiana Farm Business); Federal Yeast; Schluderberg-Kurdle (Esskay); Bethlehem Steel; McCormick; Glidden-Durkee; Exxon, and Davis Chemical (division of W.R. Grace). The number of reports declined this year, reflecting the nationwide belt-tightening.

Inflation hurt the Block Grant Program. The $30,000,000 grant is buying less at a time when the city's needs are expanding. The gasoline shortage that sent Maryland drivers on an odd-even rationing schedule was lifted in October, but had adverse effects on the travel industry. Heating fuel shortages, along with escalating fuel prices, do not portend well for the winter.

Also questionable is the development of the port. The major channel is filling and if not dredged will cut off access to Baltimore by major shipping.

Pollution menacingly invades The Chesapeake Bay waters damaging the productive $11,000,000 seafood industry. And the Port of New York is pressing for equalized shipping freight rates along the East Coast which would badly damage an already shakey shipping industry.

Bethlehem Steel Shipyards faced possible closure for lack of work but now seems to have won a reprieve with Amerada Hess Corp.'s choosing it as the proposed builder in two separate orders of three ships each, each order costing $108,700,000.

Baltimore-Washington International Airport had elaborate dedication ceremonies in October to celebrate the $70,000,000 expansion. Space increased by 75%, allowing for three times the number of passengers now served. Passenger volume increased 11% in the first half of the year and nine new carriers added Baltimore to their rosters.

Catching investment fever, two national chain restaurants are now located in Baltimore: The Rusty Skupper, with plans for four locations, and the Chart House. The city-owned steamship, the Nobska, was sold to Adam Siegel who plans to reopen the floating restaurant by year's end at the Inner Harbor.

A highly charged sports drama captured headlines for a major portion of the year. First the Orioles were sold to Edward Bennett Williams, firing controversy over whether the club would move to Washington. (It's not.) Then volatile public pronouncements by Colt owner Robert Irsay threatened to move the franchise to another city. (It's not—yet.)

The basic soundness of Baltimore's economy is born out by both Moody's and Standard & Poor's A rating. In a time of near bankruptcy for many large cities, perhaps that rating speaks for itself.

Charleston, S.C.

(Continued from Page 45)

plant, the largest single industrial investment ever made in the state.

- A long-awaited $40,000,000 convention center and hotel complex appears ready to get off the ground.
- A $56,000,000 expansion of port facilities is under way, to be followed by a second-phase project costing $57,000,000.
- The local naval base increased its military payroll by 5,000 during the year.
- Airport expansion, totaling $40,000,000, is under way.
- The Sheraton Corp. is putting up a $13,000,000 hotel.
- Three hospitals are building major additions, and a fourth is relocating to a brand new facility in the suburbs.
- A marsh is converted by the county into a 725-acre family oriented recreation park, complete with lakes, hiking trails and picnic areas.
- A new four-building museum complex is being built; it will feature natural history, decorative arts, anthropology and a library.

What we have here isn't Los Angeles, Chicago or Miami. It's Charleston, S.C.

Charleston may not be among the giants in population, and even population projections through 1995 don't put the three-county SMSA much beyond the half-million mark.

But few of the bigger metropolitan areas in the nation can match the sort of progress that has turned the Trident Region, long a dormant area noted mainly for its antebellum architecture, into what city fathers now term a "complete" metropolitan area.

"I can't think of a thing—nothing at all," says a Charleston business leader, asked if it was just possible that somehow, somewhere, there was a flaw in the economy.

Unemployment in Charleston, Berkeley and Dorchester Counties was down a point-and-a-half, to 5.4%, in June from the previous year's figure, and even a slight decrease in tourism because of the gasoline shortage has been reversed.

As a matter of fact, tourism increased in Charleston during the 1973-74 gasoline crisis, and an aggressive advertising campaign is already showing signs of turning the 1979 gas crunch into yet another plus for the area, as tourists abandon long trips to visit areas closer to home.

The convention center proposal, which preservationists have opposed for years because of its size and because several historic buildings would be destroyed, has been given the go-ahead by the South Carolina supreme court; the city is now awaiting environmental clearance from the federal government.

Although another lawsuit is possible, city officials say they are hopeful that construction can start soon; the complex would consist of a hotel and department store—no tenants have been selected—and the convention or conference center.

Alumax of South Carolina, which manufactures aluminum ingots, is constructing a facility in Berkeley County, north of Charleston. It is expected to have 1,700 employes. Once in production, probably by mid-1980, it is to have about 800 fulltime employes.

Port facilities are being expanded with the addition of three berths to the present 13; four more are to be added in the second phase, which would begin when the first is completed, in late 1980 or early 1981. The city's port, which has about 5,000 employes, already is one of the leading container ports in the nation.

The expansion of Charleston International Airport also is being done in phases, with the first phase—relocation of a hazardous cargo area—already completed. Construction is to begin on a new passenger terminal.

Charleston is the headquarters of the Sixth Naval District, and about 5,000 Navy personnel came aboard in 1979. Total military employment in the area, including Charleston Air Force Base, the southern terminal for the Military Airlift Command, increased to 22,500 military and more than 12,500 civilians, with a total annual payroll of just under $600,000,000.

Among other industrial growth in 1979 was the announcement of a 1980 start for Perseverance Textiles, which is to have 400 employes. Also, Geo. J. Meyer Mfg., with 650 employes, is to begin production late in 1979, and the Jim Walter Corp. metals division is expected to open a plant having 150 workers.

A few miles north of Charleston, S.C., sea-grass weavers create ornamental products from marsh grass

Charlotte, N.C.

Population	605,900
Rank	66th
Personal income	$4,209,000,000
Income '77 vs. '76	+11.08%

They're looking up and down in Charlotte these days. Up, to try and picture what the new addition to the city's skyline will look like; down, to see if ground has been broken yet.

Trammel Crow Co., a major southeastern real estate developer, this summer announced plans for a 31-story office tower adjoining a 35-story luxury hotel in Charlotte's downtown area. But so far, the addition is still in the planning stage.

While new development will be a plus for the city's skyline, it will be but one more lift to a business economy which is already strong and growing.

Downtown Charlotte, in particular, shows signs of vitality. The First Union National Bank this year completed construction on a new facade on its 10-story headquarters, as well as a pedestrian mall called Crystal Gardens. The mall is connected to Charlotte's Skyway system, an enclosed, climate-controlled elevated walkway that links six city blocks.

- Restoration and building continue in the city's Fourth Ward area. Discovery Place, a $7,000,000 children's nature and science museum is under construction across the street from the First Baptist Church's new cultural center, Spirit Square.

Many of the fine old buildings in this historic district have been restored and converted to condominiums, and more such projects are currently under way. Many of the units are sold before construction begins.

Housing throughout the market continues to be a problem. Despite the climbing mortgage interest rates, builders report they cannot get homes up fast enough to satisfy the demand from homebuyers. Inventories have been low all year, though industry representatives say the picture is finally beginning to improve.

Charlotte's expanding economy is a principal cause of the housing shortage. The rapid growth of recent years has created an influx of new families.

IBM's Communications Systems division, for example, last year began building a major new manufacturing plant, and estimated that some 1,600 new workers would be transferred in. Although the plant is still under construction, more than 1,000 families have already moved into the market, and no one is sure how many more can be expected.

- This influx into the SMSA has also put a strain on the school systems. Gaston County voters in September approved a referendum to sell $20,000,000 worth of bonds for badly needed improvements to their school system's physical plant, and to build three new facilities.

At the same time, however, the voters soundly defeated an additional $10,000,000 bond issue that would have provided recreational and cultural facilities in the county. Gaston officials blamed a "Proposition 13-style" taxpayers revolt for the defeat.

Three-quarters of Gaston County's economy is based on manufacturing, especially textiles. The labor market continues strong and county officials have begun a drive to attract smaller, capital-intensive industries to the area.

Freightliner, a huge trucking company that opened in 1977, is still hiring and expanding operations. Handy City opened a major new retail store in Gastonia, and new industries in the county included Dixie Yeast, MTE Hydraulics and Commercial Shearing—representing a total new investment of some $11,000,000.

- In Charlotte, Independence Park, a major new $41,000,000 office park began construction this year. Kilsby Tubesupply, a steel manufacturer, opened a new $6,000,000 plant, while Florida Steel Corp. announced a $7,500,000 expansion project.

AREN'T YOU MISSING SOMETHING?

Buying Florida without buying Tallahassee/Thomasville is like buying a car without the wheels. For starters, you're missing 124,200 households (ARB '78) in Florida and south Georgia. In fact, Tallahassee alone is ranked 24th in the nation in per household retail buying power. And the Tallahassee/Thomasville market ranks 13th among the fastest growing metros in the country.*

WCTV is your best vehicle to reach this important market. WCTV has been the number one station in this market for over 23 years, delivering a whopping 54% of the Tallahassee/Thomasville market (ARB '78). And WCTV has a wide reach of 49 counties in north Florida, south Georgia, and south Alabama as well. Pretty good mileage from one station. And we deliver the goods in the youth market, too. In our home metro county, the average age is 24.3.* WCTV is affiliated with CBS, too. The network that's a big number one in most major Florida markets, according to Florida Trend Magazine (Nov. '77).

So if you've got something to sell, test drive the Tallahassee/Thomasville market with WCTV. And you'll get better mileage from your Florida media buy.

*Sales Marketing Management Survey—July, 1978

If you're not buying Tallahassee/Thomasville, you're missing a lot of Florida, south Georgia, and south Alabama.

BLAIR TELEVISION

Most of the country's largest trucking companies maintain large operation centers in Charlotte because of its central position on the interstate system—and many of these companies announced expansion plans.

Carowinds, a large amusement complex near the city, made it through the gasless summer without major problems, and announced at season's end that it would reinvest another $2,000,000 in the facility.

And Charlotte's sporting scene—traditionally associated with stock car racing and football—got a touch of class this year when the U.S. Equestrian Open Jumping Championships, the major event on the U.S. Grand Prix tour, were held in the city. It was later announced that the championships would return to Charlotte again next year.

Columbia, S.C.

Population	380,000
Rank	98th
Personal income	$2,413,000,000
Income '77 vs. '76	+9.83%

Columbia, S.C., may typify the best of the progressive new South, as it basks and grows in the sweep of the Sunbelt.

But even as it enjoys increased migration from northern states, it is as concerned as most areas about energy shortages and conservation. Hence, major citywide energy-saving measures have taken top billing among new activities for 1979.

Mayor Kirkman Finley hopes motorists will realize significant fuel savings with the implementation of a plan to reroute railroad grade crossings. By locating central city railroads into a north-south corridor, the city hopes to eliminate 80% of all crossings. This should greatly decrease the need for stop-start driving in the downtown area. Columbia seeks federal funds to assist in this effort.

Meanwhile, the city's police force has cut back energy costs by converting to more fuel-efficient mid-size police cars.

■ Energy-saving devices are even being built into the city's water and waste treatment works. The design of the soon-to-be-constructed Metro Wastewater plant expansion relies heavily on the use of methane gas generated in the treatment process.

This design allows greater self-sufficiency of the plant itself. Methane gas generated in the treatment process can in turn be burned to heat all or part of the plant's buildings, decreasing the plant's reliance on outside sources of energy.

Energy savings may also be realized after wastewater treatment. Columbia aims to implement a water system which will pump water at an even rate 24 hours a day from treatment plants to storage facilities and customers.

Under present conditions, pumping rates coincide with usage—they usually peak in the morning when water usage is highest, and drop off during the night while the community sleeps. Columbia's revised system will help to equalize pumping rates, and should reduce electricity consumption by more than 15%.

■ Finding recreation close to home is one way to cut fuel costs incurred by travel. Columbia understands this, and as a result, has chosen to develop the riverfront area downtown.

Once completed, this new recreational area should provide leisure time activities for hundreds of thousands of residents from South Carolina's Midlands, according to Mayor Finley. Revenues from increased tourism are also expected to boost the local economy.

Healthy reserves in electrical power and availability of natural gas have enabled Columbia to weather the worst of the energy crisis. Yet, while the chamber of commerce reports that the average resident has not had any difficulty filling his tank, the airlines servicing the Columbia area have.

The jet fuel shortage combined with deregulation caused cutbacks in airline service, even as renovation of the airport was completed. In the past year, two major carriers, Delta and Eastern Airlines, have cut back the number of flights out of Columbia.

Southern Airways has pulled out entirely. Still, according to the chamber, the number of direct flights to Atlanta has remained constant, "and if you can get to Atlanta, you can get anywhere."

Meanwhile, Columbia's industrial base continues to expand steadily, bringing with it new jobs and a healthy housing market. Michelin will offer a good portion of these jobs—close to 2,000—when it opens its steel-belted radial tire manufacturing plant in 1981. The tire maker announced and subsequently broke ground for the new $100,000,000 facility this year.

New York-based Indian Head Inc. hired about 100 new employes this fall to staff its InCon bottle manufacturing plant. The corporation purchased the former Summer Co. building, and remodeled it for the manufacture of two-liter plastic soft drink bottles. Full-scale production should begin in January.

Carbide Alloys, a division of Cerametal of Luxembourg, will employ upwards of 200 workers when it opens its new facility in Richland County Industrial Park at the end of 1979. FN Manufacturing, owned by Fabrique Nationale of Belgium, hired 200 workers when it opened its manufacturing facility this year. FN produces automatic shotgun rifles for Browning Arms Co.

Gould Inc. of Chicago, producers of industrial electrical control equipment, completed a new electrical switch gear plant this year. It should be open and operating with a staff of 200 by the end of the year.

Fort Lauderdale-Hollywood

Population	881,900
Rank	42nd
Personal income	6,771,000,000
Income '77 vs. '76	+13.1%

Despite a virtual shutdown of state gasoline supplies in midyear, the Fort Lauderdale-Hollywood area actually gained economic ground in 1979.

Retail sales figures are up nearly 19%—too large a figure to be credited only to inflation. Unemployment continues its steady decline from a 1975-recession high of 15% to last year's 7% and a 1979 midyear figure of 6%.

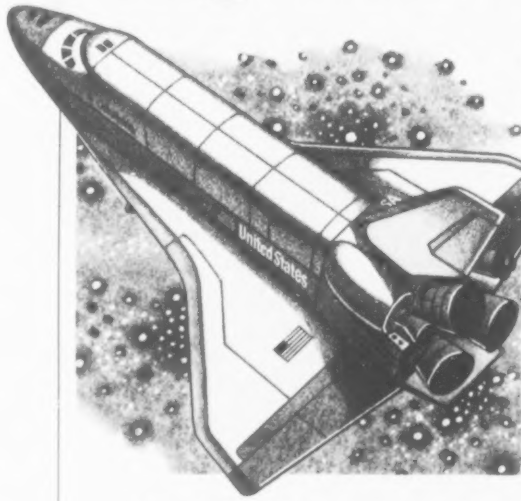
The number of people arriving at Fort Lauderdale-Hollywood International Airport is up 10% and the city of Hollywood reported that advance bookings for this year's tourist season are up correspondingly.

A continuing need for housing helped keep threats of recession at bay. During the last recession, the area was overbuilt and when tight money dried up demand, the construction industry came to a standstill.

Today's picture is far different, with Hollywood reporting its

(Continued on Page 48)

Spaceships, Spark Plugs, Savings Plans and Chevrolet.



The melody often lingers on from the advertising that we make at Campbell-Ewald.

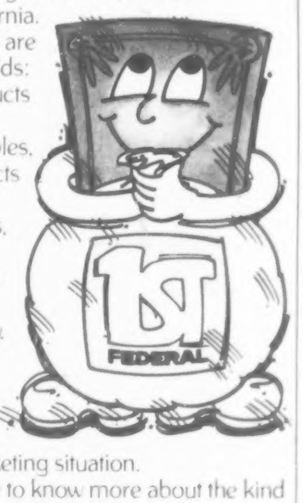
Of course there's "Baseball, hot dogs, apple pie and Chevrolet."

There's also the impactful advertising we do for Rockwell International. It includes aerospace, electronics, automotive and other industrial businesses. Plus corporate.

We're responsible for the AC-Delco "Thanks, AC" consumer campaign that's significantly increased the brand's awareness.

And our multimedia campaign for First Federal Savings of Detroit has helped them grow to a $3 billion financial institution. The largest savings and loan, in fact, outside of California.

Our clients are in a variety of fields: consumer products and services, consumer durables, industrial products and services, financial services, public service. So we are a very broad and well-balanced agency. This enables us to offer you experience and talent in any kind of marketing situation.



If you'd like to know more about the kind of advertising we make, and the kind of results it gets for our clients, please write or call our Vice Chairman, Dick O'Connor, Campbell-Ewald Company, 30400 Van Dyke, Warren, Michigan 48093. (313) 574-3400.

Perhaps we can make your product as famous as apple pie.

Campbell-Ewald Company

The Interpublic Group of Companies, Inc.

(Continued from Page 47)

building permits up 22% over last year and countywide rental apartments running only 1% vacant. This has pushed the area's rental prices to one of the highest points in the nation.

- Meanwhile, new housing developments are coming thick and fast. Arvida finally got approval for its mammoth Indian Trace development, which eventually will put a planned community (a la Reston, Va.) in what today are swamps just east of U.S. 27 and south of State Road 84. Arvida execs expect the first people to start moving in by the end of next year.

Hollywood has nine developments under way or about to start, the largest of which involves 3,500 condominium units where the Hollywood Golf & Country Club golf course is now.

Work is getting under way on the projects specified by last year's successfully voted $250,000,000 bond issue. "By this time next year, we'll have 70% of all right-of-ways acquired for the roads and half of them will actually be under construction," said Elaine Wardwell of the Fort Lauderdale Chamber of Commerce.

Unfortunately, things are not going so smoothly with the long awaited and desperately needed east-west expressway scheduled to head west from Port Everglades. The same is true of the airport terminal expansion. The best guess now is that the expansion will go on the east side of the airport rather than the southwest, which will mean relocating U.S. 1 and at least one set of railroad tracks.

- Downtown Fort Lauderdale remains an area of wide open spaces (half of it was demolished and replaced with a "temporary" park five years ago), but a 21-story office building to be named One Corporate Plaza is going up and the Downtown Development Authority now is trying to decide what to do with the rest of the area. Hotels, another office building and residential condominiums are high on the list because these would draw people to the area.

As for Hollywood, a $20,000 study by a Chicago company said the future of downtown will lie with professional offices and financial institutions. "Our downtown is starting to decay. This has been our major weakness and that is what the downtown project is designed to stop," said Robert Bartz of the Hollywood CofC.

Ethnically, the face of the area continues its slow change. Cuban residents continue to trickle in from Miami. Some 50,000 live here now. But an even bigger surprise is the influx of French Canadians, especially as visitors and winter residents.

Only 10 years ago, Air Canada was flying 30,000 Canadian visitors in and out a year. Now the figure is 250,000 and it's estimated that several hundred of these wind up staying. Mostly, they're buying motels along the beach, restaurants and travel agencies.

- Hollywood is now home to three new industries, Atlas Pen and Pencil, Gribetz & Son (quilting machine manufacturer) and Plasma Techniques (industrial plastic coatings). Food Fair has moved its corporate headquarters to Fort Lauderdale.

Educationally, a $6,000,000 expansion is under way at Sheridan Vocational School in Hollywood and Broward Community College is renovating its downtown Fort Lauderdale quarters. The county also has a new cultural center, the 1,200-seat Ralph Bailey concert hall on the BCC main campus and plans are under way to build a $15,000,000, 3,000-seat opera and symphony hall.

The Hollywood Sportatorium, long infamous for its rock concerts, may become the permanent home of a pro basketball team. The Hollywood location is one of three or four sites being considered nationally by the National Basketball Assn.

Greensboro-Winston-Salem-High Point, N.C.

Population	779,300
Rank	52nd
Personal income	$5,460,000,000
Income '77 vs. '76	+ 10.48%

Big things are afoot in the north-central area of North Carolina, and the growth is well distributed among its three major metropolitan areas.

In Greensboro, Southern Life Insurance is completing a $10,000,000 corporate headquarters and will begin construction soon on an identical office tower next door. Two major hotel chains are considering building on the same tract, although Greensboro voters in October defeated a referendum proposal for a $7,500,000 convention center that would have assured construction of one of the facilities—a 350-room, $20,000,000 Loews Hotel.

Winston-Salem is raising more than $7,000,000 in private and public contributions for development of a downtown cultural block, and proposals are in the works for a $33,000,000 downtown arena, an $80,000,000 commercial "Superblock" development and a $250,000,000 six-square-block downtown redevelopment program. R. J. Reynolds Tobacco Co., the major employer in the city, is undertaking three building projects totaling $83,000,000.

- High Point officials are ready to construct High Point Center, a $35,000,000 downtown project that will include yet another convention center; a 17-story office building, which would be the tallest downtown building, and a 350-room hotel, which would be connected by walkways to the massive Southern Furniture Market Center and to the First Citizens Bank building.

Voters in the area approved a liquor-by-the-drink referendum proposal early in the year, and officials in Greensboro and High Point noted that restaurant trade and expansion increased significantly as a result.

Unemployment in the SMSA was steady at 4.5%, primarily the result of unspectacular but steady growth of small industry. And officials credit airline deregulation with increasing the volume of passengers by 17% at Tri-City Airport, as both Piedmont and Delta airlines added nonstop flights and United Airlines opened its Memphis Gateway, which provides nonstop service to Memphis and connecting flights to the West Coast.

"We've always had excellent North-South airline service; this gives us access to the West Coast," said a Greensboro business leader.

- Industrial as well as commercial growth is taking place in Greensboro. Levi Strauss & Co. purchased the old Greensboro Mfg. Co. and began producing women's apparel early in November. The company is expected to have 700 employes eventually.

Other new industrial companies in the Greensboro area include Atco Rubber Products, Energy Development Associates, Rebau Plastiks, E. R. Squibb & Sons and Procter & Gamble, which has acquired land for a large manufacturing plant.

Miniature scale model uses white buildings to indicate structures either under construction or proposed for Baltimore's Inner Harbor.

An old newspaper building became a downtown center for the visual arts in Greensboro. And near the Greensboro Coliseum, Holiday Inn-Four Seasons announced a $10,500,000 expansion that will add 250 rooms and 60,000 sq. ft. of meeting space.

In sports, the Greensboro Hornets, a Class A baseball team affiliated with the New York Yankees, completed what city fathers call a very successful first season in 1979.

- Meanwhile, in Winston-Salem, downtown redevelopment is being spurred by conversion of an old J. C. Penney Co. building into an office building and renovation of the Arista Mill into a complex of retail establishments, restaurants and offices. The two projects total some $4,000,000 in private investment.

The cultural block, Winston Square, will consist of headquarters of the city's arts council; Sawtooth Mill, an old textile mill that will become an art gallery and restaurant, and galleries and a rehearsal hall for the Winston-Salem Symphony Orchestra in the former YMCA building.

- "Superblock," a four-square-block area across Winston Square, would be an $80,000,000 complex of shopping centers, condominiums and apartments, a hotel, amphitheater, law offices and athletic facilities.

An even larger proposal is a $250,000,000 revitalization plan to transform six square blocks bounded by Fourth, Sixth, Cherry and Liberty Sts. into more than 2,500,000 sq. ft. of office, retail and commercial space.

- In High Point, the $35,000,000 High Point Center is designed to fill a square block on Main St. and transform the central downtown area.

Developers are being selected, and construction is expected to begin in the spring, 1980, with completion planned in late 1981 or early 1982.

Among new industries in High Point is Olde World Products, which distributes institutional and household cleaning products, and has 125 employes. Perstorp Inc., a Swedish manufacturer of decorative laminates for the furniture industry, opened a plant in High Point during 1979. Officials expect its work force of 45 to quadruple within the next two years.

Greenville-Spartanburg, S.C.

Population	541,000
Rank	73rd
Personal income	$3,291,000,000
Income '77 vs. '76	+ 10.36%

In many respects, the Greenville-Spartanburg area could be considered a tale of two cities.

Generally, the three-county SMSA is a high growth region, still dependent upon textiles and related businesses but broadening its economic base and drawing increasing numbers of new industries.

But the area's two major cities, Greenville and Spartanburg, are about as disparate as they could be.

Greenville is one of those Horatio Alger success stories, making the transformation from a sleepy old mill town to a thriving urban center. It shows booming industrial growth, a revitalized downtown and a newfound reputation as a little giant in the art world.

- While Spartanburg also is attracting new industrial growth, on the other hand, most of it is outside the city limits. Downtown Spartanburg is suffering the pangs of urban decay, and middle-class and wealthy residents are moving in increasing numbers to the suburbs, eroding the city's tax base.

Urban renewal projects are under way, but repeated attempts to revitalize the city center have not gone far. Perhaps a third of the shops on the downtown mall have gone out of business or moved to suburban shopping malls.

Pickens County, meanwhile, continues its quiet growth, also attracting some new industry and showing a healthy increase in home building, despite high interest rates.

- In Greenville, construction is well under way on Greenville Commons, a $27,000,000 project that will include a five-story IBM office building, a 350-room Hyatt Hotel featuring a seven-story atrium, a convention center and a parking space.

The Commons is rising on Main St., which itself is undergoing $1,000,000 worth of redesign and reconstruction. Unlike many street projects, Main St. is not being widened; rather it is being reduced from four lanes of traffic to two, and through traffic is being diverted around the area, which extends from city hall some eight blocks to the Commons. The street is being landscaped and is designed to become more pedestrian oriented with the addition of benches and better lighting.

- A local industrialist purchased 26 Andrew Wyeth paintings and gave them on permanent loan to the County Museum of Art in downtown Greenville.

"It's hard to overemphasize the impact that had," says a local business leader. "All of a sudden, Greenville went big-time in the art world. Now, if we want to borrow some other collections to show here, we have something to offer in return."

Elsewhere, the downtown Greenville Memorial Hospital is undergoing a $33,000,000 expansion. The six-floor addition will add 260 beds, a new trauma and emergency department and a new diagnostic and treatment area.

Within the city limits, several large industrial developments are taking place. Digital Equipment Corp., Waltham, Mass., one of the nation's largest manufacturers of minicomputers, is planning a 100,000-sq.-ft. plant on 150 acres. The plant, which will manufacture printed circuit boards, is expected to have some 300 workers.

- Also downtown will be the southeast regional headquarters of the Wickes Corp., a $2 billion-a-year building supplier based in San Diego.

In the eastern section of Greenville, Haywood Mall, billed as one of the largest shopping malls on the East Coast, is scheduled for opening in 1980. Its more than 1,000,000-sq.-ft. will be anchored by such stores as Rich's, Sears and J. C. Penney Co.

Outside the city, Keystone Consolidated Industries of Peoria, Ill., plans to build a wire products plant in Greenville County. The 120,000-sq.-ft. facility is expected to have 200 employes.

Greenville business leaders note that in 1978 the county added capital investments of $166,000,000 in new and expanded industry, adding 2,800 new jobs. In 1979, both totals should be higher, they say.

- In neighboring Spartanburg County, some $115,000,000 in new and expanded industrial growth occurred in 1979. The largest is a $50,000,000 printing plant being constructed by R. R. Donnelley & Sons Co., the Chicago-based company that prints telephone books and the Sears catalog.

The company, now in temporary facilities, expects to have 1,000 employes in a 40-acre plant. The site is along Int. Hwy. 85, just outside the Spartanburg city limits.

The electronics division of Monsanto Co. took over an existing factory in Woodruff, south of Spartanburg, as a plant to manufacture silicone discs for the computer industry. Production is planned by summer. And Michelin started a $12,000,000 expansion of a tire plant west of Spartanburg. The project is expected to increase its employment at the plant from 750 to 1,000.

The downtown Spartanburg redevelopment project, first announced in 1974, was to include two seven-story office buildings, a shopping complex, an ice skating rink, a civic center and a 15-story hotel. But financing was never secured, and tight-lipped city officials now say the project hinges on evidence of support by the local business community.

Meanwhile, the square block in the very center of downtown Spartanburg remains unoccupied, and neighboring businesses, tired of waiting for the shot in the arm that

Spartan Square would provide, move to the suburbs in increasing numbers.

▪ "The downtown area is really suffering right now," says a newspaper business writer in Spartanburg. "The merchants are hinging their hopes on the future of the mall on Spartan Square."

In Pickens County, major industrial growth includes Fluid Controls, which plans to build a 60,000-sq.-ft. facility in Easley to manufacture electromechanical solenoids. The $3,000,000 facility eventually is expected to have 100 employes.

And American Store Equipment Corp., known as Amstore, is putting up an 80,000-sq.-ft. building in Liberty. Such store fixtures as display counters would be manufactured at the plant by a work force of 100.

Jacksonville

Population:	701,500
Rank	56th
Personal income	$4,538,000,000
Income '77 vs. '76	+9.64%

Few cities can match Jacksonville's growth and expansion over the past decade, and the city stayed right on course in 1979. Massive building projects are sprouting downtown, and others, including a convention center, are on the planning board.

The diversified economy, anchored by three huge naval bases, remains virtually recession-proof; unemployment dropped to 6% this August from 6.2% a year before.

Detroit's losses were Jacksonville's gain, as near-record numbers of Japanese automobiles came into the country through the city's ports. "We say we're No. 1 in imports, and Baltimore says it's No. 1," says a newspaper business editor. "But whichever, we're going great guns."

The icing on the cake could be a pending congressional decision on whether the new King's Bay submarine refitting plant, just 35 miles north of Jacksonville in Georgia, will become the East Coast Trident submarine headquarters. If so, its present complement of 2,000 personnel could reach 30,000, giving another boost to Jacksonville business.

▪ Two major building projects are planned in Jacksonville, one in the central business district and the second to the south on the St. John's River, although plans for both have not yet been completed.

A $200,000,000 project called Northbank is planned for an eight-square-block section in the heart of the city. Southern Bell will build a 1,000,000-sq.-ft. office building there, and city officials are negotiating with hotel chains for a 500-room facility.

The huge site is being cleared of old buildings which will be replaced by a variety of commercial buildings, as well as a convention center, although the plans are still on the drawing board.

St. John's Place, the other major city project, will include a 350-room Sheraton Hotel, which is already under way. That project will include shops, office buildings and restaurants, as well as condominiums, and will feature a boardwalk along the St. John's River.

The Universal Marion Bldg., an office building whose owners went bankrupt, was purchased by a local conglomerate, and will be refurbished. The project, said a local businessman, will "remove a pall, a ghost that has been hanging over the fringe of the northeastern downtown."

Hemming Plaza, a small downtown park that had fallen upon hard times, was refurbished and landscaped, and now features band concerts, theater groups and ballet troupes. And a $2,100,000 multipurpose service center for senior citizens is to be completed by the end of 1979 on the eastern end of downtown.

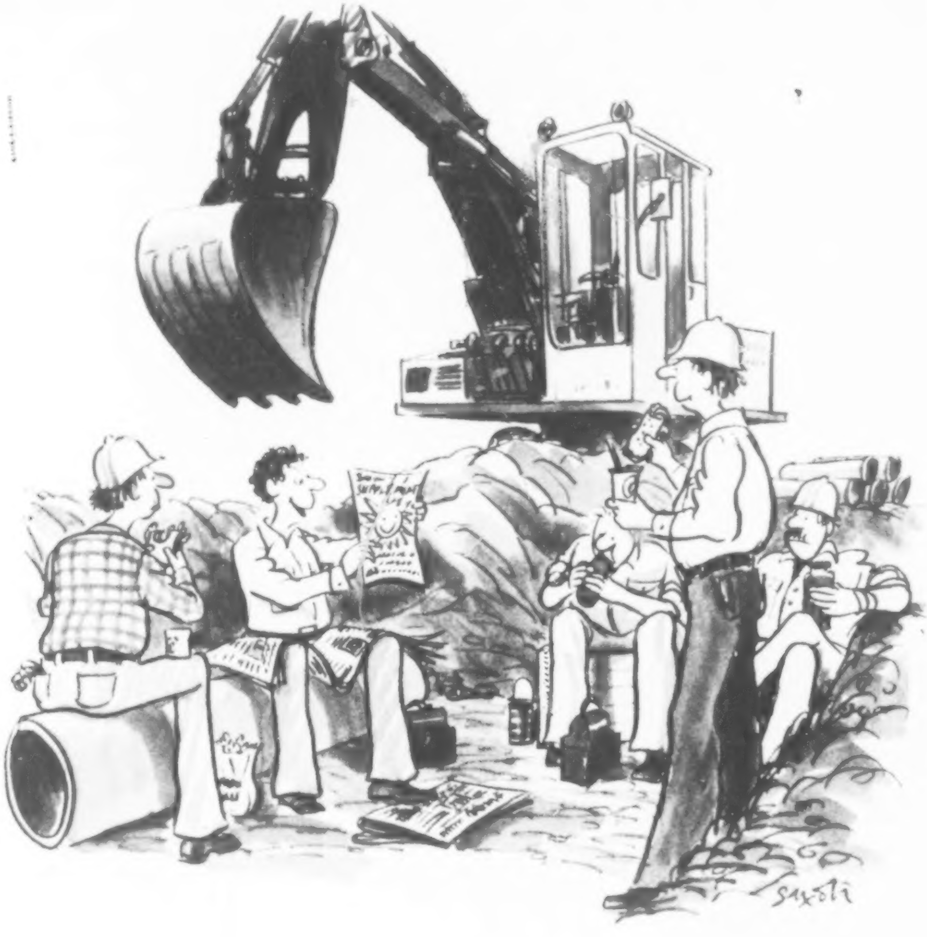
Environmentalists have brought suit to prevent construction of a $150,000,000 bridge across the St. John's River at Bridge Mill Cove. The bridge, which had received the approval of the Coast Guard, would be the missing link to the I-295 bypass around the city.

Steelworkers at the Jacksonville Shipyards went on strike for three weeks this summer, closing down the yards. But, according to one city official, the strike was predictably short. "Just like a vacation," he said. "The unions do it everytime their contracts are up, and then they quietly sign up a few weeks later."

Yet there are warning signals for Jacksonville's economic future: Two consulting companies, commissioned by the city's chamber of commerce, reported this summer that poor airline service and a spiraling electric rate (one of the highest in Florida), may deter economic expansion.

▪ There was actually a modest increase in the number of airline passengers served out of Jacksonville in the past year, despite route cut-

(Continued on Page 50)



Hey guys! Ten-day free trial of Julia Child's "Cuisine of Micronesia!"

Why throw away your advertising dollars on people who have no appetite for your product?

With The Houston Chronicle's Tailored Market Penetration program, you can limit your audience to people with the taste for what you're selling.

You select the zip code (or zip codes) and The Chronicle will distribute your insert to virtually every household in your target area.

Chronicle subscribers receive the insert in their newspapers. Nonsubscribers receive the insert by mail at the regular mail rate plus a small handling charge. Duplication is kept to a bare minimum by continuous computer updating of our lists.

With TMP, you can buy as few as 25,000 subscribers or the entire city zone. You can even choose between apartment dwellers and homeowners within a zip code.

Best of all, you can reach the slice of life you're really after. Without paying for the whole pie.

Houston Chronicle

We put a little extra in your day.

(Continued from Page 49)

backs by Eastern. These were partially made up by rapidly expanding Air Florida; nevertheless, the report found that both intra- and interstate air service were inadequate and inconveniently scheduled and that there was inadequate direct service to most major cities.

Electric rates in Jacksonville were up some 300% since 1973—about 30% in the last year alone—and the service provided by the Jacksonville Electric Authority was criticized as unreliable, with brownouts becoming increasingly common. The major reason for the high cost of electricity is the fact that the utility company is totally dependent upon expensive imported oil.

Both of these factors, the consultants said, could be troublesome in the future and could affect whether companies decide to relocate to or expand in Jacksonville.

On the positive side, the consultants found that Jacksonville has a good quality of life with excellent climate, schools and medical services. A wide variety of potential industrial sites is available and there are no serious labor problems, the report said.

Kingsport-Bristol, Johnson City, Tenn.

Population	411,300
Rank	92nd
Personal Income	$2,215,000,000
Income '77 vs. '76	+11.14%

A Boston mortgage insurance company recently selected Johnson City as one of the nation's top 10 housing markets in percentage of growth. The company pointed out that the city had high industrial development, job potential and quality of life.

The designation didn't exactly startle local officials. "We think we're among the top five," says a Johnson City real estate agent, adding that although the survey cited only Johnson City, he believes the entire SMSA has the same growth potential.

But it's not just potential that Johnson City is showing. Texas Instruments, already one of the larger employers in the area, is building a major new facility south of the city to manufacture electronic motor controls.

Though company officials won't say how many employes will be added to the payroll, local industrial development officials estimate that the present payroll of 800 may well expand to 3,000 when TI moves to the 120-acre site. One estimate runs as high as 7,000 employes.

- Safeguard Industries, which manufactures pistons for the automotive industry, is building a new facility north of Johnson City, and is to have 125 employes when it opens in 1980. A three-phase expansion over the next three years is designed to increase the payroll to about 800.

Nearby, a spring 1980 opening is planned for a new plant of ADC Magnetics, which makes electronic components for IBM. The company is to have about 300 employes.

And while a Magnavox plant that manufactured cabinets for television sets moved out this fall, the Budd Corp. is taking its place in the vacant facilities, located south of the city, with about 300 employes. Most of the 300 former Magnavox employes have already found work in the area, which has a need for skilled workers.

In downtown Johnson City, the old John Sevier Hotel, which went out of business in 1973, has become the John Sevier Center for senior citizens, a residential project housing 131 elderly people. Another 102-unit senior citizen center project is under way nearby.

- An $11,000,000 medical school building at East Tennessee State University in Johnson City is looking ahead to construction. It would be a joint project of the university and the Veterans Administration. The university's medical school already has enrolled its second class, which is being housed in temporary quarters.

A longtime downtown problem, the lack of adequate parking, is being alleviated with the construction of a combination parking garage and retail complex, to be known as the Downtown Center. The $2,250,000 project is to include one floor of retail shops, three floors of enclosed parking, and a fifth floor rooftop parking area, with a total of 500 spaces.

The city, meanwhile, has allocated $208,000 as its first-year share of a new municipal bus system. Nine 18-passenger buses and three vehicles for the handicapped, purchased largely with federal funds, will provide the city's first mass-transit system since a private bus company folded several years ago. City officials are counting on the system to give a boost to downtown business.

Kingsport is also showing healthy industrial growth. General Shale Products Corp. completed a $7,000,000 plant expansion, doubling its capacity of 50,000,000 bricks a year, and the ASG Corp., which manufactures glass, is adding 300 employes to its present payroll of 1,800 as a result of a $30,000,000 expansion of its plant, west of the city.

- Elsewhere, ground has been broken for a regional shopping center on 11 acres in the western section of Kingsport, a facility that is to be anchored by Winn-Dixie. Completion is planned for 1980.

In Bristol, which straddles the Tennessee and Virginia border, a 151-unit low and moderate-income housing project, Leisure Park, has been completed on the Virginia side; a similar project is planned for Bristol, Tenn.

A 250-room Regency Inn Motel has opened along Int. Hwy. 81, south of Bristol, Tenn., and both the area's high schools have begun major expansion projects. Tennessee High is completing a distributive education wing, and Virginia High is finishing an auditorium and gymnasium complex that will include a swimming pool.

Bristol, Va., officials hope to complete long-discussed plans next year for a downtown revitalization project. For years, feasibility studies have looked at the possible construction of a convention center next to an 11-story hotel.

Enterprise Fabricators, which manufactured steel fabrications in a Bristol, Va., plant, laid off a number of employes during the summer of 1979 and then announced that it was going out of business, putting some 300 workers out of jobs. But city officials said they have received few queries about employment, and believe the workers found other jobs with little trouble.

The Bristol-Washington County Industrial Park, located between Bristol and Abingdon, Va., opened in 1979, with several companies already announced as its first tenants.

Miami

Population	1,451,200
Rank	23rd
Personal Income	$11,177,000,000
Income '77 vs. '76	+10.51%

If Miami were to adopt a nickname these days, it would have to include the word "international." Long a favorite "fun and sun" destination for some Americans and a retirement home for others, Miami is emerging not only as a holiday haven for European and Latin American tourists but as an important business center as well.

International air traffic at Miami International Airport, for instance, is up 25% over 1978. Domestic travel during the same period climbed 19%.

What's making Miami and South Florida increasingly attractive to international tourist and business concerns is their tremendous buying power and economic advantage in the marketplace, as the U.S. dollar continues to plummet in value.

Simultaneously, the middle classes in oil-rich countries such as Venezuela are finding themselves with more discretionary income to travel, and they like Miami because of the year-round warm weather and of the familiar (to them) Latin cultural atmosphere. More than 500,000 persons of Hispanic background live in Dade County, and the majority speak Spanish.

- A familiar occurrence is that of a Latin (or European) family landing at the airport with a half-dozen empty suitcases for buying sprees here. By the time the family leaves, a few days or weeks later, the luggage is jammed with new clothes, shoes, jewelry, appliances, tv sets, stereos and dozens of other items.

As a consequence of the influx of Latin tourist consumers, downtown Miami is experiencing an unprecedented surge in retail business, residential and hotel construction. Another new luxury hotel, Marina Park Hotel, following the downtown lead of the successful Omni International Hotel, is scheduled to open in January on Biscayne Blvd.

The $5,400,000, 200-room project is being built inside the shell of the once-luxurious Biscayne Terrace Hotel, which was sold for $1,400,000 earlier in the year.

Plaza Venetia, immediately across from the Omni hotel-mall complex, is now under construction, with 300 apartments planned in its first 25-story building. The second phase is scheduled to include 810 apartments, 120 hotel rooms, and 200,000 sq. ft. of commercial and recreation space.

- Just south of downtown, in the popular Coconut Grove district, the area's first "European-style boutique center" opened in March. The three-story, air-conditioned Mayfair Boutiques has about 30 tenants, all leading designers such as Valentino, Charles Jourdan and Pierre Balmain.

About 50% of the center's business comes from Latin American and other tourists; the balance of customers are wealthy women from nearby Coral Gables, South Miami and Kendall area.

In April, the first phase of the Miami Free Trade Zone opened just west of Miami International Airport. The 300,000 sq. ft. warehouse facility has about 40 tenants. Another 300,000 sq. ft. building was inaugurated in late October and a third unit is scheduled for construction in early 1980. Within 10 miles of the Free Trade Zone, in western Dade County, two new major shopping centers are planned. Edward J. De Bartolo Corp. will build a 1,250,000 sq. ft. mall at NW 107 Ave. and the East-West Expressway. Rouse Co. and Homart Development Co. will construct a 1,145,000 sq. ft. center at Coral Way and the Florida Turnpike.

- Across Biscayne Bay, on Miami Beach, the landmark Sak's store closed. Yet, ambitious renovation projects are on the drawing boards and are under way, in an effort to counter the beach's sagging reputation with tangible, obvious improvements.

The South Shore Development, at the southern tip of Miami Beach, the single most ambitious revitalization project, remains hung up in litigation. The plan calls for 4,350 hotel rooms, 3,300 residential units, 470,000 sq. ft. of retail/-entertainment uses and 62,500 sq. ft. of office space, marina and dry boat storage. During 1979, the bottleneck has been a court case over authority of the Miami Beach Redevelopment Agency to issue funding bonds.

Even if the agency wins the bonding case, however, there are no indications when the project will be free from litigation, since it is strongly resisted by "art deco" enthusiasts who are determined to save some of the buildings slated for removal, and area planners who are concerned about relocating the poor and elderly whose moderatly priced homes will disappear.

- Along Miami Beach, many hotels are attempting to regain the high esteem they once held among vacationers with extensive renovation projects. The Fontainbleu Hilton, for instance, reportedly spent $15,000,000 to spruce up, clean and revitalize the property.

Most beach hotels are also benefiting from the influx of Latin, British and German tourists who seem particularly fond of the area and are booking tour packages from their countries in record numbers.

If you had to choose the apparently most *unwanted* spot in Miami, it would have to be the Orange Bowl. The University of Miami, which has always played its games in the 80,000 seat facility, has a new coach who wants to build a 40,000-seat stadium on the campus. He predicts an on-campus stadium would boost attendance and community support.

Although stunned by the mid-summer gas crunch, Miami escaped relatively unscathed, as Florida-bound tourists apparently chose to fly to Miami instead of drive. Domestic air travel increased 19% over last year.

Skyrocketing electric bills, in this air conditioning-dependent city, spurred many homeowners to seek relief with ceiling and floor fans. Most major department stores and scores of specialty shops now carry assorted models, ranging in price from about $60 up. Many residents found their monthly bills cut in half, after installing a few fans and shutting off the air conditioner.

Located in the heart of Charleston's financial, real estate and insurance district, St. Michael's Episcopal Church has an air of quiet dignity and solitude.

Norfolk-Virginia Beach-Portsmouth, Va.

Population	800,100
Rank	48th
Personal income	$4,905,000,000
Income '77 vs. '76	+10.4%

What may be the world's largest weathervane looms over the Norfolk Harbor skyline, a symbol perhaps of continued balmy breezes for the economy of the Norfolk-Virginia Beach-Portsmouth metropolitan area.

The weathervane is actually a 120-ft. tower crane—its boom pivots with the wind—installed in connection with a football field-size drydock called the Titan, one of the country's largest, and an adjacent pier.

The facility, an expansion to the Norfolk Shipping & Drydock Co. built earlier this year, is already overhauling tankers and a fleet of liquid natural gas carriers.

- Despite seemingly disastrous developments, little seems to faze the SMSA. It appears less likely all the time that Volvo will ever build its proposed $100,000,000 automobile assembly plant in Chesapeake.

A proposed oil refinery in Portsmouth has been given tentative approval by the Secretary of the Army, but still faces opposition from environmental groups as well as from the Interior Department, both of which fear potential oil spills that would endanger the Chesapeake Bay area.

If approved, the $6.6 billion facility would be the largest oil refinery on the East Coast, and the first major refinery built on the East Coast since 1957. Neighboring Newport News lost a $1.6 billion Navy contract to refit four aircraft carriers; and another year has passed without any definite plan for a prime 17.5-acre tract in downtown Norfolk that has been vacant for some 15 years.

Add to the bad news the gasoline crisis of this spring, as well as some bad weather around the same time that cut sharply into the business at tourist-oriented Virginia Beach.

- But the local attitude to these grim tidings seems to be, so what? The over-all economy has remained steady, and there's plenty of good news to go with the bad. Some examples:

- Virginia Beach tourism actually is projected to be up for the year, thanks to a good early spring-late summer influx that more than made up for the gasoline shortages that kept tourists at their backyard barbecues.

And the city is building a $20,000,000 arts and convention center in an effort to further expand the traditional 100-day Memorial Day to Labor Day tourist season. Several large conclaves already are booked for late next year when the center is to be completed.

Industrial development continues to boom in Virginia Beach. When one industrial park fills up, the city goes to work on another. The 1,000-acre Oceana West Industrial Park drew six new companies in 1979, including a number of large foreign operations such as Moulinex, known as the G.E. of France.

Work is under way on the 1,200,000-sq.-ft. Lynnhaven Mall, also in the industrial park, billed as the largest such new facility in the Tidewater area.

Downtown development continues in Norfolk. Newcomers this year included the Washington, D.C.-based Hechinger's hardware store. Also completed was the rehabilitation of two long-vacant department stores into international trade marts and boutiques.

The first townhouses have been sold in the $110,000,000 Freemason Harbor residential and shopping project, although financing problems have slowed down the 10-year project. Several new phases of Freemason Harbor, including townhouses, condominiums and a parking garage, are expected to get under way late in 1979.

The eight-story federal building in downtown Norfolk was completed and occupied this spring in Norfolk's Grandy Mall area, stimulating additional downtown development, including the refurbishing of several neighboring office buildings.

In Portsmouth, three large buildings are going up in the Crawford Harbor area, dominating the local building picture there. They are a six-story city hall, a five-story private office building and a $12,500,000, 25-story, 200-unit middle and high income apartment building which will be the tallest building in the Tidewater area.

Virginia Products announced plans to build a storm window and storm door manufacturing plant in Portsmouth's redevelopment area, a $6,000,000 venture that will add 500 employes to the local payroll. And construction was to begin late in 1979 on three buildings, providing 300 housing units for the elderly and low and moderate income residents.

Greenbrier Mall, approaching 1,000,000 sq. ft., is under construction in the city of Chesapeake, which is negotiating with the Navy for acquisition of surplus property at its Naval Ammunition Depot for use as a site for light industry.

And in the city of Suffolk, construction is just beginning on a 10-mile Interstate 664 spur that will improve access between the city and the Newport News-Hampton areas, where many Suffolk residents work. The spur, which includes a third James River crossing, is scheduled for mid-1980s completion.

Local controversy in the Norfolk-Virginia Beach-Portsmouth area centered around the proposal by business leaders to consolidate the SMSA with the neighboring Newport News-Hampton SMSA.

The merger would add some 400,000 residents to the SMSA; advocates say this would put the entire area in an advantageous economic position. Critics, largely in the smaller Newport News-Hampton area, argue that they would be swallowed up by such a merger.

- The issue was resolved by the Census Bureau's decision to create a consolidated metropolitan statistic area following the 1980 census, while retaining the identity of each of the SMSAs.

Although Newport News lost the aircraft carrier refitting project, there is a hope that a new nuclear aircraft carrier—authorized by Congress but not yet approved by the President—would be built at the local shipyards.

And although the Newport News-Hampton SMSA has one of the higher unemployment rates in Virginia, local officials hope that the new Interstate 664 spur, as well as a revitalized municipal bus system, will ease massive traffic jams that have hampered downtown growth.

Orlando

Population	**609,900**
Rank	**6[illegible]th**
Personal income	**$3,875,000,000**
Income '77 vs. '76	**+10.53%**

The word in central Florida is "activity." All over the area, residents are looking at theme park expansion, airport construction, civic center plans, shopping mall construction and industrial construction. The kind of activity that was going on last year is going on now at an accelerated pace.

Under way are Sea World's new Florida Festival, Walt Disney World's mammoth EPCOT (Experimental Prototype Community of Tomorrow), Cypress Gardens expansion, a new theme park (Western World) and the Orlando International Airport. That's not to mention new hotels, malls, warehouses and industrial complexes.

The amounts being spent or budgeted for these projects are mind-boggling—figures like $800,000,000 for EPCOT and $100,000,000 for Sea World. It all totals about $1.5 billion, an amount that will probably go higher.

- All of this is helping the area recover from the lost business syndrome brought on by last summer's energy crisis in June; hotel rooms were empty and theme-park turnstiles weren't clicking. Park attendants took to checking want ads and kept their bags packed.

Faced with $175,000,000 in lost revenue and 6,700 lost jobs, Gov. Bob Graham approved a national advertising campaign to assure vacationers that gas problems don't exist in Florida. The campaign, a toll-free gasoline information hotline and the governor's guarantee that gas was available helped turn the tide.

Orlando's tourist attractions make this a profitable stopping point for airlines. Until recently, Eastern, National and Southern have had a lion's share, but seven others, including United, TWA and American, used their new route flexibility to move into Orlando this year. Passenger traffic in June was running 26.5% ahead of June 1978.

Orlando's long-awaited, long-debated convention center is on the drawing boards, with conventions booked clear into 1988. The center is scheduled for a 1982 opening, with a Shriners convention. Another big one is scheduled for 1984, when the American Farm Bureau Federation comes here.

- Orlando Central, a wholly-owned subsidiary of Martin-Marietta, anticipating a deficit of at least 22,000 hotel and motel rooms by 1985, recently briefed local business leaders on its plan for Plaza/-International, a hotel/motel/-shopping center concept with 8,000 hotel rooms at Orlando Central Park, immediately adjacent to the convention center.

Orlando's sports scene is a mixed bag. Arnold Palmer's Bay Hill Club was the scene of the Bay Hill Citrus

(Continued on Page 52)

WE COUNT...
BIG APPLE

When you're selling in the #1 market, Bergen counts! It's the only New Jersey county in the New York SMSA, but Bergen has the best slice of the big apple's market.

For example: Bergen has the highest median household Effective Buying Income in the New York SMSA! What's more, Bergen tops Nassau and Fairfield too!

Sure Bergen's population is only 9.3% of the big apple, but count Bergen in for 12% of the EBI, and 12.9% of total retail sales. And in the New York suburbs, 45 cents of every retail dollar is spent in Bergen!

When you buy the #1 market, put The Record on your schedule. The Record has more circulation in Bergen County — daily or Sunday — than all the New York City and Newark newspapers combined. And that counts too!

100 MARKETS

(Continued from Page 51)

Open this spring. The name will be the Bay Hill Classic in 1980, because the Florida Department of Citrus withdrew sponsorship rather than put up another $175,000. Mr. Palmer has signed other sponsors, and the event is expected to be played with a $300,000 purse next year.

The Orlando City Council is still wrangling over the swaying east upper deck of the ancient Tangerine Bowl (plus its overflowing sewers, girders obstructing seats and other design faults). The bowl pits Mid-Atlantic Conference and Southeast Conference college football teams each December. "Improvements" were made five years ago, but the structural problems found today have turned up, nevertheless.

The question before the council is whether or not to fix the stadium. Already the council has received $900,000 from a settlement of a lawsuit over construction defects.

▪ Other cultural news is upbeat. Top-flight entertainment has been scheduled into Bob Carr Auditorium, home of the Florida Symphony Orchestra, since it reopened last year.

The World Trade Council of Central Florida, meanwhile, has been entertaining international business meetings this year. Much of the interest is in EPCOT, which will be an international showcase, half of it devoted to displaying goods and cultures of other countries.

While the theme parks are keeping busy, other aspects of the economy are also apparently doing well. The orange crop forecast is 200,000,000 boxes (agribusiness is the state's major business), employment is high and new companies are injecting steady cash-flow into a healthy economy.

But you can't win 'em all.

Waterslide World is on the blocks. Opened in late 1977, it never caught on despite a visual location off Int. Hwy. 4. It just never seemed to get off the ground.

But a new attraction debuted this year and is doing well, from all reports. Wings & Wheels, a commercial aviation museum, is located at Orlando's International Airport.

Raleigh-Durham, N.C.

Population	493,600
Rank	77th
Personal income	$3,337,000,000
Income '77 vs. '76	11.01%

The massive $4.2 billion nuclear power plant that the Carolina Power & Light Co. is building on an 11,000-acre site south of Raleigh—a project that dwarfs other construction in the three-county SMSA—is creating a labor problem.

"It's so big," says a newspaper business editor in Raleigh, "that other construction projects around here are having trouble finding help. But that's the kind of labor problem that economists like."

A full work force of almost 3,500 is working around the clock to put the first of four 900-megawatt reactors into operation in 1984. Full operation is planned for 1990; over the life of the project, workers are expected to receive some $600,000,000 in wages. It is to be one of the largest nuclear facilities in the nation.

▪ Generally, the Raleigh-Durham area is having an easy time of it, insulated from cyclical problems by large government and educational complexes and lacking the industry that suffers with economic downturns.

"There have been a few weak points in retail sales and employment," says the business editor. "And some companies may not be hiring as much as they would normally. The economy may be softening just a little, but nobody's talking about a slump."

Not hardly. In Raleigh, Radisson Hotel Corp. is planning a 350-room hotel, giving the go-ahead on the project after the city announced plans to build a downtown parking deck and after Wake County voters in January approved the sale of liquor by the drink. Other small new hotels or additions are expected to increase hotel capacity in Raleigh by more than 1,000 rooms by the end of 1980.

Construction is well under way on the Falls of the Neuse Reservoir and Dam in northern Wake County, a $100,000,000 project that is to provide water and recreation areas for the area by 1982. And the state is extending Int. Hwy. 40 around the southern part of Raleigh to complete the 31-mile Raleigh Beltline by early 1982.

▪ Two major airlines, Altair and Allegheny, began service at Raleigh-Durham Airport in 1979, and other airlines already serving the area increased their number of flights. A new terminal and expansion of the runway system is being designed to accommodate future growth.

Under construction in Raleigh is a $6,000,000 building for the North Carolina Museum of Art, a $32,000,000 veterinary school at North Carolina State University is expected to begin soon, as will a $2,800,000 athletic facility.

The Plaza of North Ridge, a $60,000,000 office and residential project, is to open eight office buildings with 500,000 sq. ft. of floor space in late 1981. Other phases are still in the planning stage.

Among major industrial growth in Wake County is the announcement by Hewlett-Packard Co., the California-based electronics company, that it will build a research, manufacturing and marketing facility on 230 acres in northern Wake County. The first building is to be completed by late 1981 and is expected to have 700 employes; additional facilities on the site are expected to house 10,000 employes by the year 2000.

▪ Siemens-Allis is expected to employ 300 persons in late 1980 at a plant it is building on U.S. Hwy. 64 for the manufacture of switchgears and other electrical equipment for industry. At full production, it is expected to have 700 employes.

And Northern Telecom has moved the headquarters of its digital switching division to Raleigh. This and other expansion projects by the company may increase its area work force to 2,400 by 1983, making it one of the largest local industrial employers.

In Durham County, an early 1980 completion is expected for Duke Hospital North, a 606-bed, $93,000,000 facility. It is being connected to the existing Duke University Medical Center by a unique quarter-mile horizontal elevator that runs on a thin layer of air.

Much of the county's business growth is under way in the highly successful Research Triangle Park, the 20-year-old facility that has just filled half of its 5,600 acres. Officials there say 1979 was one of their best years; seven new projects are under construction or ready to start, adding 2,200,000 sq. ft. of space and 2,500 jobs.

▪ Also in the park, Union Carbide Corp.'s agricultural products division is investing $20,000,000 for a pesticide research facility that is to have 800 employes when completed in 1981. And Mead Technology Laboratories of Ohio is locating its environmental division in the park, employing 100 persons in a leased facility to be completed in 1980.

Neighboring Orange County, home of the University of North Carolina at Chapel Hill, is growing even faster than Raleigh or Durham.

The university is constructing a new women's gymnasium and plans a new basketball arena in the near future. North Carolina Memorial Hospital, located on the campus but not affiliated with the university, is undertaking a multimillion-dollar expansion of its outpatient facilities.

Business is good in Chapel Hill, according to a chamber of commerce official. "Anybody that can go through the red tape necessary to open a shop can make it," he says. "Open your doors and you will make a go of it."

Richmond, Va.

Population	611,700
Rank	64th
Personal income	$4,675,000,000
Income '77 vs. '76	10.35%

A flourishing public sector—state government and medical facilities—continues to give Richmond one of the strongest economies in the state of Virginia.

The low unemployment rate, in the 3.5% range, stems partly from the fact that the state employs 20% of the Richmond labor force.

Hospital and medical school construction in the area topped $283,000,000 in 1979. City officials report $260,000,000 in new and expanded industrial investment in the first six months alone.

The city escaped the gasoline lines that haunted much of the East during the early summer.

It also attracted a minor league hockey team, the Richmond Rifles, and refurbished the historic Lowe's Theatre as the first permanent home of the Richmond Symphony. The Hartford Ballet company made two extended appearances for the second year in a row.

▪ In downtown Richmond, steelwork has been completed on a 28-story state office tower, a $48,500,000 building that is scheduled for completion late in 1980. State officials have delayed, however, a decision to build a twin tower on a common base, while reassessing the need for a second building.

The State Department of Motor Vehicles moved into its massive seven-story, $13,500,000 building early in the year, and a 24-story Federal Reserve Bank office tower, completed in 1978, is now fully occupied by federal offices and private firms.

United Virginia Bank announced its intention to build a new office tower in Richmond, but has not yet selected a site.

In other downtown activity, the old Main St. Railroad Station, vacant for years, is undergoing a $10,000,000 refurbishing that will include restaurants, commercial and office space. And the city is hoping for federal funds to restore the old Jefferson Hotel, a landmark whose staircase was the model for that used in "Gone With the Wind."

▪ Old Victorian townhouses and rowhouses in such neighborhoods as Ginter Park, Jackson Ward, the Fan District, Church Hill and Shockoe Valley are being restored by the thousands, as these once-elegant neighborhoods make a comeback.

Byrd International Airport, located in neighboring Henrico County, added two taxiways and parking facilities during 1979, and a major expansion of the terminal shared by four airlines is scheduled for the early 1980s.

Industrial expansion has been primarily in the suburbs. Among the major projects:

- Virginia Gravure, which prints magazine and newspaper inserts, is building a printing plant in northern Henrico County. The 134,000-sq.-ft. building will employ some 300 workers when it opens in early 1980.
- DuPont's Spruance Fibres plant, which manufactures a material used in belted automobile tires, is expanding its Chesterfield County facility, originally built in the 1920s. Some 300 new workers will be added.
- Reynolds Metals will relocate its can division headquarters and experimental laboratories in the Chesterfield County Airpark area.
- Lawyers Title Insurance Corp. intends to build a $6,000,000 office building at Brookfield Office Park in Henrico County.

Major hospital construction includes Virginia Commonwealth University's Medical College of Virginia, a $43,000,000 facility in downtown Richmond; a new Veterans Administration hospital in the city, which will provide 694 beds at a cost of $116,000,000; the just-completed 60-bed Richmond Eye Hospital, and Stuart Circle Hospital, also downtown, which will provide 153 beds.

In Chesterfield County, the 292-bed Johnston-Willis Hospital is under construction.

▪ Legal problems continue to delay one ambitious city-backed building plan, known as Project One. The $12,000,000 first phase would include a convention-exhibition center, a 400-room hotel, an office tower and retail shops.

Landowners who would be displaced have lost their case in several courts, but continue to appeal. The city awaits final disposition of the case before issuing bonds for the project.

One discordant note reverberates from the continuing battle over the interstate beltway that would ring Richmond. The northeastern segment of the project is nearing completion, but the city remains opposed to the construction of the remainder, as well as to the proposed relocation of I-95 to the east of the city. Mayor Henry L. Marsh III argues that the beltway would hurt the inner city.

"New highways generate their own use and economic growth around interchanges," says a city planner. "The building of the road would draw business from the city and would be an economic hardship on us."

The question ultimately will be decided by the U.S. Department of Transportation.

Tampa-St. Petersburg

Population	1,396,300
Rank	25th
Personal income	$8,843,000,000
Income '77 vs. '76	10.58%

Weather and tourism are top subjects of concern in the Tampa-St. Petersburg area, and both caused difficulty in 1979.

Located midway down the west coast of Florida, this area is often termed the Suncoast simply because it enjoys more days of sunshine a year than any other Florida area.

In May, however, a storm poured down 17 ins. of rain in less than 24 hours, and caused such damage that President Jimmy Carter designated it a disaster area.

At about the same time, the impact of the gasoline crisis was beginning to cut into tourism. Aggravated by a truckers strike, which created further uncertainties about supply, tourism was off about 12% during the April to June period.

Fortunately for local businessmen, however, Tampa-St. Petersburg long ago diversified so tourism lost its dominant place as the mainstay of the economy.

▪ Tampa today is the industrial hub of the Florida west coast and is seeing an increasing number of light manufacturing, electronics, precision instruments and communication equipment companies relocate to its shores.

It goes without saying that such industries represent the "nonpolluting types"—those that will not destroy the air that tourists search out.

Examples of increased business activity include Stromberg-Carlson's plans to relocate its corporate headquarters to Tampa; the Shriners of North America following a like pattern; joined by Metropolitan Life Insurance Co. regional offices, Colonial Penn Group and the McNichols Co. Others such as General Telephone & Telegraph Co. and Tampa Electric Co., plan to expand existing facilities.

To satisfy the demand for office space created by the influx of new companies and existing expansions, more than 1,900,000 sq. ft. of office space are currently under construction or on the drawing boards. Added to 4,800,000 sq. ft. of office space already occupied today, this will bring the total to 6,700,000 sq. ft.

▪ Across Tampa Bay lies Pinellas County—a county incorporating St. Petersburg, Clearwater and Largo—with miles of white sandy beaches and resort hotels and motels. In the early 1950s, Pinellas County had not one manufacturing company with as many as 150 employes. Today, despite stringent control to keep out industries that raise prospects of pollution, there are over 700 industrial companies in the county, including several employing over 1,000 people.

Just north of St. Petersburg in Pinellas County, construction is well advanced on three new units for a big veterans hospital at Bay Pines. The units, scheduled for completion during the second half of 1980, include $13,800,000 for a 520-bed hospital, $4,300,000 for a 120-bed nursing home and $6,800,000 for a 200-bed domiciliary unit.

Residential housing, which had been moving along 13% above 1978, took a sharp dip in Pinellas County just after midyear. But "Construction Cost Index," the well regarded forecast publication of Mills & Jones Construction Co., remains optimistic about the chances that continued commercial work will keep the construction industry at a high level.

▪ Part of the optimism rests on the work that got underway in Tampa in April, when ground was broken for the "Quad Block" project, considered the most important development in the history of downtown Tampa.

Included will be a 37-story office tower, a 500-room hotel, a two-level retail and plaza area and a 30,000 sq. ft. conference and banquet facility.

The Marriott Corp. announced plans to build a 375-room, 12-story hotel near Tampa International Airport, and Anheuser-Busch plans a joint venture development of a 400-room, $20,000,000 luxury hotel at its Busch Gardens park in Tampa, to be managed by the Sheraton Corp.

Among tourist attractions, Tampa's Busch Gardens is second only to Disney World as Florida's top tourist spot. The park has announced an $18,300,000 expansion program, highlighting an African Timbuktu section, the Crazy Camel and the Scorpion thrill rides and a new dolphin show.

For sporting enthusiasts, organized sports are well represented on the Suncoast, and the local boosters hope that the new hotel construction currently under way will improve the area's chances of snagging the pro football Super Bowl in the early 1980s.

Despite record losing streaks during its early years, the Tampa Bay Buccaneers team of the National Football League has packed Tampa stadium with the third highest paid admissions in the NFL attendance record books.

The popular Tampa Bay Rowdies, which play both an outdoor and indoor soccer season, use Tampa Stadium for their outdoor season in the summer when the Bucs are idle. This year, the Rowdies went all the way in the outdoor season to the soccer super bowl, only to lose to Vancouver.

Hope persists that Tampa-St. Petersburg, which boasts spring training camps for three major league baseball teams, will break through with a major league franchise of its own.

■ As a major tourist area, Tampa-St. Petersburg already features a wide variety of good restaurants. New on the eating scene this year is Crawdaddy's, a 1920s style wharf-shanty on the shores of Tampa Bay; the Embassy, with Kansas City beef in a Mediterranean setting; the Sea Wolf, near Busch Gardens and family priced; The Levee, described as downtown with Dixieland and all the fixins', and the Chinese Pavilion.

The tourism crunch might have been worse except for the huge Tampa-St. Petersburg airport, often termed one of the finest in the nation, with monorails moving passengers virtually to planeside. For 12 months ending August 31, passenger traffic was up 12%, as visitors switched from highway to sky.

American, USAir (formerly Allegheny), Republic, Ozark, Piedmont and Southeast, utilizing their new route freedom under airline deregulation, joined the lines serving the airport, bringing the total to 10 domestic carriers and eight international airlines.

The airport itself continues to have ample resources for the added service, "but we are drowning in automobiles," one of the airport executives said.

A three-stage construction project dealing with traffic problems has begun moving from the design stage, with a $4,000,000 satellite parking lot for 3,500 cars slated for 1980; a new $4,500,000 highway interchange in 1981, and a $2,500,000 expansion of existing rooftop parking garages visualized in another two to three years.

Washington, D.C.

Population	**3,016,800**
Rank	**8th**
Personal income	**$28,277,000,000**
Income '77 vs. '76	**+9.21%**

It would almost seem as though some sort of domestic Marshall Plan were under way in the nation's capital.

Huge chunks of district real estate are in varying stages of construction. Pennsylvania Ave., between the Capitol and the White House, is in the first phase of a half-billion-dollar renovation that will provide hotels, commercial and office space, private housing and a facelift of part of the avenue itself.

Elsewhere in the area, 10,000,000 sq. ft. of additional office space—involving more than 40 projects—is under construction or committed for completion through the end of 1982. A big percentage of that space has been preleased; occupancy of existing office buildings is 99.4%, the highest in the nation.

Construction is expected to begin in 1980 on a $99,000,000 convention center on H St., NW, between 9th and 10th, a decaying neighborhood that is expected to get a shot in the arm from the influx of trade. At nearby Thomas Circle, for instance, developers already plan three commercial buildings.

■ The Georgetown Waterfront, a $50,000,000 residential, commercial, and office complex, is planned to start construction within a year, and just back from the waterfront work is well under way on a $40,000,000 townhouse commercial complex being built on the same block as the plush Rive Gauche Restaurant. Georgetown also sports a swanky new hotel, the Four Seasons.

And of course there's Metro, a continuing success story that has done more to transform Washington in the past few years than any other factor. Metro began Sunday service in September, on the day of the Redskins' first home game, and in December opened a 3.9 mile segment of the Orange line in Arlington, Va.

The subway, which now totals more than 30 miles, continues to breed commercial growth. A recent study prepared by the Federal City Council said that Metro already has helped foster more than $970,000,000 worth of private development near subway stations, and another $5 billion is expected if the full 101-mile subway is completed.

A 3.5 mile segment of the Blue line is scheduled to open in late 1980, extending east of the district into Prince Georges County, Md.

■ Metro's bus division bought 115 sleek new General Motors buses at more than $100,000 each, and 43 articulated buses, 98-passenger vehicles that bend in the middle. Together, bus and rail service are now carrying more passengers than at any time since 1967.

Fifteen years ago, Washington was a sleepy, roll-up-the-sidewalks-at-sunset town, almost totally dependent upon the federal government, with a big crime problem, little growth, and an almost nonexistent cultural establishment.

Today, it is bursting with growth. It is an important business center, abounds in cultural facilities, and has curbed its crime rate. Come midnight, you can find roller skaters on the sidewalks in front of glass-paneled office buildings. The district has replaced New York as the No. 1 site of national headquarters of associations.

"I think Washington has passed the takeoff point—maybe you'd call it the point of critical mass—in its growth," says the vice-president of a real estate brokerage company. "There's just going to be a tremendous increase in the demand for offices, retail space, homes—just about everything. All indications are that Washington will continue to grow and thrive."

■ That's not to say that no problems exist. There are a few.

Leonard Kolodny, manager of the retail bureau of the Metropolitan Washington Board of Trade, says that the rapid expansion of the area's economy has resulted in the area becoming "overstored"—that is, retail establishments are moving in faster than the community can support them.

Mr. Kolodny says he has no figures on commercial bankruptcies, but adds, "Go into any shopping mall and you'll see new stores you've never heard of. Go in there 4 or 5 months later, and a lot of them will be gone."

Even when national or regional

The Bulletin
circulates 257,261 more
newspapers in the
14-County City & Retail
Trading Zones
than The Inquirer
Monday through Sunday

If you're an advertiser and your customers live in the Greater Philadelphia area, then take a good hard look at the map above.

Because in this area, Monday through Sunday, your potential customers will get their hands on 257,261 more Bulletins than Inquirers.

Surprised? You shouldn't be.

Because last year retail and national advertisers, like yourself, placed 1,878,917 more lines of advertising in The Bulletin than in The Inquirer.

This leadership — plus our circulation dominance — make selling very simple.

It pays to put your money where your market is.

And in Greater Philadelphia The Bulletin is the market. Phone: (215) 662-7474

The Bulletin
Morning. Evening. Weekend. Sunday.
Putting your money where your market is.

(Continued from Page 53)

chain stores move here, Mr. Kolodny says, in most cases they face initial financial problems, but they have the capacity to wait out these first lean months:

Retail sales in the SMSA, are flat, running about at the same level as last year, without adjustment for inflation.

Another sore spot is the high cost of housing. Mayor Marion Barry was publicly indignant that he and his wife couldn't find adequate housing in the district for less than $100,000, a price that has become something of an average in the District and the close-in suburbs. The housing market remains strong despite the high costs, but some business leaders worry that spiraling home prices will dampen that market.

- And finally, there's the recent interest rate hike, which the *Washington Post* editorialized would have a chilling effect on both commercial and residential development, and a resulting effect on employment.

This will be more strongly felt in the suburbs than in the district itself, but the full effect won't hit for several years—when projects now being built with long-term, lower-interest financing have been completed.

While the spring gas crisis cut deeply into Washington's tourism industry, out-of-state license plates abounded later in the summer and into the fall, and business leaders say the over-all figures were down only a little from 1978.

Little serenity remains on Pennsylvania Ave. between 3rd St. and 15th St., N.W., as the Pennsylvania Ave. Development Corp. undertakes 19 separate projects, ranging from renovation of the old Willard Hotel, where President Lincoln stayed on the eve of his first inauguration, to the preservation of the five 19th Century building facades at Gallery Row at 7th St., N.W.

- Pennsylvania Ave. itself will be completely relandscaped, with special lighting at selected areas. Sidewalks will be widened and landscaped with a canopy of oak trees, and street furniture will be added. Larger open spaces will be provided at three locations—Western Plaza, Market Square and John Marshall Place, corresponding to the original L'Enfant plan for the city.

As the center city of Washington undergoes major renovations, development has spread outward. Ground was broken in the fall for a $13,300,000 shopping facility, Hechinger Mall, that ultimately will offer shoppers in northeastern Washington some 40 stores.

Developers promised that the mall, located at Benning and Bladensburg Roads and Maryland Ave., N.E., will stimulate the rehabilitation of this entire troubled area.

Giant Food opened a major new store in the Shaw area of northwestern Washington, a significant move into an area that has largely been devoid of supermarkets since the 1963 riots. City officials hope that here, too, the development will have a ripple effect.

- Metro is also having the effect of expanding the central downtown area, through the Washington Circle area on the west, almost into Georgetown, beyond Dupont Circle to the north, and into the northern Virginia office areas of Rosslyn and Crystal City.

Further out in the suburbs, regional malls and shopping centers continue to expand, although not in all cases, according to the Board of Trade's Mr. Kolodny. A new mall opened in Laurel, the Columbia Mall expanded to include a Sears store and the developers of Tyson's Corner shopping center ready plans for a major expansion of their already huge facility.

In the district, business continues to be spotty at Mazza Gallerie, a mall on upper Wisconsin Ave. that contains a Neiman-Marcus store. But completion of a Metro line in this area in the next few years is expected to improve business.

West Palm Beach-Boca Raton

Population	486,700
Rank	78th
Personal income	$3,757,000,000
Income '77 vs. '76	+12.49%

In the past year, the Palm Beach-Boca Raton area has experienced a building boom (single family residences, hotels and shopping centers), a 20% increase in retail sales and a continuing drop in unemployment.

The rate of expansion, which made Palm Beach County the fastest growing county in the nation last year, is beginning to level off, but that is to be expected, according to local observers.

After the 1975 recession, in which county building permits dropped to $69,000,000 in that year's second quarter, Palm Beach went on a building binge during which permits jumped to $146,000,000 in the second quarter of 1977 and $257,000,000 last year. This year's second-quarter jump was a relatively light $21,000,000.

Several major projects are under way, including an expansion of Palm Beach Mall that will make it one of the largest south of Atlanta, the $60,000,000 community of Leasureville in Palm Beach, a $17,500,000 Hyatt Hotel and a $12,000,000 county courthouse expansion. In addition, the $7,000,000 West Palm Beach city hall now is open for business. The first residents are expected to move into the 2,300-acre Professional Golfers Assn. of America project next year.

- Boca Raton continues its steady growth westward. The city's population has jumped from 57,000 to 72,000 in the past two years. "The last couple of years have been phenomenal for us," said C of C representative, Pat Wilson. "It's no longer true that this is a retirement area. We're now drawing a lot of young executives and middle management people who work in Miami and West Palm Beach."

Businesses are beginning to discover Palm Beach County, too. Among the new companies that moved in this year were Siemens Corp. (electronics), Sikorsky Aircraft, Motorola and STP, which brought along its world headquarters. Pratt & Whitney is in the middle of a $19,000,000 expansion which will add 2,000 workers to its payroll.

The energy crunch has brought an unexpected twist for local population growth. The expected shortage of heating oil may be scaring people south. "Our inquiries are double over last year from people seeking information on accommodations for the winter," said Charles Hays of the Greater West Palm Beach Chamber of Commerce.

Meanwhile, several long awaited projects remain on the drawing board. There has been discussion for some time of trying to push through a $150,000,000 road bond issue but, with county commission elections coming up next year, no action has been taken. Because of land price inflation, the county is having a rough time buying the property for a beach project that was approved with a $50,000,000 bond issue two years ago.

On the other hand, West Palm Beach has donated land needed to build an $11,000,000 theater for the performing arts and Boca's historical society continues its renovation of an old home for a new museum.

Meanwhile, Wellington, a posh development centered around golf and tennis, opened its huge polo grounds this year and promptly held a $150,000 Michelob World Cup match that could become a yearly event.

Wilmington

Population	515,500
Rank	75th
Personal income	$4,087,000,000
Income '77 vs. '76	+8.93%

Wilmington, which suffers from an unemployment rate higher than the national average, has plucked out the major economic thorn that threatened to drive at least one of its major job sources out of Delaware.

Responding to howls of displeasure and talk of pulling up stakes by its largest corporate tenants, the Delaware state assembly cut its 19.8% state income tax to 13.5%.

In addition to mollifying Irving Shapiro, chairman of DuPont, and, as such, the state's most important business figure, the tax cut insures the continued alliance between Delaware and Hercules Inc.

But while Hercules, which employs some 3,000 chemical workers at its Wilmington headquarters, now plans to stay in Delaware, it may leave the city proper. Tentative plans to construct a new corporate headquarters outside the city limits could deprive Wilmington of a significant municipal taxpayer.

- Other mainstays of Wilmington's economic life seem relatively well pleased, however. Though the city's unemployment remains roughly two percentage points above the national level, the overall jobless rate dropped from 12.7% in August, 1978, to 10.4% in August, 1979.

DuPont—the mainstay of the area and the state—continues to provide work for more than 22,000 employes. ICI Americas, a subsidiary of Imperial Chemical Industry of London, employs almost 3,000.

Besides its strong showing in the chemical industry, Wilmington also hosts several large automobile manufacturing plants, one of which, Chrysler, sent city and state officials scurrying to Detroit when clouds began to appear on the company's horizon.

Chrysler's well-publicized problems led to several stop-gap measures should continued losses lead to production cutbacks. The automobile maker maintains a plant in Newark, just outside Wilmington, which employs 4,800 people in making Chrysler LeBarons and Dodge Diplomats.

Special tax incentives are under consideration by governor Pierre S. duPont IV, but the Newark plant is considered one of the less vulnerable Chrysler facilities.

General Motors' Wilmington assembly plant concentrates on the Chevrolet Chevette, employing 4,900 people in the process.

The city is also hosting a new employer, Delpro Co., whose $10,000,000 train repair facility will offer 350 new jobs to Wilmingtonians.

The major source of growth within Wilmington in the past year has been new construction, most notably an 11-story office building on the site of Wilmington's old Odd Fellows building.

The 200,000 sq. ft. structure will not completely alleviate Wilmington's crying need for office space, however, and another 200,000 sq. ft. space has been proposed.

Wilmington also hopes to leap into the convention trade with the opening of the $9,000,000, 220-bed Hotel Radisson last spring. Though Wilmington already boasted the venerable Hotel DuPont, the Radisson can provide the ballroom and other convention requirements the DuPont lacks, and, as evidence, it recently signed its first convention for 1981.

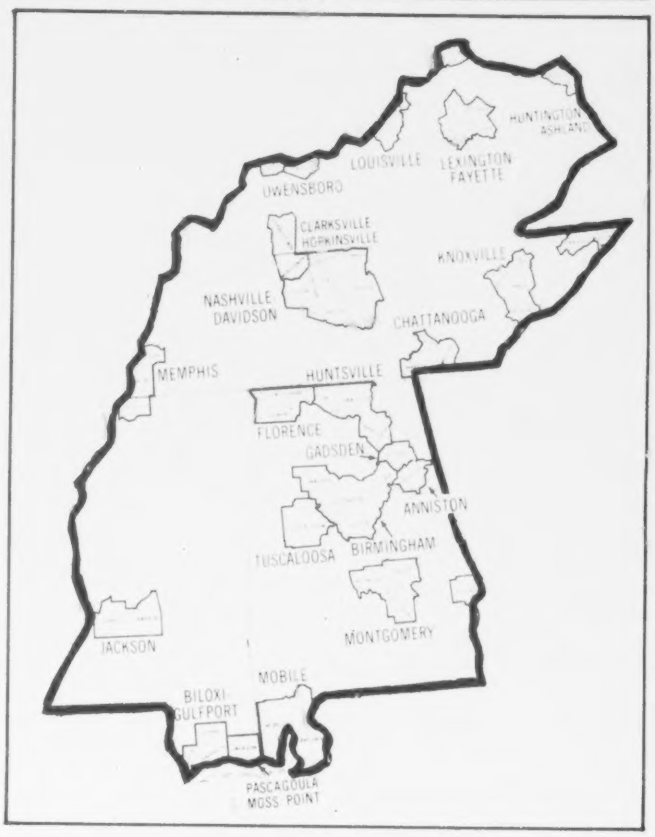
Along with the Radisson's attempt to woo large groups, the state is coordinating local tourist attractions in its first concerted promotion. The area boasts several lovely museums, mostly funded by and dedicated to the immense wealth of the DuPont family.

- The Winterthur Museum, housing one of the country's premier collections of American furniture and crafts; the Eleutherian Mills, where the DuPont family sowed the seeds of its fortune in the gunpowder plants along the Brandywine River, and Longwood Gardens, just over the border in Pennsylvania, are three of the most notable tourist lures.

Future construction in Wilmington will be partly financed by a recent industrial revenue bond, which should bring $30,000,000 to $40,000,000 toward a family court and new complex of doctors' offices next year.

The city's largest medical facility, the 800-bed Wilmington Medical Center, is still fighting federal court battles, however, as it attempts to relocate at a site outside the downtown area. Wilmington residents have argued for expansion of the medical center at its current location.

In retailing, the completion of a large mall eight miles south of Wilmington gives the area a vehicle to attract customers from nearby states with enough gas to get there. Despite Delaware's high personal income tax, the state has no sales tax. The $20,000,000 Christiana mall is fully operational, with the exception of a J. C. Penney's, due shortly.



East South Central

Birmingham

Population	818,200
Rank	46th
Personal income	$5,486,000,000
Income '77 vs. '76	+10.81%

Fifteen years ago, Birmingham was a tense, racially divided place, the scene of church bombings, protest marches broken up by the hard-line tactics of Sheriff Bull Connors and the most impassioned of rhetoric by both Martin Luther King and George Wallace.

Now Birmingham has elected a black man to serve as mayor for the first time in its history.

After a no-holds-barred campaign, councilman Richard Arrington Jr. defeated political newcomer Frank Parsons, a lawyer and travel agency owner.

Earlier, incumbent Mayor Donald Vann, whose support eroded after a summer in which a white policeman accidentally shot a young black girl who was a bystander at a robbery, was defeated in the primary. Although Mr. Vann disciplined the officer, he refused to fire him, a decision believed to have alienated Birmingham's black community, opening the door for Mr. Arrington.

- The business community was as surprised as everyone else with the primary election results, but today, according to several sources, no one is very alarmed at having a black mayor.

"Mr. Arrington has a good record on the city council and will probably pick up some funding support from some business leaders," said one observer.

A major reason for the calmness of Birmingham's business leaders has to be the area's continued strong economic growth. "What recession?" is the way one company head put it.

Indeed, in the face of a year of national jitters and dire predictions of gloom, Birmingham and the surrounding area have forged steadily ahead, continuing the diversification of the economic base.

- The University of Alabama at Birmingham is now the city's largest single employer and is closing in on U.S. Steel for that honor in the metropolitan market. New office buildings are sprouting like kudzu all over the area, reflecting Birmingham's growing role as a regional white-collar center.

On the negative side, however, looms some uncertainty about the economy's effect on Birmingham's backbone industries—coal and steel. U.S. Steel's Fairfield plant late this year announced layoffs of some 400 workers, and observers believe that the number will eventually climb to 1,500.

Other rumors have the operation's large plate mill on the verge of being closed down. Insiders report that the company is concerned with labor productivity and is worried about continued downturns in the national economy.

Just a few years ago, such talk would have been enough to send the entire city of Birmingham into a panic. But today the coal and steel operations, while important, are not the only game in town.

The year saw no fewer than 11 new office space facilities either begin construction or begin planning for the future. These buildings—spread throughout the SMSA—will add more than 3,000,000 sq. ft. to Birmingham's office space inventory, representing a total investment of $119,000,000.

▪ Downtown Birmingham will receive several additions to its skyline in this office blitz. Park Place Towers, a new 15-story building, will be constructed at 19th and 6th Aves. The Iron & Steel Credit Union Bldg. will also be in downtown Birmingham, as will the 11-story Birmingham Plaza Office Tower.

Inverness Center, a $50,000,000 office complex on U.S. Hwy. 280, has announced plans for adding 1,300,000 sq. ft. on a 172-acre tract over the next 10 years.

The University of Alabama at Birmingham is nearing completion of its multiyear, $64,000,000 expansion project. To keep pace with the university's modern medical facilities, most of the area's hospitals and medical centers have begun expansions and additions of their own.

Birmingham's pride and joy, the Birmingham-Jefferson County Civic Center, expanded again this year—this time with a $4,000,000 addition to the exhibition hall.

The city, however, lost its only major league sports team when the Birmingham Bulls of the now defunct World Hockey Assn. parceled out its players to National Hockey League teams. There will still be hockey in Birmingham, though, as the Bulls are now the main farm team of the Atlanta Flames.

Retailers, meanwhile, face a dilemma. Gloomy reports from the north tell them to pull in their horns and dig in for a long battle. Yet sales continue to set records across the board and there are no signs of a slowdown. Loehmann's Village, a $9,000,000 open-air shopping mall of 200,000 sq. ft., opened its doors in October.

Chattanooga

Population	**400,900**
Rank	**96th**
Personal income	**$2,526,000,000**
Income '77 vs. '76	**+9.83%**

A year ago, rumors concerning plans of the Tennessee Valley Authority (TVA) to build a huge office complex and consolidate its thousands of employes into one central location were causing skittishness in the downtown Chattanooga office space market.

This summer, TVA announced plans for its new downtown office complex and, while the consolidation will mean the loss ot TVA leases in many buildings downtown over the next five years, the prospect has generated a lot of optimism. Chattanooga's business leaders took one look at the scale of TVA's plans and realized that the huge complex—to cover 13 acres between Market St. and Carter St.—will mean yet another shot in the arm for downtown Chattanooga's business.

▪ In fact, the revitalization of the city's downtown business district has been under way for almost a decade. Old office facilities have been renovated, new towers have been built and downtown retail stores have undergone facelifts. The result is an active and exciting downtown climate.

The new TVA facility will be the feather in Chattanooga's cap, and already is inspiring plans for additional development. Downtown developer T. A. Lupton has formed a joint venture partnership with the L&N Railroad and has announced plans to build a 400-room hotel, a connecting office building and a parking garage adjacent to the TVA complex.

There also are general plans afoot to build an industrial trade center and a 2,000-space parking garage in the southeast section of the central business district.

All of this adds up to a total investment of more than $200,000,000 in just one 10-block section of Chattanooga in the next few years.

▪ The TVA facility became a reality this year soon after the City of Chattanooga was awarded a $10,000,000 UDAC grant from the Department of Housing and Urban Development. The complex will house both the TVA's computer center and its office of power—with a total of some 3,000 employes. The complex will cover more than 1,000,000 sq. ft. and cost about $130,000,000.

Construction is expected to begin on the computer center soon after the first of the year and a final completion date is forecast for the early 1980s. When finished, the complex will represent the city's largest urban development ever.

In continuing TVA board chairman David Freeman's efforts to make his agency a national model for energy efficiency, the buildings in the complex will employ passive solar heating and cooling systems that will save some 30% on energy costs.

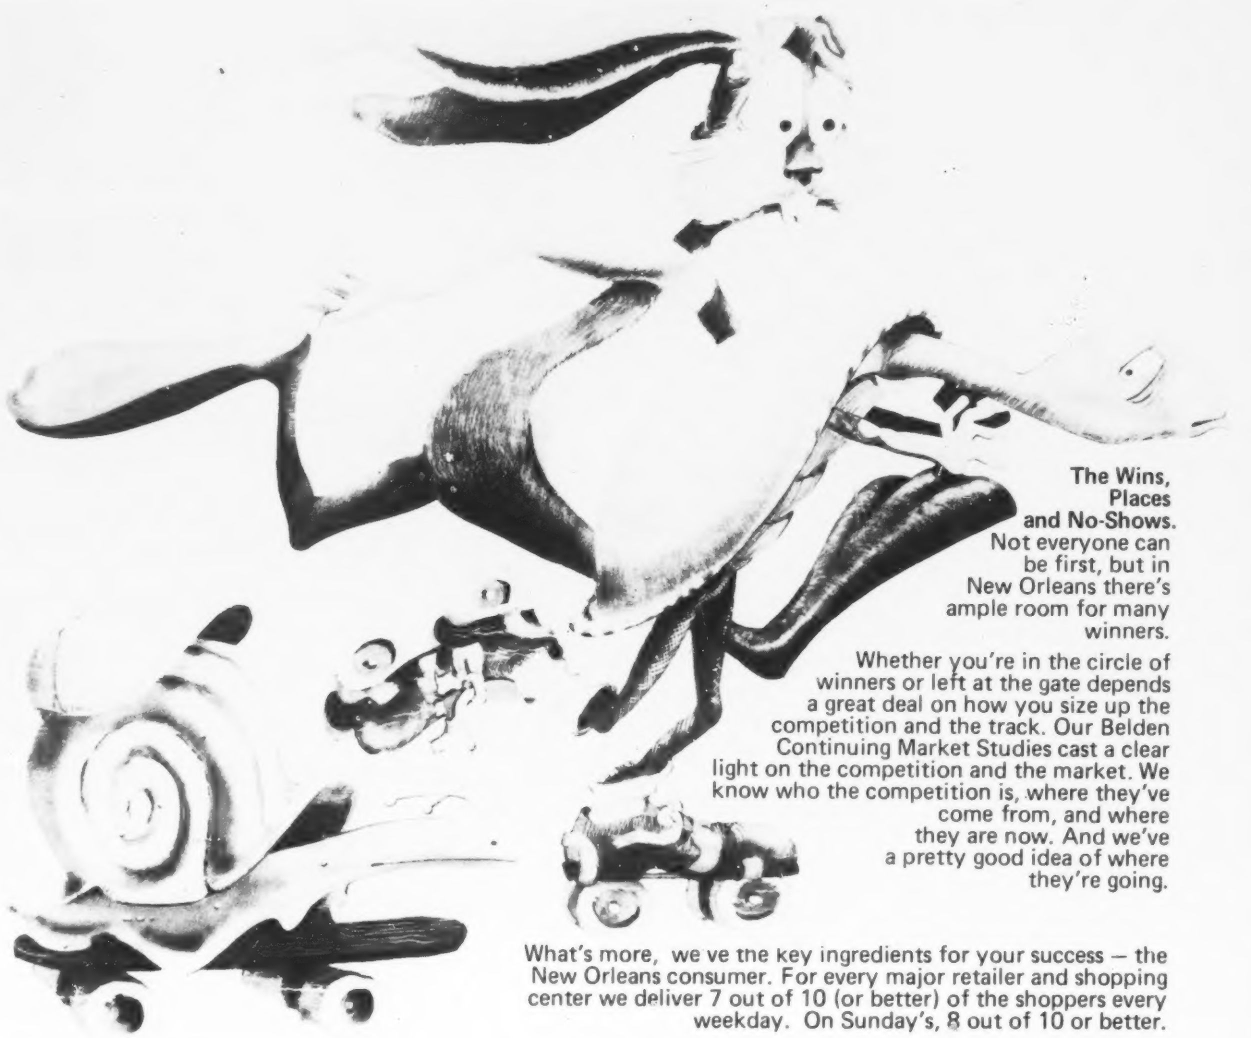
▪ TVA's announcement was not the only downtown activity in 1979. The Civic Forum, a $1,600,000 building housing the chamber of commerce, the visitors and convention bureau and other civic organizations, was dedicated in midsummer. The developer Franklin Haney announced a multi-million-dollar expansion and addition building program for the IBM office building downtown.

Chattanooga's Large industrial base performed strongly in 1979. The Jorgenson Co., a large national steel distribution company, announced plans to build a $7,000,000 plant here.

Selox Inc. opened a new plant, Tuftco added a multi-million-dollar expansion to its operation; Penn-Dixie's concrete division will build a $1,000,000 distribution plant; Synair Corp. will add a new plant, and Vulcan Iron Works continued construction on its $3,000,000 expansion.

▪ The gasoline shortages of last spring and summer took their toll on Chattanooga's important tourist

(Continued on Page 58)



**The Wins,
Places
and No-Shows.**
Not everyone can
be first, but in
New Orleans there's
ample room for many
winners.

Whether you're in the circle of winners or left at the gate depends a great deal on how you size up the competition and the track. Our Belden Continuing Market Studies cast a clear light on the competition and the market. We know who the competition is, where they've come from, and where they are now. And we've a pretty good idea of where they're going.

What's more, we've the key ingredients for your success — the New Orleans consumer. For every major retailer and shopping center we deliver 7 out of 10 (or better) of the shoppers every weekday. On Sunday's, 8 out of 10 or better.

RETAILING in the 80's

So, before you start jockeying for position with new marketing and media stratagems, check with us. It could make the difference between a win or a no-show.

(Continued from Page 55)

industry. Mayor Pat Rose estimates that tourism dropped off by some 40% in the early summer months as the gas supply dropped 15% over-all in the area.

However, the Chattanooga Choo-Choo facility reported continued patronage from both tourists and local residents alike.

Statewide Enterprises, developers of the Lakeshore residential development on the shores of Lake Chicamauga, announced two new expansion phases that will add some 31 condominium units. Also outside the city, a six-story, 110,000-sq.-ft. office building was added to Eastgate Center, a 13-building office complex.

Though Chattanooga continues to be a hard-working industrial center, it still shows some respect for saving treasures of the present and past. The city government wanted to construct a new bridge over the Tennessee River, replacing the Walnut St. bridge, which it was forced to close after more than 100 years of use.

■ But the new bridge would have disturbed the McClelland Island bird sanctuary in the middle of the river—upsetting area environmentalists—and the University of Tennessee at Chattanooga announced plans to begin an archeological dig at Bluff Furnace, an ante-bellum industrial development that lay in the path of the bridge.

The digging is proceeding—for artifacts. Plans for the bridge have been shelved for now.

Knoxville

Population	**455,700**
Rank	**85th**
Personal income	**$2,723,000,000**
Income '77 vs. '76	**+11.6%**

Preparations and planning for the 1982 International Energy Exposition capture the spotlight in the eastern Tennessee city of Knoxville, overshadowing growth and capital improvements in industry, commerce and municipal developments.

Big budgets were laid out this year for Expo expenditures. In June, the municipal government earmarked $24,000,000 for the acquisition and preparation of the Expo site. According to John Ulmer, executive director of the Knoxville Community Development Corp. (KCDC), $20,000,000 will be spent on a state pavilion featuring a "technologically advanced" arena for exhibit display.

A total of $22,000,000 will go toward construction of the U.S. pavilion, the first scheduled for construction. KCDC also purchased land to construct a nine-acre park on the Expo site.

To accommodate the 12,000,000 visitors expected during Expo's six-month run (May 1 to Oct. 31), Knoxville plans to build two new hotels. In November, ground was broken for a 200-room hotel and adjacent 125-unit apartment complex two blocks east of the Expo site.

A 300-room Hilton Hotel is planned as part of KCDC's East West Mall urban renewal project, which is to offer from 120,000 to 200,000 sq. ft. of retail space at a cost of $13,000,000.

■ To promote commercial expansion, the 27-story United American Plaza opened this year, offering 60,000 sq. ft. at its base for commercial leasing.

Public works projects in Knoxville are aimed at increasing the growth potential of the area. The state highway department has backed the improvement of the interstate highway system in Knoxville. Under way is a stretch of 10-lane highway and three-level interchange to replace the present four-lane intersection of Int. Hwys. 40 and 75.

Already new industry is heading for Knoxville: In May, Magnavox Consumer Electronics Group broke ground for its newly relocated headquarters. Magnavox' $7,500,000 plant on Strawberry Plains Pike near Int. Hwy. 40 is expected to have 550 employes when it opens next year.

The facility will replace current headquarters in Fort Wayne, Ind. A local company, McCarty, Bullock & Holsaple, designed the three-story building, planned for the 26.5-acre site.

■ Energy-related industries in the Knoxville area anticipate increased attention, if not additional growth as a result of the Expo. The Tennessee Valley Authority and Union Carbide, leaders in energy research and development, are two of these, soon to be joined by Boeing Engineering & Construction Co. of Seattle.

Boeing announced plans this year to construct a 200,000-sq.-ft., $45,000,000 manufacturing plant in Oak Ridge. The plant will be built under a $235,000,000 joint contract awarded by the U.S. Department of Energy to Boeing, the Los Angeles-based Garrett Corp. and Goodyear Aerospace Corp. of Akron, O.

The facility will manufacture centrifuge enrichment machinery for two DOE uranium enrichment plants. The first phase is expected to have 250 employes, plus 40 technical staffers moving to Oak Ridge from Seattle.

The new facility will broaden the current DOE base in the Knoxville area. Union Carbide's nuclear division operates three DOE facilities outside Knoxville. The Oak Ridge Laboratory conducts research; Oak Ridge gaseous diffusion plant enriches uranium 235 for use in nuclear power, and Oak Ridge Y-12 serves as a defense facility.

Nuclear fusion is the focus at Oak Ridge Laboratory. Research and development efforts are devoted to perfecting what the lab terms an unlimited and invaluable energy resource. Oak Ridge is also developing methods to use fossil fuels through experimentation with a technique for converting coal to synthetic fuel.

■ TVA, the nation's largest producer of electricity, spent $23,500,000 this year on energy projects. Part of the sum has gone to construct the first of six nuclear plants. Another portion went toward solar energy development efforts.

As part of a current TVA solar research project, solar water heaters have been installed in 1,000 Memphis homes in order to study energy cost savings. Kentucky broke ground in September for the first of 44 homes that will be fueled exclusively by passive solar energy, another TVA project. For fiscal year 1979-80, about $4,000,000 is budgeted for solar and renewable resource work.

Industrial expansion interests raised by Expo are expected to affect the housing market. Lafitte Howard, business editor of the *Knoxville News-Sentinel*, speculates that the cost of residential housing in 1980 will increase at a rate considerably above the 10% recorded for this year.

Louisville

Population	**887,300**
Rank	**41st**
Personal income	**$6,146,000,000**
Income '77 vs. '76	**+11.50%**

The nation's energy problems may be hurting Louisville's economy by cutting into the amount of traffic passing through the city and taking a bite out of its tourist trade, but the high gas prices and occasional shortages are also helping the city begin to deal with one of its most serious problems—air pollution.

One of the nation's more industrialized urban areas, Louisville has been unable to meet the Environmental Protection Agency's air quality standards. Tackling the city's air pollution problems is complicated by its location down in the Ohio River Valley, with air tending to hang in the valley and inversions and stagnant air situations common.

In an effort to cut the amount of pollution caused by auto traffic, the city has been increasingly promoting vanpooling programs and public transportation. Since 1974, the marketing budget has grown from $60,000 to $250,000, with much of the advertising effort aimed at informing residents of the city's air quality problems and the need for use of public transportation.

The effort met with some success, but is wasn't until the high prices, gas shortages, and long lines hit the nation last spring that the popularity of public transportation in Louisville really took off.

■ Bus ridership shot up to record highs this summer—normally the slack time of the year—and the city ran out of vans for those interested in vanpooling. Transit officials also say that there has been a significant shift in rider demographics—including more discretionary ridership and a greater number of white-collar, downtown workers and many requests have come in for bus service to new parts of the Louisville metropolitan area.

The surge in popularity of public transportation also resulted in a change in the transit authority's marketing efforts. This fall's radio, tv and print advertising, for example, positions public transportation as a convenient and economic alternative to driving a car.

The new campaign also places more emphasis on showing people that public transportation is fun and easy to use as well as striving to inform the public about the services that are available and how to use them.

The uncertain gas situation has also convinced the city to concentrate its tourism advertising in a smaller area in the coming year, focusing its efforts on such cities as Columbus, Evansville and Indianapolis, rather than more distant cities such as Chicago and Cleveland.

■ The desire to avoid unnecessary driving also contributed to the emerging interest in rehabilitation of the city's close-in neighborhoods. The Old Louisville Preservation District just south of downtown has been particularly popular, with many middle and upper-middle-income couples and families buying and restoring the large, old homes located there.

Louisville's downtown area also continues to prosper and, as 1979 draws to a close, it appears that construction of the long-awaited Galleria project will begin shortly.

A $101,000,000 project, the Galleria is planned to cover two blocks and to include 100 shops, two office towers, a commercial building and a multistory, glass-enclosed courtyard and garden.

Though the city and county have been supporters of the project from the beginning, the developers have encountered resistance from historic preservation groups that fear that the project would destroy the Louisville landmarks located in the area and from environmentalists who questioned the wisdom of a project that might adversely affect the area's air quality by attracting more vehicular traffic into the downtown area.

Plans and work on other downtown projects are moving along as well. Construction has already begun on a $100,000,000 riverfront complex containing apartments, a convention center, a hotel, retail space, three office towers and parking; work on the $37,000,000 Kentucky Center for the Arts is expected to begin shortly, and a downtown site is currently being sought for the new University of Louisville sports arena.

New bridge construction symbolizes the ever changing Memphis skyline.

Memphis

Population	**888,800**
Rank	**40th**
Personal income	**$5,731,000,000**
Income '77 vs. '76	**+11.67%**

Memphis—the "Home of the Blues"—has its troubles, including a continued influx of unskilled labor, and lingering bitterness from last year's fire, police and teacher strikes. But 1979 brought a number of signs that the city has turned the corner.

Among the reasons for optimism:

- A revitalized chamber of commerce has formed a broader basis of support for its industrial recruiting activity. A year ago, the chamber had been on the brink of bankruptcy. Now the rejuvenated chamber is pushing ahead on its promise to help the city get 20,000 manufacturing jobs over the next 10 years and the first of them—a tv manufacturing facility for Sharp Electronics of Japan—opened this fall with 750 jobs, and the prospect of 2,000 in the future.
- Airline deregulation has boosted Memphis air traffic. Delta and American Airlines are expanding their Memphis operations, and United designated the city as a major hub and doubled its flights in and out of the city.
- Progress is being made on the $5,200,000 Beale St. Renovation Project and the $30,000,000 Volunteer Park development. Work on turning the four-block Beale St. area into a tourist and entertainment district with a French Quarter atmosphere was finally begun this year after some delays.

At the same time, construction work began on the museum portion of the Volunteer Park complex planned for Mud Island, located across from downtown. The monorail and walkway that will link the island's planned amusement, educational, and cultural facilities with the downtown Cook Convention Center are expected to be completed by late 1980.

- Tourism boomed after Elvis Presley's death, including 15,000 visitors who crowded outside the gates of his mansion on the anniversary of his death.
- The city was successful in keeping the Memphis Rogues NASL soccer team from fleeing the city (it is now locally owned), and it came close to luring the Baltimore Colts football team to Memphis and the city's Liberty Bowl stadium. Locals remain hopeful that Memphis will be next to get a National Football League franchise.

■ Despite the promise of better times ahead, many of Memphis' problems remain to be solved. One of the most pressing is how to help the large number of unskilled workers who have migrated to the city from the surrounding agricultural areas.

Observers say that in recent

years the low productivity of these untrained workers has caused at least one major manufacturer to leave Memphis, has inhibited other companies from coming to the city and continues to trouble firms located in the area.

It is likely that many manufacturers being courted by the chamber of commerce to move to Memphis will be taking a close look at the success (or failure) of the recently established Sharp plant.

▪ There is also some concern regarding the future of the city's downtown retailers. Although the downtown area continues to be the city's center of banking and government, almost all the new office and retail development in recent years has followed the residential flow toward the southern and eastern outskirts of the Memphis area.

The southern district near the airport has grown especially rapidly, with two giant 1,100,000 sq. ft. malls now under construction nearby and expected to open in 1981. The completion of the northern leg of I-240 is expected to spur similar growth in the northeast part of the metropolitan area.

In response to the challenge of the outlying retailers, the 10-block downtown Mid-American Mall was completed a few years ago and has helped to stabilize downtown retailing.

Programs such as the Memphis in May festival, the Schlitz Jazz festival and the Oktoberfest help draw people downtown, but it remains to be seen what will happen once the large outlying malls open.

Mobile, Ala.

Population	**435,300**
Rank	**90th**
Personal income	**$2,448,000,000**
Income '77 vs. '76	**+11.53%**

Statistics have yet to construct a clear picture of Mobile, Ala., after the harbor town was ravaged by Hurricane Frederick, but as Randy Rein, business editor of the *Mobile Press Register*, remarks, "Freddy pretty much tore up things around here."

Yet even hurricane clouds can have silver linings, and Mobile may well uncover unexpected benefits once the storm debris is swept away.

"We are living the last quarter of 1979 in a transfer economy," Mr. Rein says. "And I think it's safe to say that as a result, Mobile's economy is better than normal."

According to Mr. Rein, the biggest boost will be felt by the construction industry. Up to now, this has been the weakest sector of the local economy. "Now construction workers have more than enough to do," he says. "For now, recovery is a shot in the arm."

▪ While most construction is for repair of homes and office buildings, rebuilding activity may boost new residential construction which felt a continued slowdown in single-family housing for 1979.

It likewise may add to construction of apartment units. The chamber of commerce reports that permits for apartment units for the first half of 1979 were already up 15% over the same period in 1978.

Sales of consumer goods have also snapped back, as recovery creates marked changes in consumer spending. Area food stores report sales of frozen foods and canned goods are booming, as consumers hasten to restock depleted freezers and shelves.

Car sales are likewise up, outdistancing the depressed norm for the rest of the nation. "Car business was dismal here this year," Mr. Rein comments. "Now people are going ahead and purchasing new cars to replace those crushed or lost in the flood."

Retailers report that consumers are spending readily available insurance refunds to replenish fall wardrobes and "to buy that long-awaited color tv." Meanwhile, area residents have chosen to postpone major expenses—furniture, housing repairs—until they receive their low-interest federal loans.

▪ Jewelers report active sales of gold jewelry. Again, consumers have opted to apply insurance cash-on-hand to this speculative investment.

While figures on the extent of damage have yet to be compiled, industries report that business is back to normal. "The greatest damage occurred to homes in the low-lying areas," states Ted Hackney, a representative of the chamber of commerce. "At present, the vast majority of businesses are back in operation, perhaps with a patched-up roof or front end. This is particularly true of industrial plants.

The go-ahead is still intact for industrial construction plans announced this year. These include Shell Chemical's plans to build a plant to produce Pydrin insecticide, expected to employ 100 workers. This will adjoin its $50,000,000 herbicide plant that opened last year, employing 200 workers.

Kay-Fries Chemicals of New York broke ground on a $17,000,000 plant in the Theodore Industrial Park, a major industrial complex 14 miles south of downtown Mobile. Kay-Fries' plant is expected to begin operation in early 1981.

▪ Degussa Corp. plans to add four new plants to the company's current $200,000,000 complex in the Theodore Industrial Park. When completed, the U.S. facility will duplicate an existing specialty chemical facility in Antwerp, Belgium.

New industry broadened Mobile's industrial base and increased job opportunities in 1979. Union Carbide announced the start-up of its multi-million-dollar Linde division air separation plant in Theodore Park. The 410-ton-per-day facility supplies high-purity oxygen, nitrogen and argon products to industrial customers.

Autlan Manganese Corp. of Mexico City purchased the Ferro Alloy Complex, formerly operated by Airco Inc.'s alloy division. Autlan Manganese hired 100 workers when it put the facility back into operation.

Halter Marine added 250 workers when it expanded its facility this year. Halter Marine leased a shipbuilding facility at the Port of Chickasaw last year.

S. S. Steele & Co. purchased a site for a new 53,000-sq.-ft. home office and manufacturing complex. Steele is the area's leading "on-your-lot" builder of residential homes.

Nashville

Population	**786,000**
Rank	**51st**
Personal income	**$5,138,000,000**
Income '77 vs. '76	**+12.26%**

If Nashville officials have their way, no one who visits the city in 1980 will be able to miss the fact that the city is celebrating its 200th birthday.

The celebration will start Dec. 23, 1979, with a reenactment of the arrival of explorer James Robertson to the area and will continue throughout the next year.

All of the city's major annual events have agreed to use the "Century III" tag line, and souvenirs such as buttons, t-shirts, historical calendars and coffee table books emblazoned with the trademarked Century III logo will abound.

(Continued on Page 60)

THE 2-BILLION DOLLAR WOMAN.

DIARIO LAS A
Ejecutad
5 A

She's alive and well and living in the Greater Miami Latin Market

That' right! She's Latin.
And she's affluent. As a matter of fact, she's worth $2-billion each and every year.

$2.2-billion, to be exact*. For that is the aggregate annual income of the more than half-million Spanish-speaking people making up the Greater Miami Latin Market.

Being affluent, this 2-billion dollar woman spends a lot of money. On food. On fashion. On jewelry. On cosmetics. On decoration. On her home. On her kids. On her husband. On her whole family.

Oh!, yes, she's very much family-oriented. Her activities revolve around her whole family. And it's a large family, averaging 3.4 members per household*.

But for you--the advertising decision-maker-- the most important aspect of this 2-billion dollar woman is that she speaks and reads in Spanish. Not only does she speak and read it, but she lives, breathes and thinks in Spanish. Therefore, she makes her buying decisions in Spanish.

And the place she goes to every day to get help in making those buying decisions is DIARIO LAS AMERICAS. The No. 1 Spanish-language daily newspaper. Particularly oriented to her and her family.

Make sure you get your fair share of this 2-billion dollar woman. Reach her by advertising in DIARIO LAS AMERICAS

(Continued from Page 59)

The centerpiece of the celebration will be a week-long festival beginning April 24, the 200th anniversary of the arrival of the first families to the area.

Already planned are reenactments of the first landing; a special musical program saluting the city at the Grand Ole Opry; an imaginative "reverse parade" in which the "parading" musical groups will remain stationary at various historical points while the "onlookers" walk by; a birthday gala picnic at Centennial Park and, of course, a giant fireworks display to "Celebrate the past while looking to the future"—Century III's slogan.

- Nashville certainly has its share of things to celebrate, with a highly diversified economy that has enabled the city to enjoy orderly, steady growth in recent years and earned the city a reputation for being recession-proof.

Aside from a one-month jump to 5.5% in July, Nashville's unemployment rate this year stayed under 4.5%, well below the national average.

Though high interest rates caused most local contractors to cut down on "speculative" construction and to concentrate on "lock and key" projects, Nashville construction also continues strong.

- Among the more popular residential areas are Brentwood (south of the city and featuring homes with prices starting at $100,000) and Hendersonville (northeast of the city with prices starting at $60,000).

The Hickory Hollow area, nine miles southeast of downtown, has seen the greatest retail growth, with many small retailers and fast-food outlets beginning to cluster around the giant Hickory Hollow mall that opened in the fall of 1978.

In downtown Nashville, portions of the long-awaited, $34,500,000 Tennessee Performing Arts Center are expected to open in the spring, with the 31-story office tower atop the arts center scheduled for completion by the fall.

- Chamber of commerce officials are also enthusiastic about the long-term potential of a large tract of downtown land, formerly occupied by railroad track, that has recently become available.

The local economy was also given a boost by Firestone's announcement this spring of plans for a major expansion of its Nashville tire plant. Work started last summer on the $145,000,000 expansion, which is expected to add 3,000 jobs when it is completed in 1983.

Officials at the city's chamber of commerce add that many companies are examining the Nashville area as a site for new facilities, indicating another year of good growth in 1980.

Most indicators may agree with the chamber's prognostications, but troubles afflicting two of the city's big industries—tourism and recording—should not be overlooked.

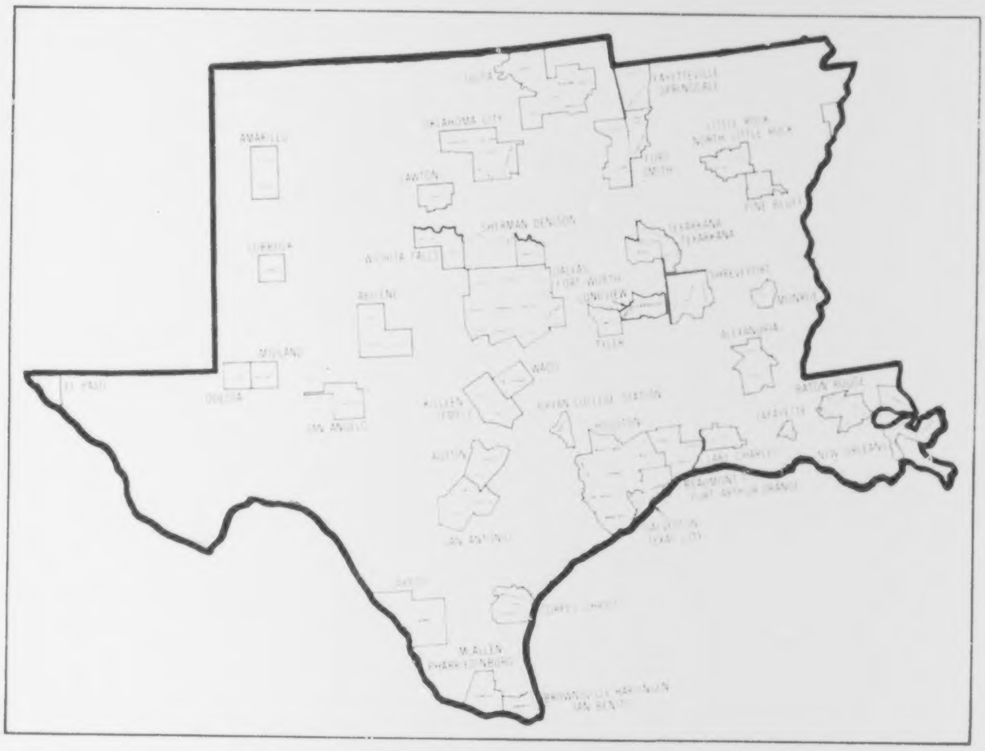
As a result of the high gas prices and shortages, the number of tourists visiting the Nashville area slumped badly this summer. Most estimates pegged the mid-summer slump at about 15% off last year's pace, although the tourism season ended on the upswing as the gas situation improved.

Additional advertising that was run in a 500-mile—"one tankful"—radius around Nashville during the summer may also have helped improve business.

More than 7,000 hotel rooms were built in the Nashville area in the last decade (including 1,000 in 1979 alone). Civic leaders express justifiable concern that rising gas prices and the faltering economy will result not only in less tourism but will also cut into the number of business travelers visiting the city, and hurt the growing hotel industry.

- The sluggish recording industry also caused some sour notes in Nashville, where more than 50% of all U.S. singles are recorded. The rising cost of petrochemicals used in the manufacture of records has caused prices to shoot up, and the relative dearth of new music stars has not helped record sales either.

The surge of interest that followed the death of Elvis Presley helped record industry sales, but, as one observer pointed out, "Elvis won't be recording any new albums."



West South Central

Austin

Population 477,900
Rank 81st
Personal income $2,946,000,000
Income '77 vs. '76 .... +13.66%

Beautiful Austin, capital of Texas, with its almost recession-proof economy firmly rooted in government, education, tourism and a growing industrial complex, has proven an irresistible lure to newcomers.

With one of the lowest cost of living indexes in the country, plus its mild weather, diverse recreational and scenic offerings and the general feeling that eating and drinking are among the joys of life, Austin is the kind of place a person is likely to visit and think, "Gee, it would be nice to live here."

And therein lies what many see as Austin's biggest current worry: How to grow gracefully—if at all.

Over servings of Portuguese soup at the Inn at Bushy Creek, or rack of lamb at Erich's, while savoring barbecue brisket tacos at a Casita Jorges, or a beer at historic Scholz's Garten, conversation may turn to Austin's growth.

- Although there hasn't been talk of building walls around the city, a bumper sticker has appeared with "No Vacancy" written over a representation of the Austin skyline.

The growth/no growth debate has bubbled to the forefront here, triggered primarily by two issues—whether scenic areas along Barton Creek should be turned over to apartment and shopping center development, and how the city should move ahead with the revitalization of its downtown.

While the debate continues, so does Austin's growth, proof of the enduring strength of the market. The area continues to attract light industry and is gaining a reputation as a new electronics and computer industry center.

Recent plant expansions have been accomplished by IBM, Texas Instruments, Motorola, Tracor and Westinghouse. Production is under way at new Austin plants for a Hughes Tool Co. division, the McNeil Laboratories division of Johnson & Johnson, Data General and Advanced Micro Devices.

- Retail sales were down slightly in 1979, but retail expansion continued. The first Foley's department store outside of Houston highlighted a major expansion of the Highland Mall regional shopping center and construction started on Melvin Simon's Barton Creek Square, planned as an enclosed regional mall with at least six department stores when completed by 1981. At least 11 other new shopping centers have opened since 1977.

New office towers are under construction or announced for three Austin banks, and a 400-room downtown Hyatt-Regency also is planned. The *Austin American-Statesman* plans a new lakeside downtown plant.

For lovers of the arts, the Paramount Theatre for the Performing Arts was completely renovated and then reopened and Symphony Square was completed.

Austin continues to be a city where employment remains high and unemployment low—at about half the national average. Housing starts in 1979 were above the record 1978 level.

- Austin Mayor Carole Keeton McClellan noted her city did not face the severe gasoline shortage that hit other areas of the country, including Texas, in 1979, and gas prices generally did not reach $1 per gallon.

There apparently was enough of a shortage and price increase, however, to result in greater use of public transit, she indicated.

Mayor McClellan noted the city is diversifying its fuel base for its electric plants to coal, lignite and nuclear and away from a total reliance on natural gas.

"The diversification is particularly important to our commercial and industrial customers," she said. "Austin prides itself on being able to attract and maintain financially sound and environmentally clean industries, which use electricity rather than other fuels in their production efforts. Since Austin is now using fuels in other than natural gas and oil for the production of electricity, price changes in those fuels have a smaller impact on business."

Baton Rouge

Population 444,600
Rank 87th
Personal income $2,894,000,000
Income '77 vs. '76 .... +11.87%

Like Old Man River—the mighty Mississippi to the West—Baton Route just keeps on rolling along.

Anchored by state government offices, a giant petrochemical industry and the main campus of Louisiana State University, the area's economy leveled off a bit from the frantic pace it has kept in the last few years, but it showed few signs of weakness.

Two major projects highlighted the development of downtown Baton Rouge in 1979—completion of the Centroplex area and plans for a $50,000,000 hotel, office and bank complex adjacent to Centroplex.

Occupied early this year, Centroplex features a new municipal government building, an arena and exhibition hall, a plaza, a theater, an arts and science center and a parking area. The bill was some $55,000,000.

- Plans were announced for an early 1980 groundbreaking of the hotel, office and bank complex, which is to house City National Bank. Baton Rouge officials are still lining up tenants for the 20-story office building and negotiating with a major chain for the planned 300-room hotel.

Several older downtown hotels are being refurbished, but the new hotel would be the first major new hotel in the central downtown.

"These two projects will give us a brand new downtown—a whole new look," says a local business leader.

New Orleans-based Kirschman's department store opened a major facility on Florida Blvd. in Baton Rouge this summer, but other than a spate of small office building projects, there was little other major construction in the downtown area in 1979.

Most of the major growth in the area came southeast of the city, but still in the SMSA. "The commercial real estate market there is very, very strong," says a Baton Rouge real estate agent, noting dozens of light industries, shopping plazas, and professional and office buildings going up in the area. "That is the really healthy part of the city."

- Residential construction in the SMSA—which consists of East Baton Rouge, Ascension, Livingston and West Baton Rouge parishes—is centered mainly in the northeastern part of East Baton Rouge Parish. And some growth is beginning to occur in Livingston Parish, spurred by parish-backed mortgages that allowed the purchase of private homes at interest rates as low as 8½%.

"It's only a matter of time until East Baton Rouge fills up, and then you're going to get a lot faster growth in the other areas," says a newspaper business editor.

In the same vicinity, Toscaloosa Sands Field, a natural gas field that extends from Texas almost to the Mississippi line, is being opened for development. It's one of the largest natural gas finds in the continental U.S., and will be a big spur to industrial development in Baton Rouge as more companies get involved in exploration and development.

Perhaps the strongest segment of the SMSA's economy is the petrochemical industry, which lines the Mississippi River from Baton Rouge south to New Orleans. Dozens of giant corporations manufacture an array of different petrochemicals ranging from gasoline to plastics.

In 1979, expansion continued, with Goodrich building a large chemical plant, and Shell Chemical Co. taking option on 1,200 acres for a yet-to-be-announced expansion.

- Louisiana State University, with some 26,000 students and a budget of $78,000,000 for its Baton Rouge campuses alone, continues to expand. Dozens of new buildings and renovations are planned or under way for 1980, including renovation of the old chemistry building, a $6,300,000 project; construction of an architecture, fine arts and landscape architecture building, $7,200,000; a two-floor addition to the library, $10,500,000; construction of a new agronomy building, $7,200,000; a new forestry, wildlife and fisheries building, $7,900,000, and construction of a continuing education center, $24,500,000.

The state government, which employs more than 13,000 people in Baton Rouge, with a payroll in excess of $25,000,000, continued to grow, although no major new spending projects were planned in 1979, an election year in the city.

Baton Rouge's port facilities, fourth largest in the U.S., set a record of 70,000,000 tons in 1977, an increase of 4,000,000 tons over last year. According to Bill Herbert, an official with the port commission, a million tons will be added in 1979.

An expansion project is due to start at the city's Ryan Airport in early 1980, including construction of four jetways, which would allow passengers to board flights directly from the terminal.

Also planned is a $6,000,000 expansion of the terminal building. Other improvements, including construction of additional parking facilities, an access road from Int. Hwy. 110 and construction of a National Weather Service building, have been completed.

■ Still vexing the metropolitan area is the question of whether to build a new airport in an outlying area to service private or general aviation, thus reducing traffic at Ryan. A $2,500,000 site study is to be completed in early 1980, and the Greater Baton Rouge Airport Authority may then make a decision.

The issue has been a controversial one, with the mayor favoring a new airport and the airlines and residents of proposed airport sites in opposition. The airlines favor expansion of Ryan Airport.

"We have had, literally, at least 32 studies on a new airport over the last 20 years," says a newspaper editor, "and I don't know whether this new study will make any difference. It just seems to be one of those issues that for some reason isn't resolvable."

Dallas-Fort Worth

Population	2,719,900
Rank	9th
Personal income	$20,595,000,000
Income '77 vs. '76	+12.89%

When the recession of 1973-74 hit the U.S., the question in the Dallas-Fort Worth "Metroplex" was "What recession?" Now, as the country appears headed toward another recession, this area does not expect immunity, but plans to weather the storm well.

In spite of one of the fastest rising cost of living indexes in the country, the Metroplex has remained a booming area. Interest in corporate moves to the area—which fed the boom of the past decade—show little sign of abating at the start of the '80s. The economy continues to create more jobs than a steady flow of new residents can fill.

The area continues to be one of the nation's most active housing markets, in spite of some slowdown fueled by rapidly rising prices and a shortage of mortgage money.

■ The dynamic Metroplex is anchored by its landlocked "skyharbor," the Dallas-Fort Worth Regional Airport (DFW), a major growth stimulator for the entire area, but particularly for the 35-mile area separating the two cities.

Braniff International, American and Texas International airlines—which have all been expanding service—are working on expansions at DFW. Braniff moved its headquarters from Dallas to new DFW facilities in 1979 and also is expanding its terminal facilities. Texas International plans a $39,000,000 expansion of its terminal.

American Airlines completed shifting its headquarters from New York to temporary Metroplex headquarters during 1979. Its new headquarters facilities at DFW are expected to be finished by early 1982. American also has a new southern reservations center under construction at the airport.

An example of DFW's impact on its immediate area can be seen in development of a foreign trade zone authorized in August, 1978. A year later, the 259 acres of raw land set aside for the zone were completely leased to developers, except for 80 acres held in reserve by the airport.

Adjacent to the zone, Woodbine Development Corp. unveiled plans for 500-acre DFW Freeport, an industrial and office park that is expected to include a hotel.

■ Although the whole Metroplex area has continued to boom, the biggest surprise is Fort Worth, a city that often seemed unable to decide whether it wanted growth or no-growth. In 1979, business leaders made it clear they would aggressively pursue revitalization and growth.

Bass Brothers Development Co. has undertaken a three-phase downtown revitalization project that includes construction of a $34,000,000 Tandy Center Hotel, improvements to a nine-block area of Main St., and renovation of 12 buildings, including historical landmarks, for use as retail, restaurant and office space.

Chamber Development Corp. has purchased two city blocks for redevelopment under its "Project Front Door" revitalization program.

Woodbine Development Corp. of Dallas plans a $31,500,000 renovation of the historic Sheraton-Fort Worth into a Hyatt Regency. Also planned for downtown is a 150-acre park on the slopes of the Trinity River. Away from downtown, Fort Worth's historic stockyards area is also undergoing renewal.

■ Another sign of Fort Worth's attitude: Late in 1979, the Economic Development Council named McKone & Co., a local agency, to help develop a comprehensive marketing program, including advertising, promotion and public relations, aimed at encouraging corporate relocations to Fort Worth.

In Dallas, development has continued at its usual torrid pace, both downtown and in the northern area of the city. As it continues to grow as a convention and business center, hotel space remains tight, although several hotels are under construction or announced and more rooms become available each year.

As of late 1979, there were at least 10 major commercial office construction projects under way or announced in downtown Dallas, paced by the $100,000,000 Plaza of the Americas.

As a sign of Dallas confidence, a $35,000,000 sports arena is under construction downtown to house major league pro basketball and hockey teams—although the city doesn't have them—yet.

In the business-like manner typical of Dallas, the city plans a $1,000,000 outdoor scoreboard system for the arena that it figures will be paid for by advertisers—at the rate of over $200,000 annually.

■ Although a continued shortage of gasoline or a significantly more expensive energy supply are seen as factors that could radically affect the way the Metroplex may grow in the future, gas shortages and odd/even rationing did not hurt retail sales in 1979.

In far north Dallas, Prestonwood Town Center, a $93,000,000 enclosed complex with five anchor stores and over 150 shops, opened in August. Within a month, plans were unveiled for the "Quorum," a 167-acre office, shopping and hotel development across the road from Prestonwood.

Plans also were dusted off for a Dallas version of Houston's Galleria, to be anchored by Marshall Field & Co. and Saks Fifth Avenue in an older north area. Sanger-Harris announced an innovation for Dallas—leasing its air rights for an eight-story office and parking development over an addition to be built to its Preston Center store.

The continuing population growth and the 1979 gas shortage left Dallas beginning to face up to two related problems—traffic congestion, particularly along the 30-year-old Central Expressway, and inadequate mass transit. Debate about both issues heated up in 1979 and is sure to intensify in the '80s.

El Paso

Population	443,300
Rank	88th
Personal income	$2,204,000,000
Income '77 vs. '76	+9.43%

El Paso, like many cities throughout the nation, is feeling the bite of the unstable economy. But the city's proximity to Mexico and its two newly formed financing agencies have cushioned recessionary effects.

Within the past three months, city government officials have approved formation of the El Paso Industrial Finance Corp. (EPIFC) and the Housing Finance Corp. EPIFC is a nonprofit development group that will issue bonds to spur industries to locate in the El Paso area.

The city has lost much industry in the past because Texas is bordered by states that have offered low-interest development bonds for more than 20 years.

■ In addition, the city's twin-plant arrangement with neighboring Mexico allows basic materials and machinery to be imported duty free for manufacturing plants located in Mexico. The agreement lets American industry take advantage of cheap labor markets in El Paso's sister city, Juarez, and pump U.S. dollars into that sluggish border city.

Since the beginning of the year, General Motors Corp. has opened several assembly divisions under the agreement. Businessmen are optimistic that the revenue-bond program will fuel a boom in industrialization when the funds become available at the end of the year.

Underwriters for the Housing Finance Corp., meanwhile, are taking bids on more than $100,000,000 in tax-free bonds to help middle and low-income people buy homes in El Paso.

Applications already are being accepted, and it is expected that revenue from the bonds will be made available to borrowers at between 8½% and 9½%.

■ This strategy is expected to pump new life into the city's housing starts, which have been down considerably from last year. A provision has been established allowing 40% of the funds generated from the bond sales to be set aside for new housing.

El Paso's conventional mortgage market dried up early this spring when the inflow of savings at local thrift institutions remained negligible, while the Texas usury ceiling continued to force an artificial ceiling on El Paso mortgage rates—a ceiling considerably lower than the national secondary market.

In the energy area, El Paso fared better. There were few, if any, lines at gas stations during the "gas crunch." El Paso residents had plentiful supplies of gasoline and diesel fuel throughout the year.

While retail sales were declining across the nation this summer, an informal survey showed El Paso businessmen were experiencing record sales. This came as the city's two largest industries changed their marketing strategies in anticipation of an economic slump.

Apparel manufacturers adjusted their operations early in the year to gear for shorter lead times and smaller orders. They knew retailers would be cutting down on inventories and asking shorter time spans between ordering and delivering.

Also, the El Paso Tourism and Visitor's Bureau, anticipating a gasoline shortage during the city's peak summer tourist season, changed it marketing focus towards the air traveler.

The strategy apparently worked. Air travel into the city has increased 37%.

Although hotel-motel occupancy along El Paso's interstate highway, which runs through the center of the city, has been down considerably, occupancy at hotels catering to tour groups has risen and the city's tourist-related income is expected to reach an all-time high.

Roach can help you make a name for yourself.

Roach, the largest producer of iron-on advertising transfers in the world, has made a name for itself by making names for others. Roach iron-ons have been used with tremendous success as self-liquidators, image-makers, giveaways, mail-order fulfillments—you name it. Customers love them, they don't cost much and they keep on selling your product over and over.

And Roach makes it all so easy for you. We've got a transfer to work with any type of fabric and virtually any budget…and the toughest quality checks in the industry. Our services, from design and marketing to delivery when and where you want it, are unmatched in the industry.

So why not let Roach help you make a name for yourself. We've had a lot of practice.

100 MARKETS

(Continued from Page 61)

look back at the pack, Houston, America's super boom town of the 1970s, has slowed only slightly as it races into the '80s. As a local financial analyst put it, "In Houston, a recession is when the rate of increase declines."

Residential construction gives the clearest example. According to a National Assn. of Home Builders forecast, total housing starts in the metropolitan area in 1979 were down 22% from the previous year—to a still whopping 46,960. Starts in 1980 are expected to be about 2% below the 1979 level. Even with the 22% decline, however, Houston led the nation in housing starts for the fifth consecutive year.

An influx of foreign money in recent years has been a factor in the market for commercial and residential real estate. Now this has suddenly been augmented by a flood of money from Californians looking for ways to avoid the hassles of expensive land, strict zoning, environmental restrictions and—increasingly—rent controls, that are hampering housing investments in their state.

- Houston has not escaped the current national fascination with converting apartments to condominiums, although there is some feeling that the trend has peaked here.

A clear sign of confidence in Houston's future is that nonresidential construction has continued its maddening pace. Following a record year in 1978, the value of construction contract awards in Harris County during the first seven months of 1979 was up 41% to over $1.5 billion.

In office leasing, including preleasing, Houston has led the nation for the past two years and the leasing activity isn't slackening. Office space nearly tripled in Houston during the 1970s.

It was like frosting on the cake when it was decided in 1979 that Texas Commerce Tower, already under construction, should rise to 75 stories instead of 70, a reflection of strong preleasing. Only federal aviation height restrictions prevented it from going higher. The structure, announced in 1978 as El Paso Tower, was 65% leased before construction began. It will be completed in late 1980.

- Other examples of the strong leasing activity include the First International Plaza/Houston Oil & Minerals Tower, a 55-story structure downtown that is fully leased while still under construction, and First City Tower, a 40-story downtown office building scheduled for completion by early 1981. Announced in March, it was about 50% leased by September, before construction began.

The office space—and housing—is needed by the businesses that are continuing to relocate and expand in Houston and the people who are going to work for them. Historically, the area's rapid population growth occurred because the economy created more jobs than could be filled by the resident labor force. That situation continues.

The Houston SMSA, with an estimated population of 2,595,400, expects to have a population of 2,957,000 by the end of 1980 and nearly 3,500,000 by the end of 1985.

- From 1973 through 1978, the Houston SMSA averaged an annual net gain of 72,500 in employment, which translated into a 6.6% annual compound growth rate. In 1979, even with the slowing national economy, employment grew about 4%. Average unemployment for 1979 will be in the range of 3.7% to 3.8%, well below the national average.

Houston is experiencing rapid growth in better-paying jobs. The Texas Employment Commission projects that nearly one-third of the area's growth in employment through 1985 will occur among professional and managerial groups.

Retailers are working to serve the increasingly affluent market. In 1979, Sharpstown Center announced an expansion that will boost it to a total of 1,500,000 sq. ft. and make it Houston's largest regional mall—until Sears builds an announced regional mall of 2,000,000 sq. ft., largest in the South.

Greenspoint Mall also plans to expand to 1,500,000 sq. ft. As of September, San Jacinto Mall was the only regional mall under construction, but six others were announced or in the talking stage.

- Department store sales slowed for a short period in 1979 when gasoline was in short supply and the area shifted to an odd/even gas purchase plan. During the period, some discretionary driving was apparently eliminated. Retailers expect something of a rerun in 1980—reduced driving if gas supplies are tight.

On the good side of the gas shortage was a noticeable increase in carpooling and vanpooling, with encouragement from the Metropolitan Transit Authority. MTA is also studying the feasibility of a nonauto transit mall downtown.

In its role as a center for energy development, Houston is increasingly becoming an international city. Through September, eight more foreign banks established Houston offices in 1979, bringing the city's total to 44.

As of 1979, the city ranks fifth nationally in consular offices with about 50, including one of two U.S. offices established by the People's Republic of China. The city also received its long-sought U.S. passport office in 1979.

- Work isn't all there is to life in Houston. For people not interested in the football Oilers or baseball Astros, which have both developed statewide followings, there are also professional basketball and soccer teams.

For less athletic spectators there are also offerings of opera, ballet, symphony and theater. The runaway hit of 1979, ironically imported from New York, was "The Best Little Whorehouse in Texas," a musical about the closing of the Chicken Ranch in La Grange, not too far from Houston.

Houston is also a place where people can make a hobby of trying new restaurants. Some 200 open here in a month. But what else can you expect from a boom town?

Little Rock

Population	**376,400**
Rank	**100th**
Personal income	**$2,514,000,000**
Income '77 vs. '76	**+11.29%**

Reentering the top 100 markets this year is Little Rock, the capital city of Arkansas. Marked by a balanced economy and below average unemployment, this Sunbelt city has achieved steady, stable growth in recent years.

Today, half of the state's 2,500,000 population finds itself within a 60-mile radius of Little Rock. Built in a free foreign trade zone on the banks of the Arkansas River, this city attracts primarily light industry and distribution-warehousing operations.

In July, Target Stores, a subsidiary of the Minneapolis-based Dayton-Hudson Corp., announced plans to build a major distribution center in Little Rock. The national discount chain, new to Arkansas, plans a two-phase approach to construction. Completion of phase I should bring 600 jobs to the area. By the end of phase II, the facility should comprise 1,000,000 sq. ft., and employ 1,000 workers.

It is expected that the facility will handle distribution for the entire Southwest region. Once the center is operational, Target plans to open two retail outlets to serve the Little Rock area.

- Apparently, Little Rock escaped all but the fringes of the 1979 gas shortage. As all across the nation, prices loom at 95¢ or better a gallon. Yet, while many station operators have restricted daily hours, gas appears to be in abundance. Business has not been adversely affected, and retail sales are stable, according to Randy Tardy, financial editor of the *Arkansas Democrat*.

"Tourism is down slightly," he says, "but this is largely attributed to rumor rather than reality."

Still, rising gasoline prices have forced Little Rock residents to adopt conservation measures. In conjunction with the state energy and highway and transportation departments, and with cooperation from major area corporations, the Little Rock Chamber of Commerce instituted a car pool/van pool mass transit system this year.

Already, Bell Telephone, Levi Straus, and Remington Arms have led other companies in the development of car pool programs for employes. Several companies have purchased vans to contribute to gas saving efforts.

- The highway and transportation department provides computer "match up" services to locate rides for commuters. The energy department assists in the design of corporate car pool programs. And the chamber of commerce acts as mission control, handling phone inquiries from potential commuters.

Meanwhile, airline deregulation seems to have benefited Little Rock residents, even while causing cutbacks in service. Combined effects of deregulation and the jet fuel shortage have forced major carriers to consolidate service for the long hauls, often sacrificing stops in Little Rock. Braniff International Airlines, for example, recently pulled out all service to the city.

However, both Delta and American Airlines are vying for new routes. Each seeks the Little Rock-Tulsa and Little Rock-Dallas routes to supplement present service.

According to Jim Flowers of the chamber of commerce, while the over-all number of flights has decreased, service to major metropolitan areas has increased. "We now have more of the kind of service we need," he comments. "We have more flights a day to Washington, New York, Chicago and Atlanta than we did before."

In some cases, smaller airlines are taking over routes dropped by the major carriers. Royal Airlines will now offer connector service to St. Louis. Ozark received permission to fly the St. Louis-Little Rock-Dallas route, though as of the end of October, service had not yet begun due to prohibitive fuel quotas.

- On the ground, new construction is limited in Little Rock. This can be attributed to the 10% usury ceiling. This maximum allowable interest rate imposed by the state has created a tight money market in Arkansas. With little money for mortgage loans, housing starts are declining.

Most major construction is concentrated in downtown Little Rock, which is destined to undergo significant refurbishing. Efforts spearheaded by the Little Rock Progress Unlimited group resulted in plans for a $70,000,000 riverfront project.

This joint public and private venture will include a 70,000 sq. ft. exhibition hall and adjacent meeting rooms, a 450-room Hyatt Regency hotel, 300,000 sq. ft. of office space, a large amount of retail space, parking ramps and a 17-acre riverfront park complete with amphitheaters and bike and jogging trails. Also planned is restoration of the Capital Hotel.

The convention center is part of an ongoing effort to revitalize urban Little Rock. As more residents return to the city, retail operations that formerly fled to the suburbs are increasing efforts to develop a downtown business base. Numerous restaurants are cropping up to promote a formerly nonexistent nightlife.

In various stages of construction are three new banking complexes. Commonwealth Federal Savings & Loan opened a $3,200,000 office building this summer. Savers Federal Savings & Loan's $15,000,000 complex is nearly completed. First Federal Savings & Loan has earmarked a two-acre block, where it will begin construction sometime next year.

Elsewhere in the downtown area, the Metro Center six-block pedestrian mall continues to thrive.

The Farmer's Market, a drawing card for suburbanites and farmers from outlying districts, is the main attraction. A feasibility study conducted during the last year examined the prospects for turning the temporary edifice into a permanent structure, a move that may foster commercial growth in downtown Little Rock.

New Orleans

Population	**1,141,000**
Rank	**33rd**
Personal income	**$7,706,000,000**
Income '77 vs. '76	**+10.81%**

Oil may be fueling discontent in many areas of the country, but oil and its companion natural gas are sources of power behind the boomtown growth that's engulfed New Orleans.

Louisiana is the nation's second largest (behind Texas) producer of oil and the leader in the production of natural gas. And the body of water south of New Orleans is the nation's center for offshore oil rig operations. It is estimated that one out of every four jobs in the Crescent City's metropolitan area depends on oil and gas. In the surrounding areas, the estimates run to one of three.

Many workers not involved in oil and gas related industries, rely on conventions and tourism for their livelihood. More than 46,000 permanent jobs in the New Orleans area are pegged to the $1.1 billion tourism business. Nearly 32% of that goes for lodgings in the more than 22,000 available hotel and motel rooms.

- The city has seen some immense hotel construction, and a number of additional super hotels are under way. Among them: The 50-story Sheraton New Orleans with 1,200 rooms; the $35,000,000 "super luxury" Trusthouse Forte hotel in the Canal Plaza Development, and the 400-room addition to the Marriott hotel, an expansion that will make this hotel the largest in the Marriott chain.

Two huge convention facilities—Rivergate and Louisiana Superdome—offer 134,000 sq. ft. and 160,000 sq. ft. of exhibit space respectively. But the city sees the need for even larger facilities, and financing for a 225,000-sq.-ft. facility on the River is under discussion.

Commerce and retail space is also tight. Occupancy rates for office space run 95%, with rents ranging from $10 to $13 per sq. ft. The downtown business area, which accounts for about 15% of all the retail sales in the SMSA, is adding about 640,000 sq. ft. of retail space.

The Canal Place Development, a project expected to revitalize the riverfront area between the French Quarter and the central business district, represents one of the first large-scale, multi-use projects in the New Orleans area.

Phase One, a 32-story, 680,000 sq. ft. office building, opened in August and Phase Two, which will include a 250,000-sq.-ft. retail mall anchored by a Saks Fifth Avenue, is scheduled for completion in 1982. Already plans are being drawn up for a second office tower, another hotel, and a condominium and townhouse residential complex.

- Other new construction projects include Poydras Plaza, a structure with a 1,250-room Hyatt Regency, the 425,000 sq. ft. Amoco building, the 470,000 sq. ft., 24-story building with the address 1250 Poydras, and a 150,000-sq.-ft. shopping mall; the International River Center, a 23-acre riverfront project that was inaugurated by the 1,200-room New Orleans Hilton which opened two years ago, and the Pan-American Life Center, a 700,000-sq.-ft., $50,000,000, 27-story office complex.

- In addition to Canal Place and Poydras Plaza, new retail space will include a complex of specialty shops and restaurants called Piazza d'Italia.

Outside the central business district, there's plenty of healthy retail activity. New Orleans has five shopping centers with more than 400,000 sq. ft. each where retail space rents for $6 to $15 per square foot.

Together, these centers total more than 4,000,000 sq. ft. and enjoy an occupancy rate of approximately 98%. The Crescent City area also claims 24 shopping centers of between 100,000 and 400,000 sq. ft. each. There is more than 4,200,000 sq. ft. of space in these centers and they have an occupancy rate of 85% to 90%. Rents run between $3 and $13 per square foot.

- Demand for office space rests in part on companies related to oil and gas which make their headquarters in New Orleans.

These and other oil companies will undoubtedly use the services of the Louisiana Offshore Oil Port (LOOP)—the nation's first deepwater terminal for crude oil imports.

Scheduled for completion in 1980, the $500-million LOOP will enable supertankers to unload their cargo into storage facilities mined out of naturally-occurring salt domes. One study predicts that within 10 years LOOP will generate approximately $4,900,000 in new plant investments and create 25,000 new jobs.

The offshore activity matches the LOOP's potential. More than 100 wells are scheduled by Louisiana L&E Co. for drilling by the end of 1979. And Shell, working with McDermott, has constructed a drilling platform taller than the Empire State Bldg. to reach the 100,000,000 barrels of oil and the 500 billion cubic feet of natural gas lying in 1,000 feet of water in the gulf off New Orleans.

Oklahoma City

Population	**789,400**
Rank	**50th**
Personal income	**$5,327,000,000**
Income '77 vs. '76	**+11.65%**

Business is booming in Oklahoma City. While the unemployment rate stays low, building and

Convention visitors to San Antonio may ride a river taxi from their downtown hotels into the Convention Center.

businesses have been soaring.

Construction is up 6.6% in '79. More than 2,400,000 sq. ft. of office building space is either under construction or being renovated. Industrial and commercial construction is up 10% for the first six months of '79, compared to a year ago.

"The office demand is tremendous," one Oklahoma City businessman said. According to a recent study, the city's office building occupancy rate is near 95%.

By midyear, more than 500 acres of new industrial and business parks were under development. For instance, there is the 180-acre World Airport industrial park, the 160-acre Lakeside Park, the 40-acre Meridian business park and a 14.2 acre Great Plains industrial park.

▪ KOCO-TV is building a new $2,000,000 corporate headquarters; construction has started on a 14-story, 294,000 sq. ft. Galleria Tower; construction is to be started on the 19-story 344,000 sq. ft. Mid-America Plaza.

Other major office building projects include the 400,000 sq. ft. Texas International Northwest Place; the 215,000-sq. ft. Century Plaza; the 100,000-sq. ft. Sheraton's Century Plaza Mall and the Nichols Hills Executive Center.

Taking advantage of vintage edifices, the city is on a renovation binge, reviving such downtown buildings as the Harbour Longmire building, the Leonhardt building, the Magnolia building and the Midtown Center.

For retailers, Oklahoma City is building four new shopping centers. The largest of these ventures is the Quail Springs Mall, a 1,000,000 sq. ft., 140-store, $20,000,000, 95-acre project expected to be completed in late 1980.

Three other smaller centers (in the 130,000 to 190,000 sq. ft. range) are now under construction.

▪ And as the buildings go up, sc go the rents—now up to $8 to $12 per square foot.

The University of Oklahoma Health Sciences Center has been expanding with the construction of the Oklahoma Children's Memorial hospital and a new parking garage. Plans to renovate the Veterans Administration hospital have just been announced.

While commercial and industrial building may be up, residential building was down for the first eight months of '79. Only 868 permits for single-unit dwellings were issued for that period, as contrasted with a whopping 3,317 a year prior. In the next year, one Oklahoma City business reporter predicted fewer than 5,000 houses will be built.

However, the condo craze sweeping the nation is capturing Oklahoma City. Sycamore Square, with 44 two-bedroom units is being constructed and another eight-story, 80,000 sq. ft. building one block from the Galleria in the central business district is planned.

▪ Oklahoma City's employment picture has been bright indeed. The August rate of 3% fell below the state average of 3.2% and the national unemployment rate of 6%.

General Motors rolled its first Citations (small car) off its Oklahoma City assembly line last year. The first shift of 2,400 is expected to expand this year.

As predicted, the GM union wage of $8.50 an hour sent tremors throughout Oklahoma City's business community. The UAW was accepted by a 2-to-1 vote, in a basically nonunion town.

In the wake of GM's entrance, wages have gone up in other manufacturing segments of the community. For manufacturing in the city (GM included), the average hourly rate is $6.59. Western Electric, with its workforce of 5,000, pays an hourly wage of $8.

There has also been good growth in the retail area with employment up 71,100. While retail sales have been down, "the employment picture has been so darn good," one resident commented.

▪ The Galleria, the key in Oklahoma City's reclamation of the central business district, has yet to sign its first retailer, according to city sources. In contrast, Sheraton-Century Plaza has more than 100,000 sq. ft. of space rented out to various small boutique retailers.

School openings this fall were delayed with a two-and-one-half week strike by the teachers over a pay issue of approximately $1,000. The board of education obtained a decree from the courts saying the American Federation of Teachers had lost its bargaining powers by waging an illegal strike.

Once the Sooner football season is over, Oklahoma City's blockbuster events are the state fair and the National Rodeo finals. The state fair hosted a record crowd of 1,500,000 persons last summer and the rodeo has moved to the Myriad Convention Center so more spectators can be seated.

In the recreation and entertainment area, Oklahoma City now has a new 1889'ers Harn Museum and Gardens—a pioneer homestead located on 10 acres. Also the fun has been expanded at the city's Springlake Amusement Park. A new park, River Front Park, is now on the drawing boards.

San Antonio

Population	**1,037,800**
Rank	**37th**
Personal income	**$6,156,000,000**
Income '77 vs. '76	**10.24%**

San Antonio can be best compared to its river: Steadily flowing, recently urbanized and, in places, deep with potential.

The river with its flagstone landscaped walkway meanders through the heart of the city, offering an oasis of green calm to visitors and residents alike.

Twenty feet above the river, however, the rest of the world has stepped up the pace of what was once a sleepy little town at the beginning of the long cattle drives north.

Three national chains are building 500-room hotels within two blocks of the Riverwalk—and each other—to satisfy the tremendous jump in tourist and convention business San Antonio has seen in the last 10 years. And this business still came tumbling into town even during the worst of the recent national gasoline crunch.

Just down the street, the Rouse Co. has been studying a potential site for a $50,000,000 center-city shopping mall, behind the Alamo, the city's perennial symbol, which would include high-rise office space and condominiums.

Federal grants are changing the face of the city, financing new plazas, walkways and pedestrian malls. Encouraged by the new look, residents are renovating formerly vacant buildings all over town.

Downtown housing is all the rage. Four 1880s-era office buildings are being converted into luxury apartments, while further down the block, several hundred garden apartments, financed by a consortium of downtown banks, are almost totally leased and there is demand for more.

▪ During the 1970s, attention-grabbing growth areas like Dallas and Houston tended to overshadow Austin. Now San Antonio's mix of the old and new seems to have increasing appeal to corporate executives disillusioned with glutted freeways and smog.

A city of Mexican charm in the midst of modern growth, San Antonio teases Dallas and Houston with advertising telling those cities they should take a deep breath, enjoy life and be more like San Antonio, a place of grace, not haste.

Among those who have expressed enthusiasm about San Antonio is Levi Strauss Co., which recently announced plans for a third manufacturing facility in the area, bringing the company's total San Antonio employment to 2,500—the largest concentration in the country for the apparel giant.

Union Camp Corp. just completed a $10,000,000 corrugated box plant in preparation for more growth from local customers.

Hartford Insurance finished a $3,000,000 regional office building on the north side of town, bypassing Houston and Dallas to handle growing numbers of Texas customers from San Antonio.

Big city convenience in a small city atmosphere is part of the San Antonio attraction. But practical realities favor San Antonio, too.

Two coal burning electrical generating plants recently built by the city utility provide sufficient surplus that the city is negotiating with Mexico to trade extra power for natural gas. Another energy source due to come on line by 1983 is the South Texas nuclear plant.

The area is particularly attractive to labor-intensive industries hungry for low skilled, union free labor. Present wages are as much as 25% below other areas, but they are likely to increase as more companies arrive.

Population remains steadily on the rise, and with it brings more home construction and retail sales. Encouraged by constant increases in retail activity, Melvin Simon & Associates just put the finishing

(Continued on Page 64)

At Burgoyne the Mini-Market is very big.

As America's most experienced Mini-Market operators, we've done more Mini-Market tests on a larger scale in more cities than anyone in the business. We're called on so often because:
1) We can conduct your test in practically any city you choose;
2) Our superior trade relations allow more complete distribution;
3) Our field staff controls everything, from warehousing to shelf maintenance;
4) Our extra experience produces a more meaningful picture of what you can expect on full-scale roll-out;
5) And, of course, we report market shares and related data.

Call us about your product; we'll go anywhere for you.

(Continued from Page 63)

touches on a second 1,000,000 sq. ft. regional shopping mall and has purchased land for a third to be built in the next five years.

The Federal Reserve Board's move to make mortgage money more expensive has taken the edge off the local housing market—which had been growing at 35% a year—but the high numbers of local military personnel should lessen the sting of a major recession in home building (one military base pumps more than $1.5 billion into the local economy).

Tulsa

Population	628,500
Rank	62nd
Personal income	$4,501,000,000
Income '77 vs. '76	+11.72%

Tulsa continues to enjoy an economy far heathier than the rest the nation, thanks to the increased profitability of the energy business and strong demand in the aerospace and housing sectors.

The SMSA, which includes Tulsa, Creek, Osage, Rogers, Wagoner and Mayes Counties, could boast an unemployment rate of only 3.3% in June of this year—down from 3.8% in June, 1978. Total unemployment in the period was up about 2%, to 289,300. What's more, total personal income increased 15.7%.

And announcements of new businesses and expansions promise to soak up a good portion of the remaining labor pool. A major project includes a $21,000,000 plant and corporate marketing headquarters to be built by Hilti Inc., an arm of Hilti A.G., headquartered in the European principality of Liechtenstein. The complex will employ up to 1,000 in the production and marketing of power tools and fasteners.

- Other new industrial development or expansions include:
- A new 130,000 sq. ft., $3,800,000 plant being built by Baker Packers, a division of Baker Oil Tools Co., that will employ about 400.
- International Metal Co.'s $3,000,000 expansion of its metals processing facility, which will create 40 new jobs.
- Oklahoma Gas & Electric's recent announcement of plans to add a third 550 megawatt coal-fired generating unit, to cost $320,000,000.
- Latoka Engineering Co's $500,000 plant expansion to manufacture oil field and chemical processing equipment—an expansion that will create about 100 new jobs over two years.
- International Harvester's plan to build a $20,000,000 plant in Wagoner to produce Paystar heavy duty trucks, where 250 will be employed initially, growing to 600 by 1982.

Other factors promising strong industrial activity include an announcement by McDonnell-Douglas that it will spend $5,400,000 on capital improvements on its Tulsa facility and the award of $20,000,000 in Space Shuttle Orbiter work to Rockwell International's Tulsa division.

The market has also experienced a boom in retail and commercial development and expansions.

Major projects announced in the past year include:

- A $3,500,000, three-building office complex called Koger Executive Center.
- A $1,200,000 Wal-Mart store in Jenks.
- A $47,000,000 project called Kensington Center, which will include a 362-room Sheraton Hotel, a shopping center and a Sakowitz department store in Tulsa, to open in 1982.
- A 37,000-sq.-ft. "super store" to be built by Safeway Stores in the Gilcrease Hills Shopping Center.

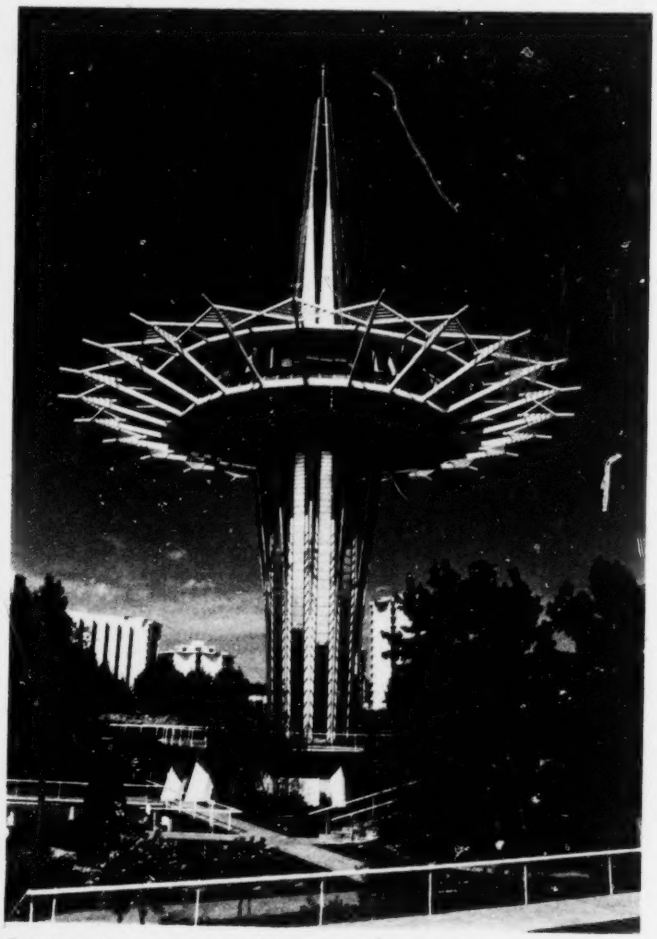
Despite the construction activity, retail sales have not kept up with inflation, with total sales for the first half of 1979 only 10.2% above the similar period in 1978, with the market's cash registers ringing up about $1.36 billion. In the second quarter, however, automotive sales were up 20%.

- Air travel, too, was up—about 11%, as the Tulsa International Airport broke a one-month record in July by recording more than 100,000 passengers.

In the housing category, Tulsa continued to show strong growth. In fact, *Housing* magazine rated it "excellent" in every category in compiling its housing demand index.

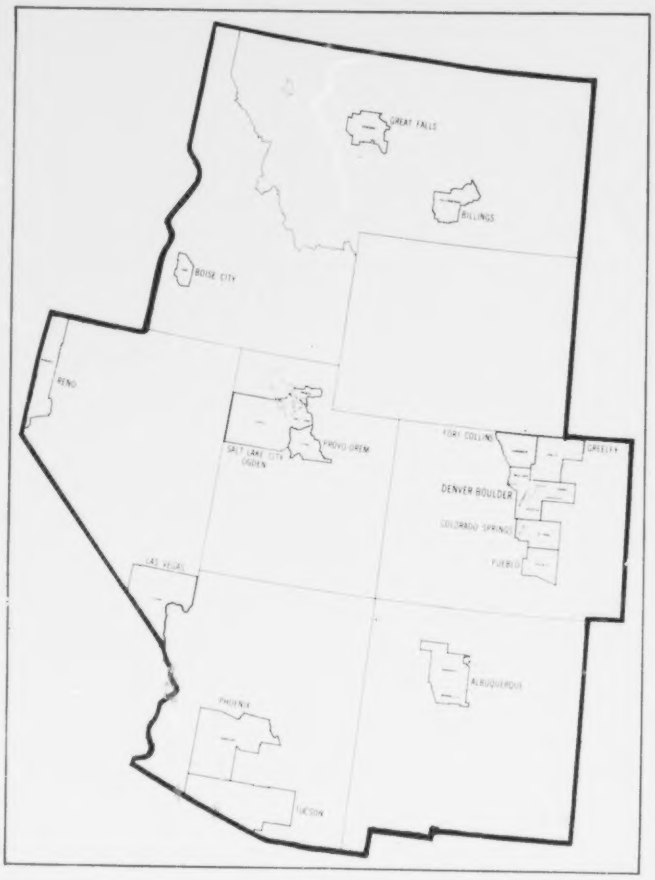
In the first half of 1979, 864 permits for single family units were issued in the city of Tulsa—a gain of about 2% over 1978. However permits for multifamily units numbered only 372—down about 75%. Nevertheless, the Tulsa Chamber of Commerce expected total 1979 multifamily permits to exceed the 1978 level, with strong growth anticipated in the third quarter.

In 1978, Tulsa ranked 11th in the nation in value of all building permits—$409,000,000—according to a Dun & Bradstreet report, and the chamber of commerce expects 1979's figures to surpass that.



Soaring above the Tulsa skyline is the Prayer Tower at Oral Roberts University.

Mountain



Albuquerque

Population	408,800
Rank	93rd
Personal income	$2,649,000,000
Income '77 vs. '76	+12.15%

From the day of its founding 273 years ago, trade has flourished in Albuquerque because of its strategic location along the El Camino Real (the King's Highway). Today its cohesive citizenry of varied ethnic heritages have banded together in support of planned growth, rebutting the criticism that Albuquerque has grown "too big, too fast, too soon."

Local attitudes are typified by Mayor David Rusk, who says the community encourages new business while remaining aware of its responsibility to maintain the quality of life.

Voters, for example, recently approved 11 of 13 bond issues, totaling $36,400,000, for fire protection, water and storm sewers, parks and recreation.

- Energy conservation innovations figure in several of the new major construction projects in the area. One project, in which steelwork was completed in mid-1979, is Mountain Bell's new regional center.

It has a unique design that heats the building in cold months by using hot air generated from the normal operations of the company's computers. Officials are contemplating the possibility of sharing the heat with nearby buildings.

Energy management concepts incorporated in the design of the Public Service Co. of New Mexico building call for the hanging of double-glazed windows and fully insulated panels on the outer walls. Heat pumps and huge solar panels would warm or cool the air in the building. Giant pools of water would store energy gleaned from the sun for later use.

Excluding residential building, projects in various stages of planning or completion are Pertec Computer Co.'s 150,000-sq.-ft. plant, Honeywell Inc.'s 100,000-sq.-ft. building and "The Classic," a hotel adjoining the city's largest shopping mall.

DeVore Aviation, meanwhile, has established a manufacturing plant in the city. The Albuquerque Publishing Co., publisher of the city's two dailies, has announced creation of a new industrial park—the Journal Center. It will be the site of the new editorial offices and publishing plant.

- Presbyterian Hospital Center, which includes eight other hospitals in the state, in addition to the two in Albuquerque, has begun a $3,600,000 expansion project to add 30 beds at the Anna Kaseman facility and a $22,000,000 construction project at the main hospital.

Elsewhere, Albuquerque International Airport, which serves a city that is one of the most geographically isolated metropolitan areas in America, has attempted to keep pace with current demands.

Today, it provides terminal facilities for Trans World, Continental, Frontier, Texas International and American Airlines. The installation's 13,500-ft. main runway is one of the longest in the nation. Passenger traffic has grown more than 44% over the last five years.

To satisfy current and projected needs, the airport is undergoing a $1,600,000 expansion and renovation program. A new west wing has been added to the terminal building, and three new gates have been provided to serve American Airlines.

According to a 1979 study commissioned by *Money* magazine, Albuquerque's growth potential is the fifth best in the nation. The Bureau of Business & Economic Research of the University of New Mexico projects that the city will have more than 430,000 people by the end of 1980 and more than 634,000 by the year 2000.

Denver-Boulder

Population	1,504,700
Rank	21st
Personal income	$11,788,000,000
Income '77 vs. '76	+12.64%

Denver is facing the new decade like a missile poised for take-off. Some urban leaders are ready to launch the fourth fastest growing metropolitan area in the nation into a program of rapid expansion and development, while others promote a more conservative orbit with strict controls on growth.

"The whole western scene is heating up," *Colorado Business* editor Ann Feeny said. The Denver metropolitan area is the center of the action, she added, "and the linchpin is energy."

Recent natural gas discoveries in the Rocky Mountain region added to already thriving oil and gas exploration activities, making 1979 one of the most active years ever, according to the Petroleum Information Institute.

But energy is bringing problems as well as promise to the fast growing Denver metropolitan area: Pollution, inflation and urban sprawl are clouding the city's prospects for a bright future.

- While population in the five-county Denver metropolitan area is expected to top 1,700,000 in 1979 (by local estimates), with an unemployment rate of only 3%, the area suffered an inflation rate of 16.4% for the first six months of 1979, the second highest rate of inflation in the U.S.

Despite the high cost of living, shortage of housing and auto pollution that created a brown cloud—a permanent fixture over the mile-high city—out-of-staters flocked to Denver last year, continuing a trend that increases annually.

An estimated 19,000,000 passengers went through Stapleton airport in 1979 and the increasing traffic means the airport is fast outgrowing present facilities.

Even a $10,000,000 expansion of parking facilities currently under construction won't keep pace with airport use, according to Robert Stapp, director of public affairs.

"We're going to have to undergo a major expansion within the next few years," he commented.

Currently 15 airlines service the Denver metropolitan area, with two new additions in 1979: Hughes Airwest and Piedmont.

Local transportation is another major challenge that Denver residents will have to cope with in the 1980s. The city has more cars per capita than any other city in the U.S. and only 2% of all passenger vehicle miles traveled in the Denver area are on buses, according to State Sen. Barbara Holmes (D.-Denver).

The senator complained that commuters make little use of Denver's mass transit system, but disgruntled users of the city's buses responded that the system fails to meet commuter needs.

They pointed to action taken by the Regional Transit District this past summer to conserve fuel. In the midst of a heat wave, the RTD shut off air conditioning on all the system's buses.

But mass transit in Denver could take on a futuristic appearance if suggestions by some members of the RTD board are followed. Eight members visited Calgary and Edmonton, Canada, this fall to study those cities' light-rail transit systems and returned impressed.

"I'm convinced that LRT is on the way," said Howard Beck, acting director and general manager of Denver's Regional Transit District. Projecting a cost of $50,000,000 to put a system similar to the Canadians' into effect in Denver, Mr. Beck said the city could handle the expense without federal funding, using instead a sales tax increase.

■ As in most other metropolitan areas, there is a housing shortage in Denver as rising mortgage rates are driving new buyers out of the market and home owners hang on to what they've got.

New housing construction was down 20% this year. "The demand is strong, but local people are postponing purchases," housing consultant William Veio said. "The ones who are hurting are people who are moving in from out of state," he added. This group made up 25% of housing sales in the past five years.

In downtown Denver, the picture is completely different. There hasn't been such a building boom since the Gold Rush. A massive urban renewal project is well under way, with the completion of sales of lots that make up 27 square blocks in the city center.

Developers are planning luxury condominium projects and medium cost apartment buildings for much of the area.

■ Construction has begun on the Atlantic Richfield building, a $93,000,000 42-story structure that will be Denver's tallest skyscraper. The building will also house a 622-room Marriott Hotel. Developers Miller-Davis, Denver, and Urban Investment & Development Co., Chicago, have scheduled completion for 1981.

Outside the city, construction began this fall on a $16,000,000, six-story Hilton hotel off Interstate 25 in the Greenwood Plaza complex. Built by Western Group Ltd., an investment combine of businessmen from Texas and Oklahoma, the 312-room hotel on a nine-acre site is scheduled to open before the end of 1980.

The first luxury hotel in downtown Denver in 20 years, the $44,000,000 Fairmont Hotel officially opened in October with an elaborate dinner dance benefit for the Denver Symphony. The 559-room, 26-story hotel is expected to generate $20,000,000 worth of convention business in 1980, according to sales director Tom Kiely.

If all goes according to projections, the Fairmont, which is booked solidly into 1980, will contribute $30,000,000 to the economy of Denver during its first year of operation.

■ Another boom in Denver this year was in condominium conversion, according to the chamber of commerce which estimated that 5,500 such conversions occurred in 1979. The apartment vacancy rate in the Denver metropolitan area is less than 2%.

Among recently completed housing projects in Denver is Brisbane Commons, a high priced 11-unit condominium development that combines restoration of a three-story mansion with new construction.

Las Vegas

Population	376,800
Rank	99th
Personal income	$2,783,000,000
Income '77 vs. '76	+14.24%

Despite the gasoline crunch and competition from new casinos opening in Atlantic City, the tourist and gambling oriented Las Vegas economy is expected to show continued growth and stability.

The 3½-mile "Strip" of world-famous gaming houses continues to draw record numbers of money-spending tourists and conventioneers who seem unconcerned about economic woes at home—or that the 5¢ slot machine in Las Vegas is going the way of the Buffalo nickel.

Tax revenue from gaming in 1978 was up 21.7% from the year before. The current year will show further strong growth, officials say.

The gas crunch took a serious toll only for a while; new industry continues to diversify the economy, and the over-all business climate looks bright, apparently unaffected by a taxpayers' revolt in the state.

■ The gasoline panic in May prompted a 40% drop in motor travel from Southern California. But even in the face of a brief public relations *faux pas*—insisting gas supplies were fine and along the way to Las Vegas when availability was spotty at times—traffic resumed at near-normal levels by summer.

One lasting fallout of the gas crunch is that more visitors are flying—about 45% of the total, up 6% from pre-gas shortage levels.

Although the city has been served by seven airlines for many years, in the deregulated air travel climate another six air carriers, including Braniff, Continental and American, have joined the ranks.

Southern California still accounts for half of Las Vegas' visitors, which is a major reason local officials feel competition from Atlantic City will have little impact. New Jersey's new gaming city, for the foreseeable future, will pull its trade mostly from regional resorts in the East, say Las Vegas officials.

■ Of the city's 11,000,000 visitors in 1978, about 600,000 were delegates to conventions and trade shows.

The Las Vegas Convention Center—a 785,000-sq.-ft., one-level, air-conditioned facility—and 44,000 hotel and motel rooms are two reasons that the city is one of the largest convention centers in the U.S., bringing in $193,000,000 (exclusive of gambling) during 1978.

To broaden its economic base, Las Vegas is attracting what it calls "clean industry" compatible with its resort trade. Warehousing is the major force, and its growth is spurred by several favorable laws, including the state's long-standing "freeport law," which allows national and international companies to store goods destined for out-of-state shipment in Nevada to avoid heavy inventory taxes elsewhere.

Buster Brown Textiles, Levi Strauss & Co. clothing and McDonnell Douglas Corp. established major warehouse facilities in the Las Vegas area in 1978. J. C. Penney Co. is building a 1,850,000-sq.-ft. storage building this year.

Also, General Telephone & Electronics' Sylvania division plans to open the world's largest lithium battery plant in the area in 1980. A 55-acre complex is being developed by Video Entertainment Industries to supply cassettes and discs for the burgeoning home video industry.

■ As expanding industry attracts new people—Las Vegas is the sixth fastest growing city by population in the nation—home and shopping center construction has been brisk.

Some $75,000,000 was committed to building a 34-acre, 130-store shopping center called the Fashion Show, which will open on the Strip in 1980.

Schools in Clark County, which includes Las Vegas, are in a $39,700,000 building program.

Southern Nevada's largest single employer in terms of personnel and payroll, however, is nearby Nellis Air Force Base, which has 8,000 military and 1,100 civilian employes. The Las Vegas area also has a large retirement community.

■ Nevada is a state where the electorate and legislature are tripping over each other to cut taxes. In November, 1978, voters passed Question 6, an initiative designed to reduce real estate taxes. It needs approval a second time in 1980 to become law.

The legislature, however, passed broader tax-cutting measures, now in effect, which trim other levies besides real estate taxes and limit government spending.

No state or local personal income or inheritance taxes exist, and the sales tax in Las Vegas is 3.5%.

Phoenix

Population	1,293,200
Rank	30th
Personal income	$8,993,000,000
Income '77 vs. '76	+14.25%

Civic and business leaders in Phoenix feared the worst as gas lines lengthened from coast to coast: What would happen to tourism, the Sunbelt City's big attraction?

Gasoline dealers and energy advisers scrambled to secure allocations of precious fuel for the area, while "hotline" numbers sprung up throughout the West to tell travelers where gasoline could be found.

Metropolitan Phoenix resorts went one step farther. They capitalized on an otherwise unfavorable condition by encouraging area residents to vacation at local resorts.

Prices were slashed for weekend jaunts at luxurious resorts, and residents of this Valley of the Sun flocked to such nationally renowned spots as Camelback Inn, Mountain Shadows Resort and Carefree Inn. Room occupancy remained near 90% capacity areawide even throughout the blistering days of 115-degree summer.

■ That's just one example of the life style in Phoenix, where people still have the pioneering spirit and businesses are willing to take a risk for their community.

Phoenix, a metro area comprising 11 communities, has grown from a small group of western towns supported by agriculture into a dynamic metropolitan area envied across the nation for its relaxed life style and favorable climate.

Population in Phoenix has grown by nearly 60,000 persons per year for the past several years.

They come for a variety of reasons, including a booming business economy that has yet to show many signs of a slowdown, activities for every age and increasing academic excellence, including Arizona State University, Tempe, with a student population of more than 37,000 for the 1979 fall semester, and a community college system with five campuses.

Businesses and students complement each other with a ready source of talent and an increasing need for young business leaders.

■ Business growth is typified by the location of several major companies in Phoenix during the past year or two. Sentry Insurance now has its headquarters in Scottsdale, just northeast of Phoenix. It has more than 700 employes, offering an array of benefits including full recreational facilities.

Manufacturing continues to be the No. 1 income producer for the metro area. In 1978, the dollar increase for manufacturing amounted to $367,000,000, a 15% gain over 1977.

Intel Corp. produces computer memory products and integrated circuits, while General Telephone & Electronics' Automatic Electronic Laboratories researchers are communicating with their colleagues in Chicago by picture-telephone. In all, more than 2,000 companies employ some 90,000 persons in the Phoenix area.

After a 18.6% gain in 1978, retail sales headed for another record year in 1979, with the opening of two major malls.

■ Fiesta Mall, the first 1,000,000-sq.-ft. regional shopping mall in the Southeast Valley area, opened Oct. 1 on a 102-acre parcel that will contain 140 stores. Three major department stores to anchor the mall and 70 shops are already open. A fourth major department store, Diamonds, is set to be open in 1980.

A renovation in Tempe is bringing a "mercado," capitalizing on the southwestern flavor of the river town, as well as maintaining a sense of history in more modern surroundings.

Unique shops for every age and interest greet browsers along old Mill Ave. A new department store, Mervyn's, has joined the already impressive list: The Broadway, Bullocks, Diamonds, Goldwater's, I. Magnin, Saks Fifth Avenue, Sakowitz and Joske's.

Banks are located on nearly every corner, with 16 banking institutions represented through 264 branches. Seven savings and loans and 82 credit unions have grown in deposits statewide.

For the sports-minded, there's the Phoenix Suns of the National Basketball Assn.; Arizona State University Sun Devil Football, basketball, baseball, track, volleyball, etc.; Phoenix Giants, a baseball farm team of the San Francisco Giants, and a promise of a Valley soccer team to begin professional play in 1980.

headquarters or administrative offices in the Salt Lake metropolitan area.

City and state officials also hope the ads which will appear in the *New York Times* and *Wall Street Journal* late this year will help fill some of the 1,000,000 sq. ft. of office space currently under construction in Salt Lake City's central business district.

Although a study presented to the mayor and city commission by a planning consulting company in September warned of the economic impact of "a glut of office space," most city residents aren't worried about filling it.

Noting the city's unemployment rate of 3.8%, one representative of the chamber of commerce said, "We're already concerned about finding enough people to fill jobs available in the area."

- "I can determine that our economy is healthy simply by looking outside my office window," another city official said. "There's construction going on wherever I look."

The Crossroads Mall, a $72,000,000 office-shopping complex, the major downtown construction project for the past two years, is taking shape with the first office spaces to be occupied in March, 1980, with retail openings planned for August.

A topping off ceremony was held in October for the 20-story tower of the Commercial Security Bank, a Crossroads tenant. According to contractors, Okland-Foulgers Co., the exterior finish of the mall should be completed in December.

Marriott Corp. announced plans to build a $21,090,000 15-story hotel adjacent to the Crossroads Mall. The 480 rooms are expected to be ready for occupancy by April, 1981. Sheraton Hotel Corp. canceled plans announced last year to build a hotel near the mall.

Ground was broken in October for an 11-story, 115,000-sq.-ft. office building for the Utah Bank Corp. and Mountain Bell announced plans to build a 15-story, $29,000,000 regional office building downtown. That project is slated for completion by January, 1982.

- There's also residential construction going on in downtown Salt Lake City, including a $30,000,000 condominium project called The Brick Yard and, in southwest Salt Lake County, an old gravel pit has been reclaimed as the site of a $20,000,000 condominium project by Kehl Inc. Called Stone Hollow, the planned community will eventually house 400 families with two and three-bedroom units in the $45,000 to $80,000 range.

To encourage residents to leave their cars at home and use the mass transit system instead, Utah Transit Authority offered free bus rides during nonpeak hours for the month of October.

Living in an area rich with energy-related natural resources, most people in the Salt Lake City metropolitan area aren't concerned with gas or heating fuel shortages. Instead they're looking at the area as a major supplier of the rest of the country's energy needs in the future.

Power in Utah is produced by coal-fired, steam generating plants and the state has enough generating capacity to export power to other Western states.

- Mountain Fuel Supply, the natural gas utility in the Salt Lake City area, has more gas reserves than almost any other gas utility in the U.S., according to Utah's department of economic development.

Although inflation and high interest rates on mortgages haven't slowed commercial construction in the Salt Lake metropolitan area, residential construction showed signs of slowing down. During the first six months of 1979, there were 9,213 new home starts, compared to 11,880 for the same period in 1978.

While other parts of the country talk of recession and gloom, in Salt Lake City the talk is of tourism on the rise and developments in recreation. Some area residents seem more concerned with weather—will there be snow in time to open the ski season at Thanksgiving—than with the economy.

But it's the ski areas—there are eight major ski resorts within half an hour from downtown Salt Lake City—that have attracted a growing number of tourists to the area over the past two years.

Salt Lake Metropolitan Airport showed increases in passenger traffic of 13% to 17% per month this year, slightly under last year's growth pattern, according to deputy director of operations Tom Greer. He estimated total passenger traffic for the year at 5,000,000.

- The airport got four new airlines this year: Eastern, Braniff, TWA and PSA and is trying to meet increased activity with a construction program supported by $42,000,000 in revenue bonds.

Last December, a new terminal was opened and renovation of the old terminal is under way. Eventually the airport will have five terminals, including bridges to parking structures, Mr. Greer said. The access highway to the airport is also being upgraded, with completion scheduled for 1980.

In nearby Ogden, also part of the Salt Lake metropolitan area, Great Salt Lake Minerals Chemical Corp. opened a new $4,500,000 salt processing plant in October. The plant is the first of its kind opened in the U.S. in the past 25 years.

Bonneville, west of Salt Lake City, will be the site of a $350,000,000 concentrator facility operated by Kennecott Copper Co. Construction will begin on the facility in 1980.

The Utah Symphony Orchestra, internationally known for its concerts and recordings at the Mormon Tabernacle, got a home of its own this year, a $10,000,000 concert hall, part of a $20,000,000 arts complex.

Tucson

Population	**461,700**
Rank	**83rd**
Personal income	**$2,872,000,000**
Income '77 vs. '76	**+9.53%**

Tucson, the "Old Pueblo," is growing up.

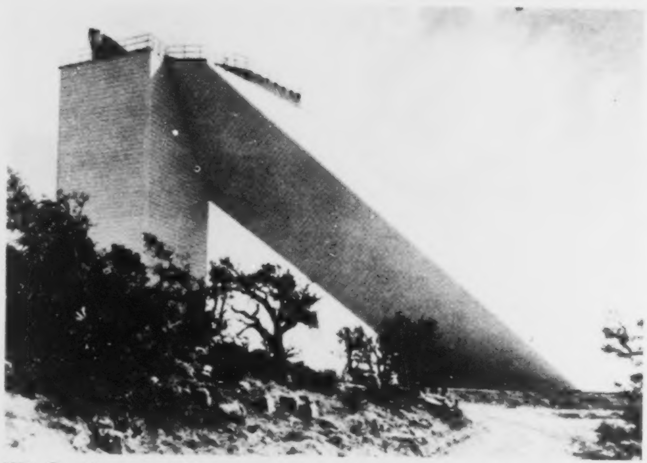
The southwestern city passed the 500,000 population mark in 1979 and earned itself a bigger dot on the maps.

New residents poured in and the housing industry boomed in an effort to keep up with the influx. Building permits for homes and apartments were up more than 50% over 1978.

Luxury apartments complete with tennis and racquetball courts and spas began to fill in the streets on Tucson's east and northeast sides.

Development continued on the north and northwest sides as well and plans were announced for the construction of the Tucson Mall, to open in 1981. The northwest shopping center will be the city's third and largest mall.

- School districts on the outskirts of town struggled to keep up with the steady increase in enrolment they experience each year. New elementary schools are filled the day they open and district officials are busy planning for more bond elections, more land acquisition and more construction.



Kitt Peak's solar telescope, a short distance from Tucson, is a vital instrument in astronomical research.

To the south, International Business Machines began moving workers into a plant that will eventually employ 4,000. Brush Wellman, Veeco Instruments and National Semiconductor Corp. announced plans to locate in Tucson in the near future.

Some of the city's established companies—Hughes Aircraft Co., Gates Learjet Corp. and Burr Brown Research Corp.—are also expanding.

One business that did not fare so well here this year was American Atomics, a company that manufactured tritium-filled luminous components for digital watches and signs. When traces of radioactive tritium were found in the atmosphere surrounding the plant and in a cake from Tucson Unified School District One's central kitchen, the state Atomic Energy Commission stepped in and shut down the plant.

- The controversy gained national attention when Gov. Bruce Babbitt sent in the National Guard to seize the tritium and dispose of it properly.

The gas shortage was kind to Tucson, compared to other parts of the country. Prices were comparatively low, lines were unheard of and many stations were open 24 hours a day and on Sundays.

Air travel into Tucson International Airport increased as gas crisis-wary travelers took advantage of Super Saver and discount fares.

Gas hotlines were established on the local and state levels to spread the word that gas was available.

Motels and hotels, worried that some vacationers might stay at home due to the energy crisis, boosted business with special stay-at-home get-away packages for locals.

Transportation in the city continued to be an issue. The need for a crosstown freeway was again debated, with no solution reached. When a bond election question for road improvements failed in June, the county transportation director succeeded in getting another bond election scheduled for early 1980

- The Old Pueblo made a name for itself in the sports world when the Tucson Sky became the 1979 International Volleyball Assn. champs. The whole town rallied behind the young team and volleyball gained in popularity as a pastime.

Roller skating made a comeback as a hobby and rental shops did well here, especially near the University of Arizona where many of the 32,000 students skate to, from and sometimes in class.

The UA's basketball and football teams began their second season in the Pacific 10 conference, after what sports fans thought was a decent showing in the 1978-79 school year. Students still wear t-shirts saying, "I was there" when the basketball team beat USC and UCLA at McKale Center, to the cheers of what western sportswriters called "McKale's Navy."

New racquetball clubs and health spas opened up in Tucson, and a bit of California came across the border when Sweetwater Funtubs, a hot tub club, opened in a desert area to the west.

- Plans were unveiled for the opening of Canyon Ranch, an exclusive health resort near the Catalina Foothills northeast of town.

El Con 6, a six-screen movie theater, held its grand opening in conjunction with Tequila Mockingbird, a new Mexican restaurant in El Con shopping center. The new restaurant offers a modern disco version of Mexican eateries, rounding out Tucson's offerings.

Visitors and residents alike with a taste for quality Mexican food can choose to dine in the lush garden settings of El Parador or La Fuente, the unadorned surroundings of El Dorado or the homey atmosphere of El Charro, the downtown restaurant that prides itself with being the "oldest Mexican restaurant continually run by the same family in Arizona."

Income '77 vs. '76	**+14.39%**

There's a new bumper sticker showing up on quite a few backsides of the numerous, sleek, Orange County imports these days which reads: "If the Rams are coming, can statehood be far behind?"

Although it may simply attest to the fact that the old Los Angeles/Orange County jealousies are still alive and healthy, it is also an indication that now that this land o' plenty has made it as a big business center, it's ready to concentrate on nonbeach amenities, namely sports and the arts.

There is no downtown focus for sprawling Orange County as yet. However, the Segerstrom corridor, as it's called, just could carry that title this time next year.

This area, bordered on one side by the newly renamed John Wayne Airport (formerly Orange County Airport), and what is said to be the nation's most profitable shopping center, South Coast Plaza (owned by the Segerstrom family) on the other, will soon house the county's largest financial services complex, which will include three Top 8 CPA firms.

- In addition, this is where Orange County culture seems to be settling, thanks in part to generous donations of Segerstrom farm land. A new, $50,000,000 Music Center, which will house the fledgling Orange County Pops—with Carmen Dragon as conductor—will sit adjacent to the South Coast Repertory Theatre just completed last year.

Officials of the Music Center have worked closely with the Los Angeles Music Center and New York's Lincoln Center to obtain the best in facility and showcase advice.

In Garden Grove, construction is nearing completion on The Village Green Cultural Arts Facility, which includes a $1,000,000 civic theater, the Gem Theatre, the Strawberry Bowl—an outside amphitheatre—and an expansion of the existing Mills House Art Gallery and Museum.

Also going up in Garden Grove is the multi-million-dollar Crystal Cathedral, being built by the Garden Grove Community Church and planned to be the largest glass cathedral in the world.

Nearby, a major new shopping center—Greenbriar—will combine office-professional and residential development, and is slated for construction in early 1980.

Both retail sales and employment are up significantly in this area over 1978, and only 25% of the local businessmen surveyed by the chamber of commerce have felt that the energy crisis has had a major impact on their business. Businesses most hurt seem to be car and recreational vehicle sales.

- Orange County is rapidly becoming a national base for the food services industry, with one of the hottest food service areas in the country.

Companies headquartered here include Taco Bell, Del Taco, Carl's Jr., Far West Services (Coco's, Reuben's and many others), Colony Foods, Der Weinerschnitzel, Jojo's, Alphy's, Spires and El Torito/La Fiesta.

Anaheim is feeling an increased surge in tourist travel since the Angels have staked their claim as near-heroes by winning their first Western division title in 19 years, and the Rams have officially occupied the Big A Stadium.

Restaurants, lodging facilities and entertainment spots near the already congested Anaheim Stadium are springing up left and right.

- Disneyland, Anaheim's longstanding synonym, has also made a few improvements this year, adding the Thunder Mountain roller coaster attraction to compete with its topsy-turvy ride competitors in L.A. county.

Disneyland, will celebrate its 25th birthday in 1980, and executives are anticipating an even bigger tourist season than last year.

The Anaheim redevelopment commission has approved plans for a $38,000,000 mixed-use project to be known as Midtown Anaheim. Proposed are a 15-story, 300-room hotel, a 12-story residential condominium tower, an enclosed shopping mall and an office building. The development will be located near the new Anaheim Civic Center, Disneyland and Anaheim Stadium.

Orange County's largest current retail development—Oakbrook Village—is under construction on a 19-acre parcel adjacent to the already existing Laguna Hills Mall shopping area.

The 200,000-sq.-ft. complex, due for completion in early 1980, is a development of two Newport Beach-based companies, the

LeeSammis Co. and Columbia Investment Co. Tenants will include a Barker Brothers home furnishings outlet, a Victoria Station restaurant, El Torito restaurant and a Bank of Irvine.

- Industrial expansion continues to create new job opportunities. Beckman Instruments, the county's seventh largest employer, completed a new engineering lab facility at Fullerton.

Near the airport, in the Irvine Industrial Complex, the energy-oriented Gregory construction company has broken ground for a $1,000,000 headquarters. In Newport Plaza Business Park, a $20,000,000, 10-story single-tower office facility—the last major construction in this area— is scheduled for completion in early 1980.

In Fountain Valley, adjacent to Newport Beach-based research and development labs, The Systems Video division of the German-based BASF has moved into the largest built-to-lease facility in the country. Ricoh Electronics, one of 26 Japanese companies in the Irvine industrial complex, has purchased 14.6 acres—a $3,000,000 site.

GTE division of General Telephone, has relocated its administrative offices from Cincinnati to Anaheim, and is occupying an 80,000-sq.-ft. building which will house headquarters operations as well as research, design, testing and marketing for its point-of-service mini-computer systems for the food service industry.

Tungsten Carbide, a division of Smith International, has initiated a $4,100,000 expansion which will permit a 150% increase in production and double employment within three years.

- The California housing market boom of last year is over. The increase in the average price of an Orange County home is expected to be the lowest annual rate of increase (3.5%) since 1968-69. The inventory of unsold housing units is at its highest point since 1975.

There has, however, been a determined move by several public interest groups and by some builders to concentrate on low-cost housing in Orange County, a move belying the area's affluent new-community reputation of recent years.

Fresno

Population	**479,000**
Rank	**80th**
Personal income	**$3,268,000,000**
Income '77 vs. '76	**+7.49%**

Although gasoline shortages and a trucker's strike seriously threatened Fresno's agricultural enterprises and its nearby tourism business, the area showed strong prospects of continued economic growth.

After a longstanding battle between real estate developers and those who want to limit Fresno's creeping urban sprawl, construction of seven new shopping centers has begun.

Construction projects include a $2,000,000 Northern Village Shopping Center via Robert Klein Jr., Fisher Land Corp.'s Nursey Shopping Center and Zinkin-Kovacevich's 50,000 sq. ft., $2,000,000 center.

In the last two years Fresno has moved to restrict new construction and concentrate on rejuvenation of the older downtown Fresno areas, but downtown development remains slow.

- In the past two years, major businesses have opened operations in Fresno (Sharon Bolt & Screw Co. of Ashland, Mass., and Vendo Corp. of Kansas City), but no major companies relocated or opened substantial new plants here this year. However, Sequoia Steel & Supply began construction of a $150,000 warehouse for its stucco manufacturing operations.

But interest in Fresno as an economic hub is continuing. While scrutinizing the cost-effectiveness of service to other markets, due to spiraling fuel costs and the pressures of deregulation, airlines are finding Fresno to their liking. The market experienced an over-all 12.1% increase in air passenger traffic from fiscal 1978 to 1979.

United Airlines plans to introduce nonstop Fresno-to-Chicago direct service this year. Pacific Southwest Airline, Air California, Frontier, Eastern, Northwest Orient and TWA all have filed for CAB permission to serve the Sacramento-Fresno air route.

Frontier Airlines also has filed for permission to serve the Fresno-Sacramento-Denver route. United Airlines recently suspended its Fresno-to-Denver service.

- Fresno was affected by the gasoline shortage—most visibly in a tourism slowdown in nearby Yosemite, Sequoia and King's Canyon national parks. Although the San Joaquin Valley wasn't included in the odd/even gasoline allocation system, potential park visitors from the San Francisco and Los Angeles areas were subject to the system. The result was fewer Californians traveling the long distances to the parks.

Partly in response to the gas shortage and related problems, the Fresno Chamber of Commerce has begun a tourism development program to establish Fresno as more than just a place to refuel on the way to California's larger cities. The program is designed to develop and restore existing Fresno recreational facilities and initiate new projects. A drive to refurbish Fresno's more interesting old architecture is currently under way.

Fresno's agricultural industry is still its leading enterprise, so the June, 1978, independent trucker's strike was potentially disastrous for the area.

The strike, which protested the rising price of diesel fuel, began at the start of Fresno's packing season. With a shortage of refrigerated railroad cars to take the crops to market, and the prospect of the fruit becoming overripe, Fresno's situation became desperate.

Fresno's city council discussed the possibility of air lifting the crops to market, and there were incidents of violence against strikebreaking drivers. An end to the strike came soon enough to salvage most of the crops without extreme measures, however.

The outlook for Fresno's year end raisin and cotton crops was good due to a long, hot summer season. Last year there was considerable damage to these important crops from unseasonable rains.

Honolulu

Population	**719,600**
Rank	**55th**
Personal income	**$5,652,000,000**
Income '77 vs. '76	**+8.11%**

The celebration that marked the 20th anniversary of Hawaii's statehood was unusually quiet, perhaps muted by the local sigh of relief that the United Airlines strike and the grounding of the DC-10s didn't completely wipe out the summer tourist season.

Despite the 57-day strike that cost the islands an estimated $1,000,000 a day in losses from anticipated business and subsequent economic losses from the DC-10 groundings, tourism for 1979 is still ahead of 1978 by almost 8%, according to Jerry Panzo, director of information for the Honolulu Visitors Bureau.

"Because both setbacks took place in a non-busy season, there was a lot of shifting and reorganizing," Mr. Panzo said. "All things considered, we're doing very well for the year."

Visitor arrivals for the first quarter of 1979 outpaced the previous year by 11% and, seeking to build momentum after the strike, the Visitors Bureau mounted an ad campaign in eight metropolitan newspapers on the mainland.

- Offsetting the economic losses to tourism was a continued boom in real estate and construction that put completion of new buildings in excess of $1.1 billion for the year, according to the Bank of Hawaii's annual economic review.

Encouraging developers in Honolulu was a bill passed by the city council (over the veto of Mayer Frank Fasi) to allow increased density for apartment building. Waikiki Beach is under a special design district ordinance and is not affected by the new law, but the Punchbowl historic district will see density limitations relaxed slightly.

The Bank of Hawaii predicts that within two years high-density construction will ease on Oahu, but will be very active on the neighboring islands. For example, on the island of Hawaii, the Kainalu Development Corp. is adding 117 units to its Keauhou-Kona Surf & Racquet Club, and all were sold before the ground was broken.

Building costs continued to spiral upwards, with a 9.8% construction cost index increase for the first four months of 1979 recorded over an 8.9% increase for 1978.

- Economists for the Bank of Hawaii expressed fears that future single-family residential construction will be severely hampered by both construction costs and the prohibitively expensive price of land. Property on which to build a home costs between $50,000 and $100,000, up to 50% of the total cost of a home in Honolulu.

Hotel and condominium construction, however, continues to boom. Hilton Hotels Corp. announced plans for addition of a $75,000,000, 35-story tower to its Hilton Hawaiian Village complex on Waikiki Beach. When completed in 30 months, the tower will add 1,056 rooms to the resort complex.

The 75-year-old Halekulani Hotel closed Sept. 30 to undergo a $30,000,000 renovation and will reopen in two years with 480 rooms including a 14-story building.

But the future could be bleak for the 52-year-old Royal Hawaiian Hotel, despite support from island preservationists. Controversy over the fate of the famed old hotel was stirred up when a representative of the owners, Kyo-Ya Ltd., a Japanese company that bought the Royal Hawaiian from Sheraton Hotels in 1974, wrote the Historic Places Review Board opposing its listing as an historic site. He also said the old hotel was "becoming functionally and economically obsolete."

- Another Waikiki landmark, the Waikiki Theatre built in 1936, has been slated for demolition and on the island of Kauai, the two mountain stream slides, one natural, one man-made for "South Pacific" were closed in mid-1979 because of accidents.

And the authentic island taste of Primo beer will never be the same for its fans—the brewery which was acquired by the Jos. Schlitz Brewing Co., Milwaukee, closed its Waimalu operations and is now producing Primo in Los Angeles.

Shopping complexes are springing up throughout Honolulu, with the recently completed $25,000,900 Waikiki Shopping Plaza augmented by construction of a $35,000,000 Royal Hawaiian Shopping Center.

Honolulu residents are experiencing indirect effects of the energy crisis and inflation problems—both are cutting into discretionary spending by tourists.

Availability of gas is not a problem on the Hawaiian islands, "as long as you're willing to pay through the nose for it," one Honolulu resident complained.

Los Angeles-Long Beach

Population	**7,080,900**
Rank	**2nd**

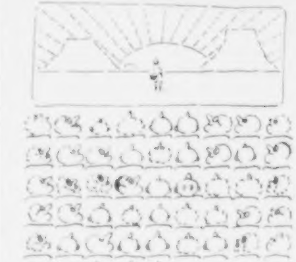
When America goes to the movies your sponsored film will be there.



Americans are going out to the movies again. By the hundreds of millions. And this huge audience brings with it very desirable, upscale demographics.

That's a tremendous opportunity for your company's sponsored films. Because more and more movie theatres are turning to Modern for interesting shorts to fill out their screenings.

As the world's largest distributor of free-loan motion pictures, we've got what it takes. Through our on-line computer system, we're currently scheduling shorts into over 6,000 theatres, resulting in about 500,000 showings a year.

We know how to help you, too. Our research surveys, for example, answer many important questions. How long should the short be? What are the most wanted subjects? Do theatres want lobby posters?

So be there when America goes to the movies. Ask Modern all about it by calling one of the offices below.

LAS VEGAS SUNBELT BUYING POWER

How does a market ranked only 100th in population show up as 34th in retail sales per household? By having a corresponding rank in Consumer Spendable Income of 39th. The Las Vegas metro C.S.I. of $20,833 is the highest among the next 15 larger markets. Four of them are well known high growth Sunbelt metros. Las Vegas' own Sunbelt in-migration is at the rate of about 2,500 people per month. So it should come as no surprise how fast retail sales are rising. In 1978 they jumped up 17%. This year's gain is 18%. Next year . . . by the way, are you in this market?

(Continued from Page 67)

and brought a new miniwave of population growth to the Los Angeles-Long Beach market, but a cutback in new housing starts made it tough for newcomers in a market already short on apartments and reasonably priced homes.

Through the first-half of the 1970s, Los Angeles-Long Beach lost population in some years and hovered around the 7,000,000 level in others. But over the past year or so, the area's population inched up to a 1% growth rate and economic researchers see that continuing.

They point to a surge in aerospace growth that has had a beneficial ripple effect through many related technological industries.

As an example, this year Boeing of Seattle, the world's largest aircraft manufacturer, dealt out subcontracting work to Los Angeles and Long Beach-based suppliers totalling an estimated $5 billion, much of it to Lockheed, which in turn subcontracts to smaller specialists in the market.

In addition, McDonnell-Douglas' role in the space shuttle project was expanded and suppliers down the line have added work from that.

- The theory has been put forth that Los Angeles-Long Beach fell back to second place behind Chicago in retail sales last year because the high cost of housing in the West Coast market cut back consumer spending on other things.

Reseachers say this may be as important a reason as any for the Los Angeles retail sales total amounting to $29.7 billion (up from $26.9 billion in 1977) compared with No. 1 Chicago's $30.3 billion in retail sales last year.

Part of the shift in retail sales ranking is attributed to a surge in auto sales in the Chicago market that outpaced auto sales in Los Angeles-Long Beach, the traditional leader in this category.

One thought on this came from a sales statistics source at the Los Angeles Area Chamber of Commerce. He said one possible reason is that Chicagoans bought bigger cars resulting in a bigger total sales figure while Los Angeles-Long Beach continued its preference for smaller cars.

There was also mention of a shortage of popular small models which is understood to have sent buyers to neighboring Orange County and the Riverside-San Bernardino market. But for the most part Los Angeles-Long Beach economic researchers find the development puzzling.

- It was noted by others studying the market that when the gasoline shortage struck last spring it hit first in Los Angeles-Long Beach and car sales generally were off in the market for weeks afterward as the area recovered from the jolt of blocks-long gas lines.

Sobered by the experience, community leaders kept pressure on local governing bodies and the odd-even system of dispensing gasoline stayed in effect in Los Angeles-Long Beach even after other parts of California abandoned it.

The vote on letting drivers go back to their old ways was close, however, indicating that even this mild form of rationing is a tough matter for officeholders to face in a market where gasoline has been the economic lifeblood.

Areas in which Los Angeles-Long Beach remained on top in retail sales included spending on entertainment (primarily eating out) and furniture.

- Final agreement on holding the 1984 Olympic Games in Los Angeles provided local leaders and economic forecasters with food for upbeat speculation—and a few solid indications of the growth the games are expected to generate.

An increase in inquiries about long-range construction of new hotel space has been noted by the LAACC, which attributes some of this interest to the Olympics and some to a general need for more visitor accommodations because of increased convention activity in the market.

Having a negative impact on growth of the market so far are new rent controls that have resulted in a decrease to virtually zero in the number of applications for permits to build new apartments.

There is continual pressure for revisions that would encourage continued investment in this area, and local officials have been sounding conciliatory on the subject.

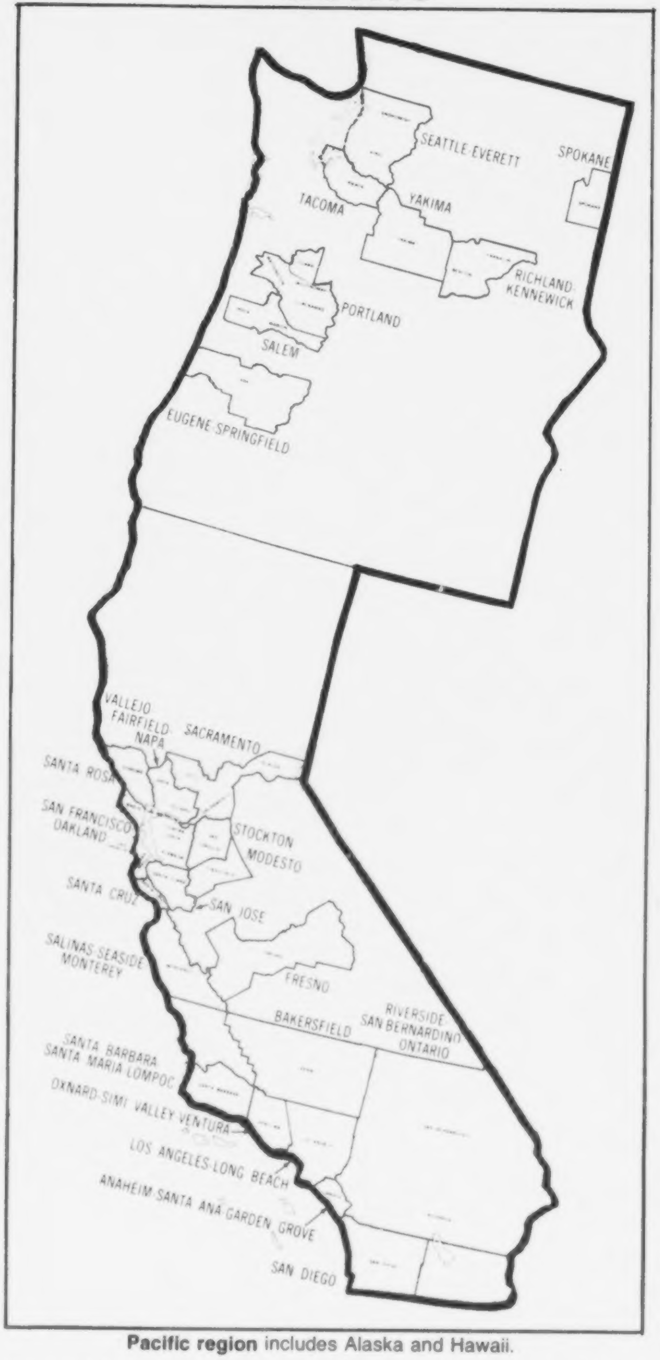
They have toughened their stance on conversion of apartments to condominiums, however. The practice had made quite a few millionaires overnight while driving many fixed-income apartment dwellers into substandard housing or out of the market altogether.

- The population mix continued to change, with Hispanics moving toward a majority in some areas and Anglos becoming a minority in the central city and some neighboring sections and increasing their numbers elsewhere.

Predictions that the city of Los Angeles, which is in the center of the market, will be a city of minorities soon (estimates on illegal aliens in Los Angeles indicate it may already be) don't seem to have dampened local enthusiasm about the market's future.

The median family income this year is expected to be close to $19,500, compared with $10,972 in 1970. This is no cause for celebration given inflation over the period, but neither has it slowed down commercial growth in most sections of the market.

Pacific



Pacific region includes Alaska and Hawaii.

Oxnard-Simi Valley-Ventura, Cal.

Population	**484,500**
Rank	**79th**
Personal income	**$3,119,000,000**
Income '77 vs. '76	**+12.97%**

Southern California's Ventura County, known as the Oxnard-Simi Valley-Ventura SMSA, continues to absorb the spillover population from neighboring Los Angeles and the San Fernando Valley.

Since 1970, Thousand Oaks has been the boom town, with an 85% population growth. Now stringent land developing policies are forcing developers to look elsewhere, and nearby Simi Valley is becoming the hot growth area.

A review committee in Thousand Oaks is updating the city's general plan and resisting pressure for hillside development. Three major projects are avoiding these land issues, however. They are the 850-acre Donielson Ranch, and the 2,300-acre Dos Vientos Ranch on the southwest side of the city and the 1,850-acre Metro-Goldwyn-Mayer ranch on the north side.

- The retail trade boom in Thousand Oaks, exemplified by the opening of the Oaks regional shopping center and numerous other retail outlets, parallels growth in residential construction. Oaks retailers alone increased the city's business license revenues by $356,000 last year.

But there is a feeling among some that the Thousand Oaks planning commission is "treading water and standing still." So it goes that a Downey, Cal.-based builder, the Mayer Group, recently changed its plans and selected Simi Valley for residential and commercial development.

Purchased for $9,000,000, the site is on a portion of the Indian Hills Ranch. Plans call for the building of nearly 800 homes there within the next five years, with about 95% of the new owners coming from Los Angeles, the San Fernando Valley and other areas of the Simi Valley.

The Mayer development is only a sample of the activity in Simi Valley. The area has 11 industrial and 35 commercial projects in various stages of construction, and—at midyear—49 residential projects approved but unbuilt.

Among the 19 new commercial projects being reviewed by city planners is a five-building shopping center at Tapo Canyon and Cochran St. with 90,606 sq. ft. of retail space and 50,000 sq. ft. of offices.

One attraction is the Pacific Ocean, which provides the southwest border of the SMSA, and offers 42 miles of coastline where Oxnard and Ventura, the county's most densely populated communities, are located.

- Oxnard points with pride to its Channel Islands Harbor, its many recreational facilities and the nearby residential and commercial developments that have made the south county shoreline an attractive place to live.

Located on some of the best agricultural land in the world, Oxnard developed as a farming town. Ventura County ranks 11th among California's 58 counties in agricultural development, and the Oxnard Plain, with its lemons, avocados, strawberries, flowers and vegetables acounts for more than 20% of the county's output.

- Oxnard also is headquarters of the plants and offices of many major companies, including several closely tied to agribusiness. While the dollar value of building permits has been down in recent years, total housing starts for 1979 are expected to equal or slightly exceed those of 1978.

Oxnard is served by two regional shopping centers, several smaller centers and the downtown shopping area.

- Current expansion on the retail front includes adding another 48,750 sq. ft. of space to the Crossroads Center complex and complete remodeling and enclosure of a formerly open mall shopping center. The latter facility, to be named Center Point Mall, will have a relocated J.C. Penney store as one of its retail outlets.

City planners also have approved development of a Zody's department store and other shops totaling about 138,000 sq. ft. Also approved is a 14-story office and commercial construction for the downtown redevelopment area for which ground bearing is scheduled to take place in February.

Fuel shortage has a mixed effect in this area. Tourism flourished as Los Angeles residents discovered they could have smog-free holidays for less than a tank of gas, round trip. But shortages of petrochemical fertilizers and insecticides worried the agricultural sector, and rising fuel prices brought the threat of potentially disastrous truckers' strikes.

Nearby Camarillo has also had a surge of growth, with an influx of residential buildings and an increasing number of light industrial plants. Among the city's newcomers have been Playtex and Clairol, joining 3M (1,000 employes), the SMSA's largest employer with the exception of the military.

- The Navy commands at Port Hueneme and Point Mugu, headquarters of the Pacific Missile Range, have a combined civilian and military work force of 16,000, with a payroll of $221,000,000 a year.

The past year saw traffic at Port Hueneme, the only deep water port between Los Angeles and San Francisco, threaten to outgrow existing facilities.

Del Monte Banana Co. began importing two shiploads of product from Central America each week, adding to other port activities, which include off loading of imported Mazda cars for 11 western states and serving as a support facility for intensified offshore oil explorations.

- In Ventura, the county seat, a carefully devised phasing plan has been implemented to ensure orderly growth. The city has also developed hillside building regulations and an open space plan to protect the quality of life for its residents. Basically a residential town, Ventura has had an upsurge of new condominiums, apartments, mobile home parks and housing tracts.

Much of downtown Ventura has been designated a redevelopment area and several renovation projects have already been completed.

Recreation-oriented Ventura is also in the first stages of a plan to develop Ventura Harbor to make full use of its waters and surroundings.

A large hotel, restaurants and a shopping village are some of the additions that have been planned. The city averages 55 conventions a year, accommodating up to 15,000 delegates in its hotels. Last year, Ventura's 11,000 hotel rooms brought in tax revenues of $248,000, up from $50,000 just four years ago.

Portland, Ore.

Population	**1,140,100**
Rank	**34th**
Personal income	**$8,832,000,000**
Income '77 vs. '76	**+12.2%**

The headlines in Portland, Ore., should read: "The Canadians are coming."

Canadian-proposed commercial and industrial development totaled more than $300,000,000 for the first quarter of 1979—and that's just the beginning of the reverse gold rush.

Cadillac-Fairview proposes to transform four downtown city blocks into a new $1,000,000 retail/office/hotel complex. The core area office buildings under construction are Canadian-financed. An $80,000,000 to $160,000,000 office/-retail complex is on the drawing board; so is another downtown 19-story office tower.

Canadian dollars have purchased a 152-acre residential development in suburban Lake Oswego; several tracts of property prime for residential construction in nearby Gresham; 3,000 acres east of Vancouver, Wash.; a frozen food processor in Washington County, and a prominent downtown apparel store, warehouse space and prime motel development site in Portland. And commercial brokers are rumored to have Canadian investors in the wings.

▪ Over-all, approved projects will add 1,400,000 sq. ft. to Portland's office space over the next three years—but the anticipated occupancy rate will be the same as 10 years ago—95%.

The dynamic growth of downtown has been accompanied by squeezing out elderly, low-income people occupying low-rent hotels and apartment houses.

Eye-openers for newcomers are the red-brick transit mall, in the heart of Portland's retail-office core, with its widened sidewalks, plantings, sheltered benches and disputatious art, and site of the three-day annual Artquake, and mile-long Waterfront park, along the Williamette River, where 1979's NeighborFair drew 400,000 people.

Portland's Chamber of Commerce expanded its support of cultural activities, with awards for business support of the arts and for the enhancement of art education in the schools.

And newcomers were aplenty. Net immigration in the past eight years jumped 72% and projections for the next decade show no easing in the flood of pilgrims. In total population, Portland declined slightly, but suburban Clackamas, Washington and Clark (Washington state) counties swelled, with developers madly swapping rich farmlands for housing and industrial developments.

For newcomers without backpacks, the 502-room Marriott Hotel will open in 1980 and several downtown hotels are in the talking stages, giving the town future convention muscle.

Despite rapid growth, Portland was ranked first nationally for its over-all quality of life in a study commissioned by the Environmental Protection Administration. Employes of Georgia-Pacific, whose corporate headquarters will be moved to Atlanta in 1983, are already debating the merits of a good job *vs.* a good life.

Biggest manufacturing work gains continue to be made in the electronics and electrical products area and will rise more sharply when Wacker Siltronics of West Germany begins operations next year and new California plants are settled.

Up from Santa Clara's "Silicon Valley" have come Maruman Integrated Circuits, to build a $10,000,000 plant in east Multnomah County starting in spring, 1980, the first major electronics high technology development east of the Williamette, and Intel Corp. to construct a plant employing 2,000 at Hillsboro. Hometown Tektronix opened a $35,000,000 Micro Electronics plant at Beaverton.

As downtown Portland continued skyward and its retail face changed—Marshall Field-owned Frederick & Nelson purchased Lipman's department store, among other takeovers—the over-all picture was mixed.

Nonagricultural employment during the summer increased 3.6% over a year ago, but unemployment rose 13.3%. Average weekly earnings in total manufacturing increased 11%, but inflation went up 14.2%. New small shopping centers growth accelerated, but the giants slackened pace.

Within a hour's drive of Portland, Ore., is Timberline Lodge, an all-year vacation resort popular with conventioneers.

The massive hydroelectric power base helped keep energy costs down. Nevertheless, there were soft spots in the economy. Summer tourism was off 25%, reflecting gasoline shortages. New passenger car registrations dipped 6.5%; trucks and buses were off 17.2%. Construction of single family homes was down 24% and multifamily units down 16.5%. Sales of both new and used homes lagged.

Portland's share of the West Coast ship repair business approaches 50%, and it continues to extend its lead over Seattle as the largest distribution center in the Northwest. The boom in auto imports, which has hurt the U.S. economy elsewhere, was good news on the Portland docks.

Riverside-San Bernardino-Ontario

Population	1,385,400
Rank	27th
Personal income	$8,380,000,000
Income '77 vs. '76	+12.42%

The Riverside-San Bernardino area, although one of Southern California's most rapidly growing industrial regions, is also the home of several of the most popular resort and recreational areas in all of California. As a result, the market is feeling the energy crunch. It's also taking steps to ease it.

The mountain resorts of the Big Bear Lake ski area, comprised of Snow Summit, Gold Mine, Snow Valley and Green Valley, have launched joint advertising campaigns pushing the area's new charter bus routes in hopes of letting Southern California skiers know that this year it will be cheaper and easier to go skiing.

The resorts have scheduled same-day bus service from six Los Angeles and Orange County shopping centers to the various ski areas for $23 round-trip.

▪ As ski resorts in the area are notorious for selling out tickets and disappointing many would-be visitors, the new bus program will allow skiers to confirm availability of tickets and purchase them at Southern California Ticketron locations.

The resorts are a major source of revenue to the market and a boon to local small businesses who don't seem ready to let the high price of gasoline pull away business without a fight.

Another major recreation-related industry, recreational vehicle manufacturing, is already hurting, however.

Riverside is the nation's largest manufacturing area for recreational vehicles, with two of the industry's largest plants, Fleetwood Enterprises and Golden West, both located there. Figures were not available for the year but sales have been widely reported as dropping fast. Despite job losses in RV manufacturing, total employment and retail sales figures are up in the Riverside area, where 1,800 new jobs were created during 1979, and total dollar volume sales were up 50%.

▪ Housing and commercial construction in the area have both slowed considerably, with only a 5% increase in home and construction. But the industry-laden area has seen even more businesses moving into the market this year than in 1978.

Newcomers include Pepperidge Farms, Hartz Mountain, Schneider Fine Foods, Arlington Heights Packing, Cunningham Mfg.'s Magnetic Pulse division and a Toro Mfg. plant expansion.

A major downtown shopping mall, Mission Square, was also completed this past summer.

In the San Bernardino area, retail sales are up 14.2% over the last year, with less than a 2% increase in employment. Numerous housing projects are still pending throughout the market due to several building moratoriums.

For the first time in the history of San Bernardino County, mineral production exceeded agricultural production, with mineral production accounting for 34% of California's total. Six mineral producing companies are currently in or planning major expansions, modifications or plant updates.

Sacramento

Population	951,000
Rank	39th
Personal income	$6,617,000,000
Income '77 vs. '76	+11.92%

Against a stable economic background, Sacramento experienced highs and lows in other areas in 1979, ranging from a national championship winning sports team to a sex crime scandal that rocked the city's leading hospitals.

The city celebrated the victorious homecoming of its professional soccer team, the Sacramento Gold, from the playoffs of the American Soccer League Championships in Columbus, O., Sept. 16. It was the first pro title since the Solons baseball team captured the Pacific Coast championship in 1942.

The Gold enjoyed larger crowds at its home games than any other team in the ASL, with a season attendance of 72,561. The enthusiasm of the crowds, however, did not spill over into support for a new stadium.

A measure to allow private financing and construction of a

(Continued from Page 69)

$20,000,000 stadium with seats for 30,000 was narrowly defeated, 19,000 to 18,000, in municipal elections Sept. 25.

It was the second time within recent years that a stadium issue was defeated, despite support by the Sacramento Sports Assn., a coalition of local businesses.

▪ The biggest news story of the year involved a Sacramento physician-anesthesiologist who was convicted of sexually molesting female patients. The incident prompted revamping of the governing boards of Sutter General and Memorial Hospitals, two of Sacramento's largest institutions.

The best economic news the city received in 1979 was Hewlett-Packard Co.'s announcement of plans to build an electronic assembly plant in suburban Roseville, which is expected to provide jobs for 4,500 people by 1983 and 22,000 by 1995.

Hewlett-Packard's plant will be a substantial impetus to make Sacramento one of the state's fastest growing regions in the 1980s, according to a study by the Center for Continuing Study of the California Economy, Palo Alto.

The center also predicts an increase of 7,000 jobs in paper, publishing, rubber, plastics, metals and electrical machinery during the 1980s.

▪ New interest was focused on the downtown mall with the opening of a 16-story Holiday Inn with 370 sorely needed rooms to supplement the city's convention center.

Other additions to the downtown plaza included a Weinstock's department store and the start-up of construction on a Liberty House department store, scheduled for completion in 1980.

The 10 square block renovation continues, with the two remaining lots up for bidding in September.

Construction was expected to begin in late 1979 on a 17-story office building that includes a five-story parking garage. Owned by the Canadian Daon Corp., the building will be located next to the state Capitol building.

The California Farm Bureau will occupy a new 160,000 sq. ft. building in early 1980, moving its headquarters from Berkeley to Sacramento.

The major housing project in the city in 1979 was construction of the 15-story Broadway Towers adjacent to the downtown plaza.

▪ In the suburbs, housing construction continued amidst a booming real estate market. As in other California communities, housing prices soared, though the average price for a Sacramento area home, $63,888, (as of the end of summer) would be considered a super bargain by househunters in the San Francisco Bay area.

Because the Sacramento economy lacks a strong industrial base, it was not seriously affected by energy related problems in 1979, though most of the 19 major industries located in the area reported they are concerned about the future supply and cost of energy.

Gas station owners were the most vocal and vehement protestors of the energy situation, with local participants in the California Service Station Assn. threatening to shut down over the Labor Day holiday weekend. The gas dealers were protesting gasoline profit ceilings, but a Superior Court injunction effectively thwarted the shutdown.

Unemployment in the Sacramento area was at 7% in July of 1979, an improvement over the 8.1% unemployment rate for the same period in 1978.

"There still are too many youths and minorities unemployed," said an official at the Sacramento Chamber of Commerce, who also mentioned unemployment problems among clerical workers.

The state government provides 30% of Sacramento's employment and Proposition 13 cutbacks resulted in loss of jobs for some 5,500 people.

San Diego

Population **1,743,600**
Rank **20th**
Personal income **$11,899,000,000**
Income '77 vs. '76 .... **+12.04%**

In 1979 the only word for San Diego's economy was booming. How long it will last nobody knows.

The boom sprang from many sources: A strong upsurge in aerospace and related high technology industries, and also from growth in computer and electronics manufacturing.

And there was a proliferation of small plants, retail outlets and new buildings to house them.

While many cities lost population, San Diego continued its annual growth of 3% to 4%, which stimulated business, especially retailing.

But the expansion put pressure on demands for business and residential quarters, and real estate prices became depressingly high.

▪ The single most important thing that happened in San Diego in 1979 was the improvement in manufacturing related to the boom in aerospace, according to the financial editor of the *San Diego Union*, Donald C. Bauder.

According to Mr. Bauder, the aerospace boom "really helped to buoy employment. It also gave a boost to aerospace high technology manufacturing. Their strength has been the really big positive surprise we've had."

He cited Rohr as a prime example of a company that is going great guns today. But two years ago it was close to bankruptcy. Committing too much of its corporate resource to land transportation, it lost hundreds of millions of dollars from BART in San Francisco and Metro in Washington, D.C. After taking its lumps, the company returned to aerospace.

San Diego registered major employment gains, largely by going after companies and inducing them to locate here. Among them was the Signal Cos., whose corporate team is moving here from its Beverly Hills headquarters.

Another big one is Oak Industries, which was attracted by the prospect of being near the University of California at San Diego, where its research and design facility can take advantage of scientific resources. Aerojet General also will move here.

▪ Another major Japanese company came to San Diego, as Sanyo bought 19 acres in a Kearny Mesa industrial area, built a 300,000 sq. ft. plant and in July of 1979 began producing audio equipment, basically stereo components.

Production of refrigerator units was launched three months later. Employing 400 persons, the plant is gearing up to produce some 200,000 units, both audio and refrigeration, in 1980.

Sony led the Japanese influx in the early 1960s and now produces 500,000 color television sets annually at its 750,000 sq. ft. plant in Rancho Bernardo, next door to the NCR Corp., plant, where the company's main computer frames are made for its world market of banks and retailers.

Sony has 1,400 employes, fewer than 4% of whom were transferred from the Tokyo office.

Fujitsu, of Japan, has completed negotiations with the city to acquire a plant to manufacture semiconductors. The plant would offer about 650 jobs initially and up to 1,000 eventually.

▪ San Diego's employment roles in the health industry are growing, with some new companies beginning operations in the eye care manufacturing field. IVAC and Imed are well established.

The relatively new 811-bed U.S. Veteran's Hospital has devoted one entire floor to research, and draws on the University of California Medical School next door.

The U.S.Naval Hospital in Balboa Park is getting ready to build a larger hospital. The hospital currently serves 343,000 eligible Navy personnel, dependents and retirees in the San Diego area, and trains 40% of the Navy's entire medical staff.

Tourism, which is one of San Diego's three largest industries, suffered a setback in 1979 due to the gasoline shortage and price rise. Resort hotels and Sea World were hardest hit. But business perked up again as the summer moved along.

▪ One of the year's biggest problems for San Diego (though those in the business view it on the positive side) was the rise in property prices, to levels above the national average.

The biggest development in the transportation picture is a projected $86,000,000 "Tijuana Trolley," the 16-mile rapid transit line from the Mexican border to downtown San Diego.

The transit board of directors hails it as an economic link between the U.S. and Mexico that will grow in importance as Mexico emerges as a world petroleum power, and as more dual industrial plants spring up, with corporate headquarters on the U.S. side and manufacturing operations on the Mexican side.

Controversy is swirling about a huge civic project, the Centre City Development of Horton Plaza. It is a redevelopment of a seedy downtown area that will focus on a big shopping center and later will include a convention center, new hotels, a restaurant and entertainment complex. The city would have to advance about $35,000,000 to be repaid by the Centre City Development Corp.

San Francisco-Oakland

Population **3,183,800**
Rank **7th**
Personal income **$29,467,000,000**
Income '77 vs. '76 .... **+10.20%**

San Francisco lost one of its major tourist attractions, the cable cars, when the system was shut down after Labor Day weekend, being judged unsafe by the Public Utilities Commission.

The cable cars are a national monument and the city is applying for $32,000,000 in federal funds to restore them. Meanwhile Chevron USA lead off corporate contributions to repair the cable cars, presenting Mayor Dianne Feinstein with a check for $1,000,000.

Tourists who arrived in San Francisco for an Indian summer visit were disgruntled and businesses at the end of the cable car lines, especially street performers, suffered.

A street vendor who sells peacock feather barettes at $10 each complained that sales were down from 25 to 10 a day and a magician who normally passes the hat among crowds to the tune of $60 a day had his take cut in half.

▪ Despite the temporary loss of the cable cars, tourism is expected to hit an alltime high in San Francisco this year with predictions by the head of the Convention & Visitors Bureau that last year's record of 3,200,000 visitors and convention delegates would easily be exceeded.

Fresh salmon from Puget Sound is one of the many delicacies a shopper can find at Seattle's Pike Place Market.

Robert Sullivan, general manager of the bureau, said that by the end of September there were already more than 2,880,000 visitors and delegates. Since the cable cars weren't shut down until after the height of the summer tourist season, this year's totals won't be affected, he said.

It has not been a good year for transportation in the San Francisco Bay area, which suffered from the 50-day United Airlines strike in the spring and a no-end-in-sight work stoppage by employes of the Bay Area Rapid Transit (BART) system that began Aug. 31.

BART's employes and management are at loggerheads over a cost of living escalator clause in the union contract. When the trains from the East Bay stopped running, some 165,000 commuters jammed buses and street cars in the city and snarled traffic on bridges when they substituted their cars for mass transit.

United Airline's strike had a strong impact on San Mateo County south of San Francisco where the airline is the largest employer with 13,000 employes and an annual payroll of $350,000,000.

▪ Once the United strike was settled, the new $100,000,000 North Terminal, which has the airline as its major tenant, opened at San Francisco International Airport. Financed by revenue bonds and an additional $40,000,000 expenditure by the airline, the new terminal is handling about 12,000 passengers per day.

Traffic was up for the airport this year, with a total of 23,849,415 passengers in and out for the fiscal year ended June 30, a gain of 11.3% over the previous year.

With the new terminal, the airport's capacity is estimated at 31,000,000 passengers annually. A new 7,000 space parking garage adjacent to the new terminal is due for completion by the end of the year.

A 16-story air traffic control tower received approval by the Airport Commission, with construction on the $6,000,000 tower to begin in August, 1980.

▪ At Pier 39, the city's newest shopping and restaurant complex, there were clowns carrying picket signs instead of balloons this fall. The clowns, who performed and sold balloons to tourists all summer, were protesting their eviction by developer Warren Simmons.

Mr. Simmons said that Pier 39 had always intended the clowns' tenancy to be temporary and that Pier 39 was planning to get into the balloon selling business itself.

A waterfront neighbor representing the old Port of San Francisco, the Ferry Building at the foot of Market Street, is the object of a $35,000,000 restoration project.

The Ferry Building with [illegible] ft. campanile clock tower [illegible] been used as the transportation hub it once was since the last automobile ferry to Oakland ceased operations in 1940.

Among proposals for future use of the Ferry Building are a visitors center, museum and shopping plaza.

▪ The Port of San Francisco welcomed the first ship from the People's Republic of China in October when the Zhi Hai sailed through the Golden Gate before taking on a load of corn in Sacramento.

It was an election year in 1979, and the list of candidates gives credence to San Francisco's image as a metropolis where everything goes. Mayor Dianne Feinstein went into the November 6 free-for-all the supposed favorite over Quentin Kopp, her principal rival, only to be forced into a run-off, which was to be resolved Dec. 11.

Running behind the two dominant candidates Nov. 6 was a colorful field which included David Scott, an avowed homosexual; Jello Biafra, lead singer of the punk band. "Dead Kennedys"; Steve Calitri, a taxicab driver who wanted to ban all single passenger cars from downtown, and Patricia Dolbeare, who described herself as an "antiliberal organizer" and called for "an end to government by homosexuals."

The skyline continues to be an

explosive issue in San Francisco. The city planning commission recently rejected a proposed 33-story tower by Southern Pacific Co., and reduced the height of a new building being constructed by Crocker bank. But a referendum putting a 20-story limit on new buildings was beaten in the November balloting.

■ While the problems of energy and inflation are very much in the forefront (the city's Board of Supervisors didn't repeal the odd-even gas rationing system until the end of October), a variety of events captured the attention of San Franciscans during the year.

A record breaking heat wave with temperatures near 100 degrees in September required city water trucks to follow Municipal Railway's diesel buses, spraying them to keep them from overheating.

A "blanket" of 10,000 people jammed Golden Gate Park for the seventh annual Opera in the Park concert and gave conductor Kurt Adler and tenor Luciano Pavarotti standing ovations.

An incident of terrorism came to a chilling conclusion when a sniper who paralyzed central Market Street for 23 hours was taken alive by a police assault team but hanged himself in his city jail cell two days later.

■ Across San Francisco Bay, Oakland is in the midst of a massive urban renewal and development program.

Chamber of commerce president Lex Byer estimated private investment in downtown Oakland by the mid-1980s will total $1.5 billion with Hong Kong U.S.A., City Center, Chinatown, Victorian Row and the Oakland World Trade Center making major contributions.

Three banks are in various stages of construction. Bank of America broke ground Aug. 23 for a $6,900,000, five-story building downtown; The Bank of the Orient is scheduled to open a $600,000, two-story branch in February, 1980, and Fidelity Plaza, a $20,000,000, 15-story office and parking complex near Lake Merritt, is still on the drawing board, though zoning approval has been granted.

At Oakland International Airport, ground was broken in October for a $1,300,000 executive terminal building, an effort to lure some of the 30 executive jets that land daily at San Francisco's airport.

■ Near the Oakland Airport on Hegenberger Road, the Oakland Hilton Inn is undertaking an $8,000,000 expansion of its facilities including a nine-story building and canopied walkway to the present three-story building.

Sports fans were dismayed with Oakland's troubled relationships with its professional baseball and football teams. The A's games were virtually deserted this summer and the city even filed a lawsuit against owner Charles Finley for failing to promote the team.

The Raiders, rumored to be considering relocation to Los Angeles, requested improvements to the Oakland Coliseum totalling $15,000,000. The team is in the final year of its third three-year option in a contract with the Oakland Coliseum, and officials there said the Raiders demands are far beyond the stadium's capacity.

San Jose

Population	**1,232,200**
Rank	**31st**
Personal income	**$10,508,000,000**
Income '77 vs. '76	**+12.9%**

The rest of the country may be worried about inflation and recession but it's a bull market in San Jose, where the booming electronics industry continues to bolster the economy of one of the fastest growing metropolitan areas in the nation.

"The rate of growth in the electronics industry is fantastic," said Jim Mitchell, business editor for the *San Jose Mercury*. "There were 35,000 new jobs in electronics this year."

In October, the Sunday editions of the *Mercury* and *News*, San Jose's morning and evening newspapers, had 94 pages of classified ads, "and more than half of them were job openings," Mr. Mitchell said.

Sales for most of the electronics companies in the San Jose metropolitan area increased 20% to 60% during 1979 and a representative of one company noted he's not worried about sales for the next 18 months, describing the future as "in the bag."

■ Expansion and acquisition are the orders of the day for most of the electronics companies in the Santa Clara Valley that makes up the San Jose metropolitan area.

A case in point involved merger offers to Memorex, a manufacturer of peripheral computer equipment, from Storage Technology, a similar corporation and Amdahl, a computer manufacturer.

Memorex directors rejected a $186,000,000 bid from Storage Technology and continued discussions with Amdahl, based on improving the computer company's offer of exchanging 1.2 of its shares for each Memorex share.

"The demand for these electronics products is so high, people are forgetting what happened when the bottom dropped out of the market in 1974," one industry source said. "Very few market analysts are being cautious today; they are for the most part, optimistic."

Electronic games represent an example of the increased consumer impact on that industry. "The companies can't produce the [computer] chips fast enough," the *Mercury's* Mr. Mitchell commented.

■ San Jose is the picture of suburban affluence with 131 shopping centers, 146 major food stores, more professional employes and more incomes above $25,000 than any of the other 11 San Francisco Bay area counties.

A major challenge facing San Jose is how to manage the rapid growth it has experienced over the last decade, a central issue in the successful reelection campaign of Mayor Janet Gray Hayes.

She described a map of the city as "a moth-eaten tablecloth. We have to fill in the holes before we add more fringe."

Another challenge is to retain an identity for the city while at the same time cooperating with the other 13 communities that populate the Santa Clara County.

A task force that included real estate brokers, city council members, labor leaders, environmentalists and homeowners from all 13 communities recently concluded some form of countywide metropolitan government is needed. But the idea is politically unpopular.

■ Control over land use is a jealously guarded power among the municipalities and one they are least likely to give up.

San Jose, for example, is locked in debate with the federal government over the height of a federal office building to be constructed downtown. The city wants a high rise and the federal government wants floor space provided by a lower, more sprawling complex.

Two new high rises are making their appearance on the San Jose skyline, however. The Union Bank, a 10-story, 120,000 sq. ft. structure, was completed and construction began on a 12-story, 160,000 sq. ft. Lloyds Bank building.

San Jose police moved into new quarters this fall, ahead of official dedication in December. The new $3,500,000 three story building across the street from city hall doubles the size of the Police administration's former quarters.

Despite the jump in the prime lending rate, San Jose banks and builders say there has been no slowdown in the housing market. The average price for a home in the San Jose area climbed by $2,000 per month starting in June after holding steady for the first six months of the year. By September an all-time high average home price was reached: $98,494.

■ Retailers noted that sales are keeping ahead of the cost of living index, though figures show increases of 14% over last year's sales, indicating a pretty close margin of profit.

Energy shortages and price increases had little impact on the San Jose economy in 1979, according to Mayor Hayes. "We have not suffered any shortages as far as new industrial or commercial activity is concerned," she said.

As in other California cities, there were gas lines and the shortage affected tourism in early summer. Visitor traffic was off 30% to 35% in late May and early June, according to James Tucker, economic development director for the San Jose Chamber of Commerce. Late summer activity was at the same level as 1978, he added.

Major hotels and motels have been running at 100% occupancy during the week and close to that on weekends, Mr. Tucker said, compared to 86% a year ago.

Seattle

Population	**1,467,600**
Rank	**22nd**
Personal income	**$12,070,000,000**
Income '77 vs. '76	**+11.13%**

A visitor has only to hop into a cab or car at the Seattle-Tacoma International Airport and drive downtown to catch the sweep of new construction that is changing the face of the city.

Major new office buildings include the 35-story 1111 Third Ave. Bldg., which topped out recently; the 36-story One Union Center, now well along, and the 42-story Seafirst Fifth Ave. Plaza, the newest of the projects.

Among hotels, the 33-story Park Hilton is just about finished, the 18-story David Denny is just starting and the biggest of all, the 47-story, $60,000,000 second tower of the Washington Plaza, the pride of Western International Hotels, is scheduled for completion in mid-1982.

■ Everett, 30 miles to the north and part of the SMSA, will soon have its first 12-story office building. To the east, as one drives across the Lake Washington Floating Bridge on Int. Hwy. 90, new high-rise office buildings of fast-growing downtown Bellevue stand out.

Along with this go a lot of smaller buildings and a record number of apartment and single-family residential construction projects. All told, according to "Marple's Business Newsletter," the regional publication, there is more new construction under way in Seattle than at any time in the city's history.

What's behind it? Topping the list is the tremendous workload of the Boeing Co., the world's largest builder of commercial aircraft. Its work force now exceeds 76,000 in the Seattle-Everett area, and its backlog totals more than $16 billion. In 1979 alone, Boeing added more than 10,000 employes, though figures are expected to level off next year.

But Seattle has become a lot more than just a builder of aerospace vehicles. With expansion in other manufacturing, notably in electronics and diversified goods, and with sharp growth in retail trade, services and other support groups, Boeing's place in the economy has actually shrunk. In 1966, when Boeing employment reached an alltime high, its work force accounted for 22% of all employes in the Seattle-Everett area. Today that proportion has fallen well below 10%.

The big growth comes with emergence of Seattle as the commercial and financial capital of the Pacific Northwest, serving a wide area—from the wheat and apple farms of the interior to the concentrated forest and shipping centers around Puget Sound and the oil and fishing industries of Alaska.

■ Ocean shipping takes on increasing importance, too. The Port of Seattle, under leadership of dollar-a-year commissioners, pioneered the building of docks, cranes and marshaling yards that have made Seattle second only to New York in movement of ocean shipping containers. Now the opening of China gives fresh impetus to shipping, and almost every week delegations of public officials and private industry head off for the Orient through Seattle.

As in much of the country, the most rapid growth in Seattle has

(Continued from Page 71)

come not in manufacturing but in the services sector—new stores and shopping centers, new restaurants and notable expansion in the number of professional services, including accountants, lawyers, bankers and insurance brokers. Legal and accounting firms take a substantial amount of the available new office space.

Health services have also grown in importance—to residents of the Pacific Northwest and to the economy. The University of Washington Medical School, founded just after World War II, has become the largest in the nation in volume of medical research. Its teaching programs tie in with universities from Montana to Alaska. The number of employes in health services in the Seattle-Tacoma area now approaches 40,000, up nearly 25% in three years.

But Seattle has become known as a fun town, too. Two continuing attractions are the famed Pike Place market and the renovation of the Pioneer Square district.

- The Seattle Supersonics captured the National Basketball League championship last year and, in the process, had to move to the Kingdome stadium to accommodate record-breaking crowds. The Seattle Seahawks, now in their fourth year in the National Fooball League, sold out their entire season weeks before the first kickoff. And the Mariners, an American League baseball team, never far from the bottom of the standings, drew smaller crowds.

New restaurants have sprung up in the past two to three years, almost faster than one can keep track of. Indeed, the *Weekly*, the city's alternative newsweekly, recently published a section devoted to the 100 best restaurants. The diversity of restaurants ranges from French, Italian and Czechoslovakian to those influenced by the city's location on the Pacific rim—the restaurants with the cooking of Korea, Japan, China, Indonesia and India.

The legitimate stage continues to draw larger audiences. The Seattle Repertory Theater played to full houses for most of its last season. Now the city has begun construction of another theater on the grounds of the 1962 World's Fair.

In the heart of downtown, the Fifth Ave. Theater, built in opulent Chinese style 53 years ago and listed on National Register of Historic Places, is to be rebuilt as a performing arts center. And each summer, the Seattle Opera Assn. puts on the full Wagnerian Ring cycle, the only place in America where this is done.

The growth of the city brings counterpressures, however. Various individuals with good humor belong to what they call Lesser Seattle, an effort to preserve a beautiful corner of the country for those already here.

One can see why from a recent report from the State Office of Fiscal Management, which placed net inmigration into Washington during the fiscal year through April, 1979, at 100,600. That's 82% of the year's increase in total population and by far the largest gain since annual data were compiled starting in 1965.

Tacoma

Population	1,467,000
Rank	89th
Personal income	$12,070,000,000
Income '77 vs. '76	+11.13%

Tacoma has an asset found at no other deepwater port on Puget Sound: A number of large industrial manufacturing sites served directly by ocean shipping.

The development of these sites is controlled by the Port of Tacoma, which limits new manufacturing to that which requires water borne commerce—either for inbound raw materials or for the shipment of finished goods.

The results are spectacular. Tonnage moving across the docks went from 2,700,000 tons in 1976 to 5,400,000 in 1978. For 1979, the port estimates a final total up another 20%

- Tacoma, already the port of entry for imports of Chrysler and General Motors cars built in Japan, picked up late in 1979 a Mazda contract that is expected to bring to 130,000 the number of automobiles landing annually in Tacoma.

Figuring in all costs (for tugs, barges, diesel fuel, ship stores, longshoring and driveaway), the port estimates the average economic benefit to the community at $180 for each car imported—a total that exceeds $23,000,000 a year.

Two projects indicate the type of industrial expansion that the port fosters. Domtar Inc., a Canadian manufacturer, leased 15 acres for construction of a $15,000,000 plant to build gypsum wallboard. Construction of the plant is contingent upon Domtar's obtaining various shoreline and pollution-control permits. Domtar would bring raw gypsum by water from Mexico.

In another project for an Australian wood products company, the port agreed to advertise for sale a 50-acre tract (one of its inland industrial tracts) that is served by truck and rail, but not by ocean shipping.

The company would remanufacture lumber, produced in the Puget Sound area, into mouldings and other end products. Hugh Wild, the Port of Tacoma's industrial development and marketing manager, said the company expects to employ about 100 people initially.

- New forecasts prepared by Bonneville Power Administration for the Pacific Northwest indicate that Pierce County (Metropolitan Tacoma) will add 20% in employment from 1975 to 1980 and 12% more from 1980 to 1985 to a total of 184,600.

Tacoma business and civic leaders continue to work to retail a vital downtown, an area about a mile off the north-south I-5 freeway and scheduled to have a stub connection to the freeway in 1982. A number of retailers have left downtown for the Tacoma Mall, alongside the freeway on the edge of Tacoma.

Sears, Roebuck & Co., which has had a downtown location in Tacoma for 50 years, recently announced it will move to the mall, where Sears is building a 178,000 sq.-ft.-full-line store, to be completed in 1981.

But there is downtown expansion by other businesses. For example, headquarters for United Pacific Insurance Co., a subsidiary of Reliance Insurance Co., expanded into a building formerly occupied by the Bon Marche department store. The University of Puget Sound, whose campus is on the edge of Tacoma, is building a center downtown for its fast-growing and highly regarded law school.

- Looking further ahead, Tacoma leaders already are working on Expo '89, a world's fair that would bring construction of a permanent sports arena, convention center and exhibition hall. The city already has called in Allen Beach, planner of the world's fair in Osaka, for preliminary studies.

Expo '89 would be a special-category international exposition, such as the Century 21 world's fair in Seattle in 1962, Expo '74 in Spokane and the San Antonio Hemis-Fair in 1968.

Financing for the sports and conventional hall, center piece of Expo '89, is expected to go on the ballot in Tacoma in the spring of 1980. The 67-acre site already has been selected, some of the land vacant or containing rundown housing, but no attempt has been made yet to acquire the land.

- Noting that 1989 is the 100th anniversary of statehood in Washington, Mayor Mike Parker, strong advocate of Expo '89, said, "The eyes of the state will be where they belong—on Tacoma."

Changing life styles, spending spur market growth

(Continued from Page 1)

things happen.

And all of America is prepared to join them, for what is developing is but the more explicit, uninhibited evolution of the social and economic values endorsed in the '70s. The direction of the recent past is a preview of what will emerge in the '80s.

Already some of the statistics are in. We previewed some of the significant demographics a year ago (AA, Dec. 11, '78). The burning question is how markets will change as a result of the proliferation of one-person households, the broad participation of women in the labor force, delayed marriages, the high divorce rate, the low birth rate, women's lib, etc.

Changing life styles are bringing about a higher consumption rate. The degree to which consumers have increased their personal consumption expenditures during the last few years is well portrayed by the accompanying table.

The percentage of disposable income which consumers have devoted toward the consumption of goods and services is now at an unprecedented level.

- Turning to the latest information on U.S. markets contained in the new "Marketing Economics Guide 1979-80," one is immediately impressed by the broad impact that the increase in consumption has had on the thousands of markets in the country.

It accentuates the need for accurate measures of the current dimensions of each market so that marketers can assign their resources commensurately.

We find that from the time of the 1972 census to the present, the Mountain and West South Central regions scored the highest rates of increase in retail sales, 100.4% and 97.5% respectively. Wyoming and Nevada were the outstanding gainers in the Mountain region while Texas led in the West South Central.

Retailers in Alaska benefited substantially from the construction of the pipeline. In 1978, for example, long after the pipeline became fully operational, they realized a retail sales volume that is 138.9% above 1972.

If marketers were to follow the business adage, "people make the markets," and target markets according to where people are moving, they would miss some of the fastest growing markets. Aside from the two Sunbelt states, Texas and Nevada, the other pacesetting states following Wyoming and Alaska are in the Frostbelt: Montana (+105.4%), Idaho (+103.9%), North Dakota (+104.8%) and Oregon (+104.2%). All of these states more than doubled their retail sales volume since 1972.

- In order to capture the lion's share of the action, it is advantageous for marketers to examine each state in detail by focusing on the major markets. The 100 top markets in population account for 58.7% of the population, but 63.8% of the disposable income and 61.1% of the retail sales. These three statistics summarize succinctly the attraction of these markets.

Marketers who are laying their plans for the '80s will give these quality markets careful scrutiny because their high concentration of population offers the highest marketing efficiency, a critical consideration in the growing energy crisis. Moreover, their accumulated purchasing power promises substantial returns.

Among these 100 top metropolitan markets, those who have been making significant gains in retail sales will be the most attractive. Just as each growth company has a mystique of its own and an allure associated with it, so the growth markets have a special appeal to marketers.

The golden dozen markets that have compiled the best sales records, with the exception of Flint, Mich., are all located in the Sunbelt. Consequently, with the ever-growing energy crisis and food shortages, these are the areas that will continue to enjoy healthy growth during the decade of the '80s.

- The accompanying table shows the estimated 1978 retail sales volume and sales growth since the 1972 census. In addition, to help qualify the data, we have added per household sales for each market for 1972 and 1978, and the index of change.

The index shows how the retail sales volume changed after adjustment is made for the demographic change that occurred during the same period. Thus, Flint emerges with the highest index because, during this period, Flint had the lowest percentage of net demographic change. Consequently, an overwhelming part of the change in retail sales was generated by the same (or equivalent) households.

On the other hand Fort Lauderdale-Hollywood experienced the largest in-migration among the 12 markets; therefore, after allowing for the retail sales volume generated by the newcomers, its index of retail sales change came down to 145.

The table also shows the index of sales to income, an excellent barometer to show the retail drawing power of a market. If the index is greater than 100, it shows the extent to which the market attracts customers from outside the market. If the index is less than 100, it shows the extent to which resi-

(Continued on Page 74)

Income vs. consumption

	Personal disposable income	Personal consumption expenditures	Per cent consumption to income
1970	685.9	618.8	90.2%

Growth is spurred

(Continued from Page 72)

dents make their purchases within the market.

Fort Lauderdale-Hollywood, for example, had the highest index among the 12 markets in 1972, but it gradually declined during the period, probably as the result of the rising competition from adjoining retail markets, a drop in the tourist trade and/or the conversions of some of the tourists into permanent residents.

- One of the more familiar and well documented patterns of mobility during the postwar period has been the flight from the central cities to the suburbs. As far as retail sales growth is concerned, the central cities of the faster growing markets portray a different but better picture.

Quite a number of these cities are enjoying a rate of retail sales growth that is almost on a par with the entire market for which it is the nucleus. For example, Houston shows a growth rate for the entire metropolitan area of 121% while the city itself has had a growth rate of 106.8%; Austin shows a growth rate for the entire market of 115.2% while the city itself has a growth rate of 116.2%, a better performance than the entire market and its suburbs.

Herein is a caveat for the uninitiated: Most of the states of the South and the West have laws that permit corporate cities to annex suburban areas with comparative ease.

This policy has the advantage of according to the city fathers the right and the obligation to develop the city according to a systematic, organized master plan. At the same time, it accords to the residents in the annexed areas the right to the various municipal services that are the necessary perquisites of a developing urban area and the obligations of a taxpayer.

The basic purpose of these provisions is to facilitate the development of the city. At the same time, it is intended to forestall the appearance of the ugly problems that have plagued the central cities of the older metropolitan areas during the past few decades.

An accompanying table lists the golden dozen central cities that have compiled the best gains since 1972. Because these cities are associated with the faster growth metropolitan areas, the legal provisions would appear to have contributed to their fast development.

For the market analyst, however, it is important to bear the caveat in mind when examining the data, because there is no easy technique to adjust the retail sales information to permit a consistent comparison along the same boundaries. The Bureau of the Census prepares a periodic study, entitled "Boundary and Annexation Survey (Series GE-30)" which shows the municipalities that have had the greatest net increase in land area since the last census.

In examining the regions and the states of the country, we noted that the states enjoying the fastest rate of growth in retail sales were located in the Frostbelt. Indeed, scrutinizing the remaining metro areas, we find that among the markets with the fastest growth rates are Anchorage, Billings, Boise City, Bismarck and Reno, markets located in the fastest growing states.

One interesting observation is that none of the smaller metropolitan areas in Florida which have enjoyed the most significant population growth rates—Fort Myers-Cape Coral, Sarasota, West Palm Beach and Bradenton—ranked among the top 12 markets in retail sales growth.

This is partly attributable to the fact that the Florida markets enjoy substantial tourist business so that they have a higher level of retail sales compared with other markets of the same population size group. Measuring growth in terms of growth rates, therefore, does impose a handicap.

- This analysis highlights the business opportunities that are open to marketers who want to ride on the coattails of growth. In examining the changing pattern of retail sales among the markets in the country, one important factor to evaluate during this period of rising inflation is the variation in prices from market to market.

For example, per household sales in Anchorage are at a high level of $19,332. This large differential over the rest of the markets in the country is attributable to the high prices that prevail in that market.

On the other hand, the Anchorage market is among the markets that have had comparatively small price increases; Houston and Denver-Boulder have had to adjust to much sharper increases.

The retail outlets located in the fast-growing markets usually proliferate according to a rather familiar pattern. As soon as the retail volume in a market begins to turn upward noticeably, new furniture/home furnishings and household appliance stores and apparel and accessory outlets will be among the first store categories to appear and they will proliferate quite rapidly.

- The ease with which businesses can enter into a market is one of the determining factors. Automotive dealers, building materials-hardware stores and large supermarkets will take a little longer time to start up.

Existing stores usually have a comfortable margin between actual and potential retail volume so that potential competitors will scrutinize all available sites before they make a firm decision to proceed. As a consequence, new, large department stores usually require the longest time to enter a market.

Inflation has imposed a burdensome challenge on marketers. MEI's product measure studies show dramatic changes in the demand, supply and price schedules for many products and services. Not only inflation itself, but the anticipation of accelerated inflation and the increasing importance of consumers of the NOW generation and their influence on the older generations have caused sharp changes in consumer expenditure patterns.

Marketers who continually monitor these changes, market by market, are in a better strategic position to respond to and to anticipate how these changes will affect the sales potentials for their products.

There have been significant changes in consumption expenditures during the past five years.

- For many categories, the data in the accompanying table highlight the power that suppliers of scarce goods and services can exercise to magnify their take of the consumer dollar. The table also serves to quantify the impact that these categories have made on the consumer budget forcing drastic changes in consumer spending patterns.

In the case of the distribution of petroleum products, there has been a substantial attrition of outlets since 1972. Not only has it become more inconvenient and more expensive for consumers to purchase gasoline, but they have also been forced to alter their shopping patterns.

Earlier we voiced the hope that the new Congress, elected on a mandate to cut taxes sharply, would work together with the administration to balance the budget, too. This would have been an important beginning toward restraining inflation and improving economic conditions.

Since this hope was not realized, we are saddled with an administration policy that includes high interest rates coupled with deficit spending, twin scourges that are working at cross purposes. The economy will enter the new decade in a state of stagflation, aggravated by a serious balance of payments problem and embarrassed by substantial international speculation on the dollar.

- There is hope that the exigencies of a Presidential election will force the government to implement a comprehensive, forward-looking program that will start the economy moving forward again.

Otherwise, having whetted the appetite of the NOW generation during the past few years, the administration will be particularly vulnerable to their sizable voting power, their boundless energy to work for a cause, their high educational attainment and their penchant to ask why.

Since they owe no loyalty to venerable concepts, programs, or agencies that have served their purposes in a bygone era, they will be more than ready to supplant them with those that will meet the challenges of the '80s. #

Sammy and Speedy ski down snowy slopes in one of two new Alka-Seltzer commercials, playing up the product's participation as an Olympics sponsor. In bringing Speedy back again, Miles Laboratories called him "the perfect sportsman."

Speedy, Sammy in Olympics drive

ELKHART, IND.—A new duo—Speedy and Sammy—takes off for the Winter Olympics on Jan. 4 when Miles Laboratories breaks a new campaign that reprises the animated Speedy Alka-Seltzer, teaming him with current crooning pitchman Sammy Davis Jr.

The musical commercials retain the "plop, plop, fizz, fizz" tune at the finale, while the story line focuses on Alka-Seltzer's participation in the 1980 games (AA, Sept. 10).

Mitchell Streicker, vp-marketing services at Miles, said that his company and agency Wells, Rich, Greene have been looking for "just the right vehicle for Speedy," and have found it in the Olympics campaign.

One of the 30-second spots shows Sammy and Speedy packing suitcases, riding to the airport, and boarding a plane for Russia. The duo sings: "If you go to Moscow to cheer the U.S.A./ and you get acid indigestion and a headache, let me say/ . . . If you need us, we'll be there, fast relief is on its way."

"Alka-Seltzer. We'll be there" is the tag on the spots.

The Speedy character was born in 1952 when Wade Advertising of Chicago had the Miles account, and endured for 12 years and more than 100 commercials. Richard Beals, now 52 years old and president of an ad agency in California, was then and is now the voice of Speedy.

- Mr. Beals, who stands 4 ft., 6 ins. tall, was brought back along with Speedy for one commercial in 1976. Mr. Streicker said that spot was a test.

"We wanted to see how well he would perform as a spokesman," Mr. Streicker told ADVERTISING AGE. "And he performed very well." The three year interval between Speedy appearances, he said, was so that the animated little man would not be "overused."

Mr. Streicker would only say "maybe" when asked if Speedy would be used in a continuing series of commercials.

Outdoor, a "long list" of magazines and spot tv in "a large number of markets" will augment the three-network tv schedule.

Coast Productions, Los Angeles, handled the stop-motion animation in the current spots. #

'The new Chrysler Corp.' revs up confidence drive

By RALPH GRAY

HIGHLAND PARK, MICH.—A new Chrysler Corp.—saved by the bill—will strut in a confidence rebuilding campaign. Chairman Lee Iacocca will take the stump with the message that Chrysler is here to stay.

He will be calling the besieged auto company "The new Chrysler Corp." in tv spots of up to 90 seconds and page print ads. "We feel we must take steps to restore the level of confidence," said John K. Givens, director of marketing.

Getting prominent mention will be the $1.5 billion in government guarantees Congress approved. The campaign will break as soon as it's law, Mr. Givens said. "It's critical we get the message out that the new Chrysler is in business to stay," he added.

The ads will talk about changes that have been made in the company and ones that will be made, Mr. Givens said. At the same time, Chrysler will mount an internal campaign, "We can do it," aimed at employes and suppliers. Chrysler sales have been hit hard by the general slowdown in domestic sales and by fears that the company wouldn't be around to back its cars.

With Mr. Iacocca's corporate spiel, Chrysler will launch a heavy schedule in support of its small, fuel-efficient front-wheel-drive cars, the Omni-Horizon and imported Champ-Colt. The drive will focus on mpg and resale value.

Tv for the small cars will be regionalized—special feeds to different areas. The import models will be seen the most in import country—the West Coast and Northeast—and the domestic models in the central regions. There also will be a national umbrella effort with all cars.

Chrysler's ad spending will be up in the first quarter in support of both campaigns, Mr. Givens said.

The $300 rebate plan expires Dec. 31, and "at this moment, we don't plan to extend it," Mr. Givens said. "But we expect to take a number of new approaches, several of which have never been done before by others in the automotive business."

Meanwhile, Chrysler was revving up actor Ricardo Montalban in a new Cordoba commercial to air Dec. 30 on football games. "To drive it is to experience the pleasure of a truly roadworthy automobile in the Chrysler tradition of luxury. Yes, even rich Corinthian Leather," he says.

Two engineers introduce the commercial, talking about transverse front suspension. Chairman Iacocca doesn't appear. The Cordoba is the kind of car Chrysler says it needs in the profitable luxury markets.

But the company may be forced to cut back its plans for new entries in that segment. A report prepared for the Treasury Department says front-wheel-drive full-size cars and specialty spinoffs of the 1981 compacts may prove too expensive for the ailing company.

Small cars are better suited to Chrysler's survival in the opinion of some, and the company is breaking a magazine campaign for its imported Plymouth Sapporo this week. The life style and buff book effort says, "Sapporo is a luxury sports coupe from Japan just like Celica [Toyota] except Sapporo has more luxury, more sports and more coupe." Kenyon & Eckhardt is the agency.

Chrysler also is getting outside support. Hughes & Hatcher, Detroit clothiers, took 10% of its sales Dec. 18 to 20 and bought 12 cars, which it raffled off. Detroit Mayor Coleman Young drew the numbers in Hart Plaza. H&H president Max J. Pincus said he hoped the idea

Interbank name change aimed at widening clout

MasterCard taking charge

By JOSH LEVINE

NEW YORK—Interbank is shucking the "Charge" from its "Master" and rechristening it MasterCard for an age when plastic is the universal scrip of a "cashless society."

As plastic cards become the medium for more kinds of financial transactions, Interbank is broadening the connotations of the product it markets on behalf of member banks.

The new Interbank entity will be introduced in a network tv, radio and magazine campaign breaking Feb. 25 via William Esty Co.

After a 10-week period heavily advertising the name change, a second campaign ushering in "the good life" that cardholders are able to tap will commence. Together, the two campaigns take up Interbank's $11,000,000 budget for 1980, raised from $9,200,000 spent this year.

At the heart of the name change is the gradual transition from a retail credit instrument to one that handles a range of nonspecific financial functions which card marketers will promote. (The same reasoning prompted an Interbank rival to switch from the the BankAmericard name to Visa in 1977.)

"We're laying the groundwork for the day when a card is really a bank in your pocket and the brick and mortar branch on the corner becomes an automated teller," said Kneeland Moore, Interbank vp-marketing.

A secondary aspect of the switch is concerned less with such heady musings and more with Interbank's immediate competitive problems with archrival Visa. Though Master Charge has a slight edge over Visa in U.S. card volume, it is at a severe disadvantage overseas, where Visa racked up $8.87 billion in card volume compared to $3.06 billion for Master Charge in the second quarter of 1979. U.S. volume came to roughly $9.5 billion for both cards.

"The word 'charge' just didn't go over in other countries. It doesn't translate well and it's hard to pronounce," said Mr. Moore. "The name change is in line with greater marketing energy in overseas markets that should enable us to close that gap in the future."

The extensive campaign here calls attention only to the changing nature of the card, however.

"A subtle name change, but it will mean a world of new possibilities for you," reads the MasterCard ad copy. "And the Good Life. Because MasterCard . . . is becoming a system for universal transactions. For banking needs and services."

The campaign schedule calls for prime time commercials on all three networks for a five-week period, and radio spots on 1,700 stations. The magazine lineup includes *Cosmopolitan*, *Good Housekeeping*, *Ladies' Home Journal*, *Life*, *McCall's*,

Twas the night before Christmas and all
through ad land
No creatives were stirring, no meetings on
hand.
New products were stored for their '80 debut
And marketing efforts this decade quite through.
The ad folks were sated and all looked well fed
As party thoughts replaced layouts in everyone's
head.
But soon when the lights dim, and the Claus has
departed.
The work for the coming year's ads will get started.
Then on O&M, DDB, McCaffrey & McCall,
It's write away, sketch away, work away all.
A new marketing era will be on the rise
With a host of new ventures to tempt and surprise.
So in this brief respite from ad tears and sweat
We wish all our readers the best holiday yet.

—Season's Greetings

last minute news

Fortinberry to leave JWT for Ross Roy presidency

NEW YORK—Glen W. Fortinberry, vice-chairman of J. Walter Thompson Co., reportedly will leave the agency soon to become president of Ross Roy Inc., Detroit. Ross Roy declined comment on the report. John S. Pingel is now president of the agency. Mr. Fortinberry once headed the Ford Motor account team at JWT in Detroit.

Don't buy Life Insurance!
(...until you get the facts.)
NORTHWESTERN MUTUAL LIFE

One-fifth of Northwestern Mutual Life Insurance Co.'s policyholders will receive dividends hat are higher than their premiums, claims an ad to appear next month that seeks to convince consumers there's a difference between life insurance companies.

'Quiet' NW Mutual raises its ad voice

By JACQUES NEHER

CHICAGO—The "quiet company," Northwestern Mutual Life Insurance, has decided it can no longer afford to be quiet.

The ninth largest life insurance underwriter, based in Milwaukee, will triple its advertising budget in 1980 to $6,000,000 to alert prospects that there is a wide difference in premium costs between companies, and to push a program that will offer current policyholders up to 15% of increased coverage at no change in premiums.

The first phase of the campaign breaks with a spot to run four times during the Super Bowl telecast Jan. 20. The commercial, asserting that there is more than a 50% difference in premiums for the same coverage from one company to another, lists a toll free number by which prospects can order a cost comparison booklet.

"We're trying to dispel the myth that all life insurance companies are the same," said Santo Saliture, advertising and corporate information manager. "Actually, insurance costs vary more than 300%, but we thought that fact would be too unbelievable, so we said 50%."

After the Super Bowl, the spot will give way to a print campaign slated for *Forbes*, *Money*, *National Geographic*, *Newsweek*, *Omni*, *People*, *Sports Illustrated*, *Time* and *TV Guide*.

Phase two of the campaign begins in April, with page ads in the *Chicago Tribune*, *Los Angeles Times*, *Wall Street Journal*, *New York Times* and *Washington Post*. Those ads, along with two tv spots, will introduce a tax savings adjustment the company is making that will allow it to offer $4.5 billion in additional coverage to its 1,000,000-plus policyholders.

The extra coverage, according to Mr. Saliture, will be passed along to pre-1978 policy owners who amend their policies to reflect the 4% rate of return currently assu-

An apology

Although it was a positive event, one picture of a Blair gathering appears as a negative in this week's Photo Review (Page 14). The printing error could not be corrected without delaying distribution schedules.

Recruitment ad agencies new acquisition stars

By BERNICE KANNER

NEW YORK—Doyle Dane Bernbach's announcement last week of plans to buy Barickman Advertising, and the 50% of Bernard Hodes Advertising that Barickman owns, has focused attention on recruitment ad agencies and the race shaping up to acquire them.

Hodes, a New York-based recruitment ad specialist with offices in 12 other cities, will close 1979 billing more than $70,000,000.

Barickman, a 20-year-old Kansas City shop with an agricultural orientation, will bill almost $30,000,000. Bernard Hodes, 47, who owns the other half of his nine year-old shop, will continue as president; James H. Barickman as chairman of Barickman and Hodes. The value of the cash deal is predicated on the earnings of the agencies in the next four years.

• ADVERTISING AGE also has learned that Ogilvy & Mather has talked acquisition with Deutsch, Shea & Evans, a New York recruitment agency with estimated billings of $28,000,000. Foote, Cone & Belding Communications has talked to a number of recruitment agencies, according to president John E. O'Toole, but is more intent on building its own in-house recruitment operation—started a year ago—than buying an outside shop. One source, who noted that FCB's negotiations with World Wide Agency fell through, claimed that the agency was "serious" with the Santa Monica, Cal.-based North American Creative recruitment agency. Young & Rubicam reportedly has also shopped for a recruitment agency, but claims nothing is imminent.

J. Walter Thompson Co. launched the recruitment agency acquisition race with its purchase of World Wide Agency earlier this fall (AA, Oct. 1). The Los Angeles-based recruitment specialist will bill more than $60,000,000 in its 28 offices this year.

These traditionally publicity-shy agencies have not been ranked previously, but it is believed Hodes and World Wide are neck-and-neck for second place behind the Cleveland-based Nationwide Advertising Service. AA has informally ranked the recruitment shops and estimated their billings as follows: Equity Advertising, New York, fourth with billings of $35,000,000; Bentley, Barnes & Lynn, Los Angeles, $30,000,000; Deutsch, Shea; Allied Advertising Agency, Boston, $20,000,000; North American Creative, billing more than $15,000,000, and Shaker Advertising Agency, Oak Park, Ill., Stackig, Sanderson & White, Wash-

Make it Special
BURGER KING

Young lad celebrates his first haircut with a meal out at Burger King—in the company's new campaign themed "Make it special. Make it Burger King."

'Make it special' Burger King theme

By CHRISTY MARSHALL

CHICAGO—Burger King Corp. is breaking a new ad campaign in selected Florida and Michigan markets at the first of the year. Themed "Make it special. Make it Burger King," the drive will be national by the end of February.

The new campaign is designed to give Miami-based Burger King a flexibility not available in the current "Who's got the best darn burger" effort.

"We can build a commercial to stress any one of our attributes," a company spokesman said. The qualities that BK claimed set the chain apart from the pack include atmosphere and the new line of specialty sandwiches (chicken, fish, ham & cheese and steak), among others.

The spots feature "big" days in the normal course of human events. The initial pool of commercials shows a little boy getting his first haircut, an older boy buying his first car, a high school dance, a school ball game and a little girl visiting her father's office. In each case, the day is topped off with a "special" meal at Burger King. The background lyrics explain what is so special about the day.

"We need to and want to tell the world we're different, we have something different to offer," the company spokesman said.

In one spot, a potato farmer, a restaurant manager and a customer (all "real people," not actors), describe what makes Burger King so special.

The campaign, created by J. Walter Thompson Co., New York, is "not targeted to one particular group," according to the spokesman, but is obviously designed with young adults, teens and families in mind.

"We're not McDonald's. We don't have $200,000,000-some to spend this year," the Burger King spokesman said. "With $80,000,000, we can't go after everybody and still be effective."

Network and spot tv and radio are the primary media for the campaign. Magazines may be used for special promotions, the company said, but no plans were announced for any magazine buys like McDonald's use of *Family Circle*, *Life* and *Woman's Day*.

In developing the new campaign, JWT asked all offices to submit creative. A total of 80 campaign ideas were reviewed. Those finalists were "rigorously tested" for several months by consumer panels, and the "Make it special" campaign emerged as a clear favorite, according to the spokesman.

"Make it special" bumps the 18-month-old "Who's got the best darn burger in the whole wide world," but with the rollout of the specialty sandwiches, the line was subtly changed a few months ago to: "Who's got the best darn burger and a whole lot more?" #

Bristol-Myers explains $25 million cable buy

By NANCY GIGES

NEW YORK—In making a $25,000,000 commitment to Ted Turner's Cable News Network, Bristol-Myers is counting on cable to have the impact on tv in the '80s that the formation of the traditional networks had in the '50s.

B-M recently announced a $25,000,000, ten-year sponsorship arrangement with the 24-hour network news channel, which hopes to start June 1 (AA, Dec. 17). The health care company will sponsor health science news features that will run regularly throughout each 24 hour period.

Marvin Koslow, B-M vp-marketing services, said ten 2-to-3-minute original features will be produced each week. The material will be prepared by *Medical World News*, reported and produced by Cable News Network. Each segment that will include an as-yet unselected anchorperson and fresh footage will run four times during the week. B-M is allowed one commercial—probably 30 seconds—for each feature and a credit to denote that the health science segment is sponsored by B-M.

• The company has been a leader in experimenting with new electronic media. Its biggest alternate media buy before this was made on superstation WTBS, Atlanta, where eight 30-second spots are running weekly during prime time movies. Products advertised include Bufferin, Ban, Vitalis and Body on Tap.

Mr. Koslow said this new buy will feature advertising for some of those products plus Excedrin and

Despite economic warnings, most Americans say they have at least enough money to live comfortably. *See Page 4.*

Senate commerce committee tries to soften objections about pending FTC legislation that some say could undermine some major commission advertising projects. *See Page 4.*

The Advertising Hall of Fame of the American Advertising Federation elects two new members—Benton & Bowles late founder Atherton W. Hobler and late Procter & Gamble chief Neil McElroy. *See Page 6.*

Johnson Products takes a closer look at its marketing style to find a solution to sagging sales. *See Page 16.*

Adman turned teacher Robert Reilly recalls his hilarious first job in a small agency. *See Page 17.*

Bill Tyler reminds tv generation writers of the rules of print advertising. *See Page 17.*

Bob Stone reports on this year's avalanche of Christmas catalogs. *See Page 19.*

Lou Haugh forecasts the couponing scene for 1980. *See Page 20.*

A plan is laid out for a new electronic mail service, but the Postal Service may not like the specifics. *See Page 25.*

Coke's new position as marketer for the Cinzano line means more work for Kenyon & Eckhardt, which takes over the account. *See Page 26.*

Bell & Howell Co. will start 1980 with a $2,000,000 campaign to promote its microfilm products division. *See Page 31.*

Section 2

Since the Supreme Court ruling in Bates vs. State Bar of Arizona allowed lawyers to advertise, the trend for professionals to advertise their services has been growing slowly but steadily. Read who advertises, who creates professional advertising and what experts see in the future in Section 2/Professional Advertising, beginning opposite Page 16.

Looking at '80

NBC will be No. 1 by next Christmas: Silverman

By JAMES P. FORKAN

New York—National Broadcasting Co. boss Fred Silverman, in a holiday mood, is still confident that the new year will find No. 3 NBC-TV coming on strong as its rivals, especially ABC, slip in the prime time Nielsens.

At NBC's Christmas party, Mr. Silverman saw 1980 as "an exciting year" for the three-way network tv battle, already the closest in years, and also a very important year for NBC. The outcome, he said, could affect the tv ratings picture for several years. He said he is still aiming for No. 1 by Christmas of 1980.

The November sweeps data, examined market by market, show good improvement for NBC over last year, even stronger gains by CBS and declines by ABC, other NBC execs said. CBS' significant gains this fall, however, may have cost that net "$50,000,000 to $100,000,000 spent on specials, movies, and 'eaten' episodes," Mr. Silverman figured. ("Eaten" episodes are those which never turn up on the screen once a series is killed).

ABC has long had problems with its Saturday, Sunday and Monday lead-ins (including the years when Mr. Silverman headed ABC's programing) but the NBC boss saw ABC's trouble spots "spreading."

He also saw more competition from pay cable and home video during 1980 (depending on movie titles) than existed two years ago, although he stressed that the new media are operating from a much smaller base.

Asked about the outlook for more sponsored series, Mr. Silverman told Advertising Age that several advertisers, including Procter & Gamble, are looking over some prime time series possibilities. That does not mean P&G's "Shirley" is finished, he added quickly. "We haven't given up on that yet," he emphasized.

The Nielsens of "the next four or five episodes, including the two-hour pilot [on Dec. 28] will be more indicative" of what "Shirley" is capable of doing, he feels, noting that the show was hurt by November sweeps fare and pre-Christmas specials. Agencies pointed out, however, that "Shirley" will go against ABC's Winter Olympics coverage in its last two airings before NBC decides its future.

Thomopoulos: ABC will win again this season

By COLBY COATES

New York—Yes, the first half of the prime time tv season produced a few "personal" disappointments, but there's no way Tony Thomopoulos is about to second guess some of last September's more unorthodox scheduling, or the strategy that ended in ABC-TV's first November sweeps loss since 1975.

"We knew the season would be a very competitive situation," the president of ABC Entertainment said in an interview, comparing ABC to "the team that wins the World Series in a four-game sweep one year but takes seven to win the next year. In the end, the same team wins," he said, confident that ABC will overcome a stiff challenge from CBS-TV and retain its Nielsen crown for the 1979-80 season.

So now, as the second season unfolds and Mr. Thomopoulos is blessed with the Winter Olympics schussing its way into two prime time sweeps weeks in February, he's ready to tackle some of the network's more immediate problems. They include: Low ratings in about four prime time hours; the recognition that some key shows are getting older while a few new ones have fizzled, and deciding how "we can make made-for-tv movies that are special."

In attacking a perennial ABC bugaboo, Sundays from 7 p.m. to 9 p.m. (EST), ABC is countering with an informational show, "Incredible Sundays" and, in the second hour, "Ten Speed & Brown Shoe," which Mr. Thomopoulos said is "the best new program we've seen in quite a while."

- In line with his policy of fighting CBS' best with equal weight from ABC, "Ten Speed" goes against "Archie Bunker's Place" and "One Day at a Time."

"It's not going to be easy," he said, but to start things off right, "we've ordered up the most extensive promotion and publicity campaign we've had in a long time." In fact, it started at half time of the season's last Monday Night football game Dec. 17, when Howard Cosell chatted with the show's stars, Ben Vereen and Jeff Goldblum.

Of the six new programs in ABC's second season lineup, the most is expected from "Ten

Texaco leads pack with national gasohol drive

By JOSH LEVINE

New York—Though it trailed going in, Texaco has broken out of test market with the oil industry's most ambitious gasohol marketing program and the first national campaign to run for a branded gasohol product.

Texaco lead-free gasohol was the subject of ads that ran last week in *Newsweek*, *Sports Illustrated*, *Time* and *U.S. News & World Report*, along with 13 newspapers. The ads, created by Benton & Bowles, carried the headline, "Announcing a new way to make gasoline go further."

Several oil companies, among them Standard Oil Co. (Indiana), Atlantic Richfield, Standard Oil Co. (California) and Philips Petroleum Co., have begun limited test marketing efforts in recent months. None of them approaches the scope of Texaco's distribution, which currently includes 600 stations in seven states, and is expected to extend to at least 1,100 stations in 10 states by March.

Though Texaco declined to discuss its gasohol ad plans, a spokesman indicated that additional ads will be placed within the next two months, possibly on a much wider basis.

last minute news

P&G loses trademark suit against J&J

New York—Procter & Gamble has lost its year-old infringement suit against Johnson & Johnson over the use of the Assure and Sure & Natural names on feminine protection products. P&G had contended that the two labels infringed on its own Sure label for antiperspirants. District court Judge Pierre Leval, in his decision handed down late Friday, said a victory for P&G would have set back J&J for at least 1½ years. P&G's own Rely tampon, which has been marketed since 1974, is currently approaching national distribution *(see earlier story on Page 2)*.

Saint-Laurent puts new jeans at Epstein, Raboy

New York—Yves Saint-Laurent has assigned its new line of jeans to Epstein, Raboy Advertising, previously agency for Calvin Klein jeans. The YSL campaign, with spending about $1,000,000, will center on the jeans' jungle animal names. A jeans line marketed by YSL earlier has

Don Smith Adman of the Year

Donald Smith, president of Burger King Corp., has been named Advertising Age's Adman of the Year for 1979. The story of how Mr. Smith led the turnaround at Burger King is in this week's Section 2: Forecast/Review.

Previous Adman of the Year award winners are: 1978, Barry Diller, chairman of Paramount Pictures; 1977, John A. Murphy, president and chief executive officer, Miller Brewing Co.; 1976, Robert E. Dewar, chairman and chief executive officer, K mart Corp.; 1975, Rawleigh Warner Jr., chairman and chief executive officer, Mobil Oil Corp.; 1974, Donald R. Keough, president, Coca-Cola USA; 1973, W. T. Beebe, chairman and chief executive officer, Delta Airlines; 1972, Roy Chapin Jr., chairman and chief executive officer, American Motors Corp., and 1971, David J. Mahoney, chairman and president, Norton Simon Inc. #

Pertschuk rulemaking bar loses in appeals court

WASHINGTON—A court of appeals panel here has ruled that Federal Trade Commission members should not be barred from voting in rulemaking procedures merely because they express views on pending issues.

The ruling is a rebuff to ad industry groups which contended that FTC chairman Michael Pertschuk should be barred from taking part in the children's advertising rulemaking because he had made speeches and written letters which indicate he had prejudged the issues.

The litigation has lost some of its urgency for the ad groups because Congress is currently considering legislation which stops the children's advertising hearing. But it has benchmark potential because it could set the ground rules which will determine whether FTC members and other regulators can discuss rulemaking issues before the formal final decision is rendered.

Earlier a lower court had agreed with the ad groups But the appeals court panel said the rigid restrictions which apply to commissioners when they sit in a litigated case must not be imposed when commissioners participate in rulemaking.

"If an agency official is to be effective he must engage in debate and discussion about the policy matters before him," the panel said. "As this court has recognized before, 'informal contacts between agencies and the public are the bread and butter of the process of administration'."

Ad groups had won strong support from federal Judge Gerhard Gesell in October, 1978, after they contended that chairman Pertschuk's speech at a meeting of Action for Children's Television showed he had prejudged the issues in the children's advertising rulemaking procedure. But the appeals court panel said chairman Pertschuk was merely arguing a line of legal reasoning, and that there is no evidence that his mind is made up on the facts of the case.

The appeals court said the ad groups are entitled to "an impartial decision-maker," but impartial "does not mean uninformed, unthinking or inarticulate."

- The panel noted chairman Pertschuk had appeared at ACT before the proposed rule was issued. "The period before the commission first decides to take action on a perceived problem is, in fact, the best time for a rulemaker to engage in dialog with concerned citizens. Discussion would be futile, of course, if the administrator could not test his own views on different audiences."

Without more, the court said, the expression of opinion does not show that an agency member cannot maintain an open mind during the hearing stage of the proceeding.

Marketer trying soft-soap tack

By NANCY F. MILLMAN

CHICAGO—Will consumers part with their familiar bars of bathroom soap for newfangled pumpable liquid soaps in decorator containers?

Minnetonka Inc. is betting there will be enough consumers willing to slip away from messy and fast-shrinking bars of soap to give it a profitable share of the $700,000,000 market when it rolls its Softsoap into national distribution early this year.

Wally Marx, vp-general manager of Softsoap at the Chaska, Minn., company, told ADVERTISING AGE that Softsoap should be national by the end of the first quarter of 1980.

- Softsoap has been tested in Minneapolis, Milwaukee, Dallas, Houston, Denver, Indianapolis, St. Louis, Omaha and Chicago, and industry sources report that it has garnered between a 2% and 6% share of the bar soap category in each of its markets.

Minnetonka will spend $6,000,000 in tv and consumer magazines for the national launch of Softsoap, the company has told food brokers. While this figure seems high for a company with total sales from all its products in the $25,800,000 range, industry observers note that even $6,000,000 may not be enough for a new product launch in such a competitive category. Minnetonka handles the brand in-house.

The Yardley of London division of Jovan Inc. rolled out its liquid English lavender soap last spring and summer, specifically to beat Minnetonka to the punch (AA, March 19). Yardley currently is adding a cocoa butter soap, one of the varieties of its bar soaps, to the liquid line. Couponed newspaper ads promoted the English lavender rollout, with copy stressing the end of the "mushy, dirty bar" and savings, "because one (16-oz.) bottle . . . equals five bars of ordinary soap." After several agency switches, Bozell & Jacobs has settled in as the Yardley shop.

But according to Mr. Marx of Minnetonka, "Yardley is a dud." He said the latest market reports (reflecting the period ending mid-October) showed Yardley at less than 1% share in each of its markets. At Yardley, Tom Measday, vp-general manager, would only say that "we're the only national brand of liquid soap. We have a market share that is satisfactory to us." Mr. Measday said the Minnetonka assessment of Yardley's sales was "basically wrong" because it was not a national reading, but he would not comment on Yardley's national share.

Major health and beauty aids marketers are going to be watching Minnetonka's rollout with more than casual interest. Top marketing men at S. C. Johnson & Son, Andrew Jergens Co. and Armour-Dial had very favorable comments about Softsoap's concept, packaging and progress so far. And rumors indicate that Helene Curtis Industries and Jergens are among companies contemplating entering this market.

One major marketer already has jumped in. Clorox, with its two-year option to acquire Evolution

Chrysler spots delayed

New Chrysler tv spots featuring chairman Lee Iacocca hailing the government's loan guarantee were to run on last weekend's football telecasts, but the nets turned down the spots because the President has not yet signed the loan guarantee bill, and it might be construed as tending to influence legislation. In the spot, Mr. Iacocca says, "A special bond has been created with the American people—a bond that puts an obligation on the New Chrysler Corp. to turn itself around." Meanwhile, page print ads are pointing out the company's strong points and note changes that have been made or will be made. "America has given the New Chrysler Corp. breathing space," ads say. "Now watch us go." Kenyon & Eckhardt is the agency.

Testimony concludes

Both sides eager for P&G mark decision

By LOUIS A. FANELLI

NEW YORK—Execs at Procter & Gamble and Johnson & Johnson's Personal Care Co. may be tempted to break open cases of Sure antiperspirant and Shower to Shower deodorant bath powder to help keep dry this week as P&G's year-old trademark infringement suit is being decided.

The parties to the trial are awaiting a decision by federal district court Judge Pierre Leval. Testimony ended Dec. 21, and both sides have requested an early opinion, but it is not known when the ruling will be issued.

The suit centers around J&J's decision to market Assure deodorant tampons and to begin testing Sure & Natural feminine napkins. P&G lawyers argued that the use of those two names infringed on P&G's Sure trademark.

- Industry sources indicated that P&G's suit may be an attempt to delay J&J's introduction of Assure in order to guarantee the successful national rollout of P&G's Rely tampons. Marketed since 1974, Rely began a region-by-region rollout in 1978. It currently is approaching national distribution, with Benton & Bowles handling (AA, Nov. 12).

If Judge Leval rules in favor of J&J, it is likely that P&G will appeal the case. J&J, however, will be able to continue to market both Assure and Sure & Natural. Assure is currently testing in Portland, Me., and Rochester, N.Y. Sure & Natural is currently testing in Florida markets.

The decision to use the Assure name apparently came after various tests, including the development of a separate campaign using the name Woman.

According to testimony by Michael Hayes, Personal Products Co. president, the Case & McGrath agency was asked to develop the Woman campaign because of "dissatisfaction with the progress we were making with SSC&B," the Assure agency.

- J&J later decided to drop the Woman label, "because Assure seemed to be making better progress."

If the court now decides to rule in favor of P&G, testimony has indicated that the cost to J&J—for repackaging and new advertising—could be substantial.

While Johnson & Johnson would not estimate the amount involved, an SSC&B exec said that if only a name change—not a change in the advertising focus—is involved, the additional cost would not be great. #

FORECAST/REVIEW

Adman of the Year, 1979

A touch of magic

BY CHRISTY MARSHALL

MIAMI—Three days after being named McDonald Corp.'s vp in charge of just about everything except finance and law, Donald Smith left the No. 1 fast-food chain to join Burger King Corp. as president and chief operating officer.

That was in 1977. McDonald's was clearly supreme in the fast-food industry then, and Burger King was faltering, with little growth and critical consistency problems. Three years later, the chain that now claims it's got "the best darn burger in the whole wide world" is showing growth in a period when sales of McDonald's and other competitors have gone flat.

BK's average sales per unit in 1977 were $524,000; for fiscal year 1979, that figure grew to $658,000 and the estimate for 1980 is $725,000.

▪ Under Mr. Smith, Burger King has successfully grabbed a hunk of the children's market away from rival McDonald's, has improved its product and expanded the product line, has upgraded the stores—both inside and out—and has increased its market share of the fast-food industry to an estimated 7.6% in '79, from 5.7% when he first took command.

To salute that corporate turnaround, the editors of ADVERTISING AGE have selected Donald N. Smith, 39, as Adman of the Year for 1979.

The Burger King system Don Smith took over in 1977 was hardly a threat to McDonald's.

"On balance, Burger King was not growing in terms of comparable sales improvement—that is, producing incremental real growth from year to year," recalled a Burger King veteran, exec vp-operations Jerome Ruenheck. "As a system, our comparable growth was not there for as long as I can remember.

"If somebody did not do something about it, eventually I think we would have gone the way of some other fast-food companies and just sort of slipped into the sunset."

So why did Don Smith leave McDonald's, where he was heir apparent to the presidency, to take the reins of a troubled company?

▪ "Yes, I was given the title and so forth [at McDonald's], and the position gave me a clear shot at the top," Mr. Smith said. "And I'd been given some assurances that I would be president in a few years. The thing of it was I still wasn't really running the show.

"Even if I were to become president, I was not to be the ceo at that time, since Fred Turner, who is relatively young, would still be chairman of the board and chief executive officer. As such, I was not the final decision maker *per se*, so I was really interested in being able to get out and do something on my own.

"There was another incentive. Call it a little hokey if you will," Mr. Smith said, "but—I was

(Continued on Page S-3)

Christy Marshall is an associate editor of ADVERTISING AGE who, among other beats, covers the fast-food industry.

A down year? Not in advertising growth

BY ROBERT J. COEN

NEW YORK—For the fourth year in a row, advertising revenues have grown faster than the U.S. economy. Figures for 1979 show that total advertising expenditures increased by 13.3% over last year to $49.83 billion.

This has come despite a less than bright outlook for business in 1980. Inflation is expected to persist, and many industries are not likely to register real profit growth. Advertising demand, nevertheless, should continue to be relatively strong as a result of the 1980 political election campaigns and the Olympics, plus the momentum of the competition for consumer markets that has been building for the last four years.

Yet, because of the state of the economy, the advertising industry cannot expect an outstanding year in 1980, even though it probably will continue to outpace the softening economy.

The exceptional growth of advertising in 1976, 1977 and 1978 was quite a surprise to most serious students of advertising economics. A year ago, virtually no one would have believed that 1979 advertising growth would exceed 13%. The economy was supposed to soften much more than it did, and the advertising industry was expected to stall before it moved up again in the 1980 election-Olympic year.

The performance of 1979 now makes it clear that the role of advertising in industry has changed significantly in the last few years.

For 10 years prior to mid-1975, the ad industry's growth was sluggish. A series of unique events—including the Vietnam war, the withdrawal of cigarets from the broadcast media, President Nixon's wage and price controls and the deep and extended recession that began in the fourth quarter of 1973—had more of a negative impact on advertising than they did on the economy in general.

The impact of these pressures had run their course by mid-1975 and, as the economy began to expand in 1976, the climate in the ad industry rapidly improved. A flood of "held-back" new product introductions was released and advertising competition began to reappear. Established products were forced to respond with heightened advertising to sales ratios as competition for expanding consumer markets grew.

In 1980, the competition for market shares is not going to weaken in most industries, despite adverse economic developments. It will take more than a mild recession to offset the current momentum. Furthermore, it will require at least six months of lead time to reverse the strategies of most major consumer marketers, who are not inclined to relax their aggressive competitive postures.

Barring an outright economic disaster, advertising will probably do fairly well next year, even though we may experience a mild economic recession.

National Advertising Indexes

The McCann-Erickson National Advertising Indexes are a key barometer of the month-to-month path of national advertising spending. The indexes are seasonally adjusted measures of the monthly advertising revenue of the major national media. The general index is a composite of the data for network television, spot tv, magazines and newspaper expenditures of national advertisers.

The general index is based on the year 1967, which is equal to 100. The trend in national budgets was quite sluggish through the first half of the 1970s, not reaching the 150 level until the closing months of 1975. In the second half of the decade, the trend turned sharply upward. During 1979, the upward trend has continued, as the general index nears the 300 level. National budgets for the major media have nearly doubled in the last five years.

The indexes for each component shed some light on developing patterns in each of the individual media. For example, network tv, spot tv and newspapers have gradually moved upward throughout most months of this year, while magazines seem to have peaked in the

How 1980 is shaping up

(Continued from Page S-1)

summer. The magazine trend line may be flattening, or it may just be temporarily stalled—time will tell.

Preliminary 1979 Details

The ad expenditure figures for 1979 must be labeled "preliminary" because some minor revisions will be made when 12 months data become available. For most media the estimates are based on monthly data that account for about 80% to 90% of the year's activity.

In 1979, total national ad expenditures increased by 12.8%. The largest gain was recorded by newspaper budgets. Some of the growth here can be explained by 1978 figures that were affected by newspaper strikes in New York and St. Louis. Another part of the improvement in the category stems from higher automotive linage figures, which are attributable to new model announcements and inventory clearance promotions. Cigaret schedules were also much higher in 1979, as manufacturers continued to introduce new brands or increase their budgets for established brands in order to defend or expand their market positions.

The outdoor medium likewise has done well in 1979, with automotive and cigaret activity also helping to raise 1979 receipts.

Network tv revenue growth gradually improved as the year unfolded. The sharp upturn in commercial prices in the fall, when the new season got under way, helped account for a projected yearly gain of at least 14%.

Most of the other media categories have posted gains close to the national average or just slightly lower. The ad expenditures of the companies doing business nationwide were very good in 1979. Most media ended the year with larger national advertising sales than they had expected 12 months ago.

Even more surprising was the continued strength in ad spending by companies doing business at the local level. Retailers maintained or increased their newspaper schedules, and classified linage continued to surpass the record-breaking levels of 1978.

The growth in local tv expenditures, moreover, has been surprisingly strong all year. Budget gains were well above the increases posted in retail sales of individual markets.

The majority of the reports on 1979 activity in other local media sectors have also been quite good. Total local advertising demand has continued to be strong despite soft spots in some local markets.

The Future

The advertising industry is closing the decade of the '70s on a strong upward trend, and the long range outlook for the '80s is good.

I look for advertising spending in 1980 to rise somewhere between 10% and 12%. The industry may not experience an exceptional boom in 1980, but relative to the floundering economy, it will probably turn out to be a fair year at least.

The long range outlook for the decade should be quite good, once the opening years are past. Real economic growth will occur during the '80s, as will an increase in the total number of people with jobs. There will be more women in the work force, and the quality of their employment will rise. Those among the large population bulge resulting from the post-World War II baby boom will reach their 30s. And there will be a concentration of well educated and productive adults in the society of the '80s. #

Ad campaigns—Burger King's way

MIAMI—Burger King Corp. is breaking a new advertising campaign in January (AA, Dec. 23) to replace its nearly two-year-old "Who's got the best darn burger in the whole wide world" pitch. Over the years, industry watchers have claimed that the nation's No. 2 fast-food chain has had some of the best darn advertising in the industry.

The company, founded in 1954, broke its first major campaign in 1955. Created by Hume, Smith, Mickelberry of Miami, the ads used the theme, "Burger King, the home of the Whopper."

"The Whopper was the one big differential Burger King had," HSM president David Hume told ADVERTISING AGE. "Approximately 40% of the business was coming from the Whopper. McDonald's coming out with the Big Mac was, in essence, one of its answers to the Whopper."

That campaign ran until 1968, when the account shifted to one of parent Pillsbury's shops, BBDO.

During the HSM stint, Burger King created the current setup in which each franchise allocates 4% of its sales to marketing and advertising and leaves control of the advertising solely in the hands of the corporate headquarters.

Children have always played a special part in Burger King ads.

- After the HSM days, the first campaign from BBDO for BK centered on the line, "It takes two hands to handle a Whopper." The double-fisted approach ran from '68 until 1973, when the famous "Have it your way" campaign began.

"Have it your way" was the first time Burger King really worked at setting itself apart from the pack of fast-food places, as it stressed that at a Burger King you were able to get burgers "exactly the way you want them," not the assembly line way. The jingle crooned, "Hold the pickle, hold the lettuce," and Burger King had found its niche. The company stuck with the campaign for three years, upgrading it with the addition of stars such as Vincent Price, decked out as the devil, and humorous Harlem Globetrotter Meadowlark Lemon, who stacked up burgers for a very big meal.

But in August, 1976, as fewer customers waited in long lines to get it their way, Burger King dropped BBDO, and picked J. Walter Thompson Co. to handle the account. Thompson came with fast-food expertise from Shakey's Pizza and the Red Barn systems.

JWT's first campaign for Burger King broke the following November and tapped the Bicentennial bonanza with, "America loves burgers and we're America's Burger King." That campaign ran, with some expansions, until the current "best darn burger" drive broke in February, 1978

- As in the early days, messages directed to children have played a special part in the Burger King strategy. In 1975, BBDO retired the early little King character and courted youngsters with live action ads that tapped the adult's "Have it your way" approach. In one spot, kids donned fake noses and glasses to stress their individuality and the special service they get at BK.

With Don Smith on board, the company began to shoot for the children's market with greater intensity when in the summer of 1977, it formally introduced the live Magic Burger King to the public. The subtheme of that first campaign was "Now you're old enough to enjoy Burger King." About the same time, the company made some subtle changes in its adult advertising to feature more children in its spots, munching along with their parents. #—*C.M.*

Russian actions imperil marketing plans

Cloud over Olympics tv

By COLBY COATES

NEW YORK—Fred Silverman may be the president of NBC, but it's the President of the United States who will decide if the network broadcasts 152 hours of coverage of the 1980 Summer Olympics from Moscow.

Should the President ask the U.S. Olympic Committee to keep the athletes home and they agree, then good citizen NBC would pull out as well. Two separate insurance policies would take care of NBC's $100,000,000 investment, but the harm to its long-range prime time programing strategy would be severe.

"We won't be there if the U.S. doesn't participate," an NBC exec said. Meanwhile, "all our planning is going ahead with the full expectation that the games are on." If as has been suggested, the games are postponed a year and moved to another site, NBC could be in trouble since its contract is with the Soviets. However, in view of the unusual circumstances, it's not inconceivable that the International Olympic Committee might step in and award the network the tv rights.

Speaking on PBS' "MacNeil-Lehrer Report," Robert Kane, the head of the USOC, spoke against the concept of a U.S.-initiated boycott, but admitted, "We would ad-

Vodka faces backlash

By JOSH LEVINE

NEW YORK—In the vodka classification of grain neutral spirits, some brands are decidedly less neutral than others.

The recent intervention in Afghanistan by Soviet forces and the ensuing uproar here almost certainly will loosen the grip of Russia's wildly successful vodka export, Stolichnaya, on the deluxe vodka market, liquor analysts say.

Moreover, they add, guilt by association could taint even those domestic brands that have cloaked themselves in a Russian bearskin mantle to give their products a romantic allure. Among the drinking public that has made vodka the single largest liquor category (Americans bought 95,600,000 gals. of vodka in 1978), there is little cognizance of a brand's origin—especially in cases where U.S. marketers have done their best to obscure their own roots.

- Only Stolichnaya and several virtually unknown brands can claim to come from Russia, however, and the distributor, Monsieur Henri Wines, Purchase, N.Y., has no plans to mumble about it now. "There are no revisions in either our ad schedule or the copy," said a Stolichnaya spokesman. "The ads that appear in February still say, "The only vodka imported from

Hands across de Garmo

John de Garmo (left), an outspoken opponent of "merger for merger's sake," said the pairing of his shop with D'Arcy-MacManus & Masius, coming after several "serious" offers, is "a marriage of two strong partners and, therefore, worthwhile." He and his new boss, D'Arcy chairman James B. Orthwein, told why they teamed up by pointing to this picture. "It says it all," Mr. de Garmo added. (See story on Page 4.)

ARF magazine research study unable to pick best method

By BERNICE KANNER

NEW YORK—The ad community, which has long awaited the Advertising Research Foundation comparability report, will have to wait some more to learn if the two traditional interview methods used in syndicated magazine research can be comparable.

Initial findings of the $425,000 study—to be announced here Jan. 23—indicate that the two methods don't compare. But the research fails to answer which method is better.

Simmons Market Research Bureau uses the traditional through-the-book method for weeklies and larger circulation monthlies and the recent reading mode for smaller books. Mediamark Research, formerly Magazine Research, relies exclusively on the recent reading or recall method of interviewing.

- Top line results of the study reportedly confirm that the recent reading mode produced dramatically higher audience estimates than the through-the-book approach. (The ad community suspected as much after MRI released total audience numbers larger than expected in October). But with the exception of the triweeklies and, to a lesser extent, the small circulation monthlies, these recent reading scores are not consistently greater than those obtained by through-the-book interviews.

The findings also revealed that on an average, using a mixed method (recent reading and through-the-book in one interview) did not greatly distort the through-the-book results. But scattered impact means that this probably will be investigated further.

The preliminary data, based on interviews with 4,600 people in 24 weeks, also suggests that qualifying the data, as SMRB did in its fall, 1979, report, failed to reconcile the differences between the two methodologies. It does not say, however, that the differences are irreconcilable.

For that, the research community will have to wait until March when a bottom line report evaluating this study is issued, said one member of the Magazine Research Development Council, the group of agency, advertiser and publishing executives empowered to pilot the study. There has been an unofficial ban in discussing the findings until the conference later this month.

SMRB attempted to reconcile the differences in the methodologies when it detected a 90% "overstatement' in the data for small magazines using the straight recent reading method and "qualified" those numbers to align them with results achieved using the through-the-book method. Media researchers bristled at the way the data was qualified, claiming it had been done arbitrarily and without their consent. Bending to pressure, SMRB later made the unadjusted

Braniff betting on better barter

By JOSH LEVINE

NEW YORK—Braniff International will bolster its media buying with media flying as its $20,000,000 1980 campaign gets off the ground Jan. 15.

Dallas-based Braniff and several other airlines are starting to avail themselves of unofficial government sanction of barter payment for airline ads. Though the Civil Aeronautics Board has yet to issue a ruling on the subject, the agency, upon request, is allowing airlines to exchange flight tickets for advertising time and space.

A CAB spokesman said the relaxation of an "ironclad rule" that all tickets be paid for in cash comes at a time when impending recession and soaring jet fuel bills threaten the profitability of many carriers.

- Though the cash saved through barter gives slim comfort when fuel bills often account for over a third of an airline's operating costs, Braniff, for one, could use the relief.

In the face of 1979 third-quarter losses of $9,800,000 after taxes (operating losses were much higher), Braniff's new ad theme brings home its past distress as much as its future goals: "We better be better. We're Braniff."

Barter may allow Braniff to extend the reach of its $20,000,000 worldwide budget for 1980, up from $14,000,000 in 1979. If the media prove receptive to the airline's barter offers, Braniff could decide to reinvest the cash savings in advertising to bolster an expected sag in airline load factors.

"Braniff is attempting to barter for all media, as are other airlines," a Braniff spokesman said. "Obviously, there's only so much call for the tickets the airlines are offering," he continued, "so the guy that gets to the media first is in the best position."

- Continental and Pan Am are known to be engaged in bartering already.

Whoever gets to the media first, barter may not overturn airline ad practices, according to airline executives. "Everybody's running around like there's a sudden bonanza out there," said an advertising director at another large airline. "There isn't," he added. "You have to realize that what you're giving away is distressed merchandise, and, consequently, you're going to get distress merchandise in return. An airline needs upscale demographics, and barter isn't the way to get them."

The current Braniff (paid) sched-

last minute news

WRG may lose $12 million Jack in the Box

SAN DIEGO—Ralston Purina Co.'s Jack in the Box restaurant chain is reevaluating its 2½-year relationship with Wells, Rich, Greene/West, on its $12,000,000 account. Sources say the chain was ready to leave the Los Angeles shop, but late last week WRG was given 30 days to present new approaches in an effort to save it. The fast-food chain apparently was not satisfied with earlier campaigns in the works at WRG for early '80 launch (AA, Oct. 1).

Philip Morris denies Marlboro II in works

NEW YORK—Philip Morris U.S.A. has denied a report that it has begun production of an ultra-low tar cigaret called Marlboro II at its Richmond plant. "We have no plans to produce or market a brand called Marlboro II," a PM spokesman said. An industry source conjectured that a brand called Marlboro II would have "enormous impact" in the ultra-low segment, whose brands include American Tobacco's Carlton, RJR's Now and Lorillard's Kent III and Triumph.

Iowa's airwaves will be taken over this week by Presidential hopefuls including: Howard Baker Jr., John Connally, George Bush, Jimmy Carter and Edward Kennedy.

Iowa airwaves fill with Presidential drives

**By JACQUES NEHER
and RICHARD GORDON**

DES MOINES—Multiple choice quiz. Thirty seconds:

The next President of the United States should be: (A) Solid and trustworthy? (B) a fairly decent photographer who will bring back that old-time pride? (C) a man who grew up with soil between his toes? (D) a man who will call it as he sees it? (E) a man who needs no training? (F) an advocate of prayer in school? (G) none of the above?

Iowans watching tv in the next week will undoubtedly have a chance to pass judgment on the above choices as at least six of the 10 major Presidential aspirants promise to fill the local airwaves with these tidbits in their respective bids to win delegate support—or at least "momentum"—in the nonbinding precinct caucuses Jan. 21.

Since Jimmy Carter first employed the caucuses four years ago to win his first battle and set the stage for his long-term candidacy, the event has blossomed into Iowa's biggest growth industry. In 1976, Mr. Carter and his five rivals spent a total of $35,000 in radio and tv; by the time the last spot is aired next Sunday, the 14 Iowa tv stations, alone, will have absorbed at least $350,000 from the various campaign chests. Radio stations and newspapers will probably take in an additional $200,000.

While some candidates have downplayed the importance of the Iowa caucuses and one has chosen to stay out all together—Republican John Anderson—others believe the caucuses, if nothing more, will "set the tone" for the media campaigns to follow in the primaries. Some say the caucuses will present a chance for the candidates' image makers to test the effectiveness of their initial positioning and media strategies.

A compilation of orders for airtime at 11 of the state's tv stations last Wednesday showed John Connally as the biggest spender by far, with $115,445 already spent or on order for the next week. Howard Baker Jr. came in second, with $70,056; President Carter, $37,975; George Bush, $25,735; Edward Kennedy, $10,530, and Ronald Reagan, $5,550. The Philip Crane camp, which received a late transfusion of cash following the Des Moines Republican debate Jan. 5, was scurrying to buy tv time late in the week and totals weren't available. Jerry Brown and Bob Dole also were making last-minute inquiries for availabilities.

▪ Only a few months ago, most political observers thought it unlikely that candidates looking for votes in the 2,531 precinct caucuses would want to invest much in media, but instead would turn their efforts to developing organizational bases that would bring them their votes. With so small a percentage of voters likely to participate in the event, major media coverage was considered wasteful.

But with a few of the candidates beginning to buy tv time as early as November, the battle for the airwaves quickly accelerated, either because the candidates found they were too far behind at the organizational level, or else they just didn't want to be viewed as underfunded.

For example, George Bush's heavy broadcast buy in the final week "to some extent . . . is defensive," according to deputy political director Dave Sparks, who added that the candidate wanted "to be on the air when everyone else is on the air."

So now, if as many as 50,000 people brave the elements to congregate in their local churches or basements for the hours-long affair—which would be about double the turnout in 1976—the candidates, together, will be spending more than $10 per vote just in the media.

▪ On the Democratic side, the President is overwhelming his main competitor in Iowa, Sen. Kennedy, with a multifaceted tv campaign that seems to be testing several themes. One series, in a backhanded way, is apparently designed to question Mr. Kennedy's honesty. One spot, which excerpts a Carter speech on the economy, ends with the voiceover: "President Carter—he tells you the truth." Another ends with voiceover saying: "You may not always agree with everything he does, but President Carter is telling the simple truth."

Another series of 30s, 60s, and five-minute commercials shows the President behind the scenes at the White House, discussing policy with Cabinet members, special interest groups, and the Vice-President.

In one spot, geared to show the President as decisive, a foreign policy discussion ends with the President saying to his advisors: "I'll make a decision on it today."

A new set of spots, breaking this week, consist of man-on-the street interviews with Iowans who supported Mr. Carter in 1976 and say they still do. This series, according to the President's adman, Gerald Rafshoon, is intended to show "continuity of support for the President in Iowa."

▪ Sen. Kennedy's advertising thrust appears much weaker in comparison, but the Kennedy camp is said to be relying more on organizational efforts than media. The candidate started his tv sched-

(Continued on Page 74)

GOP plans $5 million push

NEW YORK—The Republican Marketing Group, an organization jointly-sponsored by the Republican National Committee and the National Republican Congressional Committee, will begin airing spots in February that urge the nation's voters to "Vote Republican—for a change."

The $5,000,000 ad campaign is scheduled to run on network and spot tv through mid-June. Humphrey Browning MacDougall, Boston, is doing creative. Malcolm MacDougall, vp-creative director, was among the major strategists on the unsuccessful Gerald Ford Presidential campaign in 1976.

This new Republican effort is described by a Republican National Committee spokesman as an attempt to "get more Republicans elected" to Congress.

Ads will focus on issues such as the economy, energy and declining American prestige. They will argue that these problems are either the result of or have been inadequately handled by the Democrats, who have controlled both houses of Congress for the past 25 years.

The Republicans had been trying to keep details of the campaign under wraps, hoping to announce it with hoopla and confetti at an end-of-the-month press conference, but information has been leaking for the past week from talkative agency and Republican sources in Boston and Washington.

▪ A major reason for wanting to keep the lid on was that the Republicans have not yet raised all of the $5,000,000 needed to mount the campaign. According to James Killough, former Compton Advertising exec now heading the Republican Marketing Group, "We are in the process of trying to raise the money. We are close, but not close enough, which is not to say that we won't do it."

▪ Mr. Killough's organization is Washington-based, as is the Republican National Committee and the National Republican Congressional Committee. Holding up the third end of the Boston-Washington-New York triangle in this Republican effort is SFM Media Services here, which will handle buying time.

According to reports from agency and Republican National Committee sources, the campaign includes six spots and three flights

FTC trims role as media watchdog

WASHINGTON—At a full-day session mostly closed to the public, members of the Federal Trade Commission made it clear to staffers last week that they have no interest in trying to stretch their antitrust power to reshape the structure and practices of media.

One clue to the kind of information examined at the meeting came at a late afternoon session, where invited representatives of Warner Communications' Qube system briefed the commissioners on their two-way cable tv network in Columbus, O., including its potential as an advertising medium of the future.

Little has been heard about FTC's media plans since a two-day seminar in December, 1978, when panels of experts from the industry and the legal community sketched their views of emerging ownership and business practices.

During the closed meeting last week, staffers provided the commission with a range of ideas for further investigations and interventions at FTC and other regulatory agencies. The commission in-

JOB HUNTING and recruitment

JANUARY 14, 1980

'No recession in ad business'

Job demand stays strong

BY B. G. YOVOVICH

CHICAGO—Despite an uncertain economic climate that is causing employers to hesitate in taking on new employes and is inhibiting individuals from switching jobs, recruiters specializing in advertising/-marketing positions found that the demand for personnel remained strong through 1979.

"There is no recession in the advertising business," says Edwin Stern, who heads his own New York-based recruitment agency, "though, with the uncertainty of the economy, people are more chary about moving."

A number of factors helped fuel the demand for advertising/-marketing personnel. With the 1973-74 recession following quickly on the heels of the severe advertising personnel cutbacks in 1970-71, the number of recruits coming into the field was severely limited during much of the early 1970s.

The popularity of advertising during that time was also severely damaged by Federal Trade Commission investigations in the late 1960s and early 1970s and by the general antibusiness attitude prevalent during the Vietnam war years.

▪ Though some training programs have been established recently, the number of individuals with the kind of experience needed at the middle-management level remains low.

"A couple of years ago it was impossible," recalls Marcia Fleschner, a recruiter with Smith's Fifth Avenue in New York, who says that the shortage eased somewhat this year.

"There's not the gaping vacuum any more," agrees Tony Reynes of the Judd-Falk recruitment agency's Chicago office.

The federal wage-price guidelines have also helped to stir up movement within the industry. With many companies holding to the wage hike ceilings, says Steve Werner, who heads his own New York agency, "Many people have found it necessary to switch jobs in order to get raises that enable them to keep up with inflation."

Faced with the prospect of losing some of their better employes, "this year for the first time we're

Agencies step up recruitment of entry-level college grads

BY EDWARD J. ROGERS

NEW YORK—How extensive is advertising agency involvement in recruitment of college grads for entry-level training positions? Where is the industry doing its recruiting? Is a graduate degree necessary to gain a berth with one of the top agencies?

A survey among 22 of the 25 largest agencies shows that the agencies are indeed busily recruiting, at a large number of both undergraduate and graduate schools. And prospects for 1979 grads were up over the numbers actually hired in 1978.

The agencies surveyed employ approximately 38% of the estimated national agency population of some 65,000. They were asked several questions including:

- The number of on-staff employes in 1978, and the number anticipated for 1979.
- The numbers of undergraduate and graduate students, without prior fulltime work experience, hired in 1978 for formal or informal training programs or into entry-level positions clearly identified as spots from which they could develop professionally, and the num-

ARGONNE NATIONAL LABORATORY

"A good career should be uphill all the way...

that's why working on new energy sources at Argonne is so rewarding. The program I'm involved in is a good example. The work is as critical, advanced, and challenging as you can get — we must have new control instrumentation for future large-scale coal gasification, liquefaction, and advanced combustion systems.

But beyond this, it's the kind of work a national laboratory like Argonne is especially well-qualified to carry out. A single commercial company can't undertake a program of the required scope, with the payoff so far down the road. It takes a large, multi-disciplinary staff with multi-faceted experience and multi-skilled support. And it takes an organization that's always ready to gear up to meet new challenges, because its members can transfer expertise from one area to another. For example, we have physicists and electrical, nuclear, and chemical engineers working on our program, and we interact frequently with electronics designers, computer scientists, and materials scientists in other areas of the lab. Our past work in nuclear reactor instrumentation enabled us to move into coal process instrumentation.

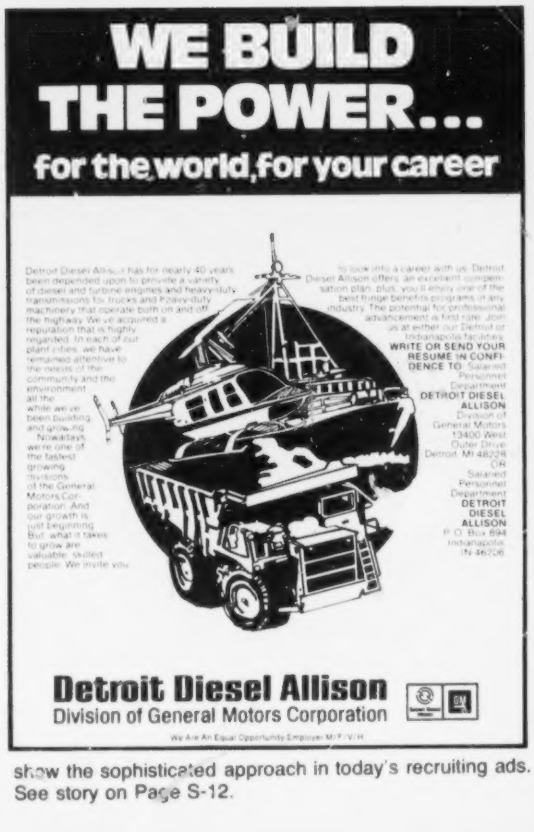
Our basic objective in this program is to assure that the instrumentation will be available commercially when it's needed. So, we maintain close contact with industry — involving them in the developmental work and working with them in the technology transfer. Many programs at Argonne National Laboratory are concerned with developing new energy sources, efficiently transmitting and using energy, and preserving our natural and human environments. The large number and variety of new programs here, and the presence of so many specialists who are willing to share their knowledge with you, present exceptional opportunities for professional growth.

If such career factors are as important to you as they are to me, you will find that these are particularly rewarding years to be at Argonne."

Among the programs of Argonne are:

Advanced nuclear reactor development • Coal Technology • Controlled Thermonuclear Reaction (plasma theory, surface science, superconductivity) • Magnetohydrodynamics • Advanced Battery Development • Solar Energy (advanced light collection, photo-chemical and bio-conversion techniques) • Environmental Studies (meteorology, ecology, biology, and reclamation, environmental effects) ... and many other projects as well.

Graduates in many disciplines — engineering, nuclear science, physics, mathematics, materials, medicine, biology, chemistry, computer science and many others — will find career opportunities at our suburban Chicago and Idaho facilities. For additional information write to: Walter D. McFall, Dept. C/A, Argonne National Laboratory, Professional Placement, 9700 South Cass Avenue, Argonne, Il 60439



WE BUILD THE POWER...
for the world, for your career

Detroit Diesel Allison has for nearly 40 years been depended upon to provide a variety of diesel and turbine engines and heavy-duty transmissions for trucks and heavy-duty machinery that operate both on and off the highway. We've acquired a reputation that is highly regarded. In each of our plant cities, we have remained attentive to the needs of the community and the environment all the while we've been building and growing.

Nowadays, we're one of the fastest growing divisions of the General Motors Corporation. And our growth is just beginning. But, what it takes to grow are valuable, skilled people. We invite you to look into a career with us. Detroit Diesel Allison offers an excellent compensation plan, plus, you'll enjoy one of the best fringe benefits programs in any industry. The potential for professional advancement is first rate. Join us at either our Detroit or Indianapolis facilities.

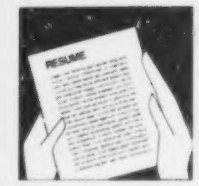
We Are An Equal Opportunity Employer M/F/V/H

Recruitment advertising has become big business, to the extent that agencies specializing in such advertising are among the most attractive acquisitions for general agencies. Sample ads like these from Nationwide and Deutsch, Shea show the sophisticated approach in today's recruiting ads. See story on Page S-12.



Where do they come from?

ber anticipated for 1979.

- The names of the schools from which the 1978 grads came.
- Which schools agencies visit for on-campus recruiting.

Encouraging Facts And Figures

Clear from the responses is an increase in the hiring of recent college grads. While the agencies surveyed experienced a collective 2.5% increase in the total number of domestic U.S. employes, they project a 7.2% increase in the number of graduating students hired.

In 1978, the agencies reported hiring 265 students with bachelors degrees and 194 with graduate degrees. For 1979, they anticipated hiring 283 with bachelors degrees (up 6.8%) and 209 with graduate degrees (up 7.7%).

Of the 20 agencies reporting on 1978 *vs.* 1979 trends in undergraduate hiring, 12 anticipate an increase in the number of bachelors, 6 expect a decrease and 2 expect to hire the same number.

Of the 21 reporting on 1978 *vs.* 1979 trends in hiring of graduate students, 12 anticipate an increase, 3 expect a decrease and 6 expect to hire the same number.

How Do Schools Rate?

School popularity among recruiters is indicated in the ranking of schools by number of visits for those schools at which two or more agencies recruited.

In 1978, the agencies visited 25 schools for undergraduate candidates. In addition to five ranked schools, those visited were Amherst, Boston University, Brigham Young, Carleton, Dartmouth, Drake, Hampton Institute, Howard, Marquette, Morgan State, Northwestern, Notre Dame, Ohio University, Princeton, Texas Tech, University of Florida, University of Illinois, University of Missouri, University of the South and Wabash.

The agencies visited 32 schools for undergraduate candidates in 1979. In addition to eight ranked schools, those visited were Atlanta University, Baruch, Boston College, Brigham Young, Brown, Carleton, Colgate, Denison, Drake, Duke, Emory, Lawrence, Morgan State, Northwestern, Northwood Institute, Notre Dame, Oberlin, Ohio University, Swarthmore, Syracuse, University of Tennessee, University of Wisconsin, Vanderbilt and Williams.

In 1978, the agencies visited 29 schools for graduate candidates. In addition to 17 ranked schools, those visited were Babcock, Berkeley, Duke, Fairleigh Dickinson, Indiana University, Notre Dame, Ohio University, University of Iowa, University of North Carolina, USC, Xavier University and Yale University.

The agencies visited 31 schools for graduate candidates in 1979. In addition to 19 ranked schools, those visited were Babcock, Berkeley, Brigham Young, Duke, Fairleigh Dickinson, Indiana University, Ohio State, Ohio University, Syracuse, University of Missouri, University of Tennessee and Vanderbilt.

Although the number of recruiting schedules each agency had at the various schools is unknown, the increase in the number of campus visits is supported by the increased number of students expected to be hired in 1979.

Where Do They Come From?

The 265 students graduating with undergraduate degrees in 1978, who subsequently joined one of the surveyed agencies, came from 121 different schools. Leading the list is Michigan State, followed by Baruch, Syracuse, Wayne State, Boston University, Northwestern, University of Michigan and Dartmouth. As a group, these eight schools accounted for 28% of undergraduate hires reported. Interestingly, only MSU, Syracuse and the University of Michigan were visited by two or more agencies in 1978.

The 194 graduate students hired in 1978 came from 53 different schools. At the head of the list is Columbia, followed by Medill, Wharton, A.G.S.I.M., NYU, University of Chicago, MSU, University of Michigan and Northwestern excluding Medill. Collectively, these nine schools accounted for 58% of graduate hires reported. All these schools had on-campus visits from agencies.

A similar study, done five years ago, provides the opportunity to observe rank changes in recruiting popularity among schools offering graduate degrees. This table also shows changes in the rank of schools as sources for entry-level employes hired. (Similar data is unavailable for undergraduates at this time.)

Implications

Data can assist recruiters in making decisions regarding how productive an intended visit is likely to be. Of course, if all agency recruiters restrict their visits to a small universe of schools, "productivity" (*i.e.*, the number of students hired in relation to the number interviewed) is sure to drop. There is much to be gained from developing new sources and broadening the recruiting base.

Word of thanks

A word of appreciation to the agencies that participated in this survey: Ayer, Bates, BBDO, B&B, Leo Burnett, Campbell-Ewald, Compton, Cunningham & Walsh, DFS, D'Arcy, DDB, FC&B, Grey, K&E, Marsteller, McCann-Erickson, NH&S, Ogilvy, Ross Roy, SSC&B, JWT and Y&R.

Because respondents were not asked how many students they saw at each school visited, a reliable "productivity index" could not be developed. However, rank by 1979 visits generally meshes well with rank by 1978 hires, indicating that agencies are carefully tracking their success, or lack of it, at different schools.

Happily, the agency entry-level recruitment scene is much improved over the past five years. The increased number of trainees hired and the anticipated increase between 1978 actual and 1979 expected, hopefully mean that the industry will continue recognizing the need for providing opportunities in the years ahead. The problems now being faced, due to a dearth of talent with three to five years experience, can be avoided in the future only by bringing in sufficient numbers of entry-level personnel. #

Adman challenges agency recruiting, training practices

BY GENE NOVAK

NEW YORK—The methods we use today to find beginners with creative talents range from chaotic to nonexistent. The same can be said for agencies' methods of training those few who wander in and get past the first hurdle.

Yet new blood is sorely needed in the agency business. Witness the costly game of musical chairs we play as we lure trained people from one another; as the same people change chairs, we get pretty much the same music, but at wildly escalating salaries. There is too little pressure from below, from a new and eager generation of challengers.

If we rely only on media and research as the traditional entry-level paths, (whatever happened to the mailroom?) we simply won't get the free spirits, the poets, the offbeats, the wild and wacky ones — the ones we need to get new juices flowing as our older juices congeal.

▪ One third of agency recruitment sources consists of unsolicited letters and resumes. Here is a youngster sitting down to write one of the most important letters of his life, trying to break into a field where grabbing attention and selling one's merits are absolutely necessary. So how come aspiring admakers write such godawful dull letters? I've read hundreds but only a few grabbed me by the tie and hoisted me out of my chair:

"*Dear Mr. Novak: I think I have the makings of a really hot copywriter – in fact, you can see that this letter got singed . . .*"

She had burned the edges of the letter and envelope, but not enough to make it undeliverable or unreadable. She got her interview.

I remember a letter from a youngster who stapled a $10 bill to it, betting that he'd get an interview. I put the letter in a desk drawer and waited. Next week another $10 arrived with the message that it was now double or nothing. My guilt was such that I called him in and gave him back his $20. Also I hired him.

"*Dear Mr. Novak,*" writes a 26-year-old woman, "*I've been everything from a truck driver in Pittsburgh to a Peace Corps technician in Equador, but I really want to write ads. I've had two years of college and read a lot. I'm working now in a boutique and free lance for an East Side weekly. I think I know what makes people buy and I*

It's always nice to know that you have contributed to a customer's growth. After all, when our advertisers grow we know we are doing our job well…and that job is providing our readers with the information they need to operate their farms profitably and efficiently…something each of our magazines has been doing for well over 100 years.

Twenty-five full-time editors in our five states work diligently to provide timely and valuable information to over 400,000 subscribers twenty-one times a year… *local* subscribers who want to read about their state…their type of enterprise…their problems…and their neighbors.

This combination of professional editing and reader loyalty makes the Harvest Farm Unit magazines ideal for advertisers who want to grow…grow like Jacques Seed Company has grown! And when our customers grow, we grow. That's why letters like this one from George Jacques makes us *glow!*

The Harvest Publishing Company
333 North Michigan Avenue
Chicago, IL 60601

ATTENTION: JOE HALL

Dear Joe:

Now that we are planning next year's program I am reminded of when we started working together in 1968. We were running a campaign in the Michigan Farmer that kicked off with a junior page in black and white followed by a few quarter pages. We didn't even imagine we would ever be using all the publications of the Harvest Unit.

Since that time our advertising budget has been growing every year. You were instrumental in convincing us to put the major part of our advertising expenditure into magazines rather than spreading a small budget over several different media. Now we are running full-page color ads in almost every issue of the complete Harvest Unit.

Our policy now is to advertise in a new state for several years before hiring salesmen in that state. We have been able to do this economically by taking advantage of the Harvest Unit rates. Now we are going strong in Ohio, Missouri and Kansas. This year we hired our first man in Pennsylvania.

The next time you are out to Wisconsin let's have lunch while we talk about new states to enter.

Yours very truly,

George Jacques

George Jacques
President

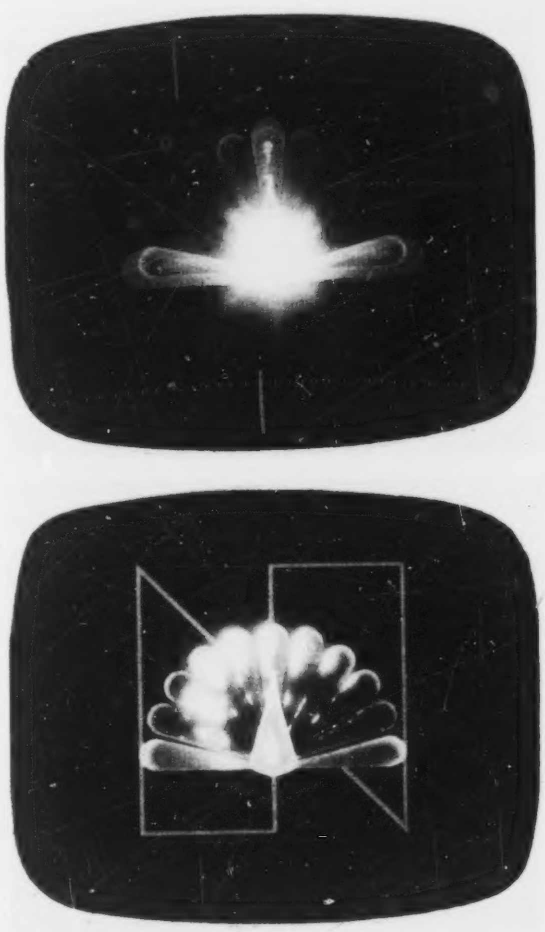
Seed Plants at Lincoln, Illinois; Schaller, Iowa; York, Nebraska; Hastings, Minnesota; Cuba City and Prescott, Wisconsin



The newest NBC-TV logo, wedding the peacock and the "N" symbol, is being used to open the network's prime time movies, series and specials. Zeplin Productions, New York, produced the ID symbol with NBC's print and design department.

account changes

Converse jogs over to Mark Myers

WILMINGTON, MASS.—Eltra Corp.'s Converse division has appointed Mark Myers Inc., Concord, Mass., to handle its $1,000,000 account. Humphrey Browning MacDougall, Boston, is the previous agency for the footwear and clothing marketer.

Other accounts moving:

Royal Hawaiian Cruise Lines, newly formed American all-passenger cruise line, to **Ronald Wren Advertising,** San Francisco, its first agency. Billings are $1,000,000.

All in Style magazine, a division of East/West Network, New York, to **Chalk, Nissen, Hanft,** its first agency. Also to Chalk: **College-Town,** a division of Interco, and **Chesa International Ltd.,** manufacturer-licensee of Geoffrey Beene and Givenchy fashions. Both previously had been handled in-house.

Aiwa America, New York, manufacturer of high fidelity home and car stereo equipment, to **Sasaki & Associates,** Melville, N.Y., from Henderson & Dapper. Billings put at $500,000.

Van Heusen Corporate Markets Co., a division of Van Heusen, to **Compton Direct Marketing,** New York, from Grey/2 which continues to service Van Heusen's industrial ad requirements for career apparel.

Kapalua Bay Hotel, Maui, Hawaii, and **Posada Vallarta,** Puerto Vallarta, Mexico, also a resort, to **Needham & Grohmann,** New York. The Kapalua Bay Hotel had no previous agency; Posada Vallarta had been handled in-house. Combined billings are put at $550,000.

Sounder Sports Inc., Ivoryton, Conn., Southern Star Shipping Co.'s manufacturer of golf clubs, to **de Garmo Inc.,** New York, from The Advertising Department, Old Lyme, Conn. Billings put at $500,000.

Corning Glass Works' industrial materials department, Corning, N.Y., manufacturer of lighting products, technical glass and ceramic products, to **Winterkorn, Hammond & Lillis,** Rochester, N.Y. No previous agency. WH&L also handles Corning's laboratory products division.

Montgomery Ward Enterprises, subsidiary of Montgomery Ward, Chicago, to **TLX Direct Marketing,** New York, for Ward's Wide World of Travel, a new travel club.

Roneo Vickers Inc. to **Gilbert, Whitney & Johns,** Little Ferry, N.J., for its newly formed copier division, billing under $500,000.

Super Food Services, Dayton, O., to **Willis Case Harwood,** from Byer & Bowman, Columbus.

Captran Corp., Sanibel, Fla., to **Ruben, Montgomery & Associates,** Indianapolis, for its condominium time sharing program.

Rallye Aircraft Corp., Raleigh, N.C., to **Flemister & Burkhardt,** Atlanta, for its General Aviation aircraft and dealer network. F&B had handled projects for Rallye last year. Budget for new program is $400,000.

Wormser Co., Chicago, marketer of toddlers' sleepware, to **Robert D. Schoenbrod Inc.,** for its Peanuts line.

Ryobi America Corp., Elk Grove Village, Ill., to **Bozell & Jacobs,** Chicago, its first agency.

Hill-Rom Co., Batesville, Ind., marketer of hospital furniture, to **Bailey Orner Makstaller,** Cincinnati, from Caldwell Van Riper, Indianapolis.

Daytona International Speedway, Daytona, Fla., to **Gouchenour Inc.,** Altamonte Springs, Fla., first agency.

Michael Scott, a leather goods manufacturer, and Daido Inc.'s **power transmission** division, to **Balletta Napurano & Co.,** Springfield, N.J., from Frieze Advertising, East Brunswick, N.J., and Keyes Martin, Springfield, N.J., respectively.

Financial Times/World Business Weekly to **Lawrence Brown Advertising,** New York, for *World Business Weekly*, a news magazine of international business news. Advertising previously was handled direct.

Bankers Life & Casualty Co., New York, to **Steen Advertising,** Lynbrook, N.Y., its first agency.

CMP Publications, Manhasset, N.Y., to **Cappiello & Co.,** New York, its first agency.

Mediapoint Inc., San Diego, distributor of over-the-air pay tv Z Channel in Orange County, to **The Phillips Organization,** San Diego, from Kaufman, Lansky Advertising, San Diego.

Protection, Inc., Pomona, Cal.-based manufacturer of professional aviator helmets, to **McAward & Associates,** Phoenix, its first agency.

Prelude Products, New York, manufacturer of personal massagers, to **Anesh, Viseltear, Gumbinner,** New York, from Martin Landey, Arlow Advertising. Also to AVG: *Houston City* magazine and Mississippi Publishers, publishers of the *Jackson* (Miss.) *Clarion Ledger* and *Daily News*. No previous agencies.

Phase Linear Corp., Lynwood, Wash., an independent subsidiary of Pioneer of America, to **Sheridan Hosner Smith & Co.,** Seattle, succeeding Evans/-Pacific, Seattle.

Pharmacia Laboratories, New York, has assigned a new product, Healon, to **Grey Medical Advertising.** The product is a solution used in eye surgery to help protect the internal eye parts.

French Government Tourist Office and **French West Indies Tourist Board,** New York, to **Van Brunt & Co./IMAA** from Needham, Harper & Steers.

Koret of California, San Francisco, women's sportswear maker acquired by Levi Strauss last year, to **Botsford Ketchum** to handle its first national consumer and trade advertising. Andrews Agency continues on collateral. #

*Total Transport Revenue figures include the following categories: Passenger, Property and Charter.

**Began operations in 1979 as a result of a merger between North Central and Southern Airlines.

Schoenfeld wins rights to Brittania

NEW YORK—Schoenfeld Inc., Seattle-based manufacturer of Brittania sportswear and jeans, has won a permanent injunction in U.S. district court here, enjoining Foster Industries from using Brittania or any confusingly similar name on any of its products.

Foster, headquartered here, had been using the accepted spelling of Britannia as its jeans name. Blocked by a preliminary injunction last September, Foster then began using the name on a line of shirts at a trade show and again was stopped by a preliminary injunction.

▪ Foster has been required to notify any accounts that have bought its goods under the Britannia name that it cannot fill their orders. It also is required to change the labels on any goods that are still in stock.

Additionally, Foster is not allowed to use any logo or symbol that resembles the Schoenfeld trademark or that of its subsidiary, Brittania.

Sales of the privately held Schoenfeld are estimated in excess of $200,000,000. #

DELTA DASH.
SAME DAY DELIVERY ON SMALL PACKAGES.

Delta is an airline run by professionals. Like Customer Services Agent Terry L. Theiss.

Why settle for overnight delivery? Delta DASH can give you same day service. DASH (Delta Airlines Special Handling) takes to the air 1,500 times a day on Delta jets. So if your small package is in a big hurry, DASH it. Shipments picked up during normal business hours will be delivered that same day. If your package arrives after normal business hours, we will deliver it the first thing next morning—generally no later than 10am. Delta carries more over-the-counter shipments of 50 lbs. or less than any other scheduled airline.

And DASH serves over 80 U.S. cities plus San Juan.

Packages are accepted at airport ticket counters up to 30 minutes before flight time. Up to 60 minutes at cargo terminals. Size limit is 90 inches: width + length + height.

The airport-to-airport rate between any two of Delta's domestic cities is $35 ($25 between Dallas/Ft. Worth and Los Angeles or San Diego or San Francisco). Expedited pick-up and delivery available at extra charge. Call (800) 638-7333, toll free. (In Baltimore, 269-6393.)

You can also ship via DASH between Delta cities in the U.S. and Montreal, Nassau, Bermuda, London, England and Frankfurt, Germany. For full details, call your local Delta cargo office.

This Flash Report of newspaper advertiser investment compiled for ADVERTISING AGE by Media Records, is derived from tabulations that cover 35 dailies and 25 Sunday editions in 15 cities—Atlanta, Baltimore, Boston, Chicago, Cleveland, Dallas, Denver, Detroit, Los Angeles, Miami, New York, Philadelphia, Pittsburgh, San Francisco and Washington. The report indicates marketplace strengths and weaknesses.

Utility spending up 36% in papers

NEW YORK—Public service utilities newspaper advertising showed a sparkling 36.1% gain in dollar spending during October, 1979, compared with October, 1978, according to the October Flash Report prepared for ADVERTISING AGE by Media Records.

Trailing close behind were sporting and leisure time equipment with a gain of 27.5% and eating and drinking places with a gain of 25.4%.

■ Of the 16 categories monitored for AA by Media Records, five were down in October ad volume in the 15 cities whose newspapers are measured (*see chart*).

Department stores, Newspapers' leading dollar category, lost by 2.4%. They were followed in the top five dollar spending group by furniture and furnishings (up 2.1%), general merchandise stores (down 0.4%), food stores (up 17.5%) and amusements (up 5.7%). #

Marx toy maker sellout may burn agencies

By JAMES P. FORKAN

NEW YORK—In a complex arrangement still being worked out at press time, Dunbee-Combex-Marx is preparing to sell off and license the Marx Toys and Aurora Products lines to three toy rivals.

The ad agencies for Marx (McCann-Erickson, New York) and Aurora (Scott Lancaster Mills Atha, Los Angeles), as well as most of the personnel from both marketers, are likely to lose out once the toys are absorbed into the buyers' own lines, sources believed.

Additionally, McCann reportedly has been stuck with $2,000,000 in unpaid Marx media bills, industry sources said. When asked, George Hatch, McCann's exec vp-chief financial officer, said only that "we certainly are having collection problems" with Marx—a client only since last summer—but that "we are studying the situation and working on solutions."

Other McCann officials added, "We don't know the full situation at this stage." However, one member of the account team, account supervisor Gary Price, has shifted to other clients in the San Francisco office.

Arthur Golden, Marx president, and Robert Jackman, exec vp-general manager, Aurora, both based in Stamford, Conn., could not be reached for comment.

They were among those said to have been meeting in New York with DCM's chief Richard Beecham, in from London, and with prospective buyers and licensees in a package transaction believed unique in toy business history. (One Marx executive, Dan Weiss, has left as exec vp to return to Gabriel Industries.)

■ "This has been coming down the pike for about four months," said one source, who added that things speeded up after the close of the Christmas selling season.

Although contracts have yet to be finalized, ADVERTISING AGE has pieced the acquisition puzzle together from various industry officials. DCM brass are studying an exchange of stock deal whereby Leisure Dynamics, Minneapolis, would take over Aurora Products, which early last year quit all but the toy auto racing field; Aurora's AFX line is said to be No. 1 in that $100,000,000 category.

Pan Am seeks ticket wholesaling

By JOSH LEVINE

NEW YORK—Pan American World Airways is putting the finishing touches on a fare proposal which, if approved, would take much of the marketing risk and obligation out of the airline's hands on certain routes.

Under the proposed "group contractor fares," large blocks of tickets on scheduled flights would be sold at wholesale to middlemen, or contractors, who would then assume the risk and responsibility of pricing and marketing the tickets as they saw fit.

Pan Am expects to overcome certain objections expressed by the Civil Aeronautics Board when it rejected a Pan Am/National proposal two weeks ago, and plans to apply the new arrangement to its N.Y.-Frankfurt route by Feb. 1.

■ While Pan Am would be paid less for the tickets than it could get through direct sale, the sacrifice insures a minimum return when many airlines fear a menacing drop in plane load factors.

"We take the money and run," said a Pan Am spokesman. "The idea is to accept less than we might have gotten, with the assurance that we'll at least have the money.

"Load factors are on everybody's mind," he continued, "and this proposal effectively transfers the risk of empty seats to the retailer

Olympic tie-in marketers facing a no-win situation

An Advertising Age roundup

"It's all very sad, and a no-win situation" for everyone involved. That's the widely shared opinion of one marketing exec from a major sponsor of NBC-TV's planned coverage of the Summer Olympic games in Moscow next July.

NBC and the 50 sponsors who have committed some $150,000,000 to the coverage late last week were awaiting word from President Carter, who may ask that the U.S., in protest to Russia's invasion of Afghanistan, withdraw from Olympics participation in Moscow.

The prospects that the advertising and accompanying promotional hoopla would go down the drain grew last week as unofficial reports said Mr. Carter was in favor of a boycott. NBC has said if a U.S. team doesn't participate in Moscow, neither will NBC.

■ The question is what will happen to the ad dollars and additional millions of promotional dollars (estimated at about $80,000,000) planned by Olympic tie-in marketers. Late last week execs of some of those companies indicated they had not all caught up with the fast-changing scene.

A spokesman for the Gillette Co., Boston, said that while nothing has been resolved, "you would be foolish not to look at alternatives." He said the company will "go along" with whatever President Carter decides.

While the company said it will be spending $5,000,000 on tv advertising during the games, "the budgeted money could and would be diverted" if the U.S. did not participate.

"Scared stiff" is the term a sales promotion executive used to describe the mood of two clients whose promotion programs are tied to the Summer Olympics.

"Both are reading the newspapers a lot closer than anyone else" the exec noted. However, he said the promotions will likely proceed as planned, since there is the expectation of news coverage by the

Gold, silver price rockets offer risky ride

NEW YORK—The impact of soaring silver prices, now being felt in higher prices for photographic film, is only the latest reaction to a prolonged worldwide surge in silver and gold bullion prices.

Gold, at $250 a year ago, was fast approaching $900 an ounce last week. Silver has increased about 600%, to more than $40 an ounce, since January, 1979. Such increases have led to what is currently dubbed "gold madness," as people rush to sell their jewelry or other family heirlooms and baubles that were, until now, more appreciated for their sentimental value.

In metro New York, at least two gold buying companies are using tv to encourage such traffic. Jeanne Berns, Huntington, N.Y., notes in a tv spot that old gold, silverware, jewelry and diamonds can be traded in for stereos, vacations, cameras, etc. "Goodbye old diamond ring. Hello new couch," is one of her lines. U.S. Redemption Center, also seeking the same business, includes coins and provides an "800" phone number in tv spots.

■ Tiffany sterling is still on sale here, a store spokesman said, because the company bought heavily in silver last spring. Cartier said it has had to increase its silver prices "substantially" to keep pace with the market. Because of pricing turmoil, however, Macy's has discounted the sale of sterling flatware until price escalations subside. Bloomingdale's salespeople check with flatware manufacturers before quoting prices to customers.

In Allentown, Pa., Hess's department store prepared for a Jan. 21 one-day sale at which sterling silver flatware prices are to be reduced by 53% to 79%. Hess's said armed guards and extra police

NBC's Tartikoff has some funny (tv) ideas

B. TARTIKOFF

By COLBY COATES

NEW YORK—At least six prime time comedies and the intriguing prospect of a Francis Ford Coppola or a Barbra Streisand making a children's tv show are just two elements of the programing philosophy taking shape at NBC for next fall, says one of its chief architects, new NBC Entertainment president Brandon Tartikoff.

A meteoric rise in the business since his first job at Van Leeuwen & Partners has, at age 31, propelled the native New Yorker into this top network job and a seat at the right hand of his mentor, NBC president Fred Silverman.

Mike Weinblatt, whom Mr. Tartikoff succeeds, has taken over the presidency of a new unit, NBC Enterprises, which will handle foreign sales, syndication and development of products for a market "swelling with new technology."

Moreover, there are indications that Mr. Weinblatt will spearhead a possible NBC move into production of theatrical movies, something NBC hitherto has said it would ignore. Both ABC and CBS, however, recently have created new units to get the networks back in the theatricals business.

A network spokesman said there's nothing to confirm or deny about the theatrical reports. "The division is only a few days old, and Mike is taking a week's vacation," the spokesman continued. "When he returns, he'll sit down and make some recommendations. Down the line, who knows what will happen." But the betting is that NBC will make up its mind in the next few months.

For Mr. Tartikoff, however, attention is fully focused on the small screen, his own "awesome responsibilities" and using the

Alberto conditioner, lotion bow

By JENNIFER ALTER

MELROSE PARK, ILL.—Alberto-Culver Co. is entering the new year at an aggressive new products pace, with the national introduction of Blow Dryer hair conditioner and test market launch of Sensually Silky skin lotion.

Blow Dryer, a line extension to Alberto VO5 hair dressing, is a concentrate conditioner to be used before blowing hair dry. Available in 1½-oz. tubes, it will be backed initially by a $1,000,000-plus ad campaign through Lee King & Partners, Chicago.

The hair dressing product, to be shipped to retailers next month, was never in a test market, but was monitored for over a year through a variety of methods, including in-home. Positioned for both men and women, it is packaged in a small blue and white box.

Sensually Silky, a protective skin lotion, is beginning test in Rockford, Ill. The test will be backed with a full schedule of ad support, including 30-second spots, also through Lee King & Partners. It is packaged in 10-oz. baby blue bottles.

- The commercial features a hardworking housewife transformed to a sensual beauty after using the product.

To be pitted against P&G's Wondra and Chesebrough-Pond's Vaseline Intensive Care, Sensually Silky is described by a company spokesperson as having "protective properties other lotions can't claim."

- Additionally, Baker's Joy an aerosol flour and oil combination designed to "grease" baking pans, will go national in approximately six months, according to Alberto president Leonard Lavin. It has been in test since January, 1979 (AA, Jan. 22, '79). Mr. Lavin said at the company's annual meeting last week that there had been some technical difficulties with the product, but that they had been fixed.

Mr. Lavin said Previews, a hot appetizer mix available in onion, mushroom, seafood and cheese flavors, will continue in test with no target date for rollout. #

No-name cigs come to Canada

TORONTO—Dominion Stores, the supermarket chain that has a 30% share of the plum Ontario food market, has added cigarets to its list of generic products.

The cigarets, made in Mexico because no Canadian manufacturer could be found to supply the chain, cost 75 cents (Canadian) a pack, compared to $1.10 for regular brands.

However, the Mexican product is a blend with Turkish flavor, whereas the popular Canadian brands are blander, using predominently Virginia type tobacco. #

CBS: Leading the '79-80 prime time pack?

By COLBY COATES

NEW YORK—On the verge of riding its Super Bowl broadcast past ABC in season-to-date standings, CBS seems ready to pull off a major upset and take the 1979-80 prime time season.

At least that's what some network executives guardedly predict. As for the agency view, Paul Schulman, president of Paul Schulman Co., a division of Gardner Advertising's Advanswers, predicted, "It's off the wall, but CBS is going to be No. 1 this season."

To enhance its chances of unseating ABC as the prime time kingpin, CBS further refined its second season schedule last week, shuffling the lineup of its two weakest nights, Tuesday and Saturday.

Meanwhile, all three networks still were developing their February ratings sweeps strategy, with the gathering confidence at CBS reflected in some bold moves to counter ABC's Winter Olympics broadcasts.

- Strategy calls for CBS to match the first network run of "The Exorcist" against ABC's Feb. 12 opening Olympics telecast. The next night, CBS comes right back with the sequel, "The Exorcist: The Heretic," prompting one observer to remark, "ABC's going to have a devil of a time with that combination."

"S.H.E.," a two-hour pilot about a "female" James Bond, also plays against the Olympics, Feb. 23, with the back-to-back combination of Bob Newhart and Goldie Hawn specials expected to join the fray on Feb. 19.

Of course, ABC has some plans of its own, including kicking off the sweeps Feb. 1 with "An Unmarried Woman," and leading in to the Olympics with a two-part airing of "The Deep," Feb. 10 and 11. "Swan Song," starring David Soul (who used to be Hutch of "Starsky & Hutch") runs Feb. 8. If all that's not enough, NBC reportedly is ready to counter "Exorcist" and the Olympics with Burt Reynolds' "The End."

The latest CBS revisions take place the first week of March after the Olympics and the sweeps have ended. "White Shadow" continues to hold down the first Tuesday hour, but the Saturday night movie, moved there only last month, now returns to its former Tuesday, 9 p.m. to 11 p.m. slot. The Saturday lead-off hour, "The Chisholms," also stays put, but "Hawaii Five-O" comes in from Tuesday to fill the hour at 9 p.m. Making its long awaited debut at 10 p.m. will be "Hagen," starring Chad Everett. As bad as "Hagen" seems to be to some executives who have seen it, they still think it's enough to salvage second place against "Fantasy Island" but well in front of "Prime Time Saturday."

- Ratings for the 17th week of the prime time season had CBS on top with a 20.9 rating and 32 share. ABC was second with a 19.3 rating and 30 share, with NBC third with a 17.2 rating and 27 share. #

Vol. 51, No. 3—Advertising Age (ISSN-0001-8899) is published weekly except semiweekly the second week in March, the first week in September and the third week in December at 740 Rush St., Chicago, Il 60611. Second class postage paid at Chicago and additional mailing offices.

Fiat eyes one shop—BBDO?

TURIN—A topflight worldwide team from BBDO made a presentation to Fiat here last week to persuade the world's 7th largest auto maker to put all its advertising eggs in one basket. The pitch fell on quite receptive ears.

"We definitely do have a problem with communications," Charles Cole, the company's international advertising director, told ADVERTISING AGE. "And it arises from the fact that we have a different advertising agency in every country."

He did not say that he intended to hand the companies' worldwide advertising over to BBDO, but he did admit to looking very closely at the agency proposal.

- "If there is any way that we can straighten our problems out, we will do it," he said. "An international agency is the logical answer. But looking down the list, you see very few without conflict."

BBDO's selling points in its pitch are its experience on Chrysler in the U.S., its launch of Toyota in the U.K. and the strong bond forged between Fiat and Italia/-

Spot tv shows no signs of recession

By MAURINE CHRISTOPHER

NEW YORK—Despite recession talk, prime time cost-per-points estimates for January indicate a strong spot tv market with prices up for all top 20 markets compared with year-ago levels.

The peak gains in this monthly Spot Quotations & Data report came in Minneapolis, up 13.7% to $58 per 30-second spot and in Chicago, up 12.1% to $148. These figures are based on transactions through Dec. 28 for a sampling of major advertising agencies. Only affiliates are covered in the prime time cost per household rating point listings.

Marvin Richfield, president of the SQAD report, attributed the Chicago strength to the "combined influence of an early political primary in March and prewinter Olympic maneuvering." He saw Minneapolis still benefiting from the promotional and sales hype that accompanied last year's affiliation switches.

Ironically, Mr. Richfield also cited a November that was not sold out and a relatively weak December as factors in the January showing. "Quite a few spot tv broadcast directors advised clients and client contact agency people that 1980 buys should be placed early to take advantage of an apparent weakness in spot tv," he noted. "That weakness no longer exists."

- Below the top 20 markets, standout cities on the list included Denver with a prime time cpp for 30s of $54, Hartford with $51 and San Diego with $47.

As usual, late news was the runner-up category in most big markets. January quotations in this area, which covers independents as well as affiliates, show this ranking: New York, $188; Los Angeles, $130; Chicago, $114; Boston, $101; San Francisco, $96; Philadelphia, $95; Dallas, $72; Houston, $66; Detroit, $64; Washington, $56, and Baltimore, $50.

Looking best in late fringe were New York, $127; Los Angeles, $96; Boston, $83, and San Francisco and Philadelphia, both $62.

- The SQAD report also includes an advertiser/agency planners guide giving quarterly cost projections for all dayparts for the next six quarters.

This year's prime time cpp forecast for New York ranges from $319 for the first quarter to $371 for the last. Other city listings for the same periods: Los Angeles $249 and $290; Chicago $181 and $211; Philadelphia $134 and $165, and San Francisco $154 and $179.

Below the top 50, Knoxville and Mobile were estimated at $15 and $18 and Rochester and Fresno at $20 and $23. #

Excluded are spots bought on a 52-week basis or calling for 150-plus gross rating points weekly. These averages are a yardstick and not a listing of the market's lowest prices. Ratings used are an Arbitron-Nielsen average. These guides can be applied to 60s—200%—and 10s—50%. Percentage gain over January, 1979, is shown in parentheses.

Bonne Bell adds to 10K athletes' line

LAKEWOOD, O.—Encouraged by the reception of its 10K line introduced last spring (AA, June 4), Bonne Bell Inc. will launch two more products in March.

10K Sport Stick, a moisturizer and lubricant that prevents chafing and chapping during exercise, and 10K Body Soak, a vitamin-enriched bath gel designed to relax tired muscles, will be added to the line created to cater to the athlete's beauty problems.

The two new items, along with 10K Sport Shampoo, 10K Sport Lotion and 10K Etonic running shoes, will be promoted in color page ads breaking in major sports and fashion magazines in April through Leber Katz Partners, New York.

The campaign will run in *Cosmopolitan*, *Mademoiselle*, *Runner's World*, *Self*, *Ski*, *Skiing*, *'Teen* and *Women's Sports*. Theme line is: "What's better than 10K? More 10K." #

'HBR' increases rates

The *Harvard Business Review* has increased its subscription rates by 14%, from $21 to $24 annually, effective Jan. 1. The every-other-monthly also has increased ad rates 9% as a result of increased costs for paper, printing and distribution.

ACB's newspaper advertising research is the most comprehensive available anywhere. ACB reads national and display retail advertising in every U.S. daily and Sunday newspaper to provide in-depth data—customized to meet your exact requirements—so you can plan more productive newspaper advertising. This is all-inclusive research, exclusive with ACB and it has a unique name: MINTSYSTEM, Marketing Intelligence Tracking System.

Only ACB's MINTSYSTEM Reporting will give you precise answers to such fundamental newspaper advertising questions as these:

"How much is the competition spending on newspaper advertising?"

"Where and when—exactly—are your competitors spending their newspaper advertising and promotion dollars?"

"What advertising appeals and techniques are competitors using?"

"How are retailers in various markets pricing your products vs. competitive products?"

"Are key retailers promoting your brand or your competitors'?"

"Are you getting the most for your Co-op dollars?"

"Which retailers are key to your sales efforts and which are not?"

"What new, innovative advertising approaches are working?"

"What about the seasonality? Are you missing out by not heavying-up at certain periods?"

"What are the market trends you should be taking advantage of?"

Today, these facts and hundreds of others are being used by more than a thousand manufacturers, service firms, ad agencies and merchandisers.

Call or write your nearest ACB office and learn how we can design the right research program to make your newspaper advertising program more effective or send for our catalog 100B.

You can't beat experience.

EVERETT RATTRAY

EAST HAMPTON, N.Y.—Everett T. Rattray, 47, publisher and editor of the weekly *East Hampton Star* on Long Island, died of cancer Jan. 14 at his home here.

Mr. Rattray took over the newspaper from his mother, Jeannette E. Rattray, in 1961. In a conservative, primarily Republican town, Mr. Rattray made a career of publishing a liberal, mostly Democratic paper.

In addition to running the paper, Mr. Rattray also wrote a book about the Hamptons called, "The South Fork, the Land and People of Eastern Long Island," that was published in 1978.

Mr. Rattray's wife, Helen, will continue to run the newspaper, which has a circulation of almost 9,000. It is expected that one of their three children eventually will take over the reins.

VINCENT MANNO

BOCA RATON, FLA.—Vincent Manno, 67, a newspaper broker and media financial consultant, died at his retirement home here Jan. 10.

Mr. Manno helped set up the first cooperative production plan for cities with more than one newspaper. He also helped to write the Federal Newspaper Preservation Act of 1970, covering newspaper mergers.

Following his education at the University of Maryland and the South Jersey Law School and U.S. Army service during World War II, Mr. Manno set up offices in New Canaan, Conn. It was from this base that he became one of the nation's leading newspaper brokers for publishers across the country.

RICHARD RIMBACH SR.

PITTSBURGH—Richard Rimbach Sr., 84, president and owner of Rimbach Publishing Co. here, publisher of *Pollution Equipment News* and *Industrial Hygiene News*, died Dec. 21 in North Hills Passavant Hosipital following a brief illness. Mr. Rimbach, a professional engineer, founded his publishing company in 1928 with *Instruments* (now *Instruments & Control Systems*). He was a founder of the National Instrument Society of America in 1945, and served as its executive secretary from 1946 to 1950.

CYRIL WAGNER

CHICAGO—Cyril Wagner, 61, corporate director of planning and marketing, Evangelical Hospital Assn., Oak Park, Ill., died Jan. 9 of a heart attack. Mr. Wagner, who had been with the association since 1977, spent most of his life in tv sales, starting at ABC in 1949. From 1953 to 1974 he was with NBC-TV here as an account exec, sales manager and finally director of central sales. He was director of corporate relations, Rogers Merchandising, from 1974 to 1977.

VIRGIL BROWNE

OKLAHOMA CITY—Virgil Browne, a longtime Coca-Cola bottler and soft drink marketing pioneer, died here Dec. 31 at age 102. In the 1920s, Mr. Browne was the first soft drink bottler to sponsor baseball on radio and the first to advertise in the newspaper comics section, according to a Coca-Cola Co. spokesman in Atlanta. He was also the first to exploit the potential of the automatic vending machine for soft drink sales, the spokesman added.

Some credit him with developing the idea of the six-pack as well, but Coca-Cola said it isn't sure who first made that packaging innovation. Mr. Browne and a partner bought the Coke bottling business here in 1922; at his death, he and his sons owned Coke bottling interests in 20 cities.

NORMAN WYNKOOP

ST. PETERSBURG, FLA.—Norman O. (Dutch) Wynkoop, 86, retired vp-controller at McGraw-Hill Publications, died of a stroke at White Memorial Hospital here on Jan. 1.

Mr. Wynkoop, who retired from McGraw-Hill in 1958 after 38 years with the company, made his retirement home in nearby Redington Beach. Mr. Wynkoop joined M-H as a salesman and later became Philadelphia district sales manager for *Power* magazine. He went on to become publisher of *Power* and held similar posts at M-H's *Industrial Distribution*, *American Machinist* and *Product Engineering*. He was named a company vp in 1937 and controller in 1946.

ANDRE KOSTELANETZ

PORT-AU-PRINCE, HAITI—Andre Kostelanetz, 78, veteran symphony orchestra conductor, died at Canabe Verte Hospital here following a heart attack on Jan. 13.

The conductor headlined one of the popular 1930s radio series, Liggett & Myers' "Chesterfield Hour," on CBS Radio. He himself recorded scores of those broadcasts for donation to the Library of Congress.

H. G. WHEELOCK

LARCHMONT, N.Y.—Howe G. Wheelock, 68, Newhouse Newspapers advertising rep, died at his home here Jan. 9 following a long illness. Mr. Wheelock had been with Newhouse for the past 16 years. Before that, he worked for the Scripps-Howard chain. #

Inflation doesn't deflate luxury spending

By NANCY GIGES

NEW YORK—Research by two major agencies suggests that while Americans are well aware of inflation's impact on their lives, certain priorities are so important that high costs aren't dampening their spending spirit.

According to a study by BBDO, even though 91% of consumers believe inflation has affected their lives, only 44% say it has greatly affected the amount they spend on luxury items.

The BBDO survey suggests that the supermarket is one place consumers are scrimping so they can "splurge" on luxuries. But a Dancer Fitzgerald Sample survey solely on food concerns placed worries about costs a close second behind taste, and found that for a sizable segment, avoiding certain factors such as preservatives, sugar, fat, salt, cholesterol and excessive calories are an overriding concern.

In the BBDO results, 37% of consumers said tight money has greatly influenced what they spend on fun—a figure the agency expected to be higher.

Realizing that consumers might not want to admit spending on luxuries when many believe they should be scrimping, BBDO first asked what they thought others were splurging on. The agency believes these figures are more indicative of what respondents were spending themselves than what they said about their own behavior.

For example, 30% said they thought others were buying major appliances while only 17% said they themselves were. For movies, 29% said others were splurging while only 13% admitted they themselves were.

According to BBDO, consumers are relying on a variety of cost-saving measures to help reduce their supermarket tabs. Some 75% say they are buying items on sale and paying more attention to price advertising than five years ago. A majority are comparison-shopping with greater frequency and stepping up their use of coupons. They are preparing less expensive meals, buying only necessities and purchasing the economy size of many items, BBDO found.

However, according to DFS results, younger people, especially single-person households, have the lowest concern for nutrition and cost and the greatest interest in convenience foods. People over 50 have higher concerns for nutrition and cost.

Although U.S. Department of Agriculture figures show that about 80% of households use coupons, the DFS study discovered only about 56%. It found it surprising that there was no difference in household penetration of coupon use between those with high concern *vs.* low concern for food costs. The dominant factor differentiating segments that use and don't

STOLICHNAYA
RUSSIAN VODKA
TSINGTAO VODKA

Did the Russians miscalculate?

IMPORTED VODKA

IZMIRA

Finally you can serve the finest imported vodka without buying Russian.

IZMIRA has perfected a vodka that makes vodka a whole new experience. Distilled from white beets and imported from Turkey, IZMIRA has a way of letting your friends and relatives know, feel, and share your joy, your exuberance, the sincere warmth of the simchah you've invited them to share with you. And IZMIRA has the kind of sophistication that makes serving it in excellent taste. L'Chayim!

Chinese attack. . . . . . so do the Turks

Deluxe, imported vodkas produced outside the U.S.S.R. are exploiting the outcry that has followed Russia's invasion of Afghanistan, by sniping at the leader Stolichnaya, imported from the Soviet Union. Romann & Tannenholz handles Tsingtao for Monarch Wine Co., and E. T. Howard is agency for Izmira.

Major tv producers drop chiefs

By MAURINE CHRISTOPHER

NEW YORK—At least two of the leading tv software suppliers will start the 1980-81 sales season at the National Assn. of TV Program Executives mid-February meeting, in San Francisco, with new men at the top.

Dramatic executive suite upheavals occurred very close together at Time-Life Films, where Austin O. Furst Jr. moved in to succeed Bruce L. Paisner, and at Metromedia Producers Corp., where the search is on for a successor to Lennart Ringquist. Each presidential departure was officially described as a resignation.

In both cases there were reports that heavy expenditures for ambitious production projects—miniseries at Metromedia and movies at Time-Life—were at least partly responsible for getting the execs into trouble with corporate financial watchdogs.

- Hollywood and New York were teeming with rumors that other program production chiefs are on their way out. Edward Montanus, president of MGM Television, denied such reports about himself. He said that while these film jobs are the type to wear a person down in five years or so, he's not thinking of leaving yet.

In the first of what some observers expect to be a series of management changes at Time-Life Films, Gerald M. Levin, president of Time's Home Box Office until being promoted to group vp for video last August, brought in a familiar face from HBO when he taped Mr. Furst; he had been an exec vp at the No. 1 pay cable network.

A company spokesman said Mr. Paisner will remain as a Time Inc. vp and adviser to Mr. Levin on tv and movies. Before going into the video operation about 10 years ago, Mr. Paisner was assistant to Andrew Heiskell, chairman of Time Inc., an association that sources think may keep Mr. Paisner secure in the corporate family if he wishes to stay.

Chrysler package going for broke

By RALPH GRAY and LOUIS A. FANELLI

DETROIT—Chrysler Corp.'s new marketing package that includes a money-back guarantee is an automotive first that may be a last. Other auto makers greeted the "unprecedented, unsurpassed, unbelievable" program cooly.

But the struggling Chrysler will concentrate "all our advertising and marketing firepower" on the guarantees in a "saturation schedule" on tv, magazines and newspapers.

Not only will Chrysler offer unsatisfied customers their money back, the company also will give free scheduled maintenance for 24,000 miles or 24 months (12/12 for imports), a free membership in the Amoco Motor Club and $50 for test driving a Chrysler vehicle.

"This is the beginning of a whole new way of doing business in the automotive industry," said president J. Paul Bergmoser at a New York press conference. "For years the consumer has demanded better protection on his car purchase and better protection against his service needs."

General Motors and Ford Motor Co. had no official comment on the Chrysler action, and American Motors said it wouldn't follow any of the four points. "It is not a new era dawning in automotive marketing," one industry analyst said. "The rebates weren't either. Nobody followed them this time around."

The $50 test drive and money-back provisions may be "an open invitation for people to pick their pocket," he said.

An automotive adman commented: "This is the kind of thing Chrysler has to try—a desperation move. But all of us have to try new

RKO loss may spur rewrite bill

WASHINGTON—The Federal Communications Commission's action killing RKO General's tv operations in three big cities dismayed the broadcasting industry but offered the consoling prospect of renewed congressional interest in a communications act rewrite.

National Assn. of Broadcasters senior vp-general counsel Erwin Krasnow said FCC's action against RKO last week was "most unfair" and goes directly to the issue of "license stability."

Legislation before the Senate communications subcommittee

Pizza Hut readying invitations for review

WICHITA—Pizza Hut will send out invitations to "several agencies within the month" as it conducts a review of its estimated $30,000,000 account (including co-op). Incumbent Foote, Cone & Belding, Chicago, will be on the list, according to the company, which declined to give a reason for the review.

NAB project to include hygiene, hemorrhoid items

PALM SPRINGS, CAL.—The National Assn. of Broadcasters tv and radio boards ordered the expansion of a planned public opinion research project on contraceptive advertising to include feminine hygiene and hemorrhoid care products as well, categories under frequent attack by viewers. The NAB codes currently do not authorize contraceptive advertising, but allow the other categories in certain dayparts.

Daly reveals CBS' spring, fall tv plans

By COLBY COATES

NEW YORK—Though obviously pleased with the prime time surge that has propelled his network into a first place ratings tie with ABC, CBS Entertainment president Bob Daly still isn't ready to predict victory for the tumultuous 1979-80 season.

"I'm a firm believer in momentum and we have it now," Mr. Daly said, "but the Winter Olympics [on ABC] could slow us down."

Even though he thinks the controversy over the summer games "may add a few points" to ABC's February numbers, the CBS exec maintained "the key is whether they can promote their new shows and whether they are any good."

Paced by the Super Bowl, CBS took the 18th week of the prime time Nielsens with a 22.5 rating and 35.2 share compared to second place ABC's 20.2 rating and 32 share. More importantly, the network tied ABC for first place for the season-to-date with a 19.4 rating, something that hasn't happened since April, 1976.

Quite a comeback for Mr. Daly and crew, especially since "everybody had us all fired" last September when CBS got off to its traditional miserable start, due mainly to the baseball playoffs and World Series aired by the competition.

- Although the CBS exec has absorbed some early season thrashings before, he admitted that, having survived the 1979 edition, "I can't take another start like that one again." As a result, CBS is mulling over a new tactical gambit for the fall of 1980.

"We may start the season with three movie nights," he said. "Then after baseball is over we would cancel one night and introduce our new dramatic hours." He ruled out breaking in the new hours in August after the political conventions are over on the grounds that hour films require more lead time.

It is possible, however, that CBS may get an earlier jump with a few taped half hour comedies. "Logistically the turnaround time isn't as great as films," he said.

Like his counterparts at ABC and NBC, Mr. Daly expects to log plenty of overtime during the next 60 days, assembling the schedule for the 1980 prime time campaign. The difference between CBS and its peers, however, seems to be both in the quantity and quality of the programs that could land a prime time slot.

"As ABC can testify, it's a tough

Becomes Olympics net for '84

ABC gets Yugoslav rights

By JAMES P. FORKAN

NEW YORK—ABC won the gold medal for the most Olympics—and most expensive games—within a 20-year period when it landed the 1984 Winter Olympics rights for about $90,000,000.

ABC's money machine, which late last year won the '84 summer games for $220,000,000-plus, will shell out much more for the Yugoslavia games than it will for Lake Placid's, with its rights of $15,500,000 and production costs of $30,000,000. The $90,000,000 figure excludes production.

ABC, which will have covered nine of the 12 Olympics from 1964 through '84, was mum on pricing the time in its 60-plus hours of mostly prime time coverage. NBC, with its Moscow woes, left the Yugoslavia bidding early in the week when it could not get a 60-day delay.

As for the Moscow Olympics coverage, an NBC-TV official said, "No one has withdrawn as a sponsor." He added, "I'm sure people are thinking about that. Nothing has happened yet."

- Although President Carter reiterated his boycott sentiments during his Jan. 23 State of the Union telecast, NBC officials said there still are "a lot of what ifs," including what if the Russians comply with Mr. Carter's demand that they leave Afghanistan? NBC will be "guided by government policies and regulations," but policy in this case will not be "clear" till the President's Feb. 20 deadline for withdrawal arrives, these network officials said. NBC also will be watching the outcome of the U.S. Olympic Committee meeting Jan. 26-27 and its poll of team members on a boycott.

If the network does not cover the games, various NBC execs said, the replacement fare would have to be "fairly normal" programing, given the short lead time. Some industry sources thought NBC could, for one thing, try out more summer series ideas than it had planned.

- As for selling this non-Olympics July-August time, NBC will not

WRG to Seattle via ex-Kraft Smithers

NEWPORT BEACH, CAL.—Wells, Rich, Greene, while locked in a struggle to retain $30,000,000 in billings from key accounts serviced by its Los Angeles office, will open a new full-service office in Seattle and begin prospecting for new business in the Northwest.

- WRG/West chairman Raymond Townsend said the Seattle office will open in mid-February with a nucleus provided by former executives of Kraft Smith Inc., Seattle (AA, Jan. 21).

Robert Wolf, senior vp and WRG/Los Angeles managing director, flatly denied such a move was afoot when questioned by ADVERTISING AGE a week earlier, as did William Mullen, one of the Kraft Smith execs.

Heading the WRG Seattle office as managing director will be John Henry Barber, formerly a vp with Kraft Smith. Other top executives will be Mr. Mullen, creative director; James Aaby, associate creative director, and Ronald Jaco, media director. All held similar posts at Kraft Smith.

Initial efforts of the Seattle office, said Mr. Townsend, will be the development of new business, with two presentations scheduled this week. The $3,500,000 Brittania sportwear account, located in

Study pins medals on military ad team

By RICHARD L. GORDON

WASHINGTON—Even as President Carter spoke last week of reviving the military draft, Pentagon ad managers were getting a straight "A" report for their handling of the "all volunteer" military's multi-million-dollar recruit advertising effort.

The praise was from New York ad consultants Canter, Achenbaum, Heekin, whose top to bottom look at military ad management—paid for by the Pentagon (AA, May 29, '78)—is gradually surfacing.

The reports available last week express the consultants' view that the Pentagon ad managers have become the equals of topflight ad managers in private business—if not better.

But changes were urged in the systems some of the services use for selecting ad agencies, including eliminating ground rules that may favor incumbents over challenging agencies and switching to competitions every five years instead of every three, as now required by federal contracting rules.

While a summary report was not available, each of the individual service studies available praised the "professionalism" and "organizational skills" of the military ad staffs.

- Canter, Achenbaum, Heekin reports on the Navy, Air Force and Marines based much of their praise for the service ad executives on their planning efforts. The Navy had "better long-term marketing cost planning than found in most private sector companies," the consultants said.

The Air Force, likewise, does "an admirable job in the planning area, much better than most companies in the private sector," according to the reports.

The Marines were cited for their system of setting objectives; their professionalism is "comparable if not superior to the best managers of advertising in business and industry."

Where the military ad teams fall

Bacardi rum-bles to top-seller spot

By JOSH LEVINE

NEW YORK—Bacardi rum has capped a decade of steady volume increases to emerge as the nation's top liquor brand in the last year of the '70s, according to *Impact*, an industry newsletter.

Bacardi moved up from third place in 1978 to establish what *Impact* editor and publisher Marvin Shanken envisions as a long reign atop his annual rankings. The study, due for release Friday, also charts increased share for key brands in all categories.

The Bacardi Imports' brand displaced Heublein's Smirnoff vodka, the 1978 leader, with 1979 depletions of 6,350,000 cases, up 15% from 1978. (Depletions measure the transfer of three-gallon cases from wholesaler to retailer.)

- Though still a powerhouse, Seagram's 7 Crown dropped from second place to third last year, with depletions of 5,540,000 cases. Before 1978, 7 Crown enjoyed a 30-year dynasty as America's most popular liquor brand. Its decline confirms the country's shift to the lighter "white goods"—vodka, rum and gin.

Of the top 10 brands, all five white goods registered an increase in case depletions. "Brown goods" brands in the top 10—Canadian whisky, scotch, bourbon and blended whisky—all dropped below their 1978 volume in 1979, with the exception of Jim Beam, up 2%.

But even with the decline in depletions, key brown goods brands performed better than the categories in which they fell. "Premium brands have the margin to support enough advertising to maintain their positioning in the market," said Mr. Shanken.

In the scotch category, *Impact's* 10-year comparison showed that three ranked brands, J&B Rare, Dewar's and Cutty Sark, held a combined 35.3% of the market last year compared with 30.6% in 1970. Four ranked bourbon brands rose from 21.5% of the category in 1970 to 38.7% in 1979; five ranked Canadians rose slightly to 73% from 72.1% 10 years ago, and two ranked blends grew from 34.5% to 49.6%.

"Distillers will continue to support those key brands heavily in coming years," Mr. Shanken said, "and advertising dollars spent per case probably will increase. That trend goes along with general consolidation of brands and severe financial management. There will be a slowdown in marketing support for secondary brands."

Whatever ad support is marshaled behind other brands, Bacardi promises to hold the top spot for years to come, Mr. Shanken said. "The king is dead," he intoned. "Long live the king." #

Stations drop Mobil tv series, citing FCC

NEW YORK—Mobil Corp. has hastily juggled the lineup of tv stations in the syndication network for its six-part series, "Edward and Mrs. Simpson," after three Post-Newsweek stations canceled the broadcasts in response to Mobil's commercials.

The stations pulling out—WDIV, Detroit; WFSB, Hartford, Conn., and WJXT, Jacksonville, Fla., found a "moral" in the issue-oriented commercials (part of the syndication package), produced in the form of fables. If ads "make explicit allusions to important controversial issues," as a Post-Newsweek attorney put it, stations are required to grant equal time for opposing views under the Federal Communications Commission's fairness doctrine.

- Mobil enlisted WKBD, Detroit; WVIT, Hartford, and WJCT, Jacksonville, to replace the defectors. In Detroit, a crucial market and audience for Mobil's energy-related fables, WDIV as an NBC affiliate leads independent WKBD, owned by the Field stations.

"I consider their [the Post-Newsweek stations] actions to be censorship," said Herbert Schmertz, Mobil vp-public affairs, who created the ads. "It's curious to note that print versions of the same ads ran in the same company's newspaper, the *Washington Post*," he added.

Mr. Schmertz has long battled network policy on issue-oriented ads.

- Before trading its Washington tv station for its current Detroit outlet, Post-Newsweek had been involved in at least two legal fights over "controversial" commercial messages.

In 1976, a Texaco spot that aired on the Washington station drew attacks for allegedly promoting the virtues of integrated oil companies at a time when the Senate was debating whether to break up the oil industry (AA, Aug. 16, '76). FCC ordered the station to carry opposing views.

- Earlier, Post-Newsweek fought to the U.S. Supreme Court and won a decision upholding its right to refuse to air commercials challenging the Vietnam War.

The Mobil commercials were produced by Steve Gold Productions and placed by SFM Media Service Corp. here. #

AmEx hopes to 'balance' cheque ads

(Continued from Page 3)

wide-ranging talk on the need to control "Big Brother" technology, noting some emerging social trends that he thinks sophisticated marketers should note. Mr. Robinson sees a societal shift from "a value system of conformity to one of competing systems—a multichoice society.

"A new set of values is emerging from the negative, post-Vietnam, post-Watergate era," Mr. Robinson said. "They revolve around: The movement away from big government to local government initiative; deregulation and less regulation as a national priority; the replacement, in part, of the Protestant work ethic by the "Society of Entitlement"; the psychology of high inflation and its complex impact on standards of living; the decline of the two-party system and the rise of special interest groups, and the rise of working women and the two-income family.

"The implications of this value shift to a multichoice society will have a profound effect upon business," said Mr. Robinson. "It will mean, among other things, that the private sector will have to cope with a society that is even more highly segmented by market. The tastes and values of the consumer will reflect great diversity . . . and diversity will represent new opportunities for those with the capacity to respond and deliver.

"Needless to say the financial services industry is influenced and will continue to be influenced by these changing consumer trends," he continued.

"The image of America as a homogeneous market is declining," continued Mr. Robinson. "The image of America as a marketplace of diversity is ascending."

Looking to the 1980s, Mr. Robinson thinks marketing will be of utmost importance to financial institutions. "What is obvious is that the banking environment will be characterized by tough competition and an escalating use of new marketing techniques to lure the increasingly bewildered and inflation-conscious consumer."

As far as claims that we may become a "cashless society" in the near future, Mr. Robinson is skeptical. "I do not believe the cashless society is immediately at hand because it does not reflect the public's deepest wish. Instead, in terms of payment systems, individuals will want more options, not less."

Mr. Robinson thinks commercial tv will face more problems in the future. "Tv has already begun to lose some of its ground. With new home entertainment options, it is no longer the only wheel in town." #

Pepsi captures 'spirit' in new theme

Bottler meet told $80 million set for brand ads

By NANCY GIGES

LAS VEGAS—Sensing that the Me decade of the '70s is taking a "you" turn in the '80s, Pepsi-Cola unveiled a new ad campaign here last week for its flagship brand to convey feelings of pride and optimism in America.

Theme changes and a 30% hike in ad spending—to $80,000,000—are part of Pepsi's arsenal to retain the momentum it has gained against archrival Coca-Cola. During a national convention here, bottlers were told of the importance of sophisticated marketing to combat growing competition.

The new Pepsi campaign invites Americans to "Catch that Pepsi spirit. Drink it in!" It replaces the three-year-old "Have a Pepsi day," but is a further extension of the brand's 18-year-old "Pepsi generation" concept.

New themes also were introduced for Mountain Dew and Pepsi Light, while Diet Pepsi retains its "You're drinking Diet Pepsi and it shows" with some improvement in execution.

Some 3,000 bottlers crowded into two showings of a $2,000,000 extravaganza Pepsi put on at the MGM Grand Hotel. It was the first national Pepsi gathering since 1976 when the company introduced its "Have a Pepsi day" theme.

In other years, Pepsi introduced updated ad plans at regional meetings. But a new theme calls for all-out efforts for bottler support. Each franchisee decides what promotions are introduced in its markets, and how much co-op will be spent.

The commercials were greeted with long and sustained applause by the assembled bottlers. The show biz atmosphere was typified by the company president John Sculley's appearance in a white spangled tuxedo. He later switched to a green tuxedo to tout himself as president of "the Mountain Dew company." The point was that it is a mainstream brand and deserves a soft drink company of its own.

▪ The biggest portion of the 1980 ad budget, $50,000,000, goes to Pepsi, followed by $14,000,000 for

(Continued on Page 86)

Catch that Pepsi Spirit.
Drink it in!
PEPSI

The whole town turns out to welcome the local hero returning from his first successful season as a Major League Baseball player in this spot carrying the new Pepsi theme, "Catch that Pepsi spirit. Drink it in!" It's Pepsi's first theme change since 1976.

S&S, C&W talks off; P&G may be reason

By BERNICE KANNER

NEW YORK—Merger talks between Cunningham & Walsh and London-based Saatchi & Saatchi Co. have been tabled indefinitely. But the apparent breakdown has not dampened either agency's interest in affiliation.

Reports have it that Procter & Gamble Co. squelched the deal. Both shops serve the giant Cincinnati-based marketer, Saatchi through the S&S Garland Compton subsidiary, which is 19% owned by Compton Advertising. C&W handles P&G's Folger's coffee.

But C&W also handles American Home Products Corp.'s Boyle-Midway division (Woolite products) and American Brands' Jergens lotion and soap products. Saatchi handles P&G's Fairy Snow and Fairy toilet and household soap, Ariel and Head & Shoulders shampoo. The leading British shop also handles Nivea cream and liquid, Atrixo hand cream and Nivea cosmetics.

C&W's Boyle-Midway and Jergens business has not been a problem since it is not a P&G agency in the soaps or toiletries areas, working only for P&G's foods division. But a linkup with S&S would have put the shop into those areas for P&G.

▪ C&W president Anthony Chevins dismissed such reports. "Procter & Gamble doesn't work that way," he said. "They don't interfere in the way we run our own business." But he conceded that potential conflicts do exist.

The C&W-S&S union is "not as dead as a doornail, but odds are slim that we'll get together," said Mr. Chevins. His $225,200,000 agency is privately held by some 90 shareholders. The merger question was laid aside without being brought to a vote.

Meanwhile, conversations continue with other domestic and international agencies, said Mr.

Filmland seeks clout, not creative

Big studios shifting shops

By JOHN REVETT and BOB MARICH

LOS ANGELES—An unprecedented shake-up of top movie marketing and ad execs over the past few months—and to an extent a push for fees instead of commissions—has started producing major account changes in the movie industry.

Doyle Dane Bernbach has followed ad head David Weitzner from 20th Century-Fox to Universal Pictures, and Fox' new ad chief has started a review which may include D'Arcy-MacManus & Masius, which loses Universal after 12 years. And if Wells, Rich, Greene/West fails to hold the Columbia Pictures account, no one is discounting the possibility of a WRG bid for Fox; the man who hired WRG at Columbia, Robert Cort, is now head of advertising at the studio.

Might D'Arcy also check Columbia to see if it's not too late to take part in that agency review? That's another possibility as the studio account wheel keeps turning.

In splitting with Fox after four years to take on Universal, Doyle Dane is expected to be adding $2,000,000 to $3,000,000 in billings. Universal is estimated to be spending at the $22,000,000 level, with Fox pegged at just below $20,000,000.

▪ As it did when working with Mr. Weitzner at Fox, DDB is expected to be handling some creative work at Universal, but the assignment is said to be primarily media handling on a commission basis.

At least part of the reason for DDB's split with Fox is understood to be a proposal on the part of Mr. Cort that the agency continue on the account under a fee arrangement that Doyle Dane found unacceptable.

A push for fees rather than commission payment is central in new Columbia ad head Fred Goldberg's review of agencies to handle that studio's $25,000,000-plus in spending, that has been handled by WRG. Columbia's total expenditures, including co-op, have been close to $40,000,000 over the past year. Mr. Goldberg made it clear that agency selection, expected within a month, would depend to a significant extent on who comes up with a budget-con-

Thank you, Canada.

Signs of thanks to Canada for its part in aiding six Americans to escape from Iran popped up last week, including this page ad in the *New York Times* from Citicorp. The ad was prepared in-house.

last minute news

Korvettes chain goes in-house from Grey

NEW YORK—Korvettes has taken its account in-house following a mutal termination with Grey, where it billed an estimated $4,000,000-plus in 1979. A new campaign will move away from "The other Korvettes" theme, but retain the hanger symbol for fashion ads and value image. A new slogan, "Famous brands at Korvettes' famous low prices," will accompany hard goods ads. Media emphasis will shift from spot tv to circulars and suburban newspapers.

Goodyear sets launch of its Arriva radial

AKRON—Goodyear Tire & Rubber Co. breaks a campaign Feb. 12 for its new "bread and butter" steel-belted radial tire, the Arriva. Goodyear will spend more to introduce it than was spent to back the all-weather Tiempo, said vp-advertising John Kelley. Arriva will be billed as combining fuel efficiency, all-weather use, long mileage and traction. "Even its footprint tells you it's different" is the theme, via Campbell-Ewald, Detroit.

RKO cable operations could face FCC review

By MAURINE CHRISTOPHER

NEW YORK—RKO General, one of the country's largest radio-tv station groups, and its parent General Tire & Rubber Co., will wait to get the formal order lifting its tv licenses in Boston, New York and Los Angeles before deciding how to fight this $600,000,000 battle.

Once that painstakingly crafted document is released, RKO may ask the Federal Communications Commission to reconsider, or go to court to try to prove itself a trustworthy licensee despite the misconduct charges leveled against it and its parent (AA, Jan. 28).

The $600,000,000 estimate made by one of the dissenting commissioners apparently covers only the market value of the 16 radio and tv stations and excludes the cable holdings of General Tire. Now that the commission has acted on a 11-year-old challenge against WNAC-TV, Boston, RKO can't sell any of its radio or tv stations until the legal hassle is resolved.

Further, the 40-plus catv systems owned by General Tire's cable subsidiary, Cablecom-General, could be subject to character scrutiny at the FCC every three years at license renewal time. This unit netted $4,970,000 last year on a gross of $37,400,000. Franchise applications are pending with cities in a few markets and are under consideration in 10 to 20 others to expand General Tire's holdings in cable.

The impression from an FCC source in Washington was that Cablecom's (cable auxiliary relay service) licenses might be in jeopardy too as a result of the commission's concern over consent decrees in which General Tire admitted to making payoffs to foreign officials and illegal domestic campaign contributions. Perhaps most importantly, General Tire also was charged with pressuring its suppliers, such as insurance companies, to buy time on RKO General stations. When announcing its decision, the commission noted that the chairman of General Tire was RKO's chairman as well.

A General Tire spokesman in Akron emphasized that the Justice Department and Securities & Exchange Commission consent de-

Lovers of the dark

Young lovers and cat burglers are among those who love the dark, according to this new spot promoting the "deep dark chocolate" of Peter Paul Cadbury's Mounds candy bar (AA, Jan. 14). Agency is Dancer Fitzgerald Sample, New York. Production house: Petrucelli & Associates.

Crain sets Cleveland business paper debut

CLEVELAND—Crain Communications Inc., Chicago, will launch its second general business newspaper here this spring.

Crain's Cleveland Business will debut March 31 as an every-other-week tabloid and be modeled on *Crain's Chicago Business*, which was launched in that market as a weekly in June, 1978.

The paper will have a controlled circulation of about 25,000 initially, and will be distributed in a seven-county area, according to publisher Ernie Zielasko, who also is editor-publisher of Crain's *Rubber & Plastics News*, based in Akron.

Frederick Freeman, former business editor of the *Cleveland Plain Dealer*, has been named editor of the paper, which will begin with a four-member editorial staff in addition to correspondents in Columbus and Washington.

Lowell Chrisman has been named director of sales, a title he also holds with *Rubber & Plastics News*. Arnold Benjamin, formerly on the sales staff at the *Plain Dealer*, was named sales manager.

The new publication will be published by Crain Automotive Group, which also publishes *Automotive News* and *Rubber & Plas-*

Seven-Up account switch rumors discounted

By CHRISTY MARSHALL
and JOHN J. O'CONNOR

NEW YORK—A whopping 73.4% decline in Seven-Up Co.'s operating income last year, coupled with the hiring of a top creative exec with soft drink credentials by Backer & Spielvogel, has rekindled speculation about the $40,000,000-plus 7UP account at N W Ayer ABH.

While the latest events have served to heighten the convictions of some agency execs that Seven-Up's parent, Philip Morris Inc., eventually will move the account to Backer & Spielvogel, that feeling is not shared by 7UP bottlers and soft drink analysts in general. In addition, an informed source said that Backer & Spielvogel's hiring of David Lamb as vp-associate creative director (AA, Jan. 28) was not related to that agency's expectation of landing Seven-Up.

Carl Spielvogel, chairman of B&S, would only say that Mr. Lamb, formerly senior vp-executive creative director at Ogilvy & Mather, Chicago, where he worked on Royal Crown Cola, was one of a number of execs being added now that the agency has digested the $85,000,000 Miller Brewing account.

Mr. Spielvogel, whose shop now has a staff of 93, said that talks have begun with prospective new clients since a moratorium on new business was lifted Jan. 15.

▪ "I'm not surprised at the [Seven-Up] results," one midwestern bottler said. "Besides spending heavily in media, Seven-Up has been spending heavily in staffing, in beefing-up salaries." PM last week announced that Seven-Up's operating income had decreased to $6,985,000 in 1979, 73.4% lower than $26,291,000 reported in 1978. The Seven-Up performance was the only negative note in PM's record-breaking year in sales and earnings. The parent company's results: Sales up 25.2% to $8.3 billion and earnings up 24.3% to $501,881,000.

Despite Seven-Up's '79 performance, one bottling exec observed, "I really don't think they [PM and Seven-Up] are that unhappy [with Ayer]. I look at Philip Morris as a company with very intelligent people who know it takes time to make things right and who don't expect results yesterday. With Ayer, everyone hoped they would hit a home run, but they didn't. However, I really think Ayer will get another chance."

Robert Emerson, an analyst at Salomon Brothers here, was not particularly bothered by the results posted by Seven-Up. Over the long term, he said, he expects Seven-Up to improve significantly, since he anticipates the company will test or introduce broadly a cola-type soft drink perhaps by the end of this year. As for near-term results, he suggested that new plans to be unveiled to bottlers March 17 could help matters.

Mr. Emerson also believes Seven-Up "will not necessarily market a conventional cola." In his mind, the company is likely to market a caffeine-free, as reported earlier (AA, Sept. 24), or combination grape or cherry-type cola drink. #

Vol. 51, No. 5—Advertising Age (ISSN-0001-8899) is published weekly except semiweekly the third week in March, the first week in September and the third week in December at 740 Rush St., Chicago, Il. 60611. Second class postage paid at Chicago and additional mailing offices.

Station says Ralphs tried ad pressure

LOS ANGELES—Charges that Young & Rubicam and Southern California's largest supermarket chain tried to pressure KABC-TV into softening its scanner-vs.-item pricing news coverage have been flying here for close to a week, but not just in media circles.

Instead of shrugging it off as in most advertiser pressure cases, KABC-TV has been putting the whole controversy on the air, night after night, on its continuing coverage of whether supermarkets should be required to mark the price of each item on its shelves. The supermarket chain, Ralphs, has been in the forefront of efforts to permit use of price scanning systems without item pricing, to save money.

The ABC o&o station began reporting on its local evening news last Monday that KABC-TV news director Dennis Swanson received a call from Y&R, agency for Ralphs, which Mr. Swanson called "an implied threat" of ad retaliation for the station's reporting of the anti-scanner side of the issue.

(Continued on Page 88)

Laboratory simulations

Marketers use 'other' ways to test

(Continued from Page S-1)

A less enthusiastic advocate of laboratory testing is Charles Hildreth, associate director of client services in the development department of General Foods, White Plains, N.Y.

"Their accuracy has been overclaimed," Mr. Hildreth says. "We would never go straight out (nationally) on their results."

In fact, Mr. Hildreth indicates that GF does not use simulated testing methods particularly often and has not used them at all in the past year or so.

He cites some dangers in relying on simulated programs. "We are concerned that on first blush (the product) may be good but that long term it drops." And he adds, "There is a tendency to want to believe in the results in terms of share performance, and this can be misleading."

GF would use simulated tests, Mr. Hildreth says, for diagnostic purposes. "These tests help you understand what you have done and how to improve, what's good about a product, what makes it work," he says.

Swift & Co., Chicago, according to Bruce Gooden, director of new products, sees clear advantages to simulated testing.

"If our ability to produce the product is very expensive, we make a small amount and test the water to decide, yes, we should spend $250,000 to put the machine in," he says. "We might also use it where the proposition has been very gray; the product is not a clear winner or loser, and you don't feel real good about taking a market loss because of the questionable success."

Another instance in which Mr. Gooden sees simulated tests as effective is when the product needs its total package—all consumer communications—in order to sell. "Merely telling someone about it isn't going to do the trick. There has to be something more personal about it," he says. "And the lab allows you to expose people to your package itself in a competitive framework.

Mr. Gooden also cites the advantages of confidentiality afforded by the simulated test, and considers it one of the few methods of test pricing. He says it provides a clearer diagnosis of the situation than does test marketing in that you're able to separate which results come from coupons and which come from advertising.

CHARLES HILDRETH

Lastly, Mr. Gooden says, because of its expediency, a lab test is useful for a seasonal product. The ability to move quickly enables the manufacturer to get the product right out rather than wait around for another year.

- Mr. Gooden points out that Swift has never foregone a test market after a lab test. After all, he says, a lab test won't tell you what level of distribution to aim for, what shelf space you will get, whether you will be featured in trade ads, what your competition will do, what kind of repeat sales you will have and what true level of sales the product will reach.

Mr. Gooden, who has used Management Decision's ASSESSOR, says he applies the method only if the company is insecure about a product. The company, he says, has gone ahead with only one of four products it has screened in a lab situation.

- Perhaps the general feelings toward laboratory testing are best summed up by Joel Levine, corporate director of research for Pillsbury, which uses its own "Supertest" system. Mr. Levine says Pillsbury kills about one of three products after the Supertest and would never consider going national without a test market.

"There are too many risks," he says. "Even if you get a pretest volume that is great, how big is it really? We use the Supertest to get some feel, some perspective on how good the market is. The objective is to be more selective with what you take into test." #

How test marketing stacks up

The following tables, compiled by Market Facts, are based on questionnaires sent to the market research directors of the 132 largest consumer goods manufacturers in the U.S. A total of 84 were returned—a 64% response rate. The responses were obtained from March 30 through April 20 in 1979.

Banks & trust companies	1979 1978	3,058,897	3,626,655	− 567,758	− 15.7

This Flash Report of newspaper advertiser investment, compiled for ADVERTISING AGE by Media Records, is derived from tabulations that cover 35 dailies and 25 Sunday editions in 15 cities—Atlanta, Baltimore, Boston, Chicago, Cleveland, Dallas, Denver, Detroit, Los Angeles, Miami, New York, Philadelphia, Pittsburgh, San Francisco and Washington. The report indicates marketplace strengths and weaknesses.

Ad spending in sports gear jumps 43.9%

NEW YORK—Sporting and leisure time equipment newspaper advertising showed a sporting 43.9% increase in dollar spending during November, 1979, compared with November, 1978, according to the November Flash Report prepared for ADVERTISING AGE by Media Records.

The runner-up for percentage gain was the eating and drinking places category, which registered an increase of 36% in the period.

▪ Of the 16 categories monitored for AD AGE by Media Records, only one—banks and trust companies—showed a decline in November ad volume in the 15 cities.

Department stores, newspapers' leading dollar category, gained 4%. It was followed in the top five for dollar spending by general merchandise stores, furniture and furnishings, food stores and amusements. #

O&M/2 unit to study abstractions

NEW YORK—Ogilvy & Mather/2 has set up its own research department geared to the study of abstractions in marketing.

John Garver, who had been a research associate at parent Ogilvy & Mather, has been named director of research in the newly formed department.

The move follows the shifting of media buying, planning and creative services to the fledgling subsidiary in efforts to make the $35,000,000 shop more autonomous. O&M/2 previously shared research facilities with its parent. Now the two-year-old shop utilizes the "reasonably mechanical services," such as accounting, of O&M.

▪ The new research department will be geared to implementing the unusual O&M/2 philosophy, Mr. Garver said. Simply stated, the agency assumes that the economy is less product-based than it once was, that it is increasingly service-oriented, and that the emphasis is shifting from the marketing of "concretes," which are cost-based and reproducible, to the marketing of "abstractions." These abstracts are value-based and they rely on the inexact science of psychographics. #

Paper linage service buys tv operation

NEW YORK—Media Records Corp., the newspaper linage measuring service, has acquired Comtrac Inc., a Santa Clara, Cal.-based broadcast measuring service.

Comtrac tapes commercials on 150 tv stations in 34 major markets. Media Records expects to expand Comtrac's broadcast measuring operations so that it will be comparable with those of the newspaper service.

▪ Glen DeKraker, founder and head of Comtrac, will continue as president.

Media Records measures ad linage in 240 daily and Sunday papers in more than 80 major markets, including Canada. #

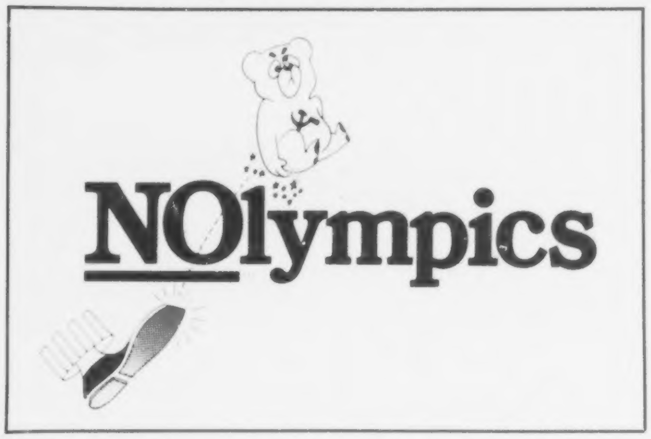
Summer games cold



Symbolic of growing world resistance to participation in the Summer Olympics in Moscow is this design for t-shirts and bumper stickers from Morton H. Kaplan Associates, a Chicago pr company.

Winter games hot

Mobil
1
LAKE PLACID
1980
When it comes to beating the cold at the 1980 Winter Olympics, the U.S. has a winner.
THE WORLD COMES TO AMERICA FOR THE 1980 WINTER OLYMPICS!
AND AMERICA WILL WATCH IT ON ABC!
ABC SPORTS

Tune-in ad from ABC hails its coverage beginning Tuesday of the Winter Olympics at Lake Placid, N.Y., which will include tie-ins by Mobil and a host of other marketers.

Marketers worldwide eye alternate to Moscow tie-ins

An Advertising Age roundup

As other nations join with the U.S. in threatening to boycott the Summer Olympics in Moscow, marketers worldwide are reevaluating their plans to tie in with the event.

With no hint yet that the U.S.S.R. is considering an Afghanistan troop withdrawal by Feb. 20—President Carter's deadline before he seeks a U.S. boycott of the games—the hopes grow dimmer for sponsorships, tie-in promotions, tv coverage and product endorsement opportunities for promising summer medalists.

In the U.S., major sponsors such as Coca-Cola and Levi Strauss are preparing alternative plans. Levi Strauss said it is ready to adjust its marketing tie-ins for Olympic sports clothing *(See story on Page 3)*.

In Britain, some big names involved in Olympic promotion include Watney Mann, Revlon, George Wimpey, Smiths and Associated Biscuits. Between them they were due to contribute substantially to the British Olympic Assn.'s $2,200,000 appeal. The association so far has $1,320,000 but admits the rate of contributions has markedly slowed. The money is to cover excursions both to Lake Placid and Moscow.

Pye, the tv manufacturer, is likely to scrap its Great Golden Olympic Offer, which would have offered cash prizes to those who bought or rented Pye tvs in the run-up to Moscow.

Arena Swimsuits, part of Adidas, already has sold more than 200,000 Olympic swimsuits, but is worried about a boycott.

Wimpey, the building contractor, has committed virtually all its advertising budget to the games. "We have put $550,000 into boxing, swimming and three-day events," said marketing manager Michael Hicks. "The Olympics was the spearhead of the effort."

(Continued on Page 87)

Full house at Lake Placid

LAKE PLACID, N.Y.—Untroubled by the Soviet Olympic situation, the Winter Olympics opens here Wednesday with more than $35,000,000 in the till from various marketers and from ABC-TV, which will provide extensive coverage of the events.

ABC paid $15,500,000 in tv rights plus $30,000,000 in production costs and said it will make a profit from the time sold to more than 40 sponsors within 49½ hours of actual games coverage, starting Feb. 13. The bulk of it is in prime time.

The Lake Placid Olympic Organizing Committee and licensor Capital Sports, meanwhile, have signed at least 110 companies for tie-in products and 100 companies as "official" suppliers. Those rights came to $20,000,000-plus.

Coca-Cola, General Foods and Boeing are among those breaking new tv commercials within the ABC coverage.

Coca-Cola has created new spots for Coke and Tab; GF has new ads for Maxwell House coffee, and Boeing Commercial Airplane Co. will salute all athletes from young beginners to gold medal hopefuls in a Cole & Weber-created spot scheduled to run 10 times during the 12-day event.

Another major sponsor, Bristol-Myers, already has begun airing a Kenyon & Eckhardt-created spot for Excedrin filmed at Lake Placid that shows the headache that organizing the Olympics can cause.

Other major sponsors of the games, including Block Drug and Campbell Soup, intend to run commercials from their current campaigns.

Coca-Cola will air two new commercials. One shows an Olympics participant bidding farewell to his family and girlfriend at a railroad station. They share a Coke before he boards the train. Another spot, narrated by country singer Kenny Rogers, features the sights and sounds of the Special Olympics, games held for handicapped individuals. Both appear under the "Have a Coke and a smile" umbrella, created by McCann-Erickson.

▪ For Tab sugar-free cola, a new spot shows a couple practicing their figure skating before appearing at the games. The commercial carries the current "Tab for beautiful people" theme, also by McCann.

New commercials for Maxwell House coffee include vignettes with an international flavor. Continuing to show people enjoying Maxwell House coffee all day long, one spot features two athletes from different countries who are drinking Maxwell House at a coffee shop and talking about down-

United move signals airline marketing shifts

By JOSH LEVINE

NEW YORK—United Airlines encountered immediate resistance from travel agents last week on planting its flag in the newly opened territory of deregulated agent compensation, an area where increasing marketing competition between airlines will be staged in coming years.

Anticipating an order by the Civil Aeronautics Board last Tuesday that breaks up the standard commission paid to travel agents, United a day earlier announced a plan to pay agents a flat fee of $8.50 for each ticket coupon they sell. While not abolishing commissions, the CAB ruling opens up various schemes of agent compensation, including co-op advertising allowances that were proscribed previously.

Agents were paid a standard commission of 7% on most ticket sales, a rate set by the Air Traffic Conference of the Air Transport Association, under the fixed commission system. "Open commission" would take effect 60 days after a final order is handed down, a move expected this week. United's fee plan is scheduled for April.

▪ The "open commissions" order points the direction the board may follow in considering whether several grandiose projects to distribute airline tickets automatically eventually get off the ground.

An ATC exclusivity rule currently limits ticket selling to the airlines themselves and accredited travel agents. But, although the CAB refused requests to rule on exclusivity along with fixed commissions, an ATC spokesman expects that restriction "to fade away within about a year."

Airline Tickets by Banks is ready to move when that happens. The Colorado Springs company would install automatic ticket dispensers in banks, enabling airlines to key their reservations into any bank outlet. The ATBB machines would deliver an authorized ticket

Jack in the Box decision due; Fortis' on project

SAN DIEGO—Ralston Purina's Foodmaker unit heard presentations Friday from Wells, Rich, Greene/West in its effort to save the $12,000,000 Jack in the Box account, and a decision is expected this week. In a move that may or may not be related to a possible review (if WRG is terminated), the fast-food chain has Fortis Fortis Westerfield, which opened in Chicago Feb. 1 (AA, Jan. 14), working on a creative project for Jack in the Box. Exact nature of the assignment is not known, but sources say ad production has begun on the FFW project.

Carnation rolling out new Fish Ahoy

LOS ANGELES—Carnation is rolling national with its third cat food line, Fish Ahoy, a dry multimix blend, and will start an estimated $6,000,000-plus network and spot tv and newspaper supplement campaign in about four weeks, via SSC&B. The debut follows Purina's introduction of Ocean Blend by several months.

ABC first? Nets ready rollout of fall lineup

By COLBY COATES

NEW YORK—While NBC is on the verge of announcing prime time schedule revisions to take effect in a few weeks, a preliminary timetable on the rollout of the three networks fall schedules has emerged.

Some educated guesswork by agecny observers reckon that ABC will be first out of the starting gate, probably announcing its new fall lineup in late April. CBS will follow, with one buyer pointing to May 1 as a best bet. NBC, it's said, would wrap up the first round of counterprograming a week to 10 days later.

Of more immediate importance to NBC, however, is the new tactics it will employ once the February sweeps and Winter Olympics have had their run. Speculation about the programs that could end up with new slots include "Big Show," "United States" and "Sanford" from NBC's second season roster and "Hello Larry" and "Prime Time Saturday" from the fall. In addition, entries such as "Boomer," "Pink Lady" and "Maxx and Me," which have yet to find a spot in the schedule, could, as a result of the shifts, find a place on the prime time roster.

Some sources see "Big Show" and "United States" moving to the 9 p.m. to 11 p.m. block on Wednesday, playing off the steadily building drawing power of "Real People," which just notched its best numbers ever, a 27.9 rating and 40 share.

NBC's Perry Lafferty talks about next fall-Page 88

"Sanford," which marks the return of Redd Foxx to NBC, tentatively has been scheduled to play Friday, 8 p.m. (EST), but there's now talk it might displace "Hello Larry" as the half-hour follow to "Diff'rent Strokes." That duo could wind up on Tuesday with a "Sheriff Lobo" lead in. The key then would be to fill the last hour, now stop-gapped with the "Best of Saturday Night Live."

Besides shuffling the Tuesday and Wednesday schedules, it's anticipated that NBC will take another look at Friday, which currently shows "Sanford" and Facts of Life" in the first hour and a movie to fill the other two. Whatever the scope of NBC's moves, they will be centered on the 9 p.m. to 10 p.m. and 10 p.m. to 11 p.m. blocks as NBC has established some solid foundations in the 8 p.m. to 9 p.m. hour, sources said.

As for the release of next fall's schedules, agency executives say the timing will have less of an impact on the upfront market than in recent years.

As the clear-cut No. 1—and usu-

B&S lands Seven-Up's new brands —not 7UP

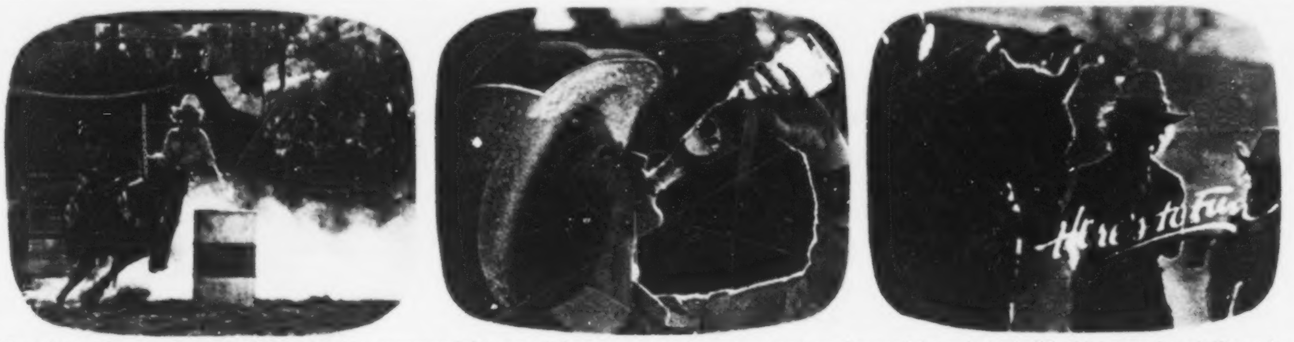
NEW YORK—Backer & Spielvogel made two presentations to Seven-Up Co. chieftains before they landed the company's new product account last week—a piece of business formerly handled by Leo Burnett Co., Chicago.

The appointment confirmed the earlier reports that B&S would be getting some Seven-Up business (AA, Feb. 4), but the rumored assignment was the St. Louis company's main brands, 7UP and Diet 7UP. They, however, stay with current agency N W Ayer ABH.

Backer & Spielvogel has been beefing up its staff for the appointment. Apart from the addition of former Ogilvy & Mather exec David Lamb, the agency has added Theodore A. Lamontagne as vp-account director. Mr. Lamontagne comes with expertise from PepsiCo, but most recently was with Grey Advertising, where he worked on Canada Dry's low-caffeine cola, Spur.

This gives strength to the oft-mentioned possibility that Seven-Up is getting ready to introduce a

(Continued on Page 86)



RC salutes fun and competition in this commercial, one of its new "Here's to fun" campaign from Ogilvy & Mather. A montage of sand racers, pole climbers, kids on Big Wheels, the Eureka, Cal., annual Kinetic race and a champion barrel racer (shown) star in this 30-second spot. Stressing that competing is fun, the song goes: "Here's to you/You're the fun/You know how good life can be/And you've tasted it in a cold RC . . ."

New RC drive teams 'you' and fun

By CHRISTY MARSHALL

CHICAGO—Just a week after Pepsi-Cola Co. announced its new ad campaign was based on the feeling that '80s will be the "you" decade, Royal Crown Cola's new drive comes right out and declares it so.

- RC's traditional theme line, "Me and my RC," has been expanded into "You and me and my RC" in a campaign breaking nationally on Feb. 25. With the third party added, the gist of the RC effort is fun—as in the new tag line, "Here's to fun."

"We are looking at ways of showing how RC Cola is smack dab in the middle of fun," said Larry Atseff, vp-marketing. "Here's to fun is our way of tying the way people enjoy the product with the product itself."

- The campaign is targeted at a younger audience—"younger people and younger thinking people," Mr. Atseff said. "We are after the heavy cola drinkers who, face it, are usually younger."

Aside from the similarities in the Pepsi and RC campaigns ("you" and youth), some of the scenarios are the same—both Pepsi and RC use a rodeo for settings.

"I can't deny we have scenes that look like other soft drink commercials," Mr. Atseff told ADVERTISING AGE, "but soft drinks are consumed in fun activities. We hope to tie in fun with RC. We want to get the concept of fun in the product as well as the experience."

"Here's to fun" is the second RC campaign from Ogilvy & Mather since it picked up the account in September, 1978. The first effort, which began airing last June, was the ill-fated "Who's the me in me and my RC?" in an effort that received a thumbs down reaction from many bottlers.

"The bottlers had some problems with it," Mr. Atseff said. "But we got some good playback from consumers. We received a lot of positive response on the beach spot, with the dog [retrieving everybody's RC]. As we looked at it [the campaign] we thought: Is there another way to present RC more positively?"

- The top creative exec on that earlier campaign, David Lamb, recently left Ogilvy for Backer & Spielvogel, which gave rise to the

World Air flies again, chops fares

OAKLAND, CAL.—World Airways, shut down for six months by the grounding of DC-10s and then a strike, will resume coast-to-coast flights Feb. 27, adding new service to Hawaii and chopping fares 35% to 40% under regular coach fares, and will give the program a $700,000 send-off via a new ad agency.

Under the headline, "Watch out, Goliath. David is back," ads done in news style open up: "World Airways is declaring war on the high cost of air travel. The establishment airlines charge too much to begin with, then add insult to injury with confusing restrictions." The opening statement carries the signature of Edward J. Daly, president and chairman of the airline.

In a swipe at other carriers, World says it pioneered popular low-cost transcontinental air service in April, 1979, and that "sent the Goliaths like United, TWA and American into a frenzy."

- World Airways, recognized in the industry as the largest charter airline in the world, will operate daily nonstop between Newark and Los Angeles for a fare of $180, including tax, and nonstop between Newark and Oakland for $194. It also will fly daily nonstop between Washington/Baltimore and Los Angeles, and also serving Oakland via Los Angeles.

The line will open its first service

Muffler makers making ad noise

By JACQUES NEHER

CHICAGO—The top two suppliers of mufflers to the automotive aftermarket will launch campaigns this year that seek to bolster their sales through service stations and to siphon off the jobs performed by muffler specialty shops and mass-merchandisers.

Walker Mfg. Co., the largest muffler maker, will hike ad spending at least 20% this year to make more consumers familiar with the brand and encourage more service stations to carry and install Walker systems.

No. 2 muffler maker, Maremont Corp., has signed actor Jack Klugman as ad spokesman for its Turbo-Flow muffler in its first consumer campaign in several years. The muffler will carry a lifetime warranty—the first such warranty offered through service stations.

Walker, a division of Tenneco Automotive, Racine, Wis., will spend "in excess of $2,400,000" in a brand awareness campaign using network tv and magazines, according to ad director Mike Sucharda. Walker spent about $2,000,000 last year in its first consumer effort.

■ "Last year we kept 8 million people quiet," is the overbearing message in print ads scheduled to run in *Sport* and *Sports Illustrated*. A tv commercial, stressing that Walker mufflers are available from more than 15,000 dealers, is planned to run in various sports programs throughout the year, including the Winter and Summer Olympics.

Olympic track star Marty Liquori has been signed as spokesman for the company, although he will appear at trade shows and in trade advertising, not consumer advertising.

"We're keeping our fingers crossed and hoping for the best," said Mr. Sucharda, regarding the possibility the U.S. will pull out of the Moscow summer games. Nevertheless, he said, the company is working on contingency plans that might include increasing the print schedule significantly.

Service stations—the prime outlet for Walker—perform about 14% of the muffler replacements nationally, a figure that has dropped drastically over the years as mass-merchandisers and specialty shops like Midas International began to grab huge chunks of the market.

Walker plans a trade campaign designed to convince "blue chip" service stations in major metropolitan markets, as well as the smaller market stations, to establish "muffler bays" in their stations. The company then will equip dealers with tools, exhaust supplies and offer promotional materials and a 50-50 co-op ad program. Walker hopes to equip 800 stations and repair garages with muffler bays in 1980, and as many as 5,000 within the decade. Hoffman York, Milwaukee, handles Walker.

■ Meanwhile, Maremont will take a slightly different approach in its tv and print campaign, scheduled to break in March.

A brand awareness campaign will claim Maremont's Turbo-Flow muffler increases horsepower and fuel economy by reducing "back pressure," according to Norm Dobrowski, director of market planning.

The lifetime warranty touted in the $2,000,000-plus campaign "will allow service stations to compete with the mass-merchandisers and Midases who have been offering lifetime warranties for years," Mr. Dobrowski said.

A trade campaign also is planned Barkley & Evergreen here is handling.

In the meantime, Midas has no intention of letting up on its competition—the mass-merchandisers and service stations. The company now has about 1,000 stores domestically. Midas plans a network tv local radio campaign estimated around $21,000,000—up about 15% over 1979.

Midas' campaign theme, "It pays to Midasize," will be continued as the company pursues a price-value strategy. Wells, Rich, Greene, New York, handles.

The aftermarket for mufflers is expected to grow 10% in 1980, to about $1.65 billion at retail. Specialized muffler shops account for about 27% of the market, including a 13% share belonging to Midas alone. Parts shops or "jobbers" account for 24% of the aftermarket, and mass-merchandisers—notably Sears, Roebuck & Co., Montgomery Ward and J.C. Penney—hold about 18%. After the 14% belonging to service stations, the remaining aftermarket is divided among repair shops, new car dealers and tire stores. #

Reynolds keeps lead

NEW YORK—R. J. Reynolds Industries again was the biggest magazine advertiser in November, a month when ad expenditures grew 16% and ad pages, 3%.

Reynolds held the lead for nine out of 11 months last year.

The tobacco, food, shipping and oil conglomerate hiked its magazine budget 127% to $12,723,552 in November. General Motors, which continued to hold second place, upped its magazine expenditures 10%.

Seagram Co. Ltd. remained in the No. 3 slot and boosted its magazine spending 19% while Philip Morris, which kept fourth place, increased its magazine expenditures 17%. Ford Motor Co. held on to fifth place with a 50% increase in its magazine budget.

General Foods Corp. advanced from eighth to sixth with a 13% hike, displacing Loews Corp.

Data in the accompanying chart was compiled by the Leading National Advertisers for the Publishers Information Bureau and ADVERTISING AGE. #

FRANCE

French supers expand arsenals for '80s fight

By CAROLYN PFAFF

For the 1980s, the big supermarket chains in France, under the leadership of some of the most savvy businessmen, are launching product diversification and expansionary efforts to insure sales growth of at least 15% a year.

In the space of 15 years, France has arrived at the point where 40% of all food distribution is now handled by 3,584 supermarkets and 392 hypermarkets. Of this 40%, the hypermarkets claim to account for 20%. A recent Nielsen report revealed that France is the world champion in this respect. No other country has reached the 40% mark, according to Nielsen figures published in January, 1979.

But the days have gone when the market leader, Carrefour, which had sales last year of FF16 billion ($4 billion) from 45 stores, will see profits increase sometimes as much as 75% a year.

In the last decade Carrefour overtook the competition through several revolutions—the first one being the introduction of generic lines in 1976.

A vast range of generic products are now offered in France—from diapers to hi-fi equipment—in all the big hypermarkets such as Euromarche, Mammouth, Casino, Auchan, Radar, Co-op and many more. In fact, Euromarche at one time looked into the possibility of a generic car.

Another recent Carrefour innovation, quickly copied, was the move onto the international scene. Forty French supermarkets are now operat-

(Continued on Page S-6)

France-Soir

Paris kiosk owners say they no longer have space for the number of magazines and newspapers on sale these days. One of the heavier trafficked kiosks is the one at the Arc de Triomphe.

Artful cigaret ads confound regulators

Tell a Frenchman that something is forbidden and he considers this a challenge. Tell a French adman that he can't advertise cigarets, except for the packet, and the affair becomes a test of honor and ingenuity.

Both Reynolds Tobacco and Philip Morris, no doubt spurred on by their ad agencies and local affiliates, have caught the French spirit.

And their solution, subtle but simple, to the whole cigaret ad dilemma was: if you can only show the pack in ads why not put something interesting on the pack. If that something has to be the *embleme* or logo, well then, let's play around with the logo.

First Camel, through the French agency Homsy Delafosse, and now Marlboro, through Leo Burnett, have come up with ads that are giving the French powers-that-be a *crise cardiaque* (heart attack).

Is it legal or isn't it? That is the question now being sifted and resifted by the courts. The first judgment on Camel, handed down early in January, said no. The case is now under appeal and as long as there is an appeal, the ads can continue until the case comes up again, maybe at the end of this year.

- The Camel ads, which date back to December, 1976, show a cute camel "smoking with delectation," according to the courts of law. Marlboro ads, which began only last November, show an unsmiling cowboy, lighting up a cigaret. It's hard to tell whether he's enjoying it or not.

The enjoyment angle may seem neither here nor there. But in fact it is crucial because, according to the Reynolds judgment, if the subject shows satisfaction, be he a corrupted camel or a poker-faced cowboy, he is judged to be inciting others to sin along with him.

Explaining it's decision, the court seemed to agree that the camel was a legitimate trademark but, on the other hand, the camel had no right to smoke. "It's a rather comic battle," says Jacques Leclerc of Reynolds France. "As I interpret the judgment, all we have to do is take the cigaret out of the camel's mouth and we're okay."

- Nevertheless, Reynolds is fighting to the bitter end for its rights. "The camel is our registered trademark and we want to keep it on the pack as it is," says Mr. Leclerc.

Reynolds also has another problem. A big proportion of its ads use a camel lighter instead of a cigaret pack, a necessary and effective way of avoiding page limitations, which are Camel's special problem in the market because it was a latecomer.

According to the judge all the Camel ads were against the law and so was the manufacture of lighters in imitation of the pack. Interestingly, the court did not pronounce on the use of the lighter in the ads but instead it ruled against the lighter itself.

This particular ruling comes a bit late in the day in view of the fact that for four years now practically all the big cigaret companies and especially the government monopoly group, SEITA, have been selling lighters like *petits pains*.

- The judge based his ruling on article 3 of the Loi Veil, which says there must be no propaganda appearing on any object which could constitute indirect ads for cigarets.

It will be interesting to see how the appeals court interprets this. But a close reading makes it clear that lighters are definitely against the spirit, if not the letter of the cigaret law.

Marlboro has yet to be taken to court but all bets are that it's just a

ing in Spain, Italy, Britain and Brazil, with many more planned.

■ And this January Carrefour came up with another first, the launching of the no-choice, one-product stores called Ed, modeled on the concept successfully introduced in Germany by Aldi.

On the other hand, Euromarche, part of the Viniprix group, and No. 2 behind Carrefour, has lately been active in the innovation department. It launched the *Vacances Orange*, a generic vacation sold off the hook; in other words a choice of pre-packaged holidays at competitive prices.

The Co-op supermarket group, a powerful association of independent shopkeepers also followed suit, as did the world's second largest bank, France's Credit Agricole, which sells vacation packages in bank offices across the country.

■ Early this year, Euromarche also announced the creation of a group of stores along the lines of Sears, Roebuck & Co., aimed at selling a vast range of products by catalog: "We are going to create a new concept in stores in France," says Gerard Seul, director-general of Euromarche. (For the record, catalog sale houses exist in France, in particular Le Redoute [FF3.4 billion sales] which specializes mainly in cheaper clothing lines, but there is as yet no equivalent of a Sears, Roebuck-type operation.)

All this activity on the part of the big two—Carrefour and Euromarche—proves one thing: both are expecting tough competition in the next decade. In fact, throughout the '70s there has been a tremendous evolution in the balance of power between the main supermarket chains. It is hard to remember that supermarkets were only introduced in France as late as 1963.

France waited 20 years after the U.S. to go supermarketing but when the first French group in the field, Carrefour, finally decided to build a supermarket at Sainte Genevieve-des-Bois in 1963, the result was a gigantic 3,000-sq.-meter store, guaranteed to blow the mind of the average Frenchman accustomed to buying all his goods in small local shops.

■ Carrefour made a killing and soon competitors moved in, slicing up the country into fiefdoms where each reigned supreme, then spreading out to take on the competition.

The make-or-break power of the hypermarkets is all-important when it comes to certain new product launches. For example, in the disposable diaper market, hypermarkets account for 50% of sales.

When Procter & Gamble's Pampers came into France a year ago, two French disposable diaper makers, Lotus and Peaudouce, responded by introducing their versions of the panty-style diaper with elastic legs. It was argued that only three brands could survive in the crowded field.

■ The battle for shelf space reached colossal proportions and each company, including the mighty P&G, was obliged to pay significant sums to each distributor to assure space. Payments of FF10,000 every six months were cited. This kind of kickback is a way of life in France.

On the other hand, the hypermarket generic lines often account for a staggering percentage of a company's output. In the economy diaper market, Lotus does 18% under its own name and another 9% for Carrefour. The other French maker, Peaudouce, does 18% in its own right but a big 29% is represented by orders for a variety of hypermarket generic lines.

Obviously, the power of the hypermarkets has always been a source of resentment for the small shopkeeper. And politicians argued that the situation was simply intolerable in a country where the local *commercant* had traditionally been the backbone of the nation.

Finally, in 1973, the pot boiled over. Two things happened: the *loi Royer*, and then the oil crises.

■ The *loi Royer*, voted in December 1973, was the work of Jean Royer, Minister of Commerce and mayor of Tours. It rigorously limits the creation of all new supermarkets of more than 1,000 sq. metres. Each request for a new site must now be submitted to a board comprised of consumers, shopkeepers and local officials.

After 1973, the number of new hypermarkets constructed has dropped substantially, to 32 in 1977 and down to 18 in 1978.

Also, after the oil crisis, the French, who traditionally spend more on food than any other nation in Europe, began cutting back. At the same time the country was in the grip of romantic socialist and ecological passions with the press arguing that the end of capitalism was near.

■ As Etienne Thil, commercial director of Carrefour, points out: "What had once seemed marvelous to the French became banal. Enormous parking lots hours till 10 at night, a choice of 350,000 articles with 15% off the usual price, all this was taken for granted or actively attacked by ecologists."

But despite sometimes violent criticism from the left, the clientele of the supermarkets has continued to climb, not as quickly as before but steadily.

Nevertheless, the big supermarket chains felt the pinch and their answer was to start buying up existing stores no matter where, absorbing independents and slashing prices—13% is the average markup. All felt they must keep growing or perish.

■ As far as Carrefour was concerned, the *loi Royer* worked superbly in its favor. With its already established 40 *hypermarches*, brilliantly located, all operating smoothly across the country, and the competition obliged to wait for years to get construction, Carrefour was sitting pretty.

Today, Carrefour turnover is still double that of its nearest rival. The 10 Carrefour hypermarkets in the Paris region alone account for FF4 billion.

But slowly other groups have been gaining in strength.

One of the major problems now has become the cost of transporting goods. For example, a supermarket which can take 25 tons of peanut oil in a single load at one time will pay 25 cents per kilo whereas a one ton order will cost 60 cents. This rise in transportation costs is a handicap for Carrefour, which has always favored decentralization and thus has no warehouses capable of storing big loads.

Casino, on the other hand, has not only warehouses but factories to condition certain products. Says Jean Pierre Gerard, head of Casino: "Thanks to our special setup we deliver only complete loads, programmed by computer."

But the chain best placed to profit from the delivery squeeze is Promodes in Normandy. The group, originally wholesale, owns a chain of depots across its territory. "A truck should never have to travel more than 150 kilometers a day or it's too expensive," says Paul Louis Halley of Promodes.

Advertising's influence

In the realm of advertising and promotion, by far the biggest spenders are Carrefour, Euromarche and Mammouth, in that order.

As a group, hypermarkets are No. 1 in the breakdown of ad expenditures by category with FF985 billion spent in 1978. Ad spending on food alone was FF755 billion the same year.

All this ad money has to be divided up between the radio, press and billboards. Television has always been banned in order to protect the small shopkeeper. In fact, general retailers are so heavily into radio that it assures 25% of radio's total income each year.

Between the big duo, Carrefour and Euromarche, there is a marked difference in ad strategy. Carrefour, through RSC&G and now Impact FCB, favors the press and often runs national image campaigns while Euromarché with Createurs Associé prefers radio and favors information spots about prices and weekend bargains.

However, as Etienne Thil of Carrefour points out sadly: "Tests prove that the public makes little differentation between the various *hypermarches*."

This March, Carrefour will come out with a completely new image campaign using photos in the style of David Hamilton and a 'gentle' message, "the opposite of hard sell," says Patrick d'Elme, pr director for Carrefour. Radio will be abandoned in favor of magazines and billboards. The campaign will be worth FF15,000,000, not counting the regional effort. #

*Retailers in France, where the small shopkeeper still has the upper hand, cannot advertise on tv.

Supermarket integration

Carrefour is the no. 1 group and owns an important minority interest in Castorama and California, stores specializing in do-it-yourself equipment for the homeowner; also a growing foreign network and the new single-product Ed group in Paris (in association with Radar).

Viniprix-Euromarche. Viniprix owns a number of small-and medium-sized superettes operating under its own name. The group controls the boutique chains, Beaujolaise, Saveco and Vegaprix.

Casino Guichard Perrachon has supermarkets, specialty shops and a chain of 50 cafeterias.

Promodes owns the hypermarkets Continent, the supermarkets Champion and the Normandy stores of Goulet-Turpin and Ami; in the Aquitaine (Bordeaux area) it has Eco Union and Etoile. Also a franchise system for the group Shopi and Banco and 12 cafeterias under the Presto sign.

Docks de France is the wholesaler for Paridoc which in turn controls the important hypermarkets Mammouth. It recently took over Cofradel.

Radar, like Viniprix, has small- and medium-sized superettes of varying sizes. Its most recent coup was the purchase of Paris France which owns the department stores Dames de France, and in Paris, the department store Trois Quartiers.

Edouard Leclerc, Intermarche and **Coop** supermarket chains. Leclerc and Intermarche operate uniquely on the franchising system and keep their stores among the most economical in France. There is also a popular growing trend toward shopkeepers cooperatives which accounted for FF20 billion ($5 billion) in sales in 1979. Codec-Una moved up from FF3 billion to FF8 billion in one year, reflecting the number of new shopkeepers who decided to ally themselves with the group. #

JWT-H&K link may accelerate trend

Some at pr shop miffed at sale

By BERNICE KANNER

NEW YORK—J. Walter Thompson Co.'s latest acquisition—that of Hill & Knowlton, the bluest of the blue chip public relations companies—has reconfirmed that giant agency's commitment to preeminence and touched off speculation that more pr-ad agency pairings will follow. It also touched off sparks of discontent among some Hill & Knowlton executives who were surprised by the sale.

Last week, JWT, now neck-and-neck with Young & Rubicam as the largest U.S. shop worldwide, revealed plans to buy Hill & Knowlton, the largest and heretofore fiercely independent pr company, for about $28,000,000 in cash and stock.

JWT also disclosed plans to create JWT Group Inc., a holding company to be chaired by JWT chairman-chief executive officer Don Johnston and to house JWT's various communications businesses. Details involving the reorganization of the corporate structure will be hammered out at a board meeting Feb. 27.

In the days immediately following the announcement, word filtered out of internal discord at Hill & Knowlton. Some younger H&K executives apparently are disturbed about the timing of the sale and believe the shop was "sold out from underneath" them without their knowledge and without having an opportunity to bid.

- The buy, the largest in JWT's 115-year history, advances the domino theory held by Dean Witter Reynolds analyst Fred Anschel: "After one goes, the others go."

The first pr domino to go was Carl Byoir & Associates, when Foote, Cone & Belding Communications bought the nation's third largest pr shop in 1978. Last July, Young & Rubicam acquired Burson-Marsteller, the No. 2 pr operation, when it merged with Marsteller Inc. And in November, Benton & Bowles entered the pr derby by acquiring Manning, Selvage & Lee, ranked No. 7 among pr shops, according to *O'Dwyer's Directory of Public Relations Firms.*

At that time, and again last week, Ogilvy & Mather president William Phillips expressed interest in the field. Doyle Dane Bernbach president Neil R. Austrian said his agency has looked at the field, and while not considering it "an absolute necessity," it hasn't ruled out the prospect of adding a pr shop.

Since then, other ad agencies have scampered to get in on the bidding. One management consultant, Chester Burger of Chester

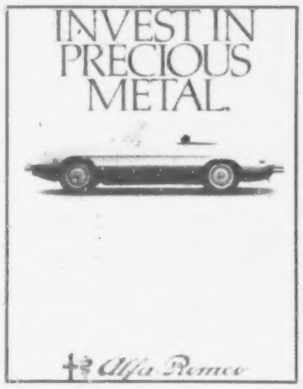
(Continued on Page 77)

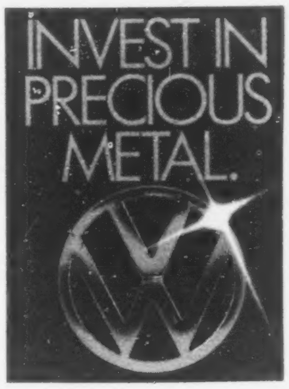
Too, too precious

NEW YORK—In 1974 Volkswagen of America took note of the increasing price of gold with a humorous plug for its cars, an ad saying simply "Invest in precious metal." Now, with gold prices skyrocketing, VofA and Doyle Dane Bernbach decided to repeat the ad.

Meanwhile, a copywriter at F. William Free was working up a one-shot ad for client Alfa Romeo Inc. (like VofA located in Englewood Cliffs, N.J.), to run in *Automotive News*. His headline: "Invest in precious metal."

Both ads broke about the same time with VW's in newsweeklies and *The New Yorker*.





INVEST IN PRECIOUS METAL.

Ray Raaber, account exec at Free, termed the duplicated headline a coincidence. John Slaven, ad director at VofA, pointed out his company's prior use of the line, but stressed that he was not suggesting Free copied the idea. #

Presidential ad drives under way

nowtorm in New England

By LEAH ROZEN

NEW YORK—Humorist Will Rogers once said, "Politics has got so expensive that it takes lots of money to even get beat with."

Lots of money is exactly what the 1980 presidential candidates are spending in the New England primaries, scheduled for Feb. 26 in New Hampshire and March 4 in Massachusetts and Vermont.

Most of the candidates appear to be spending at least $300,000 on their New England efforts, with the majority of the dollars going to tv advertising.

President Jimmy Carter, hoping to show his strength by beating Massachusetts Sen. Edward Kennedy in his own backyard, is spending $200,000 in the final four weeks of his New England effort. His advertising is being handled by Rafshoon Communications, Washington.

McAdory Lipscomb, Rafshoon vp, said that all Carter ads use the tag line, "A solid man in a sensitive job." He said the dozen tv spots being used concentrate on Mr. Carter's record as President.

Mr. Lipscomb said that the President's major rival, Sen. Edward Kennedy, is mentioned by name in only one of the radio spots, although he is alluded to in several other radio ads. The spots ask voters to compare the Kennedy and Carter records.

In turn, Kennedy radio spots now airing criticize Mr. Carter, which the senator has been doing more and more as he attempts to recover from his loss in the recent Iowa caucuses.

- Most of the other candidates appear to be avoiding mentioning their opponents by name. Ads concentrate at this stage on acquainting viewers with the candidates.

Or, as David Sparks, deputy political director on Republican George Bush's campaign put it: "It's still very early for substance in spots. What's needed is a general approach since this is still the first glimpse of the candidate for many voters."

Mr. Bush, who is considered a strong rival of former California Gov. Ronald Reagan for the top spot in the New England Republican primaries, is airing commercials that detail his job history (businessman, congressman, Central Intelligence Agency head) and end with the slogan, "A President we won't have to train"—an approach that paid off with a win in Iowa.

The Bush organization started showing a new 30-second spot in New England last week that features World War II film footage of military pilot Bush being rescued from his downed plane onto a carrier deck. The ad was created by Robert Goodman Productions, Baltimore.

- Ronald Reagan is running about a dozen tv spots, primarily 30-seconds, and radio commercials. The spots feature Mr. Reagan giving his views on issues such as the economy and foreign policy and his record as California's governor. The Reagan ads were created by

Sears mulls test of catalog sales via Warner cable

By JACQUES NEHER

CHICAGO—Sears, Roebuck & Co. soon may be ready to take a light-year leap over its competition in the catalog sales business by establishing a cable tv catalog network.

Sears, the nation's largest catalog retailer with about $3.6 billion in catalog sales in 1978, is currently negotiating with Warner Amex Cable Corp., New York, to develop a cable channel devoted to merchandising the thousands of products offered in its catalogs. The channel, according to sources, would be beamed up to a satellite and then distributed to programing-hungry cable systems across the country. More than 15,000,000 homes are currently wired with cable tv.

A Sears spokesman said the company was not engaged in "active negotiations," with Warner Amex, but admitted it was "in discussion with Warner and others" about possible tests using a cable channel to sell catalog merchandise. Such a test, he said, is "conceivable this year."

Warner officials refused to discuss the project, but a source told ADVERTISING AGE that negotiations with Sears "are moving right along."

- How such a channel might work is open to question. Last December, Warner tried out the concept with an American Express catalog, utilizing its interactive Qube system in Columbus as well as a non-Qube franchise it holds in Reston, Va.

In that test, seven categories of products from the American Express Christmas catalog were featured in regular five-minute intervals throughout the day on its special "Video Catalogue Channel." Viewers in Columbus could push a button on their Qube console if they desired a product shown. This would instigate a telephone response by Qube opera-

last minute news

WRG/West hangs onto Jack in the Box account

SAN DIEGO—Ralston Purina's Foodmaker unit has retained Wells, Rich, Greene/West, Los Angeles, on the $15,000,000 Jack in the Box account, but another WRG/West assignment, Columbia Pictures, billing $25,000,000-plus, remains on the endangered list. A decision between WRG, Diener/Hauser/Bates, Needham and Ogilvy is expected from Columbia this week. In the Foodmaker decision officials said WRG came up with a "long-term creative solution" for the chain, and also was correcting account servicing problems.

GF unleashes Gaines Complete dog food

WHITE PLAINS, N.Y.—General Foods is introducing nationally Gaines Complete dog food backed by a $14,400,000 ad effort, including day and prime time tv, newspapers, magazines and 216,000,000 coupons. The dog food in beef and beef with cheese flavors is individually packaged similar to semi-moist, but priced competitively with soft dry. It is positioned as a value-oriented, nutritionally balanced item with a six-serving box retailing for $1.29 to $1.39. Tv by Y&R breaks March 10, with print ads following.

$15 to $20 million behind Ford rebates

By RALPH GRAY

NEW ORLEANS—Ford Motor Co. is betting there is life after rebates and will follow its $15,000,000 to $20,000,000 rebate ad splurge with a similar spring effort.

General Motors kicked off the latest round of rebates and was followed by Ford and then by American Motors Corp., which mounted an indirect rebate (dealer pass-through) campaign. Chrysler Corp. quietly introduced an unadvertised $200 to $700 rebate on 100,000 holdover 1979 models.

Chrysler's Iacocca tells K-car plans ....Page 20

That and other Chrysler programs slowed its sales decline to 11% from a year ago while the industry was plunging 22%.

The tough times also produced some balm for J. Walter Thompson Co, the oft-criticized Ford division agency. "I am very happy with the job JWT has done in the past 60 to 90 days," said Bennett Bidwell, vp-car and truck group. JWT has been a target of harsh words from chairman Henry Ford II, but Mr. Bidwell said, "I think they're doing a fine job, and I'm not afraid to say that for attribution." He was in New Orleans for the National Automobile Dealers Assn. meeting.

Ford's rebate is $300 on the compact Fairmont and $500 on the specialty Thunderbird for both 1979 and 1980 models. The $15,000,000 to $20,000,000 is in addition to Ford's existing budget, with the bulk of that on rebates, Mr. Bidwell said. The rebate program budget is estimated at $75,000,000, including the ad budget.

A follow-up spring program "will be promoted in similar fashion," he added. "We are sharply increasing the budget and not necessarily for the period of the rebate announcement."

The spring campaign follows the end of the rebate on March 22 and will include Fairmont-Zephyr, Mustang-Capri and Granada-Monarch.

"The over-all point will be not to buy a car and get a check but buy a car and get a heck of a deal," he said. The initial rebate splurge will

Study notes grumbling about shops

Ad $ won't solve military woes

By RICHARD L. GORDON

WASHINGTON—The Pentagon has released a summation report by a private ad consultant that says the all-volunteer Armed Forces are haunted by major "product" problems that bigger ad budgets alone won't cure.

The overview report is one of a series of studies turned over to the Pentagon by New York consultants Canter, Achenbaum, Heekin last May that are being released publicly after lengthy in-house reviews (AA, Jan. 28).

Not only does the sum-up study—reviewing individual reports on the major services—buck the trend to bigger ad budgets, particularly at the Army, but it also reports there is grumbling by ad staffers at the Army, Air Force and National Guard Bureau about their agencies.

The consultants noted "undercurrents" of "criticism" and "dissatisfaction" among Army and Air Force ad staffers, who questioned whether their services had selected the "best" agencies in the last competition for their contracts.

While Canter, Achenbaum, Heekin said it was satisfied that none of the existing service agencies was performing "poorly," it reported these service views about their agencies:

- Army agency N W Ayer ABH, New York, is "acceptable over-all" but received "substantial criticism" for timeliness problems, use of research and the caliber of staffing assigned to the account, the Pentagon's biggest (total budget this year is around $60,000,000).
- National Guard Bureau agency W. B. Doner & Co., Baltimore, was also "acceptable" but criticized by Guard personnel for its media and creative work.
- Air Force agency D'Arcy-MacManus & Masius, New York, was "good over-all," USAF staffers told the consultants. There was unhappiness with creative, however, but the Air Force said the situation "is improving."
- Navy agency Ted Bates & Co., New York, was "very good over-all," with some Navy criticism of research.
- Marine Corps agency J. Walter Thompson Co. was "very good over-all" with no specific criticisms cited by that service.

Canter, Achenbaum, Heekin

ABA studies easing of lawyer ad code

By JENNIFER ALTER

CHICAGO—If the American Bar Assn. approves the new Code of Professional Conduct presented in discussion draft at its midyear meeting here, its restrictions on lawyer advertising will be greatly relaxed.

Unlike the current code, which spells out specifically what a lawyer can say, the new code—developed by the ABA's commission on evaluation of professional standards—limits a lawyer's advertising options only by what is false, fraudulent or misleading.

The proposed code is being analyzed in a series of public hearings this year, and will be brought before the ABA's house of delegates for final action in February, 1981.

The ABA code, which serves as a model for state bar associations, often is adopted by state supreme courts as rules for governing lawyers' conduct.

▪ Under the existing guidelines, lawyers' ads may include only name, address, telephone, fields of expertise and a fee structure. They are also essentially restricted to use of print, radio and tv media.

Not only would the new code provide for greater creative and informative description of services, but it also suggests that use of other media may be acceptable.

According to ABA commission on advertising chairman Roger Brosnahan, "It would appear to us [that the new code] permits a broader category of public communication vehicles such as billboards, placards and bus cards." Mr. Brosnahan said his commis-

—Not sold in the market.

BY ANTHONY HOFFMAN

NEW YORK—Prices paid for syndicated offnetwork product in the country's top markets have provoked a raging controversy over how profitable these shows will be for stations—if at all.

The dramatic change in the pricing trends of syndicated fare began with the sale of the "Mary Tyler Moore" show, the first fresh offnetwork series made available in several years. Coming on the heels of a spectacular rise in profits in 1976 for the independents, the syndicators' main customers, the per episode price for 168 MTM shows in the New York market was $38,000, more than 2½ times the previous recordholder—"Bewitched," at $15,000.

Anthony Hoffman, vp, Bache Halsey Stuart Shields, and a specialist in broadcast stocks, keeps a close watch on the syndication field.

Although program directors at other stations gasped audibly, one by one they began to line up to buy. When the sale was complete, prices close to the asking levels were achieved in nearly every market and nationwide, the sale followed the pricing pattern of New York.

Syndicated series used to be sold in each market to the station that came closest to meeting the distributor's asking price. The asking price was determined by the syndicator, based on the potential audience. In looking at Bache & Co.'s estimated price per episode for the most recent series sold in the top 10 markets, it is evident that, as MTM data indicate, the variations from the average price were only plus 30% to minus 7%. Thus, realized prices, although dramatically higher than other series sold previously, were proportioned to the size of each market.

This was, however, the last time the offnetwork market operated in orderly fashion. With the next major hit series, "Happy Days," things began to come unglued.

The break with traditional selling was the brainchild of Paramount's Dick Lawrence, who believed significant syndication revenues were being lost by determining an asking price before opening the sale. The older system, in effect, made the asking price the maximum, since any of the prospective buyers could close out the bidding at any time merely by meeting the asking price. The negotiating process was concerned only with the size of the discount off the asking price. This type of negotiation was familiar to broadcasters in that it was identical to the process of selling broadcast time.

By not suggesting an asking price, Paramount believed it could force the stations to determine the maximum they could afford. The sale of "Happy Days," in other words, changed the sale of programs to a true auction. This ABC hit was still running either first or second in prime time, with ratings levels higher than any previous occupant of that lofty competitive position.

The choice of New York to open negotiations proved ideal because of the competitive environment at the time the series went on sale. The market for syndicated offnetwork products in New York consisted of only two vhfs—Metromedia's WNEW and the Tribune Co.'s WPIX. At the time, WNEW was outperforming WPIX in ratings by a nearly two to one ratio for the entire day. Although the battle was close from sign-on until 6 p.m., WNEW had built up a commanding lead from 6 p.m. to 11 p.m. in part because of its successful scheduling of offnetwork comedies.

▪ Clearly, WPIX had to become more aggressive in offnetwork product acquisition; so when the offer went out to both stations, reportedly asking for bids of more than $25,000 per episode, WPIX bid $35,000, expecting to have to top a $30,000-plus offer from WNEW. Ironically, this trend to open auction could have been stopped dead in its tracks if WPIX only had known that WNEW would not bid at all.

New technology strikes a raw, sensitive nerve

(Continued from Page S-1)

Twentieth Century-Fox reacted affirmatively to life in the new technology era, noting that "pay tv and cassette assaults on free tv probably will cause more headaches in 1980 than previous years, but hopefully, much of the confusion will be cleared up next year." Twentieth Century, already selling to cable on a selective basis, pointed out further that cable and pay tv will become viable markets themselves for distributors.

ARP Films, which distributes "Spiderman," expressed concern about superstations' disregard for copyright infringement, thus diminishing the market value of a program. The need for more uniform direction as technical advances occur was cited by Kenco Productions, which believed that quality syndication fare would become even more vital to local stations as satellite to home telecasting becomes a reality in the U.S.

Rising production costs were mentioned again and again throughout the responses. "You can budget a job and in two months your figures have gone up 10%," said Carter-Grant. "Money is tight and, if you are able to get it, the 19% interest rate practically obliterates your profit structure. It is a difficult period for the small to medium independent producer without the umbrella of a large distribution company."

JWT mentioned the financial squeeze, too, as syndicators try to come up with budgets large enough to produce fare competitive with the high cost packages carried on the networks. Group W, which dropped Mike Douglas when he reportedly asked for a $1,000,000 raise, talked of escalating production costs and continuing network encroachment into local time periods, as well as general economic uncertainties. Group W now hopes to move the John Davidson talk show right into the old Douglas lineup and then some.

▪ One of the most succinct "biggest problem" answers came from Cinema Sales Corp.: "Breaking even." Marathon Entertainment accused the major ad agencies of adding to the syndicators' economic woes by "forcing inferior products down the stations' throats using the promise of big spot dollars as the wedge. This tactic is unprofessional and erodes the credibility of original tv programing."

UPA placed much of the blame on stations themselves, charging them with spending too much of their syndication budgets for star offnetwork series and leaving too little to purchase "filler" shows. "This is shortsighted thinking that will drive all prices up and seriously hurt the bottom line," said UPA. "An inflationary cycle is created and what's worse, when you consider the need for programing from sign-on to sign-off, many hours go unfilled. You could take some properties off the shelf that should have been buried long ago—but that doesn't make our air look better. We'll lose the audience eventually to pay and cable."

Producers were given a share of the blame for inflation in Viacom's response. Major problems, this major supplier said, are escalation of first-run production costs and the increasing costs and guarantees asked of distributors by producers—which ultimately must be passed on to stations.

Gardner's Advanswers bracketed costs, limited supply of quality programing and fewer desirable local time periods as threats to the continuing good health of syndication. But the supplier offered a ray of light—the use of one-inch tape to make shipping and handling more efficient.

Because it is rampant in the field, it wasn't surprising that stripping—buying one show for up to five or more days a week rather than, say, five shows to fill that same half-hour—turned up repeatedly in this survey. Benton & Bowles, Bristol-Myers and Advanswers were among those pointing to stripping in access periods as a problem.

Twentieth Century-Fox indicated that many time periods are being dried up by station programers' heavy reliance on stripping and by the expansion of network schedules into hitherto local blocks, particularly on the weekends. Similiarly, Group W, whose parent has gone to Washington to fight this trend, reiterated its charge that the three networks are continuing to encroach on the affiliates' local schedules, weekends and late night.

▪ Y&R Program Services complained that the growing amount of stripping in the access half-hour works against the "very reason" for the creation of prime access by the Federal Communications Commission in the first place—to open up tv to a wider range of production and creative talent.

On an upbeat note, several distributors, including MCA Television, Group W and 20th Century, sighted a trend toward more high quality programing and first-run syndication, which, they believe, will give the networks stiffer competition for audiences. Twentieth Century thought programs such as the "Gong Show," "Three's Company" and "Bedtime Story" were waning as more of the major broadcast groups enter into codevelopment deals with leading producers to turn out some of their own attractions.

Group W predicted that more "participatory syndication" would follow on the momentum of its own success story with "PM Magazine," which is beginning to break into the largest markets. This supplier expects to see the exploration of creative new ways of negotiating between stations and syndicators and an increased advertiser role in first-run syndication.

Y&R Program Services spotted a trend toward "greater client awareness of the values of syndication and the ability of syndicated programs to pinpoint target audiences in much the same way as radio and magazines." #

Bids spur high prices

(Continued from Page S-2)

On the strength of the WPIX sale, Paramount realized "Happy Days" prices of $35,500 in Los Angeles, $25,500 in Philadelphia, $22,000 in San Francisco and $15,100 in Washington, all of which are markets just as hotly contested as New York.

In early 1977, meanwhile, when "Happy Days" was sold, bidding for offnetwork series was most intense in San Francisco, Washington and Philadelphia. Paramount probably got from 50% to 90% more in those markets than it would have if a constant $8 per household asking price had been set in advance. It is also unlikely that the asking price would have been set as high as $8 under the old system.

It is ironic that the price for "Happy Days" in New York, although a shock to most when announced, actually turned out to be the second lowest price (per unit of audience) in the top 10 markets. So the stations in other markets actually were spurred to more aggressive action than WPIX, which started it all.

- In recognition of the "low" bid for "Happy Days" in New York, Paramount's target for the first crack at "Laverne & Shirley" was Los Angeles, where three out of the four vhf independents could be expected to bid. (The price per population unit paid in Los Angeles for "Happy Days" was 14% above the top market average.)

- Although San Francisco was clearly the most competitive top 10 market in the bidding for Fonzie and friends, Paramount believed that the shock value of a high absolute dollar price in New York or Los Angeles would have more of an effect on other markets. When the bidding was over in Los Angeles, Paramount was not disappointed. The per episode price of $61,500 was more than 73% higher than the same station paid for "Happy Days." In all, there was a considerable variation in price per audience unit within the top 10 markets, with the same markets clustered at the top and bottom.

Recent sales data suggest that the size of the market, as defined by total tv homes, is not by itself a valid measure for accurately predicting the specific market prices under the new auction selling procedures. Among other factors are total tv ad expenditures in the market per population unit and the number and type of stations bidding for shows. The average profitability of a station correlates inversely; i.e., high profits means low program prices, reflecting what appears to be a cause and effect relationship.

- Ranking by prices paid per household leads to other noteworthy observations:

- **Los Angeles.** Although suffering from a much lower per household income level than any other top 10 market, Los Angeles has a reasonably high tv ad spending level per home. But with nine rated stations in the Los Angeles/San Bernardino market, market shares and average operating margins are quite low.

Competition for ratings is intense among three of the vhf independents. The fourth, Metromedia's KTTV, achieves shares nearly twice as large as the others. This results in the highest absolute dollar prices in the country, but per household prices are only slightly above the norm.

- **New York.** One reason Los Angeles prices are the highest in absolute dollars, despite New York's larger population, is that New York has one of the lowest per household tv ad outlay levels in the U.S. The sheer size of the New York audience—nearly 65% greater than Los Angeles—produces per minute ad costs beyond the reach of all but the largest local merchants. Further, New York stations directly reach parts of four states with different sales tax rates and regulations, making the use of the same commercial for some products and services often impossible. The average station operating margins are low as well, limiting the program acquisition budget.

In New York the rivalry is less intense than might be the case in other markets with three vhf independents. The situation now could be termed almost complacent, reminiscent of the pre-1976 networks. The usual leader, WNEW, is rarely challenged by WPIX, while RKO's WOR opts for profits at minimum risk by banking on low cost shows.

In several cases, only one station bid on a given series, lessening the impact of the auctions here. Thus, the prices paid per population unit should remain well below the average of the other top markets.

- **Philadelphia.** The market is relatively poor in terms of tv ad expenditures per home. Its northeastern suburbs are covered by the New York stations and the southwestern quadrant, including Wilmington, is reached by Baltimore stations. As a result, some media plans call for smaller buys in Philadelphia and its spending levels are 12.6% lower than the top 10 market average. Still, the prices for both "Happy Days" and "Laverne" were slightly ahead of the top market average because of the intense competition between the two uhf indies.

- **San Francisco.** In recent sales, the per population prices in San Francisco are the highest by far of the top 10 markets. Why? Its time sales per tv home is among the highest and it's a glamor market to most media buyers. Although the per household income is only slightly higher than average, advertisers see the city as very "white collar and professional" and tend to include it in every multimarket spot buy. There are two very alert independents bidding very aggressively for offnetwork product.

- **Detroit.** An aggressive independent is the story in Detroit. With the market dominated by the ABC-owned station, the Field-owned uhf is within striking range of the lowest rated affiliate in early fringe and prime access times. Tv expenditure levels and operating margins are average in the market, although the ABC station probably pulls the average margin up somewhat.

A bonus in most years is the high average home income, a result of the high proportion of skilled workers enjoying high union wages in the auto and auto-related fields.

- **Washington.** Prices for off-network product here are the second highest (per unit of population) in the nation. There are two assertive independents

OSMOND COMMERCIAL PRODUCTIONS HAS MOVED UP TO HOLLYWOOD.

ANNOUNCING OSMOND COMMERCIAL PRODUCTIONS/LA

• Inspired by the great success of Osmond video tape Studios/ Utah, now we've gone even further -- to Hollywood, combining all our technical know-how and creative energy in a dynamic new film production company, Osmond Commercial Productions/ Los Angeles. That's moving up!

• As Senior Director/Cameraman, we've hired nationally acclaimed Jordy Bernstein (Morris the Cat/ 9-Lives, United Airlines, McDonalds, RJR Foods, Sears), whose use of keen imagination, complemented by a sensitivity to strategic demands best reflects the creative philosophies of Osmond Commercial Productions/ Los Angeles. That's moving up!

• We've hired advertising professional Dean W. Proctor, Jr.(former V.P.,JWT) as Senior V.P.,Business Manager, to address agency concerns from an agency point of view. That's moving up!

• To move up with Osmond Commercial Productions/ Los Angeles, call us in Hollywood:
213-937-0853
842 South La Brea Ave
Los Angeles,
California
90036

Old shows form green pastures

Syndication: Stars' social security

BY BOB WILLIAMS

NEW YORK—Lucille Ball says she "never really thought" about the green pastures of syndication during the early 1950s, when loving Lucy was becoming a national television habit.

"It was just something that never came up," she reflected. "We really didn't think beyond the shows we were actually doing. Or, at least, I didn't."

Ms. Ball and then husband Desi Arnaz were established program proprietors when syndication came into being—with such shows as "Sea Hunt" and "Border Patrol," among others—in the mid-1950s and residuals became a reality.

Mary Richards: Through the years on the staff of WJM-TV, Minneapolis.

▪ It was not until the 1958-59 season that the first batch of "I Love Lucy" shows was syndicated in what has become a nonstop merry-go-round, with at least 330 Lucy half-hours playing today on more than 100 stations.

"I guess you could say that I baby-sat for a couple of generations of Americans with 'I Love Lucy,' 'The Lucy Show' and 'Here's Lucy,'" Ms. Ball said in a phone interview from California. "That makes me very happy."

Considering that there are an estimated 140 "Here's Lucy" episodes that have received no more than a single syndicated play, it's a certainty that this performer will be occupying the attention of yet unborn generations.

"No," she said, "I never thought of competing with my younger self, or selves, when I did a new show. It never really struck me that some day I'd be on tv a half-dozen times a day in some cities, sometimes opposite myself.

"I guess that could be self-defeating, in a way, but it really never was."

The on-screen durability of the redoubtable redhead was demonstrated anew last October when she beat out—in the New York market, at least—the newly syndicated hit series, "Happy Days, Again."

▪ By the 1970s, when Mary Tyler Moore was flowering as America's tv sweetheart, the preoccupations of a sitcom queen had changed with the times and become attuned to the dollars and sense of syndication.

Mary, of course, had achieved stardom as a salaried employe for five years on the old "Dick Van Dyke Show" and was coming into her own as a program supplier with producing partner-husband Grant Tinker.

"I doubt if it entered my mind that I'd be competing with myself in the Dick Van Dyke reruns, although they were playing all over by then and still are," said Ms. Moore. "I guess I realized that, when you do something new, a new show—that's it, that's what counts."

Unlike Lucille Ball of the 1950s, Mary was acutely aware with the passing of each season that valuable episodes were piling up against that great come-and-get-it day of syndication.

▪ "Being married to Grant, who knew all about the business, I was aware that you don't begin to make money producing a tv series until you're able to put it into syndication," she said. "To me, it was just a fact of life, a case of that's the way it is."

After seven successful seasons, the two decided to cash in their syndication chips with the "Mary Tyler Moore Show" and put 168 episodes on the market for a quickie initial gross of about $7,000,000.

Next came a change of pace with a network variety hour employing Ms. Moore's skills as a dancer-singer. The poor ratings proved that while you're not necessarily competing with yourself in a new tv endeavor, you can collide disastrously with your image. The fans of Laura Petrie of the Dick Van Dyke series and Mary Richards of the MTM show weren't ready for the new Mary. As Mr. Tinker put it:

"I think Mary would be the first to say that the audience that had so appreciated her with Dick Van Dyke and in her own series just didn't want her singing and dancing and telling jokes, some of which ranged into an entirely different kind of humor."

"Maybe the hour-long show just wasn't as good as the series," Ms. Moore added. "As for the change in character, people somehow accepted me in a dramatic role in Betty Rollin's 'First You Cry,' undergoing a mastectomy. Look, all you can do is hope for the best and if it happens, it happens."

▪ Ms. Moore is due for another tv movie on CBS and a new Broadway fling in "Whose Life Is It, Anyway?" before considering another series venture.

The only way to live on tv, according to Tony Randall, is the way Mary has—as a "profit participant."

Mr. Randall, who dates back to $125 per episode as a juvenile in "One Man's Family" and $300 on "Mr. Peepers" in the pre-rerun, "live"-on-kinescope era, regards basic actors' residuals as small blessings, at best.

"Residuals are not going to be the annuity for anybody," he says. "The next job is what counts, unless you have profit participation in a series. Those first residual checks are great, but the percentage goes down fast, before you know it, to next-to-nothing."

Fortunately, both Mr. Randall (as Felix Unger) and Jack Klugman (as Oscar Madison) had profit participation in "The Odd Couple," which exceeded expectations in syndication.

▪ "Both Tony and Jack are millionaires from 'The Odd Couple,'" said agent Abby Greshler, who worked out hard bargains for their studio deals. "A situation comedy can do well in syndication if it's handled right. Of course, we've had the 'Gunsmokes' and the 'Bonanzas,' but the one-hour shows don't do as well on the syndication market as the half-hours. A half-hour fits into more places in a station's schedule."

No one was more surprised than Mr. Randall at the way "Odd Couple" caught on in its life after life in reruns.

"People discovered it who'd never seen it before," he said. "For five years on ABC, we never really had a rating. We just sort of hung in there.

"The first year we were almost dropped twice. They were constantly preempting us for practically everything, and the only real advertising or promotion we got was when I flew back and forth between coasts, appearing on all the talk shows. But, in syndication, the series just took off. It was incredible."

Between the network finale of "The Odd Couple" and syndication, Mr. Randall became involved in a role as a judge in the "Tony Randall Show," which flopped first on ABC and then on CBS. There weren't enough episodes to qualify it for a syndication deal.

"Now," said Mr. Randall, "I'm

High prices

(Continued from Page S-4)

plus an affiliate (owned by NBC), which occasionally carries offnetwork product in the daytime. Over-all, this station is barely ahead of Metromedia's WTTG; presumably, NBC buys some syndicated series to avoid having to compete with them in the prime-time access period. Partly because of aggressive bidding for programs in this market, the operating margins in Washington are lower than average.

• **Boston.** Expenditure levels and operating margins are about average in Boston. Of the two good uhf independents, only one is a perpetual bidder for offnetwork product; the other runs a lot of sports. Like Washington, Boston has an affiliate that acts more like an independent. Boston Broadcasters' WCVB is committed to locally-originated fare and regards ABC as just another source of programs, often preempting it for local or syndicated series.

• **Chicago.** The market is relatively prosperous in tv ad revenues per household, yet the prices paid for offnetwork series are consistently among the lowest of the top 10 markets. As in the case of New York, the reason is the competitive environment. The independent market is dominated by the Tribune's Co.'s WGN, the sole vhf independent. WGN prefers movies and local shows and feels little pressure to outbid Field Communications' WFLD, the market's best customer for offnetworks.

• **Cleveland.** The market has lower average prices than other top markets. Although its tv ad spending is about average, there is only one serious buyer of offnetwork product on a regular basis, Gaylord's WUAB. With the market all to itself, the station did not even buy "Happy Days" or "M*A*S*H." The NBC group (including WKYC-TV) occasionally makes an offnetwork deal, but that station alone is not a factor in setting prices in the market.

• **Dallas-Fort Worth.** The most striking dichotomy in this entire analysis involves the Dallas-Fort Worth market. With by far the highest tv ad spending per thousand of the top 10 markets, offnetwork prices in Dallas are the lowest. Operating margins are almost obscenely high, more than 60% above the national average and a full 20 points above any of the other top 10 markets.

Because of a shortage of independents the conversion to an auction market will have essentially no effect on revenues in markets below the top 50. But because about 70% of the total revenues from a given series are realized in the top 10 markets, that's where the action is.

Because prices are higher than most industry observers would have believed a couple of years ago, questions have been raised as to whether these shows can be profitable. The answer is yes. Even if a series produces losses on the first use, because of high amortization, it will generate profits in subsequent years. Some 40% to 50% of the entire cost per episode is counted against the first run.

A look at New York, for example, would illustrate the auction's effect on shows that perform as expected. "M*A*S*H" was sold before "All in the Family" at more moderate prices. Because both shows are achieving about the same ratings, commercial minutes in the shows are priced identically. But the high prices paid for "Family" at auction have halved the profits.

Although WPIX is not making a profit on the first run of "Happy Days," the station's price per rating point is somewhat low and could probably be raised, moving the series into the black. In subsequent years, the cost per episode will decline, producing profits on all series. The second year of a five-year contract would normally call for 30% amortization, while the price for ad time should rise by 15% or so if the show holds its audience. #

Note—Prepared for Advertising Age by Blair TV, these rankings are designed to show the day-to-day competition in the prime access half-hour in each of the top ten markets. In Chicago and Dallas the time is 6:30 p.m. to 7 p.m.; in the other markets it is 7:30 p.m. to 8 p.m. These household ratings are a percentage of the designated market area. If a station turns up more than once on one day's list, that's because it ran different shows during the four weeks covered in the November sweep measurements.

"Please folks, don't let this one die"...

Skag

The above quote appeared in newspaper ads on November 30, 1972. A great television show was about to go under; in spite of the praise it had received. The show had to be saved! It was worth saving. The appeal in that ad touched a nerve in you... and THE WALTONS is still with us. Now the same company that brings you THE WALTONS is appealing to you once again.

SKAG, another important television series is about to die.

SKAG is a brilliantly realized slice of life. A middle class working man and his family, the backbone of this country, trying to cope with the tumultuous forces in a changing world they no longer control or understand challenged by the economy, new sexual values, a world they knew that has vanished overnight. Americans, like us, struggling to get ahead, loving and caring, laughing and crying. But they pull together... and we pull for them because we know them. They are our friends, neighbors... they are ourselves.

This is an important series, one that offers emotional rewards and contemporary adult entertainment. Can it be cancelled? YES...UNLESS YOU SPEAK UP NOW!

The future of SKAG is in your hands. Don't think for one minute that you don't make a difference, that you have to just sit and wait for the "rating game" to tell you what you can and cannot see. Stand up and be counted... raise your voice. YOU can save SKAG.

Start writing, start calling. You can make it happen!

NBC TELEVISION NETWORK
3000 W. Alameda Ave. Burbank, CA 91523 (213) 845-7000

Keep 'Skag' on the air... you can do it!

Save 'Skag' Lorimar, producer of the "Skag" tv series, took this unsigned newspaper ad to try to save the show.

MTM talks with ad agencies

Producers going public to promote their shows

Los Angeles—What could become a significant "do it yourself" trend in ad support for tv shows—involving more advertising by producers, over and above network promotions—appeared to be setting down tenuous roots late last week in Hollywood's rain-soaked soil.

Production houses denied suspicions they were just putting pressure on the networks for more support, but there were clear signs that something's afoot.

The most dramatic and unusual example was Lorimar Productions' use of page and half-page ads in New York, Chicago and Los Angeles newspapers in an attempt to save the tv show "Skag" from cancelation by NBC.

While Lorimar head Lee Rich and ad vp Fred Skidmore were putting the final touches on their "Save Skag" direct pitch to the public, MTM Productions' Grant Tinker was starting talks with Wells, Rich, Greene/West; Ogilvy & Mather, and D'Arcy-MacManus & Masius.

If MTM hires one of the three within a month, as planned, it will become the first independent Hollywood producer with a national ad agency of its own. MTM reportedly plans to spend in the neighborhood of $600,000 in print, primarily to supplement tv network ad support for its shows.

But there was also a qualification: The agency selected might be "on hold" for awhile, according to MTM execs.

While Lorimar called its "Skag" ads a response to a special problem—lagging ratings threatening cancelation of what Lorimar and some critics feel is a special show—Mr. Skidmore took the view that "in the future this is something that's probably going to develop—production houses supporting their own product."

But he added that for the present Lorimar isn't on the lookout for a major agency and will

MCI readies attack on Bell

By JOSH LEVINE

New York—MCI Communications, the private long-distance telephone company, is girding itself for a broad-based advertising attack on Ma Bell, set to break at a time when MCI and AT&T also are waging a bitter court battle that came to trial recently.

MCI declined to discuss the content of the upcoming Ally & Gargano effort and its marketing strategy. But a company spokesman indicated the campaign would adopt the same combative tone that has characterized its relationship with Ma Bell since MCI became the first alternative long-distance carrier in 1973. Southern Pacific Communications and ITT World Communications since have joined MCI as long-distance competitors, but neither has achieved MCI's market penetration.

- All three companies are challenging Bell with lower long-distance rates in the $17 billion business segment of the market. MCI, however, will target its ad campaign at both the business and residential segments of the market under the over-all auspices of the company's residential marketing division, the company said.

The decision to pursue a consumer-oriented strategy is thought to have won the account for Ally & Gargano last November. Ally took a similar tack in promoting Federal Express' overnight package delivery in a market dominated by the much larger Emery Air Freight.

MCI has cast itself in the same David *vs.* Goliath mold, though David has begun to look a lot less puny in the past two years. In fiscal 1979, ended last March 31, MCI tallied earnings of $7,100,000 on revenue of $95,000,000 and in the first three quarters of its current fiscal year it has already logged profits of $8,100,000 on revenue of $109,100,000. That's a lot healthier than fiscal 1975 results, when MCI lost $38,700,000.

- MCI's move into media should hearten Bell's two other rivals, both of whom can expect to be pulled along in MCI's advertising draught. "It's nice to see that MCI is going to advertise," said Stephen Yesenosky, a spokesman for ITT World Communications. "At this

Last night, the ten best parties in town had something in common.

rondelé
SEMI-SOFT CHEESE
Spiced with Garlic & Herbs

rondele cheese: It tastes remarkably like that cheese from France. And unlike other cheeses that have fillers, coloring, gums and preservatives.
The only ingredients in rondele are natural ones. Rich cream.

Fresh, whole milk. Garden spices. In any of three flavors — Garlic & Herbs, French Onion, Pepper. Look for it wherever fine cheese is sold, including the gourmet section of your supermarket. And at the best parties in town.

It's a different kind of comparative advertising in half-pages starting in April women's magazines for La Jolla-based InoFoods' Rondele cheese. Copy doesn't go as far as to name more expensive French rival (Boursin), but says Rondele "tastes remarkably like that cheese from France." Hall & Levine handles.

Swift: Parent Esmark and execs impatient with turnaround

By PAUL MERRION
Crain News Service

Esmark Inc., already deeply disappointed with Swift & Co.'s lagging turnaround, is facing the prospect of more bitter delays following the exodus of key marketing executives, cutbacks in advertising and delays on some new products.

Although Swift downplays the talent drain, the departures are symptomatic of the impatience many feel as Swift struggles to transform itself from a plodding meat packer into a dynamic brand name consumer products marketer.

But the recruits, lured to Swift in 1976 when Colgate-Palmolive marketing exec William Watchman took over as president, apparently couldn't wait for the turnaround effort.

"It was the Camelot syndrome," said an executive recruiter who has worked with the ex-Swifties, as they call themselves. Young marketing professionals were attracted to Swift, he said, because "Watchman appeared as the Great White Hope who would yank a sleepy meat company into the 20th Century. But it was a gargantuan task, too much to be done in the time given."

And as Esmark's annual meeting convenes in New York this week, it's clear top management is running out of patience as well. In an unusually frank letter in its 1979 annual report, Esmark chief executive officer Donald P. Kelly said, "I believe the time has come

last minute news

Wendy's expected to pick Colarossi shop

Columbus, O.—Wendy's International is reportedly close to announcing Colarossi/Griswold-Eshleman, New York, will succeed Dick Rich Inc. (creative) and Clifford Botway Inc. (media), both of New York, on its account. At the same time, sources report C/G-E will resign its Arthur Treacher's Fish & Chips business—an account move that had been predicted since Mrs. Paul's recent acquisition of the fish chain. Stockton-West-Burkhardt will continue on Wendy's local advertising. In total, including local and co-op, the company spent about $45,000,000 in advertising last year.

FCB/Honig, SFM in hunt for film accounts

Los Angeles—FCB/Honig has become the third agency in competition for the $20,000,000 20th Century-Fox account, joining JWT and K&E (AA, Feb. 18). Meanwhile, SFM Media Service, New York, has made a presentation for the Columbia Pictures account, joining incumbent WRG, Needham, O&M and Bates. A decision is expected shortly. Columbia spending is $25,000,000-plus but agency compensation will involve a fee package.

If NBC stays home, will U.S. see Olympics

By JAMES P. FORKAN

NEW YORK—With NBC still committed to following U.S. government policy on what now seems a certain U.S. boycott of the Summer Olympics in Moscow, speculation arises on (a) will there be any coverage of the games for U.S. audiences? and (b) will NBC try to tie in with a proposed "counter-Olympics?"

- NBC-TV still says nothing more than that it would be "guided . . . by the policies and regulations of the U.S. government." Since President Carter has opted for a "final and irrevocable" decision to boycott the Moscow Olympics because Soviet troops remain in Afghanistan, that would indicate that NBC will not cover the games or at least not for the originally contracted 152 hours.

NBC officials will not discuss whether they would consider covering a counter-Olympics if the U.S. government can get the 23 like-minded foreign governments together, along with perhaps 20 others said to be pondering a boycott.

If NBC does bow out, industry sources speculated that others might try to fill the void, on a more limited scale.

A company like Satra Corp.—the international trading company that claimed the Moscow tv rights in the confusing late 1976-early 1977 period when Russia and the U.S. nets were haggling over terms—might step in, offering specials to catv or an ad hoc lineup of stations, they said.

How would the tv coverage for possible alternative Olympics, or "sports festivals," be handled? The International Olympic Committee disapproves of this, so it would not be involved.

Entertainment & Sports Programing Network, Bristol, Conn., and Ted Turner's Cable News Network and WTBS, Atlanta, hinted weeks ago they would be interested in covering such events, but there is no agent that could handle arrangements yet.

Olympics and industry sources agreed that no one site could handle an alternate "sports festival" on such short notice, especially if contingents from 20 to 30 countries would play.

The U.S. now is hinting that these events be scattered around the globe. In the U.S., New York, New Jersey's Meadowlands and Los Angeles have shown interest, as have Montreal and London. Whatever the outcome, sources thought that this package's non-Olympics status and scattered sites and tv coverage (perhaps pooled) would translate into much

FTC, Ford build 'repair info service'

WASHINGTON—Ford Motor Co. and the Federal Trade Commission have shaped FTC demands for more open disclosure of product defects into a unique "repair information service" that Ford has agreed to promote through a national print campaign.

The agreement covers only Ford, but Tracy Westen, FTC's deputy consumer protection chief, said he hoped Ford would exploit the new service as a "competitive advantage" that would force other auto makers to respond.

For Ford, the pact could be a rosy ending to two years of FTC litigation (AA, Jan. 16, '78) and embarrassing publicity about the company's handling of defects in millions of late model Ford and Mercury cars.

In a statement, Ford North American Automotive Operations exec vp William O. Bourke said, "We are pleased that we have resolved this matter in a manner that will be of benefit to our customers."

Filing charges against Ford, the FTC staff in 1978 said they had embarked on a test case to establish standards of "fair dealing" that would start with autos and move to other big ticket items that are complicated and can break down.

The agreement announced at an FTC press conference last week:

- Requires Ford to promote the availability of Technical Service Bulletins—plain language notices of engine or transmission problems that could cost more than $125 to repair. The notices would describe preventative maintenance steps and explain any Ford reimbursement or free repair programs.
- Calls for copy tested, page ads in national editions of *Newsweek*, *People*, *Reader's Digest*, *Sports Illustrated*, *Time* and *U.S. News & World Report* that would promote the information service and a toll-free number consumers could call to request bulletins.
- Requires that the bulletins be available at Ford dealerships and promoted with posters and other collateral material, and that Ford customers be able to subscribe, for a fee, to the bulletin service and have the notices automatically sent to them.
- Bars so-called "secret warranties," the practice that triggered the FTC complaint in the first place.

- FTC alleged that Ford knew that some engines suffered from defects—piston scuffing, premature camshaft rocker arm wear and cracked engine blocks—and had told dealers to make repairs without charge beyond Ford's customary 12-month, 12,000-mile warranty. The practice was "unfair," FTC attorneys alleged, because consumers were not informed of the programs.

The agreement last week requires Ford to notify its customers by mail whenever an extended warranty program is put into effect. Ford retains the authority to decide when it will extend warranty protection, however.

FTC's Cleveland office, which handled the Ford case, also is probing alleged "secret warranty" activity by General Motors, covering some automatic transmissions, and by Chrysler, covering rust.

The Ford agreement requires the

China claim doubted in Hong Kong

By BERT OKULEY

HONG KONG—Agency chiefs here are regarding with little more than raised eyebrows a claim made in Peking by a Chicago-based Chinese-American that his company has won exclusive rights to handle commercials shown on China Central Television (CCTV), the only tv network in the country.

ADVERTISING AGE could not find any agency directors in Hong Kong who heard of Waysun Liao, or his company, Transplex Inc. Mr. Liao says China Television Service (CTS), which was formed to handle commercials on the national network, gave Transplex a six-year contract as sole agent for commercial placement on CCTV by advertisers in Europe, North and South America and Australia.

- Robert Chua Productions of Hong Kong claims exclusive rights to place ads on provincial stations of Guangdong, Henan and Sichuan, as well as representation in Peking and Shanghai. A Chua

Cosmetics sales

Trends reflect changes in life styles

BY DAVID PINTO

NEW YORK—One of the most popular questions in the industry today is whether or not cosmetics are as recession resistant as their boosters claim.

In the 1970s, many traditional myths about the cosmetics/fragrance industry were exploded while a group of new ones rose up to take their place. It's safe to say that the events that shaped and changed the industry in the '70s almost certainly will continue to shape it—at an accelerated pace—in the decade ahead.

▪ One of the most obvious trends was the rise of the working woman and the resultant changes in life style.

The Bureau of Labor Statistics estimates that some 45,000,000 women now hold a job of some kind. (That figure will increase to 50,000,000 by 1985 and to 54,000,000 by 1990.)

These working women share two traits that have combined to alter how, why and where they buy cosmetics and fragrances: The need to look, feel and smell their best more often and insufficient time to purchase cosmetics and fragrances at less than convenient outlets.

▪ Expanded distribution of franchised cosmetics and fragrances also become a major factor.

Traditionally, cosmetics distribution has been based on exclusivity, a distribution philosophy that provided high end lines to department and specialty stores and lower end items to mass outlets.

Today, those restrictions are breaking down and cosmetics houses increasingly are distributing their merchandise to whatever outlets can sell it—both duplicating and broadening assortments in the process.

▪ Contingent on these two factors is the growth of supermarkets and chain drug stores as cosmetics outlets.

It is estimated that the typical consumer—whether he or she works or not—shops in a supermarket about twice a week. In an attempt to put their products where the people are, companies like Max Factor and Revlon now distribute at least some of their lines to food stores—and probably will increase their food store distribution in the 1980s.

Compared to supermarkets, other outlets see much less of their regular customers. It is estimated that consumers visit drug stores less than once a week—and visits to department or specialty stores average once a month.

▪ At the other end of the distribution spectrum is the department and specialty store, that unit that emphasizes high end cosmetics and fragrances amid a heavy dependence on service.

Even now, however, the situation is changing. Cosmetics prices in chain drug stores, especially the prices of products marketed by the major cosmetics houses, are increasing significantly, negating an advantage, both real and illusory, that chain drug stores have long enjoyed.

As a result, the offerings of such nonfranchised companies as Maybelline and Cover Girl, though themselves increasing in price, are finding a wider consumer audience than they have had to date. At the same time the franchise lines pricing differential between drug and department stores is narrowing.

With chain drug store ascendency and the growing popularity of supermarkets, the power of the department and specialty store in cosmetics has diminished.

So it is that Chaps, the new men's fragrance from Warner Western, is being distributed to some 8,500 drug stores in addition to department and specialty stores. Also, Revlon and Factor, in developing new fixturing systems designed to openly display their cosmetics lines and set them apart from those of other cosmetics houses, have made chain drug stores a prime target for distribution of those fixtures.

Clearly, the cosmetics and fragrances business is changing—dictated by the changing life styles and budgets of the consumers who buy them. But the changes may have less to do with the products—or even the prices which, though increasing, have not proven a deterrent to sales, than with the image of various distribution channels. According to a marketing director for a major cosmetics house, "The trick today is to get distribution in major department and specialty stores, and pay for it by getting distribution in chain drug stores and supermarkets as well.

"The logical next step, especially for all but high end lines, is to bypass the department store segment entirely."

▪ Whether this will happen is problematical. Some companies have reduced department store emphasis—as in the case of Almay (the hypoallergenic cosmetics line), with good success.

At the same time, more cosmetics houses will filter their lines down to the supermarket. As they do, and their food store sales increase, chain drug store sales of these products will suffer—especially in such nonfranchise lines as Maybelline, Cover Girl and the Quencher products of Miller-Morton. #

Spot tv prices continue climb

By MAURINE CHRISTOPHER

NEW YORK—Prime time spot tv prices in the top 20 markets continue to register increases in every case over levels a year ago.

Advances as estimated in the February SQAD report ranged from 19.6% in Minneapolis to 2.4% in Washington. Runners-up to Minneapolis in the double-digit gain category were Detroit, with 12.5%, and Atlanta and Tampa, both up 12.3% on the basis of this 51-market report covering purchases made by a sampling of major ad agencies as of Jan. 29.

Marvin Richfield, president of Spot Quotations & Data, attributed the sharp jump in Minneapolis to last year's poor February showing in that market. Spot tv, he noted, appears to be profiting from the Winter Olympics activity and early political buys for presidential hopefuls, while some softness in network tv has complicated the picture somewhat.

- Below the top 20, the spot medium looked strong in Denver, where the average affiliate prime time 30 was bringing a $62 cpp (cost per household rating point). Other noteworthy quotations: $57 in Hartford, $53 in San Diego and $45 in Buffalo. The rate for Buffalo—the 29th market—was higher than those in the 28th, 27th and 26th markets.

As always in this monthly report, late news was the second highest priced category in virtually all the sampled markets.

Looking to the future, SQAD's agency planners guide points toward a potentially bullish third quarter in many of the largest markets. Prime time cpp forecasts include $354 in New York, $277 in Los Angeles and a shade more than $100 for Washington, Dallas and Houston.

Random third-quarter predictions for some of the second 100 markets are: $16, Duluth; $15, Austin; $24, Monterey-Salinas; $19, Santa Barbara, and $17, Bakersfield and Las Vegas. The researcher points out the advance quarterly estimates have been revised "to reflect the probability that the Summer Olympics games will not be televised on the same basis as previously anticipated." #

Feb. 'street' prices for spot tv on net affiliates

Source: Spot Quotations & Data, 950 Third Ave., New York 10022. Average cpps for a 30-second spot were determined from ad agency conventional buys on affiliates as of Jan. 29. Excluded are spots bought on a 52-week basis or calling for 150-plus gross rating points weekly. These averages are a yardstick and not a listing of the market's lowest prices. Ratings used are an Arbitron-Nielsen average. These guides can be applied to 60s—200%—and 10s—50%. Percentage gain over February, 1979, is shown in parentheses.

Brady

(Continued from Page 30)

And so it goes. Once you delete the commercials, the evening news on each of the three networks contains 22 minutes of actualities, usually reported by a man on the spot. Cronkite introduces each CBS stalwart and does it extremely well, smiling when the news item calls for such levity, his mustache sternly aquiver when it does not.

During the entire 40 minutes he speaks perhaps a dozen sentences. His own personal opinions on mudslides or the sartorial *faiblesse* of Mr. Bani-Sadr do not obtrude. And, as the half hour ends, he tells us that is the way it was and says goodnight.

Anchormen are not reporters. The BBC, with accurate British understatement calls them "news readers," which is what they are. But for many Americans—those who have forgotten how to read and for whom these 22 minutes from ABC or NBC or CBS provide just about all they know about the world—Cronkite or Chancellor or Frank Reynolds are their oracles. And this is rather sad.

Cronkite is an intelligent man with a felicitous turn of phrase and a splendid voice. He has also, although this is not important in his trade, paid his dues as a working journalist. So too have his competitors on the other channels. Yet it is the very nature of the beast that the network evening news is not, and cannot be, more than a headline service.

- Can Dan Rather read those headlines competently? Of course he can. So too could Roger Mudd, given the opportunity.

I merely suggest that given the complexity of the subtle world within which we live, headlines are not sufficient—no matter how orthodontically perfect the teeth, how mellifluous the voice, how keen the gaze into the prompter, how trustworthy and credible the anchorman who provides those headlines. I will miss Walter, but not, however, because he keeps me informed. #

Mr. Brady's current novel, "Nielsen's Children," is about anchormen. And anchorwomen.

Three chains now open

Restlessness in fast-food ad field laid to soft sales

By CHRISTY MARSHALL

CHICAGO—A continuing slow sales picture for the fast-food business is being blamed for a rash of agency changes in the $25 billion industry.

In the last six weeks, four of the major chains have split or threatened to split from their agencies—Jack in the Box, Pizza Hut, Wendy's International and Arby's International. After a last-minute scramble by Wells, Rich, Greene, Jack in the Box stayed put.

But Wendy's last week made its move to Colarossi/Griswold-Eshleman, New York (AA, Feb. 25), which put a fifth chain on the street—Arthur Treacher's Seafoods.

"You are going to see more and more of this, since this is a troubled industry," Carl DeBiase, analyst with Sanford C. Bernstein, New York, told ADVERTISING AGE. "These guys don't know what else to do. The business isn't out there. And when it isn't out there, you sit back and say 'Gee, I've got to do something.' And what you do is fiddle with the advertising and marketing. You try this, you try that to find the formula. But it [the perfect formula] isn't there."

▪ Sales for the entire industry are flat to down and have been for some time. According to Mr. DeBiase's figures, Wendy's traffic is still in the negative column.

When it Rainier's, it gores

To demonstrate that Rainier Ale is "beyond macho," Rainier Brewing ad shows how this suave gentleman whipping up a gourmet meal reaches for his ale. Tv commercials are in the brand's Pacific Northwest area, via in-house Marketing Communications, with creative assistance from Heckler Associations.

WRG turns attention to Fox

Columbia selects NH&S

BURBANK, CAL.—Columbia Pictures, in something of a surprise, has named Needham, Harper & Steers/West, Los Angeles, as its primary national agency succeeding Wells, Rich, Greene/West, which has evidently turned its sights on 20th Century-Fox as the replacement for its loss.

Columbia has been spending $25,000,000-plus, primarily in tv and newspapers, with WRG on media and some creative, along with outside boutiques. NH&S also will work mainly on national media and research, on a fee basis below the equivalent of a 15% commission.

However, Needham will be sharing some of the business with Diener/Hauser/Bates, which will be handling spot media buying in New York, Los Angeles and Central Florida. Ogilvy & Mather and SFM Media Service were the two other Columbia finalists.

Talks between Fox and WRG became known as the Columbia assignments were made. There had been speculation about a WRG bid for Fox (AA, Feb. 4), which has been spending about $20,000,000 annually, most of it through its national agency (formerly Doyle Dane Bernbach, now Universal's agency). Fox' vp-worldwide advertising, Robert Cort, brought WRG to Columbia when he was ad head there.

▪ There also was speculation that Ogilvy is switching its attention from Columbia to Fox, which has already held initial talks with J. Walter Thompson Co., Kenyon & Eckhardt and Foote, Cone & Belding/Honig (AA, Feb. 25).

The selection of Needham came as a surprise to some in Los

last minute news

Hills Bros., BBDO split over payments

SAN FRANCISCO—Hills Bros. Coffee and BBDO, New York, have ended their four-year relationship due to "differences regarding agency compensation." Barry Reis, Hills Bros. vp-marketing, said the coffeemaker is looking at other agencies. BBDO will continue to service the $5,500,000 account until a new agency is selected.

Clearing House contacts 15 to 20 shops in review

PORT WASHINGTON, N.Y.—Publishers Clearing House, a major direct mail marketer of magazines, has contacted 15 to 20 agencies, including incumbent Doyle Dane Bernbach, during the initial round of reviews for its estimated $5,000,000 account. A decision is expected within the next few months.

Japanese/Taiwan auto pact may snub U.S.

TOKYO—Taiwan is soliciting bids from foreign auto makers to develop an indigenous auto industry, and at least two companies, Nissan and Toyota, have expressed interest in taking part in the project. Senior officials

An Interbank ad in *Life* announces the demise of Master Charge and the birth of MasterCard, the credit entity whose name is more in line with the broader range of financial functions that plastic cards will perform in the future. Tv has broken, too. Agency is William Esty Co. (AA, Dec. 24).

Interest-paying travel checks near

By JOSH LEVINE

NEW YORK—American Express and Citibank are both grappling with the feasibility of paying interest on travelers checks as a looming marketing war between issuers heightens the need for more appealing products. They might want to talk to T. H. Woods.

Mr. Woods may never threaten the industry leaders, but he is attempting to introduce the first interest-bearing travelers check in Virginia banks this spring, and hopes to sign up out-of-state banks along the Eastern Seaboard this summer.

Mr. Woods heads American Bankers Club in Falls Church, Va., and his vehicle would be called the ABC Security Plus check. The idea behind it is to allow checkholders to tap the massive rewards of the "float," the interest-earning reservoir of funds resulting from uncashed checks.

ABC Security Plus checks would be eligible for interest after 61 days, at which point they would earn 3.75% less than the prime rate at the time they were cashed, according to Mr. Woods. Receipts from Security Plus sales would be left on deposit with the bank that issued the check, and interest would be paid from the American Bankers Club account.

▪ As such, the ABC Security Plus check would be considered a security, rather than a travelers check, and would therefore be subject to Securities & Exchange Commission regulation. Current ceilings on bank interest payments would not apply since interest is paid by the American Bankers Club account, rather than the bank itself.

Citicorp has already announced that it "has been studying the question . . . just as others in the industry have," and the second largest travelers check—with about 20% of the $25 billion domestic market—is expected to make a headlong run at American Express this spring. Citicorp recently shifted its First National City travelers check advertising responsibility to Doyle Dane Bernbach from SSC&B.

While American Express has made no similar public statement of its plans, a source at the First National Bank of Boston said AmEx officials noted privately that the travelers check leader also is considering an interest bearing product.

The company would probably do so reluctantly, however, since it now reaps the substantial benefits of an estimated $3 billion float all to itself. Commercials from Ogilvy & Mather have urged returning travelers to retain a few unused travelers checks uncashed for purposes of security.

The entrance of Visa into the travelers check market this year

Republic lures business traveler with gifts

By CHRISTY MARSHALL

CHICAGO—Republic Airlines, assuming that business travelers are not greatly concerned about ticket price offers, is introducing a new route not with price cuts but with premiums.

From March 1 through the end of May, each Republic passenger on the new Chicago-Nashville route will receive a coupon good for $15 off any item in the airline's inflight gift catalog. The coupons are redeemable until the end of June.

Other lines give no indication yet of trying the premium approach. But if Republic does well enough to expand its test to other routes, the picture could change. The business traveler is important to every line, but is traditionally more responsive to conveniences, including scheduling, than price cuts. Republic wants to see if a free gift is an effective lure.

"Special promotional fares like half-off fares and super savers appeal to the pleasure traveler who can see the savings in his pocket," vp-marketing John Harty told ADVERTISING AGE. "As a practical matter, businessmen are the backbone of an airline—especially an airline like Republic. You can offer special fares but they won't affect the businessman who doesn't usually know the price of his ticket anyway."

The airline first tested premiums last January with a promotion it ran for the inauguration for its flights to Las Vegas from Minneapolis-St. Paul. The company ran a sweepstakes for an antique slot machine. (Abiding by sweepstakes rules, the cards are also available at the desk—no purchase necessary.)

A spokesman for Delta, Republic's competition on the Chicago-Nashville route, said it has not decided whether to match Republic's offer—but is more likely to tap the traditional discount fare to combat Republic.

The complexity of setting up the program—which required approval of the Civil Aeronautics Board—may be Republic's ace, according to Mr. Harty. He says the competition can't match it easily.

A $250,000 newspaper and radio campaign, via Hoffman-York, Milwaukee, supports the offer. Results of the promotion so far have been encouraging. "Passengers and travel agents are calling and advanced booking is up," Mr. Harty said. It may be expanded to

Some fear loss of a second opinion

Do mergers still pr's voice?

By JENNIFER ALTER

CHICAGO—The trend toward acquisition of pr companies by ad agencies, highlighted by J. Walter Thompson Co.'s proposed purchase of Hill & Knowlton (AA, Feb. 18), has raised the question of whether clients of agency-pr combinations will lose the objective input of the pr counselor.

Pr executives here agree there is a danger, but not in the marriages that have transpired thus far.

"There are some tremendous advantages to these mergers," says Chuck Werle, vp-creative services division, First National Bank of Chicago, who also is a co-chairman of the Public Relations Society of America's national public relations committee. "But I cannot overemphasize the importance of the public relations function maintaining its own authority."

- Warning that if autonomy is not rigidly defined, the pitfalls could be disastrous, Mr. Werle told ADVERTISING AGE, "I find it hard to believe that an account executive of one of the combined communications companies is going to tell his or her client, 'It is not in your best interests to approve this advertising campaign submitted by my associates,' unless his status is very clearly defined."

Mr. Werle, who formerly was vp-director of client services in Thompson's public relations division and who has worked with Hill & Knowlton—until very recently First National's pr agency—says that be believes Hill & Knowlton has the strength and Thompson the "smarts" to develop an independent and equal working relationship.

The First National Bank moved its pr account from Hill & Knowlton to Carl Byoir & Associates, which was acquired by Foote, Cone & Belding Communications 18 months ago. FCB is the bank's ad agency.

- Tom Harris, president of Golin/-Harris Communications here and founder of Foote, Cone & Belding Public Relations (he departed shortly after the Byoir acquisition), also stressed the importance of autonomy. Speaking to a larger-than-usual group of PRSA members gathered here last week to discuss the "Urge to Merge," Harris pointed to lack of dissension as one of the problems that can result if the pr counselor loses independence.

"Some very good things come out of debate," Harris told ADVERTISING AGE following the meeting. "If the pr people have the autonomy to come in and sit down and attack client problems as equal partners, this will continue. But there is the possibility that the advertising point of view will dominate and the pr point of view will fade. Pr can't grow and function if it's forced to be a second ban-

(Continued on Page 88)

No-compete clause chases client

SEATTLE—Under threat of suit to enforce a no-compete agreement, four-month-old Sharp, Hartwig & Vladimir resigned its largest account, Simpson Timber Co., effective March 1.

Simpson Timber, marketer of forest products, had used Kraft Smith for nearly five years as its agency for specialty products such as prefinished panels, doors and do-it-yourself building materials.

In November, David Sharp and Cynthia Hartwig left Kraft Smith to form a new agency with Andrew Vladimir, who had left Kraft Smith a year earlier. All three had worked on the Simpson account.

Simpson advertising manager, Dean E. Matthews Jr. said, "It is sad. Everybody here is disappointed, and that is an understatement."

Mr. Vladimir, raised the question: "Is it proper to restrict a company from doing business with anyone it wants to? Shouldn't a company like Simpson be free to choose its own advertising agency?

"Simpson asked us to continue producing the collateral while Kraft Smith continued handling media," Mr. Vladimir said. He added that despite the agreement, "so that both agencies could serve Simpson, we offered to share the income. Attorneys for both sides instituted discussions (AA, Jan. 21). We continued to service Simpson in the hope that we could reach a negotiated settlement."

A short time ago, Mr. Vladimir said, Mr. Kraft cut off negotiations and followed with notice to SH&V that Kraft Smith would sue unless SH&V ceased work on the Simp-

Coup

Pepper snares top P&G exec

DALLAS—With no deals to show a year after announcing it would seek acquisitions to broaden its base, Dr Pepper Co. has moved to strengthen its hand by reaching outside the soft drink industry—to Procter & Gamble Co.—for a new president.

Charles L. Jarvie, most recently corporate vp and general manager of P&G's food products division, will come on board March 3 as president and chief operating officer of Dr Pepper. At age 43, the 20-year P&G veteran is the soft-drink company's tenth and youngest president.

He succeeds W.W. Clements, who continues as chairman-chief executive officer. Although turning over day-to-day operating responsibilities, Mr. Clements, the sales-oriented driving force behind making Dr Pepper a national brand in the 1970s, vowed that he will be "as active as I've ever been" as he turns his attention to long-range planning and acquisitions.

Mr. Clements said the company's original interest in

RJR maintains hold on magazine spending top spot

NEW YORK—R. J. Reynolds continued as the biggest magazine advertiser in December, a month when ad expenditures grew 19% and ad pages 7%.

Reynolds held the lead for all but two months last year: April, when General Motors Corp. surged into the top spot, and June, when Seagram Co. edged out the tobacco, food, shipping and oil conglomerate.

Reynolds continued to earn the top spot, boosting its magazine allowance 133% to $14,201,365, considerably more than it had spent in any other month in 1979.

Seagram, which has been jockeying with General Motors for the No. 2 spot, unseated the automotive company with a 29% budget increase over 1978. GM took third place with a 115% spending hike.

Philip Morris Inc. held fifth place with a 21% increase in magazine spending. General Foods Corp. moved up a slot, displacing Ford Motor Co., which moved to sixth place, with 38% and 28% spending increases, respectively.

CBS, absent from the top 10 in November, returned in seventh place with a 7% increase in magazine spending, and Loews Corp. retained eighth place with a 36% increase in magazine spending.

Procter & Gamble remained the ninth largest magazine advertiser, although it lowered its magazine budget by 10%. American Brands rejoined the top 10 with a 59% boost in its magazine expenditures. B.A.T. Industries, which held the seventh slot in November, and General Mills, the 10th largest advertiser that month, were absent from the top 10 in December.

The beer, wine & liquor category became the biggest supporter of magazines in December as magazine expenditures rose 20%. Cigarets and tobacco, which had been the No. 1 category for most of the year, increased spending 74% and took the No. 2 spot. Automotive slipped to No. 3, with a 34% spending hike. Foods, toiletries and business/consumer services kept the lineup as fourth, fifth and sixth largest magazine advertisers, respectively. Jewelry and photographic equipment advanced two spots to seventh place without registering any increase. Publishing and media boosted spending 31% to hold eigth place, home entertainment marketers increased their magazine advertising 10% to move up a notch, and retail/direct mail marketers slipped from seventh to 10th place, despite increasing magazine spending by 13%.

Data in the accompanying chart was compiled by the Leading National Advertisers for the Publishers Information Bureau and ADVERTISING AGE. #

LCA names three

Licensing Corp. of America New York, has named Jane Sosa, formerly quality control manager, to the new post of international licensing manager. Joining the Warner Communications division are Jerry Kapner, as merchandise coordinator-toys/novelties, and Nancy Ihnat, merchandise coordinator-apparel. Mr. Kapner formerly was toy buyer, Jordan Marsh Co., Boston, and Ms. Ihnat worked on "Sesame Street" licensing tie-ins for Children's Television Workshop.

'Sheet Music' picks rep

Sheet Music, New York, and *Virtuoso*, slated to come out in April, have picked Robert Petrey Associates, Westport, Conn., as ad reps.

Showdown nears on FTC's fate

WASHINGTON—A President up to his neck in political and foreign policy emergencies may have to decide before this week ends whether to take on Congress in a veto fight that could shut down the Federal Trade Commission.

House and Senate negotiators working to beat a March 15 deadline when FTC operating authority and working funds expire, are being told that the President will not accept a bill that lets Congress veto FTC actions or intervene before they are final. Now it is hardball time, and the White House wants Congress to believe that President Carter thinks the stakes are so high that he's ready to shut down the FTC in order to hold his ground.

So far there is no sign that Congress is sufficiently worried that it's going to give the White House everything it insists it has to have. Only last week the House overwhelmingly voted to instruct its negotiators to stand firm for the House bill, with its so-called "one House veto" and its provisions terminating FTC activities involving the Sunkist citrus marketing system as well as the sales practices of funeral directors.

■ The White House perspective is that much more is involved here than FTC, and that this is the time for the President to take his stand. Once a "deal" is cut giving Congress power to veto FTC actions or intervene in pending business, it is argued, then similar Congressional interventions will be extended to one regulatory agency after another.

The White House apparently has no quarrel with the provisions of the Senate's version of the FTC bill, which provides for "expedited review" of FTC actions, but re-

(Continued on Page 82)

'I switched'

Retired football star Nick Buoniconti will put down his bottle of Lite to go work for arch-rival Anheuser-Busch Natural Light.

Lite stars switch for new A-B ad assault on Miller

TAMPA, FLA.—The almost personal war between beer industry rivals Anheuser-Busch and Miller Brewing Co. becomes even more combative as the St. Louis-based market leader gets set to go on the air with some former Miller superstars who've switched.

Anheuser-Busch Natural Light, the No. 2 beer in its category, will undertake a major assault beginning in April on Miller's Lite, the category leader, urging Lite drinkers to switch, Dennis P. Long, president of Anheuser-Busch, disclosed here.

■ Mickey Mantle, Nick Buoniconti and Joe Frazier, who all appeared previously in Lite advertising by Miller, will make the announcement that they have switched to Natural Light. Rounding out the assault team—which comedian and Natural Light continuing spokesman Norm Crosby refers to as "five athletic supporters"—will be Walt Frazier and Catfish Hunter. "Ray J. Johnson" also will continue in some ads.

■ "Taste is why you'll switch" is what Natural Light will suggest to drinkers of Miller's Lite.

Anheuser-Busch and Kraft Inc. were among several major companies disclosing marketing plans at the annual winter meeting in Florida of the Consumer Analysts Group of New York. A report on Ralston Purina Co. follows on Page 82. These reports were written by ADVERTISING AGE senior editor Henry R. Bernstein.

Mr. Long noted that his company's Michelob Light completed rollout last year and is now third in the category. Natural Light and Michelob Light (both D'Arcy), combined, have 23% of the market. "We intend to gain dominance in this category," he said. Mr. Long spoke at a special Busch Gardens "field trip" session of the Consumer Analysts Group of New York.

■ Anheuser-Busch's experiment with an import, Wurzburger Hofbrau (TBWA), is "in an acceptable development stage," Mr. Long said. Following reformulation of advertising currently under way, test marketing of Wurzburger will be extended beyond Atlanta, Boston and Hartford—to Baltimore, Cincinnati, Louisville and Wash-

Kraft sets May pouch entree test

SARASOTA, FLA.—Kraft Inc., contending it has done its homework, but admitting it faces an intriguing marketing challenge, will move into five undisclosed test markets in May with its line of fully cooked meal entrees in retort pouch packaging (AA, Oct. 29).

With Stouffer's frozen entrees and a line of retort packaged products now testing from ITT Continental Baking seen as the primary competition, the company will test five entrees under the name A La Carte—beef stew, creamed chicken, sweet and sour pork, beef Stroganoff and beef Burgundy.

The retort pouch allows the company to combine frozen food quality with shelf-stable convenience—without putting the product in a can. The Kraft entrees, in single serving size, are ready to eat after heating the pouch in boiling water for five minutes.

■ The retort pouch entrees are seen as giving Kraft an opportunity to build on its packaged dinner consumer franchise and its merchandising experience, Donald J. Andler, marketing manager-product development, told the analysts.

A La Carte will be positioned in a prepared foods category estimated by Selling Areas-Marketing Inc. to be $1.4 billion at retail in 1980, including the $1.3 billion frozen entree segment, $130,000,000 canned meat segment and $20,000,000 pasta with meat segment, the Kraft exec said.

The retort pouch, although successful in Europe and Japan, has met consumer resistance in the U.S. and its place in the supermarket is yet to be determined. "It's a packaging process in search of a market," Mr. Andler said.

A La Carte faces the intriguing marketing challenge of being a shelf product with its primary competition—Stouffer entrees—in the frozen food section. A further challenge is presented by the fact that there are two polarized targets for the products—young (both singles and married) and older "empty nesters"—rather than a classic mass market of traditional households with children.

Consumer resistance also must be overcome. Although A La Carte entrees are said to taste better than canned products and two-thirds of consumers who taste-tested found them equal or better in taste and quality to Stouffer entrees, consumers have an expectation of poor quality, Mr. Andler said. Consumers also react negatively to the retort item's higher price, compared to a canned product.

Kraft will distribute A La Carte in prepackaged merchandising display trays offering upright facings. Primary marketing objectives in test markets are to determine true sales potential, challenge ITT Continental in one or more markets to determine total category potential for two competing brands, and to achieve a shelf velocity of 2,500 cases nation-

Eastern route portends ad war

By JOSH LEVINE

NEW YORK—An airline industry advertising boom will follow in the wake of the first Eastern Airlines jets to fly from one coast to the other June 1.

Already one of the most crowded and competitive routes in the country, the New York to Los Angeles and San Francisco market will become the arena where the major trunk carriers test their marketing ingenuity and moxie and ultimately decide the success of airline deregulation, according to Julius Maldutis, an industry analyst with Salomon Brothers. Mr. Maldutis re

tailed report on transcontinental routes.

"No doubt about it, there's going to be an advertising war that will make these markets the subject of a violent struggle," Mr. Maldutis said. "The outcome of the struggle can almost determine the future of deregulation."

■ The spark to the marketing tinder is the entrance of Eastern, which has mapped out an ambitious marketing and advertising program to penetrate routes with which it generally is not associated. Ads for Eastern's Trans-Con, the brand name Eastern has given the N.Y./L.A. and N.Y./S.F. runs to overcome its image as a Florida carrier, broke last week.

The key features of Eastern's seven daily Trans-Con flights—four to Los Angeles and three to San Francisco—are its Cabin 1 business class, an attractive super-saver fare and the guarantee that its $195 one-way coach price will not increase through 1980—a bold commitment when many carriers periodically are seeking relief from the rising price of fuel.

"What we're trying to achieve is a sharply characterized product," said William Dowse, vp-advertising for Eastern Airlines. "Instead of competition through price alone, we're entering a period of innovation in product relative to different pricing levels."

Eastern's attempt to woo the business flyer with Cabin 1 is backed by newspaper and radio ads in New York, Los Angeles and San Francisco that broke last week via Young & Rubicam. Tv commercials are due to break later this

Coffee share dip challenges Hills and WRG shop

By JOHN REVETT

LOS ANGELES—Wells, Rich, Greene/West has been handed the $6,000,000 Hills Bros. coffee account at a time when the San Francisco company appears on one hand to be emerging from a Brazilian jungle of corporate intrigue and on the other to be in danger of sliding off the U.S. coffee marketing map in terms of market share.

The appointment of WRG to succeed BBDO follows eight, perhaps nine, straight years of market share losses that have seen Hills slip from 9.3% of the regular coffee market in 1971 to 6.9% in 1978. Company execs say last year Hills regular stabilized at 7%, but sources that research the field reported Hills at 6.2% last fall. Hills instant dropped from a 1.3% share to a 0.3% share over the period.

There were indications that Hills Bros. Brazilian parent, Copersucar, Sao Paulo-based sugar and alcohol conglomerate, has backed off in the past two years from the active role it had begun to take in the American company following acquisition four years ago (AA, Sept. 20, '76). Copersucar paid $38,000,000 for Hills.

"The marketing conditions in the U.S. were different than they had perceived," said a source involved with new product development for Hills. "At first there was all sorts of cultural noise, and top management at Hills was effectively silenced. But that's been changing."

▪ Although Hills Bros. has not made any progress in the four years, a Copersucar official said he knew of no plans to sell the company.

It was said by several sources that Copersucar and its chairman at the time, Jorge Wolney Atalla, brought about the Hills Bros. agency switch late in 1976 from Doyle Dane Bernbach, Los Angeles, to BBDO in New York, because the Brazilians wanted the brand handled by, as one put it, "the biggest agency they could get

'The light yogurt' expands markets

Canada Dry is positioning Sippity as the yogurt "so light you sip it," in tv commercials. Current introduction in the New York metropolitan area puts the drink in eight states. North Castle Partners is the agency.

RC 100—not an easy sell

By JACQUES NEHER

CHICAGO—Despite one critic's belief that Royal Crown Cola Co. will penetrate little more than "the hypochondriac market" with its new sugar-free, caffeine-free cola called RC 100, the company is convinced the new product can make a significant dent in the diet cola category.

"There's been some concern raised on the caffeine issue and there's news coming out on an ongoing basis," said Royal Crown vp-marketing Larry Atseff. "The product is timely."

Mr. Atseff said RC 100 "will obviously appeal to people who drink sugar-free colas and may even appeal to those who don't. It has an outstanding taste."

Sugar-free colas account for less than 10% of soft drinks sold in stores, but Mr. Atseff said it would be "very risky" to predict how well the product will do. "When Sanka got started in 1928, I doubt they ever knew it would become what it is today." Most colas contain about one-fourth the caffeine found in a similar amount of coffee.

▪ As in all soft drink introductions, RC 100's success will depend "on how much the bottlers will support it," he said. The "100" stands for 100% free

(Continued on Page 81)

RCA, Zenith plug into disc adventure

By JAMES P. FORKAN

NEW YORK—RCA Corp. and Zenith Radio Corp., the top two tv set marketers that also are among the top four in videocassette sales, have joined forces to carve out leadership roles in the new world of videodiscs.

Although Zenith was the plum long sought by RCA, Magnavox and Matsushita, there are still more than 10 other potential licensees yet to be plucked. These companies, some of which reportedly have signed with RCA or Magnavox, include giants General Electric and GTE-Sylvania, as well as Hitachi, Mitsubishi, Sanyo, Sony and Sharp.

The big benefit in their move, Zenith and RCA stressed, is that consumers will have "a broad choice of compatible videodisc products." RCA plans to market more than 300 titles for SelectaVision; Zenith will add its own software, although the latter is not talking specifics yet.

▪ In going with the mechanical pickup format (using a diamond stylus on the disc groove), RCA and Zenith will not be compatible with the optical pickup (using laser beams to read the disc surface) developed by MCA-Philips-Magnavox. Zenith at one point mulled going with an optical system too.

Magnavox' disc system has run into production and delivery snags in its test markets and reportedly sold less than 10,000 units so far. Moreover, Magnavox and MCA have been set back by deals that earlier saw CBS Video Enterprises and numerous movie studios going with RCA. Still, industry sources noted, nearly all those RCA deals are "non-exclusive," meaning MCA may yet land some as well.

Magnavox is ahead on one front in the disc war—it has named Campbell-Ewald to handle its Magnavision national campaign (AA, Feb. 25), while RCA has yet to choose a SelectaVision agency. Zenith is likely to stick with Foote, Cone & Belding, Chicago, since that is its consumer products agency and there is "no reason" to change, a spokesman said.

▪ No one is discussing their marketing strategies yet, but Zenith said its "solid product launch" advertising will go national from the start in "mid-1981," rather than the market-by-market rollout being used by Magnavox. The latter is aiming for national distribution in "early '81."

RCA will open the year with its own hefty advertising blitz. Coupled with its strong dealer network, this should mean the same domination of the disc field as RCA enjoys in vcr's. RCA last year topped Zenith in color tv set sales but started slowly in vcr's, scrapping its own project to license Matsushita's vhs format. Now it is the vcr leader, while Zenith, licensing Sony's Beta format, is fourth, according to most sources.

RCA plans to produce 200,000 disc players in '81 but Zenith won't discuss its output. A spokesman, noting that the RCA-Zenith agreement is not a one-way licensing agreement, said the two will exchange developments on each other's disc players.

▪ Matsushita has announced its plan to adopt the video high density (vhd) system of Victor Co. of Japan (JVC), using a stylus on a grooveless disc, rather than its own Visc-O-Pak (AA, Jan. 28). Matsushita's best chance at the U.S. disc market, sources felt, evaporated when Zenith went with RCA and they contend that the Japanese company cannot now match its success in vcr's, where it and licensees hold an estimated 65% against Sony's Beta format. Sony, which led the vcr market until RCA's entry and which has its own disc system for the non-home market in development, could become a Magnavox licensee, some said.

Some sources offered a "domino theory" that saw GE, GTE-Sylvania and others heading for RCA now, if they were not before. Price has been one oft-cited factor swaying companies RCA's way, with its $500 price $225 lower than Magnavox'. U.S. Pioneer soon will announce plans for its optical laser disc, which could come out before RCA, but at a higher price.

Women's Basketball League tries promotion hype

By SAM HARPER

NEW YORK—Struggling to shine among other, more popular spectator sports, the fledgling Women's Basketball League is using every promotional gimmick it can muster to boost attendance and hopefully attract additional advertisers.

Plagued by poor management and insufficient funds, the WBL has lost two of its teams and a number of coaches and players this season. The prevailing suspicion among sportswriters is that WBL is not long for this world, a prediction that has done nothing to encourage sponsor participation.

However, the New York Stars, currently leading the league, is one team that will not give up. Club president Ed Reisdorf acknowledged that the team is suffering financially, but he is steadfast in his belief that the future of the league is bright. "One day," he said, "I am going to walk into Madison Square Garden, and the place is going to be packed with screaming fans."

■ Mr. Reisdorf's dream apparently is a long way off because attendance at Stars' games is average 2,500 in the Garden, which seats 18,000. However, he is banking on the fact that his promotion efforts will start the turnstiles clicking faster. "We are pushing now the way the North American Soccer League was pushing in the mid-'70s. Hopefully we'll have the same kind of success," he said.

Other teams in the league—the Milwaukee Does, the California Dreams, the Dallas Diamonds, the Houston Angels and the New Jersey Gems, among others—are having problems similar to the Stars' worries.

The Chicago Hustle and the Iowa Cornets are having the least trouble with attendance in the WBL, attracting an average of 3,500 fans per game. Mr. Reisdorf pointed out that the Hustle has outdrawn the Chicago Bulls of the National Basketball Assn. on three occasions, a milestone that can be attributed to the live broadcasts of the Hustle games on WGN-TV. The New York Stars have never had a game broadcast live, but Mr. Reisdorf says he is now negotiating for broadcast time during the WBL playoffs, in which the Stars recently clinched a berth.

Mr. Reisdorf said that the WBL audience is two-thirds female, ranging from 18 to 35 years of age. "Generally, the women watching women's basketball have not been sports fans before, and they're getting great pleasure out of watching other women participate in sports."

■ Currently, Manufacturers Hanover Trust Co. and Dairylea, a milk cooperative, are the only major advertisers significantly involved with the New York Stars. The bank is picking up expenses for the publication of the Stars' game schedules in exchange for ad space. Dairylea offers free tickets at the point of sale to Stars fans saving milk carton panels.

"We'd like to see an Avon or a Bristol-Myers get involved with the league," Mr. Reisdorf said. "The reach would be perfect for some of their products." Avon currently is sponsoring the Avon Women's Tennis Championships.

The New York Stars have been sponsoring halftime games between employes of local tv and radio stations here. This month it will host five charity nights on behalf of such organizations as the Leukemia Society of America, with which the team will split gate receipts. "The idea behind these promotional nights is to get people to buy tickets," Mr. Reisdorf said. "That is the bottom line."

Other advertisers involved with the New York Stars on promotional "giveaway nights" are Texas Instruments and Nylantic Airlines. "People are starting to call us now," Mr. Reisdorf said, though he admitted that calls are few and far between.

The New York Stars currently are spending $100,000 on a radio effort emphasizing the team's won-lost record, which is the best of all New York's pro sports teams. The 30-second spots are being aired on WYNY, WNBC, WRLR and WPIX.

■ Faye and Kaye Young, the Stars' blond identical twins, are currently drawing attention to the league in a commercial for Dannon yogurt. That type of thing doesn't hurt us," Mr. Reisdorf said. "But we'd love to see sponsors like Dannon involved on a wider basis." Marsteller handles Dannon yogurt.

■ Mr. Reisdorf admits that the WBL is having some problems with financial management, problems that caused the collapse of the Washington Metros and the Philadelphia Fox and the desertion of one of the league's most noted coaches, Larry Costello of the Milwaukee Does. "The women who play for my team are not complainers," said Mr. Reisdorf, who dishes out an average annual salary of $10,000 to each member of the Stars. "These women are the pioneers of the WBL, and they recognize that. They also love the sport.

"Heck," he added with a smile, "they want to play as much as the next guy." #

This Flash Report of newspaper advertiser investment, compiled for ADVERTISING AGE by Media Records, is derived from tabulations that cover 35 dailies and 25 Sunday editions in 15 cities—Atlanta, Baltimore, Boston, Chicago, Cleveland, Dallas, Denver, Detroit, Los Angeles, Miami, New York, Philadelphia, Pittsburgh, San Francisco and Washington. The report indicates marketplace strengths and weaknesses.

Sports, leisure leads dailies' December

NEW YORK—Sporting and leisure time equipment newspaper advertising rose 29.9% in dollar spending during December, 1979, compared with the same month a year earlier, according to the December Flash Report prepared for ADVERTISING AGE by Media Records.

The rise was the highest posted by any of the 16 categories monitored for AA by Media Records in the 15 cities whose newspapers are measured (*see chart*). Only public service utilities posted a loss (down 7.3%).

Department stores, newspapers' leading dollar category, gained 4.9%. It was followed in the top five by general merchandise stores, furniture and furnishings, amusements and food stores.

Percentage gains of 15% or better were registered by building contractors (16.9%), building materials and hardware (17.2%), food stores (18.1%), general merchandise stores (15.4%), real estate (18.6%) and shoe stores (21.9%). #

Lubalin changes name

Herb Lubalin Associates, New York, has changed its name to Lubalin, Peckolick Associates, reflecting the appointment of Herb Lubalin to chairman and Alan Peckolick to president of the graphic design company. Mr. Lubalin formerly was president, while Mr. Peckolick was vp-partner.

In addition, LPA has affiliated with Corpcom Services, a design, communications and research consultancy and agency, in an effort to provide one another with expanded facilities. The two operations will operate independently.

SOURCE: PIB/LNA Magazine Analysis Service covers 102 consumer magazines constituting about 90% of consumer magazine ad dollars. It is compiled and published for Publishers Information Bureau by Leading National Advertisers.

Magazine growth slows in '79 after 3 fast years

NEW YORK—The magazine industry continued to grow in 1979, but not at the dazzling pace it enjoyed during the three previous years, when increases were 20% or more.

From January to December, 1979, magazine ad expenditures grew 13% to $2.671 billion, while ad pages increased 4% to almost 120,000. In 1978, ad expenditures in magazines zoomed ahead 20% to $2.364 billion, while ad pages climbed 8% to more than 115,000.

For 1979, as in 1978, R. J. Reynolds Industries was the top magazine advertiser. In 1979 it plowed almost $115,000,000 into magazines, up 61% over the $71,401,963 spent in this medium in 1978. Second-place Seagram Co. Ltd., with an $84,876,808 magazine budget, increased expenditures 24% from 1978.

All the top 10 advertisers increased their magazine budgets last year, with fifth place General Foods Corp.'s 14% being the smallest increase.

Spending also was higher in each of the top 10 product categories. Cigarets and tobacco showed a 38% increase to $281,165,813. The automotive industry boosted its magazine allowance only 1% to $223,663,058.

Material in the accompanying chart was provided by Leading National Advertisers for ADVERTISING AGE. #

Ohio shop name change

A revolution in the city room

(Continued from Page 65)

"How could anyone possibly prefer Max over me? I know he and Fox Butterfield used to be pals . . ."

Gelb smiled suavely. "And isn't that why you sent Butterfield off to China with Ed Koch?"

Rosenthal broke into a rare grin. "A shrewd move, that," he acknowledged, then, once again lapsing into despair, he muttered: "I can see people voting for Scotty Reston or Rick Smith or even Albin Krebs. But Max Frankel . . . ?"

Arthur Gelb leaned closer and whispered into the editor's ear.

"Max says a vote for him means no one has to cover Mafia funerals anymore, an amnesty on expense account padding, and dollar martinis in the cafeteria from four o'clock on."

Abe Rosenthal looked stricken.

"And," Gelb continued, "Max is telling people he can guarantee a good review in the Sunday book section to any *Times* staffer who writes one!"

"Gelb," groaned Abe Rosenthal in despair. "Is there no hope? Isn't there anything I can offer them? Mother of mercy, is this the end for Abe?"

Arthur Gelb hesitated for a moment.

"Would you believe free trenchcoats for everyone . . . ?"

Mr. Brady, who writes fiction, refuses to reveal his sources at the Times for the above account.

'Campaigns, Elections' debuts as quarterly

Campaigns & Elections, a new political quarterly, published its maiden issue in February. Subscriptions are priced at $24 a year. Ad closing for the summer issue is May 1. A b&w page is $775. The publisher is Information for Industry, Washington.

By JOHN J. O'CONNOR

NEW YORK—A total of 679 agencies combined for another record-breaking year as their total 1979 gross income jumped to $4.10 billion on billings of $28 billion, according to the 36th annual compilation of agency data by ADVERTISING AGE.

The 1979 total of $4.10 billion was 18.5% above the combined gross income of $3.46 billion reported by 629 agencies in AA's survey a year ago. In establishing a new gross income record in 1979, the 679 agencies posted billings of $27.9 billion, a 19.7% jump over the $23.3 billion record set in 1978.

At the close of 1979, the world's three largest U.S.-based agencies—J. Walter Thompson Co., McCann-Erickson and Young & Rubicam—were battling for supremacy in the gross income race. But once again, JWT emerged the winner as its gross income rose 14.7% to $254,000,000, compared with $221,500,000 in 1978. JWT's billings were $1.69 billion in 1979, compared with $1.47 billion in 1978.

▪ McCann-Erickson, breathing down JWT's neck with gross income of $250,400,000 on world billings of $1.67 billion has Young & Rubicam nipping at its heels. Y&R's 1979 figures read $247,600,000 in gross income on billings of $1.92 billion. (Y&R's billings total in-

Henderson Advertising named Agency of the Year

Advertising Age has chosen Henderson Advertising, Greenville, S.C., to receive its Agency of the Year award for 1979. This is the first year since the award was begun in 1973 that an agency outside of New York or Chicago has been selected. The choice was based on the belief that effective creative advertising is not limited to the big-city agency.

By NANCY MILLMAN

GREENVILLE, S.C.—ADVERTISING AGE has gone outside the big advertising centers of the nation to choose its Agency of the Year for 1979: Henderson Advertising of Greenville, S.C.

While creative work in the major cities remains high and such agencies as Della Femina, Travisano & Partners, Doyle Dane Bernbach, McCann-Erickson, Waring & LaRosa and W. B. Doner & Co. all came in for high praise for their work during 1979, AA's selection signals a belief that important trends of the new decade will be exemplified by the Hendersons of the agency business, which do serious, hard-working creative campaigns quietly, without fanfare, for important national and regional advertisers.

Henderson Advertising was selected as Agency of the Year for its daring concept of building an agency with big-city talent and handling major national accounts—far away from the big city; its rapid growth from both old and new clients; new product development work, and its contribution to the growth and success of major clients, notably its Greenville neighbor, Texize.

Jim Henderson, founder and chairman, launched his agency as an operation of one in August, 1946. Mr. Henderson had worked for General Foods in sales, promotion and advertising, and was an account exec with the Curt Freiberger Agency in Denver, before returning to his southern roots to build his own business. "I thought the South could produce advertising as good as anywhere," the compact, impeccably tailored exec said. "I thought I could build an agency that could equal, quality-wise, any agency in the country."

Henderson Advertising today is billing $54,000,000 annually. This is double the January, 1978 billing figures. The agency employs 135 persons, many of whom have come from major agencies in New York, Chicago and St. Louis.

In the last year, Henderson has

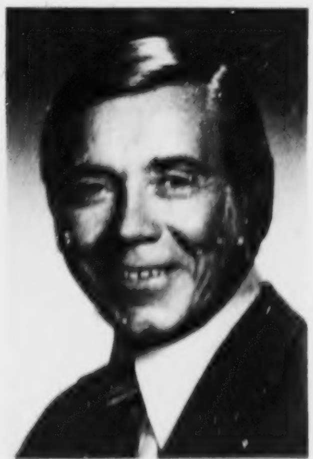
added the following new business: Professional chain saws and construction and farm equipment from the Homelite division of Textron, St. Pauli Girl beer, Folonari wines and other products from Carlton Sales Co. division of McKesson Wine & Spirits Co., the No-Pest insecticides that Texize acquired from Shell Oil Co. and the entire line of STP Corp. automotive products.

Shakespeare Sporting Goods, Platt Saco Lowell textile machinery and 3M Co.'s Jack Rabbitt photo finishing round out the client roster.



JAMES M. HENDERSON

In its 33-year association with Texize, Henderson has helped to introduce many of its products. Those currently in test and developed with the help of Henderson include Spray 'N Wash laundry detergent, Fantastik Liquid Scrub, and Vivid all-fabric liquid bleach.

For Homelite, Henderson helped to launch its string trimmer for lawns.

In addition, Henderson has recently formed a sales promotion and collateral division called Pelham Promotions. The separate unit will develop and produce nonmedia materials both for Henderson clients and other companies.

- In the late 1940s, Texize was a local company that made industrial cleaning products. Mr. Henderson had the idea that the company should package its liquid cleaner in small containers and sell to consumers. "I didn't have a car in those days," he said from an elegant beige suede couch in his art-filled office, "and I'd have to catch the Piedmont & Northern railway at 5:30 in the morning to get there. I'd arrive at 6:00 and wait around until they opened. That's how I solicited the Texize account.

"Finally, one day Jack Greer called me in the afternoon and asked me to come out and talk about the account. I said I couldn't come that afternoon, that I'd be there in the morning. Now he knew I didn't have any business I was working on, that I couldn't be that busy. But I didn't want to tell him I didn't have a car. In the end I did tell him and he came to pick me up that afternoon," Mr. Henderson said.

- The campaign for Texize liquid cleaner was "lifted" from the popular film "The Hucksters." In the movie, the theme line, "Love that soap" was used for a fictional product. During the film's peak of popularity, Mr. Henderson "saturated the area" with a campaign for Texize liquid cleaner with the tag line, "Love that cleaner."

"At the same time, Lestoil was growing in the East," Mr. Henderson said. "I got us special rates for as many as 50 commercials a week in major towns below the Mason-Dixon line. That campaign put Texize on the map. They learned how to market."

Mr. Henderson also was involved years later when Texize was ready to go national with its K2R spot remover. Mr. Henderson said he went to NBC and tried to buy time on the "Today" and "Tonight" shows. When told there was no time available, Mr. Henderson said he threatened to go to the advertisers themselves and ask to buy from them. He got his time slots, and lead-ins by Johnny Carson.

Distribution for K2R began to grow in the mid-1960s, and within a year of being national, Texize had more than 60% of the market, Mr. Henderson said.

- Today, Texize, as the household product division of Morton-Norwich, Chicago, has annual sales of more than $165,000,000. Fantastik, handled by Henderson, is the No. 1 product in the category. Glass*Plus is the No. 2 brand in the window cleaner category, and is the only such product to significantly cut into Windex' leadership position. Glass*Plus was positioned as a glass cleaner that also performed on other surfaces; the multi use positioning set it apart from other Windex competitors. Spray 'N Wash holds the No. 1 spot in the pre wash category.

In the early days of his agency, Mr. Henderson said, he hired free lance writers and artists to work with him. "We'd sit together all weekend in a hotel room, and put ads together," he said, his blue eyes twinkling as he reminisced. "The first ad I placed cost $47 in a Denver newspaper."

Mr. Henderson, in describing the philosophy by which he has guided the agency, said "I am a perfectionist. I can not stand mediocrity." This feeling is reflected in the exquisitely designed and decorated solar-energized building that has housed the agency since September, 1978.

"I think what we have going here," Mr. Henderson said, "is the personal interest we have in all our accounts. For example," he said, "I personally own stock in all our clients. The three of us [president Peter Finn and vice-chairman Fred Walker] sit on the campaign strategy boards and the creative review boards. I think that kind of involvement is the best thing going for an advertiser."

Behind the choice

Previous Agency of the Year Winners are:

1973—Cunningham & Walsh.
1974—Scali, McCabe, Sloves.
1975—Leo Burnett U.S.A.
1976—DKG Advertising.
1977—Needham, Harper & Steers.
1978—N W Ayer and Young & Rubicam.

Solar collectors atop the Henderson building are part of the system that has resulted in energy savings amounting to a 10% return on investment. Mr. Henderson expects the return to increase each year.

- But Mr. Henderson and Mr. Walker are both planning to retire in six years. A new management team culled from agencies in New York, Chicago and St. Louis, now is in place.

Peter Finn, president of Henderson, spent most of his career in account service posts in New York agencies. He began his career at J. Walter Thompson Co., moved to Foote, Cone & Belding, was vp-senior account supervisor at Doyle Dane Bernbach and served as senior vp at F. William Free & Co., before moving to Henderson as vp-management supervisor in 1974. He was elected exec vp and director of account service in 1976, and still is responsible for the account service department as well as being chairman of the new business team.

Charting the future of the agency, Mr. Finn said the last two pieces of new business Henderson added showed its ability to compete with New York agencies. He said seven New York shops were in contention for the McKesson business, and the STP account moved to Henderson from JWT.

Mr. Finn said of the eight companies on the agency's active new business prospect list, a major target is the food business, especially from southern-based marketers. Henderson, Mr. Finn said, wants to be known as a major package goods agency.

Also looking toward the future, Mr. Finn said, Henderson is checking into the possibilities of other divisions to add to its service capabilities. In adddition to the first step the agency has taken with Pelham, Henderson is looking into direct response, recruitment and retail advertising.

"In ten years," Mr. Finn said, "I would hope that no matter what you wanted, you could find it here. Clients are going to be looking for total communications services, and we will be able to provide that in the South."

PETER M. FINN

- Another member of the new management team, and the head of the creative department is Larry Richardson, 38-year-old senior vp-executive creative director, who came to South Carolina from St. Louis, where he held the same title at Gardner Advertising. Mr. Richardson began his career at Leo Burnett Co., Chicago, and also served at Clinton E. Frank Inc. and D'Arcy-MacManus & Masius there.

Of Henderson and his creative department, Mr. Richardson said, "If Leo Burnett were alive today, this is where he'd want to work. Leo was my Advertising 101. He was a simple man and believed in one person talking to another. Here we are still striving for that one-to-one communication, and that one simple selling idea."

Mr. Richardson said his creative people are among the most enthusiastic and hardworking he has seen. "The parking lot here is usually full at 7:30 in the morning," said Mr. Richardson in his office lined with trophy fish. "I guess we're a little hungrier here. But I think so many of us coming from a large agency background is an advantage in that we are able to see what will be coming next for Henderson."

He said that in selecting new tal-

Profiles of U.S. agencies: Their income, billings, new accounts, total employes

A comprehensive view of the agency business is presented in the following section, in which ADVERTISING AGE presents profiles of U.S. agencies, including their gross income in 1979 and 1978, billings, accounts won and lost, media mix, and total employes. The agency profiles are arranged alphabetically by income groups. The first group, beginning on this page, is composed of 37 agencies with gross income of more than $15,000,000.

N W Ayer ABH International

Gross Income	1979	1978
U.S.	$57,975,000	$46,487,141
International	5,921,000	— —
Total	$63,896,000	$46,487,141

N W Ayer ABH International, New York, reported gross income of $63,896,000 on 1979 billings of $428,442,000. Its 1978 gross income was $46,487,141 on billings of $325,068,000. The agency and Young & Rubicam shared AA's Agency of the Year award for 1978.

The agency's 1979 U.S. volume of $388,500,000 included $295,950,000 in media, $56,300,000 in materials and services and $36,250,000 in capitalized fees. Its 1978 domestic volume of $310,468,000 included $235,800,000 in media, $30,600,000 in materials and services and $44,068,000 in capitalized fees.

Ayer had foreign billings of $39,942,000 in 1979 and $14,600,000 in 1978. It did not break down those figures, nor did the agency disclose its non-U.S. income for the year 1978.

The agency last year gained Gillette Co. personal care products (Adorn hair spray, White Rain hair spray, new products), billing over $3,000,000, from J. Walter Thompson Co.; Nestle Co.'s $100,000 candy bar, billing $2,500,000, from Leo Burnett Co.; Menley & James Labs' Dietac, a new product with a budget estimated at $5,000,000 in 1980; Miller Brewing Co. (new products); Formfit Rogers Inc. (intimate apparel), billing $2,700,000, from Altman, Stoller, Weiss; Canadair Ltd.; McGaw Labs division, American Hospital Supply Co.; Host International restaurants; Japan Travel Bureau International; San Francisco Bay Area Wienerschnitzel Operators Assn.; Pacific Telephone & Telegraph, and AM International/Jacquard Systems.

The agency yielded Ralph's Grocery Co., billing an estimated $2,000,000; Victoria Station restaurants, billing $1,000,000; Economics Laboratories, billing $2,900,000, to Marschalk Co.; J.A. Henckels Zwillingswerk; Potlach Corp.; Cutter Labs' Resiflex division; Norton Co.; Vespa of America; Reuben H. Donnelley Corp., and Ball Corp., billing $1,000,000.

Billings breakdown: Newspapers 7.2%, magazines 28.7%, supplements 1.2%, radio 5.2%, tv 47.9%, outdoor 1%, business press 7.3%, Yellow Pages, etc., 1.5%. The agency has 1,358 employes in four U.S. offices; a year ago it had 998 employes in five U.S. offices.

BBDO International

Gross Income	1979	1978
U. S.	$91,300,000	$80,100,000
International	53,547,277*	40,272,505*
Total	$144,847,277*	$120,372,505*

*AA estimate

BBDO International, New York, is estimated to have had 1979 gross income of $144,847,277 on billings of $985,493,835. Its estimated 1978 gross was $120,372,505 on billings of $817,319,196.

AA estimated BBDO's foreign gross income and billings based on known percentage ownership by BBDO International of 19 of its 24 foreign units reporting. A 40% average ownership was applied to the remaining five shops. Also, reports on three overseas shops were too late to process actual figures into BBDO's over-all totals. In the case of two of these three—Promo in Italy and Comcore (a holding company including Baker-Lovick and Grant/Tandy agencies in Canada)—AA estimated a 15% increase in billings in gross income over known 1978 figures. For the third shop—Singapore's Batey Advertising—AA attributed the agency with gross income of $128,800 on billings of $874,000 (based on 40% ownership) in 1979. The Singapore shop was not included in AA's 1978 foreign billings report. It must be noted that BBDO was quite acquisition-minded in 1979, adding seven new shops to its network. The totals of these new shops, of course, do not appear as part of the BBDO gross income and billings aggregates for 1978.

The agency's 1979 U.S. volume of $625,600,000 included $464,600,000 in media, $123,000,000 in materials and services and $38,000,000 in capitalized fees. Its 1978 U.S. volume of $541,500,000 included $388,100,000 in media, $110,400,000 in materials and services and $43,000,000 in capitalized fees.

BBDO is estimated to have had foreign billings of $359,893,835 in 1979 and $275,819,196 in 1978.

The agency's U.S. gains last year included R.J. Reynolds Tobacco's Camel cigarets, billing over $30,000,000 from Dancer Fitzgerald Sample; Jos. Schlitz Brewing's Old Milwaukee beer and General Electric (consumer sector, dishwashers and major appliances), billing over $14,000,000, which moved from Young & Rubicam.

Its losses included Chrysler Corp.'s Dodge cars and trucks and Dodge Dealer Advertising Assns., billing $80,000,000, which moved to Kenyon & Eckhardt in what was the largest account shift in history ($50,000,000 in Chrysler/Plymouth billings also went to K&E from Y&R). It also lost Western Airlines, billing $12,000,000; Vicks toiletries products division and Minneapolis Star & Tribune Co. It did not list foreign gains or losses.

The agency's U.S. subsidiaries' gross income and billings are included in BBDO's figures. The subsidiaries include Burke, Dowling Adams Inc., Frank J. Corbett Inc., Quinn & Johnson Inc., Rubinstein-Chanfer Inc., Franklin Spier Inc., Lavey/Wolff/Swift, GM DuBois Corp., Blair Advertising and Arthur Meyerhoff Associates.

Billings breakdown: Newspapers 12%, magazines, 16%, radio 5%, tv 60%, outdoor 2%, business press 3%, direct mail 1%, other 1%. The agency has 2,581 employes in 59 offices, including 1,653 in 14 U.S. offices. A year ago it had 2,409 employes in 46 offices, including 1,542 in 13 U.S. offices.

Ted Bates & Co.

Gross Income	1979	1978
U.S.	$98,443,000	$54,874,000
International	82,546,000	78,236,000
Total	$180,989,000	$133,110,000

Ted Bates & Co., New York, reported gross income of $180,989,000 on 1979 billings of $1,202,976,000. Its 1978 gross income was $133,110,000 on billings of $903,914,000.

The agency's 1979 U.S. volume of $652,680,000 included $500,681,000 in media, $86,993,000 in materials and services and $65,006,000 in capitalized fees. Its 1978 U.S. volume of $424,748,000 included $382,874,000 in media, $12,339,000 in materials and services and $29,535,000 in capitalized fees.

Bates 1979 international volume of $550,296,000 included $390,548,000 in media, $52,233,000 in materials and services and $107,515,000 in capitalized fees. Its 1978 foreign volume of $479,166,000 included $337,168,000 in media, $46,474,000 in materials and services and $95,524,000 in capitalized fees.

Bates' 1979 figures include the billings and income of the following subsidiaries: Diener/Hauser/Bates, Sawdon & Bess, AC&R Advertising, Campbell-Mithun and Stern Walters/Earle Ludgin.

Bates' account gains last year included Adolph Coors Co., billing $15,000,000, from Ogilvy & Mather and Cadco (in-house agency); Mobil Chemical (Hefty bags), billing $8,000,000, from Lee King & Partners; Home Box Office, billing $2,000,000; JADOR; Kava coffee (Borden's); Meal Time (Kal Kan); Clairol appliances and Playtex bra division. It lost Hertz, billing $14,000,000; Thompson Medical, billing $3,000,000, North American Systems ($4,000,000) and resigned $7,000,000 in Nabisco billings. The company did not supply its list of overseas account gains and losses for this report; they will appear in AA's international income issue, however.

Late last year, Bates acquired Caracas, Venezuela, agency, Ghersy/Quintero Publicidad.

Billings breakdown: Newspapers 10.6%, magazines 14.9%, supplements 0.9%, radio 6.3%, tv 63.3%, outdoor 3.4%, business press 0.6%. The agency has 3,910 employes in 40 offices, including 1,831 in 12 U.S. offices. A year ago it had 2,978 employes in 33 offices, including 1,007 in seven U.S. offices.

Benton & Bowles

Gross Income	1979	1978
U.S.	$63,800,000	$50,200,000
International	31,600,000	26,800,000
Total	$95,400,000	$77,000,000

Benton & Bowles, New York, reported gross income of $95,400,000 on 1979 total billings of $638,000,000. Its 1978 gross income was $77,000,000 on total billings of $551,800,000.

The agency's 1979 U.S. volume of $432,400,000 included $359,100,000 in media and $73,300,000 in capitalized fees. Its 1978 U.S. volume of $369,800,000 included $311,100,000 in media and $58,700,000 in capitalized fees. Benton & Bowles reported foreign billings of $205,600,000 in 1979 and $182,000,000 in 1978, but it did not break down those figures.

Included in the agency's figures are the billings and income of its U.S. subsidiaries—Medicus Communications (health care) Science & Medicine Inc., Cinemed Systems, Kissiloff Associates and Ted Colangelo Associates.

The agency's U.S. account gains last year included Vick Chemical's Clearasil, billing $5,000,000, from BBDO; Digital Equipment Corp., billing $2,000,000, from Creamer Inc., also Creative Collaborations, Anderson Clayton Foods, Milliken & Co., Computer Services Corp., Textron's Jacobsen division (lawn care products), billing $3,000,000, from Y&R/Buchen/Reincke, and Stiffel Co.

Last December, the agency lost an estimated $20,000,000 in General Foods' cereal business to Grey Advertising and Ogilvy & Mather, which gained $15,000,000 and $5,000,000 portions, respectively.

DeBeers

N W Ayer, New York, is the agency for DeBeers.

Agencies with gross income over $15,000,000

(Continued from Page 3)

It also lost Complete denture cleaner (Vick), billing an estimated $6,000,000, to Young & Rubicam, Bell & Howell Co., Johnson Products Co., and Cannell & Chafflin. The agency resigned Quality Bakers of America, billing $6,000,000, which later moved to Ted Bates' Sawdon & Bess subsidiary, and S.C. Johnson & Son (Pledge polish).

Overseas, the agency gained over 60 accounts, including Ba..co do Brasil (Argentina), Sara Lee (France), Reemisma Astor (West Germany), Gillette (Netherlands), Quaker Oats (Norway), Pfizer (United Kingdom) and Cadbury, Schweppes, Powell Ltd. (Canada).

Its approximately 25 overseas losses included Mercedes-Benz trucks (Argentina), Generla Biscuits (Belgium), Philips Magnavox (Canada), Harley Davidson (Italy), Andrelon (Netherlands) and ITT (United Kingdom).

Billings breakdown: Newspapers 7%, magazines 13%, radio 5%, tv 70%, outdoor 1%, business press 3%, direct mail 1%. The agency has 2,359 employes in 36 offices, including 1,352 in 7 U.S. offices. A year ago it had 2,229 employes in 29 offices, including 1,228 in 6 U.S. offices.

Bozell & Jacobs International

Gross Income	1979	1978
U.S.	$44,690,000	$34,050,000
International....	475,000	465,000
Total	$45,165,000	$34,515,000

Bozell & Jacobs International, New York, reported gross income of $45,165,000 on 1979 billings of $301,250,000. Its 1978 gross income was $34,515,000 on billings of $230,250,000.

The agency's 1979 U.S. volume of $298,100,000 included $189,800,000 in media, $52,100,000 in materials and services and $56,200,000 in capitalized fees. Its 1978 U.S. volume of $227,150,000 included $142,000,000 in media, $36,150,000 in materials and services and $49,000,000 in capitalized fees. Bozell reported overseas billings of $3,150,000 in 1979 and $3,100,000 in 1978.

Bozell & Jacobs last year gained Yardley of London, billing $2,000,000; First Tennessee Bank; White Labs; *Minneapolis Star & Tribune;* American Airlines (collateral and sales promotion); El Paso National Bank; Remington Business Systems, and Texas Instruments (time products).

The agency's U.S. losses included Long John Silver's restaurants (Southeast), El Paso Electric Co., Schmid Laboratories, American Cyanamid, Vickers Petroleum Co., Central Bancshares and Prince Mfg. Co. (tennis equipment).

Abroad, the agency gained Advanced Farm System, Atlantic Container Lines, Crop Handling Systems, National Tourist Organization of Greece, White Laboratories, Sports Mitchell Canada Ltd. and Fleury Michon. Its foreign losses: March Shipping, Westinghouse Canada, Canadian Machinery, *Toronto Giobe & Mail* and Allied Bakeries.

Henderson Top Agency

(Continued from Page 2)

ent for his three creative groups, he is careful to avoid the "talented but temperamental" type. "Our creative people are all businessmen and businesswomen. Their work speaks, so their mouth doesn't have to."

- Forecasting the creative environment for the 1980s, Mr. Richardson said he thinks this decade will "strike a balance between the creative crazies of the '60s to our overdependence on numbers in the '70s. We've been concentrating too much on making advertising 'moments' instead of good campaigns," Mr. Richardson said. "The trend is more toward a balance. Creative is finding its more rightful place."

Larry Richardson

Stock in the agency is owned by 20 employes, with the bulk of the shares owned by top management. The management team for succession in the future also includes Jack Shimell, senior vp-director of market research, who joined Henderson three years ago from Young & Rubicam, New York; Bob Reuschle, senior vp-media director, who has been at Henderson for ten years, also from Y&R; John Kennedy, senior vp-chief financial officer who, previous to joining Henderson, was at Marschalk Co., New York; Ralph Callahan, vp-management supervisor heading the Texize account who spent his entire career prior to June, 1978, at Y&R, and homegrown vps and management supervisors Paul Murdoch and Mike Wilson.

- Mr. Henderson said he just now is "where I thought we'd oughta be when I had my dream. Now we're starting to get some recognition for what we've been doing down here." Though he could see himself getting involved in politics after retiring from the agency, Mr. Henderson isn't ready to quit the ad business just yet. "I want to see at least $100,000,000 in billings before I'm finished," he said. #

Gift Pax makes your brand part of the new arrival's homecoming

The moment the nurse personally presents Gift-Pax*, both mother and baby are "branded" for you. When you consider Gift-Pax Families average 4.43 persons per household, it's the alert advertiser who makes each "branding" a family affair. Your brand maybe?

Offices: United States, Canada, United Kingdom.

Agencies with gross income over $15,000,000

Last year, B&J acquired Chollick Associates, a New York retailing-oriented agency billing about $16,000,000.

Billings breakdown: Newspapers 17%, magazines 38%, radio 9%, tv 33%, outdoor 1%, Yellow Pages 2%. The agency has 1,285 employes in 24 offices, including 1,225 in 20 U.S. offices. A year ago, the agency had 1,096 employes in 24 offices, including 1,033 in 20 U.S. offices.

Leo Burnett Co.

Gross Income	1979	1978
U.S.	$94,495,000	$89,004,000
International....	46,603,000	39,292,000
Total	$141,098,000	$128,296,000

Leo Burnett Co., Chicago, reported gross income of $141,098,000 on 1979 billings of $950,650,000. Its 1978 gross income was $128,296,000 on billings of $866,069,000.

The agency's 1979 U.S. volume of $639,808,000 included $565,854,000 in media, $59,839,000 in materials and services and $14,115,000 in capitalized fees. Its 1978 U.S. volume of $603,991,000 included $528,114,000 in media $59,700,000 in materials and services and $16,177,000 in capitalized fees. Burnett reported foreign volume of $310,842,000 in 1978 and $262,078,000. It did not break down those figures.

The agency last year gained an estimated $10,000,000 in Litton microwave oven and range billings from Campbell-Mithun, Minneapolis. The agency did not report overseas account gains or losses.

Billings breakdown: Newspapers 20%, magazines 16%, radio 2%, tv 57%, outdoor 5%. The agency has 2,842 employes in 37 offices, including 1,462 in four U.S. offices. A year ago it had 2,954 employes in 37 offices, including 1,530 in four U.S. offices.

Campbell-Ewald

Gross Income	1979	1978
U.S.	$39,556,000	$35,003,000
International....	44,676,000	36,919,000
Total	$84,232,000	$71,922,000

Campbell-Ewald, Detroit, a member of the Interpublic Group of Cos., reported 1979 gross income of $84,232,000 on billings of $561,935,000. Its 1978 gross income was $71,922,000 on billings of $480,028,000. The U.S. operation includes Campbell-Ewald Co., Tinker Campbell-Ewald and Clinton E. Frank Inc.

Campbell-Ewald's 1979 U.S. volume of $263,839,000 is estimated to have included $170,000,000 in media, $46,000,000 in materials and services and $47,839,000 in capitalized fees. Its 1978 U.S. volume of $233,760,000 is estimated to have included $140,000,000 in media.

(Continued on Page 16)

Agency income rises 18%

(Continued from Page 1)

cludes the results of Marsteller Inc., which it acquired last year.)

With each enjoying billings that exceed $1 billion for the third consecutive year, the world's three largest U.S.-based agencies were joined in that envied $1 billion club by Ogilvy & Mather, a second-year member, and Ted Bates & Co., entering for the first time with gross income of $181,000,000 on billings of $1.20 billion.

- It should be pointed out that Y&R's gross income in 1979 included only four months of the gross income of Marsteller Inc., whose acquisition became effective last September. Had a full year of Marsteller gross income been included, Y&R's figures clearly would have surpassed JWT and McCann with gross income of $288,017,000.

Y&R, however, is by no means guaranteed the No. 1 ranking in next year's survey due to the aggressive acquisition stance taken in recent months by JWT in the U.S. and overseas. Since January, for example, JWT has agreed to acquire a majority interest in the Euro-Advertising agencies (located in five major European markets), whose combined billings were more than $100,000,000 in 1979. It also announced an agreement in principle to acquire Hill & Knowlton, the world's largest public relations agency with fee income of $28,301,000 in 1979.

- It also should be noted that Interpublic Group of Cos., in which McCann-Erickson is one of four agency units, had 1979 gross income of $384,685,000 on billings of $2.57 billion. Interpublic figures for 1979 include those of McCann, Campbell-Ewald, Marschalk and SSC&B. The Interpublic billings include 100% of the billings of SSC&B for 1979, which it acquired last September. At AA's request, Interpublic adjusted its over-all gross income to reflect 100% of SSC&B's gross income from September to December and 49% of the income of SSC&B Lintas. The remaining 51% of SSC&B Lintas is held by Unilever.

AA estimated a number of agencies' gross income and billings last year because they failed to comply with an equity formula included in the 1979 questionnaire covering foreign billings. The formula calls for billings claimed for foreign affiliates to be based on the parent's percentage of ownership. For example, if a 25% interest were held in an overseas office, only 25% of its billings could be claimed; if 75% were owned, only 75% could be claimed.

In terms of U.S. income and billings, Y&R remained the leader with billings of $1.16 billion and domestic gross of $149,700,000. The performances of its major rivals in the U.S.: JWT, gross income of $118,204,000 on billings of $788,000,000; McCann-Erickson, gross of $69,400,000 on billings of $463,200,000, and Ogilvy & Mather, gross income domestically of $106,800,000 on billings of $712,000,000, and Ted Bates & Co., gross income of $98,400,000 on billings of $652,700,000.

- The top 10 U.S. agencies in terms of world gross income were JWT, McCann, Y&R, O&M, Bates, SSC&B, BBDO International, Leo Burnett Co., Foote, Cone & Belding and D'Arcy-MacManus & Masius. The top 10 each had gross income in excess of $125,000,000 as well as billings of $850,000,000 or more.

This is the fourth year in which AA has ranked agencies by gross income rather than billings. The change was made because most agencies recognize gross income as a more meaningful measure of size and performance.

While the 679 agencies in this year's compilation are ranked by gross income, their billings appear in the profile on each agency. Scores of agencies that returned questionnaires to AA do not appear in this issue because they supplied incomplete information, obviously erroneous income figures or were late in responding. The U.S. Post Office also returned 83 unopened questionnaires marked "addressee unknown."

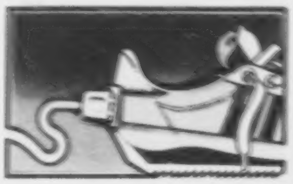
The AYS have it!

The service magazine readers respond to because it really shows them how to get the best of the good life.

Who are the AYS? The Affluent Young Spenders who read APARTMENT LIFE!™ We're the magazine that defines the state of the art of living for them. The one that tells them how to do more with their time, get more for their money.

Seldom have a magazine and its audience been so well-matched. Some examples from the March 1980 issue:

P. 7. *The fight against no-kids rules goes on and on.* SMRB index of AYS who have written to a public official: **135.**



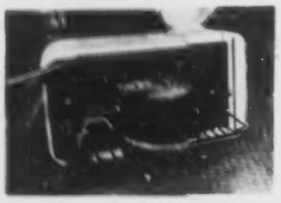
Pp. 12, 15. *The Electronic Jock. A guide to the new exercise gadgets.* SMRB index of AYS who jog: **200.**

Pp. 39-54. *Robin Williams at Home.* (Our design team does an apartment for TV's Mork) SMRB index of AYS who purchased living room furniture in the past year: **136.**

Pp. 64-66. *New Classic Restaurant.* (Menus and recipes) SMRB index of AYS who cook for fun: **164.**

Source: SMRB 78/79

Pp. 68-75. *Aptwares.* (Appliances and other home-and life-improving merchandise) SMRB index of female AYS who work full time and have a special interest in convenience items: **164.**



By any index, APARTMENT LIFE readers go, do, and buy. No wonder we enjoyed a 24% increase in ad pages during 1979!

APARTMENT LIFE reaches a monthly readership of 2,500,000 Affluent Young Spenders who live predominately in the major markets. They have a zest for the good life, and the youth, income and sophistication to enjoy it. They make APARTMENT LIFE the *prime medium* for the *prime market* of the 80's! The perfect marketplace for you!

Agencies with gross income over $15,000,000

(Continued from Page 6)

$43,000,000 in materials and services and $50,760,000 in capitalized fees. The agency's foreign volume was $298,096,000 in 1979 and $246,268,000 in 1978.

C-E last year gained no accounts and lost Borden. Clinton E. Frank Inc. gained Electroalert and Scorpion Industries; it lost Icelandic Airlines, Kohler and Heublein Club cocktails. Tinker Campbell-Ewald gained Cluett, Peabody and Heublein spirits group (new products); it lost British Airways, billing $6,000,000.

Overseas, Campbell-Ewald last year gained Philips (Belgium); Squibb (Life Savers, Bubble Yum and new products) in the United Kingdom; Rachengold mints and cough drops (West Germany); Borden (Mexico); Canon copiers etc. (Holland) and White Wings cake mixes and puddings. Its overseas losses included Mitre 10 (Australia), Horten department store (West Germany), Tempo Sanys, Moltex diapers (France), United Permanent (Australia) and Telefunken (France).

The agency has 1,790 employes, including 769 in the U.S. A year ago it had 1,793 employes, including 816 in the U.S.

Campbell-Mithun

Gross Income	1979	1978
U.S.	$23,760,000	$21,150,000
Total	$23,760,000	$21,150,000

Campbell-Mithun, Minneapolis, reported gross income of $23,760,000 on 1979 billings of $158,400,000. Its 1978 gross was $21,150,000 on billings of $141,000,000. The agency is a subsidiary of Ted Bates & Co.

The agency's 1979 volume included $123,000,000 in media, $16,000,000 in materials and services and $19,400,000 in capitalized fees. Its 1978 volume of $141,000,000 included $110,000,000 in media, $14,000,000 in materials and services and $17,000,000 in capitalized fees. The C-M total does not include the results of its two U.S. subsidiaries, CM&B Advertising and Promotion Works Inc.

Campbell-Mithun gained Coca-Cola Foods (Maryland Club and Butter-Nut coffees), billing about $2,000,000, from Tatham, Laird & Kudner; Kohler Co. bathroom fixtures, billing $1,000,000, from Clinton E. Frank Inc.; *Better Homes & Gardens'* Real Estate Service; Dubuque (Ia.) Packing, MEPC American Properties, Norand Corp., Bank of Ravenswood, Chicago; Saluto frozen entrees (General Mills); Visitronics/Honeywell Consumer Products; Masland Duraleather Co., 3M Alarm Services; Drake Hotel (Chicago); Micro-Gen Equipment Corp.; Blue Cross/Blue Shield, Chicago; Pako Filmshops; Libby, McNeill, Libby, and Uniroyal (Naugahyde fabrics division and agricultural chemicals division). It resigned West Bend Co. appliances, billing $5,000,000, and Litton Industries.

Billings breakdown: Print 27%, broadcast 65%, other 8%. The agency has 589 employes in two offices; a year ago it had 522 in two offices.

Compton Advertising

Gross Income	1979	1978
U.S.	$40,864,000	$36,025,000
International	36,851,000*	30,068,000*
Total	$76,715,000*	$66,093,000*

*AA estimates
Revised

Compton Advertising, New York, is estimated to have had 1979 gross income of $77,715,000 on estimated billings of $524,611,000. Its 1978 gross is estimated to have been $66,093,000 on estimated billings of $457,873,000.

AA estimated Compton's 1979 overseas gross income and revised its 1978 overseas figures to reflect the agency's minority holding in Saatchi & Saatchi Compton, London. The figures supplied by the agency included 100% of the Saatchi agency's billings and gross income for both 1979 and 1978. Those figures were: 1979 gross income of $95,381,000—including $54,517,000 foreign—on billings of $642,433,000, compared with 1978 gross of $82,715,000, including $46,690,000 foreign—on billings of $557,433,000. The foreign billings reported were $360,031,000 in 1979 and $311,233,000 in 1978. AA's estimate of overseas volume was $243,109,000 in 1979 and $211,673,000 in 1978.

The agency's 1979 U.S. volume of $281,502,000 included $234,902,000 in media, $37,200,000 in materials and services and $9,400,000 in capitalized fees. Its 1978 U.S. volume of $246,200,000 included $210,700,000 in media, $29,500,000 in materials and services and $6,000,000 in capitalized fees.

(Continued on Page 20)

Agencies with gross income over $15,000,000

(Continued from Page 16)

The 1979 figures include the income and billings of subsidiaries Rumrill-Hoyt, Klemtner Advertising and Ross Roy New York/-Compton.

The agency last year gained Thompson Medical (Dexatrim), Allen Beverages, First Federal Savings of Broward, *Sport* magazine, Ray-O-Vac (special project), Viacom (Showtime), Union Carbide and new assignments from existing clients (Johnson & Johnson, Jones sausages, IBM's GBGI division and Austin, Nichols & Co. (Pernod). It had no account losses last year.

Overseas, it gained 30 accounts, including Pfizer (Philippines), Black & Decker (West Germany), IBM office products (Italy), Williams & Humbert's Dry Sack sherry (Belgium), Citroen and IBM (France), Standard Brands (Puerto Rico) and British West Indian Airways (Puerto Rico). Its 10 overseas losses included Jag & Haggar Sportswear (Philippines) Bic (Germany), Cointreau (France) and British Airways (Australia).

Billings breakdown: Newspapers 4%, magazines 28%, radio 2%, tv 64.5%, outdoor 0.8%, p.o.p. 0.2% and Yellow Pages 0.5%. The agency has 868 employes in eight U.S. offices; a year ago it had 799 in seven U.S. offices.

Creamer Inc.

Gross Income	1979	1978
U.S.	$15,300,000	$13,100,000
Total	$15,300,000	$13,100,000

Creamer Inc., New York, reported gross income of $15,300,000 on 1979 billings of $102,000,000. Its 1978 gross income was $13,100,000 on billings of $87,300,000.

Creamer's 1979 volume included $80,000,000 in media, $13,000,000 in materials and services and $9,000,000 in capitalized fees. Its 1978 volume included $73,200,000 in media, $10,100,000 in materials and services and $4,000,000 in capitalized fees. It also operates Creamer Dickson Basford pr.

The New York agency lost *Dun's Review*, Penthouse International (*Penthouse*, *Omni*); Chicago lost Amsted Industries; Pittsburgh lost Disston, Overly Mfg. Co., Eat 'n Park; New England lost Digital Equipment Corp., Exide Safety Systems division of ESB Inc., KLH Research & Development Corp., King-Seeley Thermos Co.

Billings breakdown: Newspapers 10%, magazines 36%, radio 5%, tv 31%, outdoor 3%, business press 12%, farm publications 1% and other 2%. Creamer has 370 employes in five offices; a year ago it had 323 employes in four offices.

Coming April 14: Foreign agencies

In the April 14 issue of ADVERTISING AGE, income, billings and financial details will be reported for agencies in the many world areas where advertising is a factor, including Canada, Europe, the Far East, Australia and South America.

Cunningham & Walsh

Gross Income	1979	1978
U.S.	$29,276,000	$28,938,000
Total	$29,276,000	$28,938,000

Cunningham & Walsh, New York, reported gross income of $29,276,000 on 1979 biilings of $225,200,000.

The agency's 1979 volume, including the totals for both years of Post-Keyes-Gardner, Chicago, acquired in the fall of 1978, was as follows: $193,897,000 in media, $20,494,000 in materials and services and $10,809,000 in capitalized fees. Its 1978 volume of $222,600,000 included $189,525,000 in media, $21,500,000 in materials and services and $11,575,000 in capitalized fees.

The agency gained Bank of New York, billing $2,000,000; American Home Foods (Chef Boy-ar-dee spaghetti sauces); F.M.E. Corp.; Tom Fields Ltd. (Tinkerbell children's grooming products); First French Hotels, Mitsubishi Motors Corp.; Kayser-Roth's Easy to Be Me panties, hose and new products; Northern California Toyota Dealers Advertising Assn.; Realty World Corp.; Sharp Electronics' industrial equipment division (pr only); Sterling Drug (new products); "21" Brands (spirits billing $4,000,000-plus), UTA French Airlines.

The agency lost Jos. Schlitz Brewing Co.'s Old Milwaukee and Schlitz Light beers, billing $3,500,000 and $5,000,000, respectively, to BBDO and Della Femina, Travisano & Partners and Florists' Telegraph Delivery Assn.

Billings breakdown: Newspapers 8%, magazines 29%, radio 5%, tv 50%, outdoor 8%. The agency has 602 employes in four offices; a year ago it had 652 in four offices.

Dancer Fitzgerald Sample

Gross Income	1979	1978
U.S.	$59,724,000	$51,500,000
International....	8,632,000	5,000,000
Total	$68,356,000	$56,500,000

Dancer Fitzgerald Sample, New York, reported gross income of $68,356,000 on 1979 billings of $469,850,000. Its 1978 gross income was $56,500,000 on billings of $459,000,000.

The agency's 1979 U.S. volume of $420,000,000 included $245,000,000 in media, $42,000,000 in materials and services and $133,000,000 in capitalized fees. Its 1978 U.S. volume of $362,000,000 included $203,000,000 in media, $36,000,000 in materials and services and $123,000,000 in capitalized fees. DDB reported foreign billings of $49,850,000 in 1979 and $97,000,000 in 1978. It did not break down those totals.

The billings and income of its U.S. subsidiaries are included in the DFS total. They include GFS/-DFS, DFS/Wegener Agricultural Group, Program Syndication and Tomorrow Entertainment.

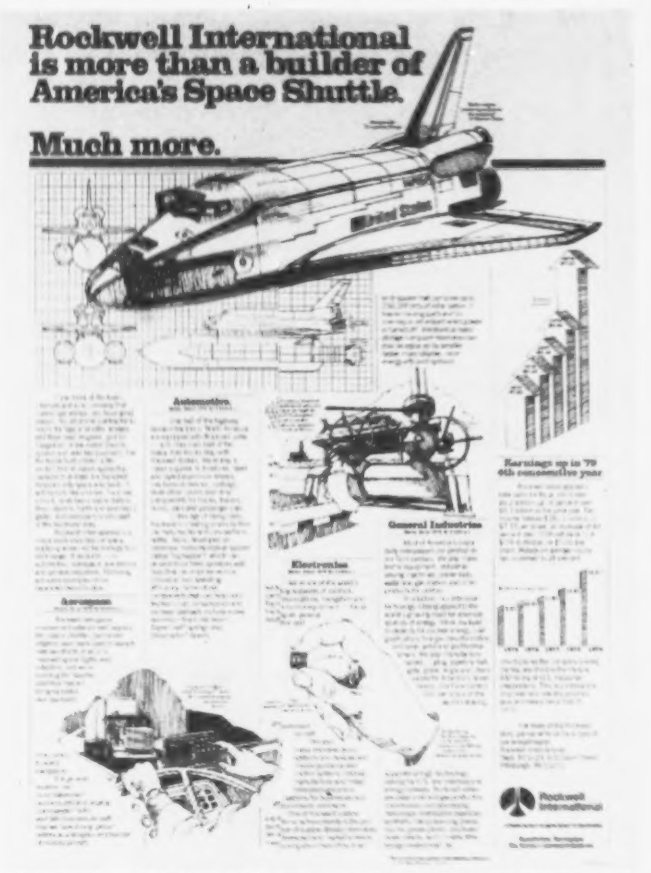
The agency's U.S. account gains last year included Nikon cameras, billing $6,500,000, via the acquisition of Gilbert, Felix & Sharp (now GFS/DFS); Jacqueline Cochran's Cie fragrance, billing $4,000,000, from Norman Craig & Kummel; General Mills' Kix and Body Buddies cereals; Popsicle Industries, billing $2,000,000; Ciba-Geigy agricultural division; Yoplait yogurt; Saudi Arabian and Canadian Toyota; Denver Toyota Dealers Advertising Assn.; 3M's Mmm! What a Tan; Procter & Gamble's Solo detergent (in test); S&W Fine Foods; Walker & Lee Real Estate; Tatung tv sets and fans, and Tri-Flon lubricants.

In one of the biggest U.S. account shifts of 1979, R.J. Peynolds Tobacco last November moved the $40,000,000-plus Winston cigaret line to William Esty Co. DFS also lost New York Metro and San Francisco Area Toyota Dealers Advertising Groups.

Overseas, DFS gained Johnson's Baby Care, Hewlett Packard, Faxe beer, Bayer/Owens Corning, Life Savers, Rossignol-Ski Deutschland, Duracell batteries, *Financial Times*, Rolls-Royce, Campari, British Airways, RCA Records, Morgan Bank and various other accounts in international markets. Its overseas losses included Supermarkets Italiani, Gamba Rotta liquors, Peugeot, Citroen, Grundig, Polycell, Arrowfield Wines and Express Freights Pty.

Last September, DFS bought out its partners, the British-based Dorland Group and the German-based DFS + R Dorland, to become sole owner of DDF International Network, which it merged into its DFS International network established a year earlier.

Billings breakdown: Newspapers 4%, magazines 21%, radio 2%, tv 69%, outdoor 4%. The agency has 1,084 employes in its five U.S. offices. A year ago it had 973 people in the same number of offices.



Rockwell International is more than a builder of America's Space Shuttle.
Much more.

D'Arcy-MacManus & Masius

Gross Income	1979	1978
U.S.	$ 57,379,000	$ 50,048,000
International....	70,666,000	54,605,000
Total	$128,045,000	$104,653,000

D'Arcy-MacManus & Masius, New York, reported gross income of $128,045,000 on 1979 billings of $853,624,000. Its 1978 gross income was $104,653,000 on billings of $698,846,000.

D'Arcy originally supplied 1979 figures that included the billings and gross income of de Garmo Inc., which was merged into D'Arcy's New York office (now D'Arcy-MacManus & Masius/de Garmo) last January. At AA's request, D'Arcy revised its 1979 figures. The original figures (including de Garmo) were as follows: 1979 gross of $134,565,000 on billings of $897,091,000. The income figure included $63,899,000 in the U.S.; international income remained unchanged.

D'Arcy's 1979 U.S. volume was $382,528,000. Although not broken down by the agency, volume is estimated to have included $325,000,000 in media, $52,000,000 in materials and services and $5,528,000 in capitalized fees. Its 1978 U.S. volume of $333,655,000 is estimated to have included $285,000,000 in media, $45,000,000 in materials and services and $3,655,000 in capitalized fees.

D'Arcy's overseas volume was $471,096,000 in 1979 and $365,191,000 in 1978.

The agency's U.S. account gains included Gallery of Homes, billing $3,500,000, from Tucker Wayne & Co.; Laker Airways, billing $2,500,000, from Stiefel/Raymond; ESPN; FTD; WIND Radio; Anheuser-Busch's Clydesdale Collections; AT&T Phone Center; American Soybean Assn.; American Hoist & Derrick; Academy of General Dentistry; Mitre Sports; Avery Label; Komatsu Fork Lift; Lasonic Electronics, and Ushio Inc. It lost Scripto, billing $1,000,000, to Burton/Campbell; Stiffel, billing $500,000; Hudson's, and Bally.

NOW PICKED, PRESSED AND RELAXED HAIR CAN BE MORE BEAUTIFUL.

Foote, Cone & Belding, New York, is agency for Clairol's Born Beautiful.

D'Arcy's foreign gains in 19 countries totaled 119. They included Barclays Bank (Canada), Colgate and Mars (France), Societa Italiana Manufatti (Italy), Elsevier Publishing (Netherlands), Norsk Citroen (Norway), Iberia Airlines (South Africa), Anheuser-Busch (West Germany), Lipton (Australia) and Reckitt & Colman (Britain). It lost 44 accounts overseas in 1979.

Billings breakdown: Newspapers 8%, magazines 18%, radio 9%, tv 63%, outdoor 1%, directory 1%. The agency (including de Garmo) has 3,255 employes in 37 offices, including 1,505 in nine U.S. offices. A year ago it had 2,815 employes in 34 offices, including 1,197 in eight U.S. offices.

De Garmo Inc., now D'Arcy-MacManus & Masius/de Garmo, reported gross income of $6,520,000 on 1979 billings of $58,709,000. In 1978 it had gross income of $5,831,000 on billings of $53,000,000. Its 1979 volume included $40,148,000 in media, $3,757,000 in materials and services and $14,804,000 in capitalized fees. Its 1978 U.S. volume of $51,000,000 included $34,531,100 in media, $4,860,000 in materials and services and $11,608,900 in capitalized fees. It reported no foreign volume in 1979, but had volume of $2,000,000 foreign in 1978, from which it derived income of $300,000. The agency gained Standard Brands' Royal gelatine and pudding in 1979.

Billings breakdown: Newspapers 3%, magazines 27%, radio 3%, tv 42%, outdoor 12%, business press 5%, other 8%.

Della Femina, Travisano & Partners

Gross Income	1979	1978
U.S.	$15,600,000	$12,400,000
Total	$15,600,000	$12,400,000

Agencies with gross income over $15,000,000

(Continued from Page 20)

ners, New York, reported gross income of $15,600,000 on 1979 billings of $111,000,000. Its 1978 gross was $12,400,000 on billings of $88,090,250.

The agency's 1979 volume included $89,100,000 in media, $10,800,000 in materials and services and $11,100,000 in capitalized fees. Its 1978 volume of $88,090,250 included $72,500,000 in media, $8,420,000 in materials and services, $7,170,250 in capitalized fees.

Della Femina last year gained Lipton Co. (herbal teas), Schlitz Light beer, Ramlosa Royal Swedish mineral water, Pacific Southwest Airlines, Kickers footwear and Mr. Steak restaurants.

Accounts lost included American International Group, International Multifoods, Danecraft jewelry and Ralston Purina's High Protein dog food.

The agency last year established a separate subsidiary, Drossman Yustein Clowes, and acquired Isidore, Lefkowitz, Elgort.

Billings breakdown: Tv 58%, newspapers 18%, magazines 14%, radio 9%, other 1%. The agency has 235 employes in two U.S. offices. A year ago it had 192 people in two offices.

Doyle Dane Bernbach

Gross Income	1979	1978
U.S.	$72,100,000	$64,500,000
International....	31,900,000	25,500,000
Total	$104,000,000	$90,000,000

Doyle Dane Bernbach, New York, reported gross income of $104,000,000 on 1979 billings of $701,000,000. Its 1978 gross income was $90,000,000 on billings of $600,000,000.

The agency's 1979 U.S. volume of $492,000,000 included $405,000,000 in media, $46,300,000 in materials and services and $40,700,000 in capitalized fees. Its 1978 U.S. volume of $430,000,000 included $350,700,000 in media, $41,900,000 in materials and services and $37,400,000 in capitalized fees.

DDB's 1979 foreign volume of $209,000,000 included $145,000,000 in media, $31,300,000 in materials and services and $32,700,000 in capitalized fees. Its 1978 foreign volume of $170,000,000 included $116,300,000 in media, $27,700,000 in materials and services and $26,000,000 in capitalized fees.

Included in DDB's figures are the billings and gross income of the following subsidiaries: Cargill, Wilson & Acree, DDB Group Two, Director's Studio, Milici/Valenti Advertising, Rapp & Collins and Schuller, Briggs & Mitchell, the latter acquired in 1979.

The agency's U.S. account gains in 1979 included IBM corporate tv, billing $10,000,000, from Conahay & Lyon; C&C cola, billing $5,300,000, through the acquisition of Catalano & Gornick, C&C's former shop; Weight Watchers International, billing $4,000,000; Foodways National; Sherwin-Williams (stores division), billing $4,000,000, from Foote, Cone & Belding; CBS (agency of record for all print advertising); Hershey's Y&S Candies division; Stroh's Goebel golden lager; Clairol's Sea Breeze skin antiseptic; VW Distributors mid-America region; Porsche-Audi's mid-America, eastern and Atlantic regions; GTE Telenet; GTE Viewdata; GTE Telecommunications Systems Group; Celanese Chemical, and the new Jetta and Rabbit convertible (VW). It lost Levy's bread and Avianca.

Overseas, the agency gained IBM (Australia, Formica (Europe), ITT (Belgium), Reckitt & Colman (France), Polaroid (Asia) Tuborg beer (West Germany) and numerous other business in international markets. Its overseas losses: Henry Jones (Australia), Volkswagen (Switzerland), J.B.Williams Co. (Canada), Bristol Myers (France) among others.

Billings breakdown: Newspapers 8%, magazines 24%, radio/tv 55%, direct mail 3%, production 9%, other 1%.

The agency has 2,000 employes in 24 offices, including 1,300 in eight U.S. offices. A year ago it had 1,905 employes, but it did not break down the total.

William Esty Co.

Gross Income	1979	1978
U.S.	$45,600,000	$41,250,000
Total	$45,600,000	$41,250,000

William Esty Co., New York, reported gross income of $45,600,000 on 1979 billings of $304,000,000. Its 1978 gross income was $41,250,000 on billings of $275,000,000.

The agency's 1979 volume included $276,000,000 in media and $28,000,000 in materials and services. Its 1978 volume included $252,000,000 in media and $23,000,000 in materials and services.

The agency last December gained the over-$40,000,000 Winston cigaret account which R.J. Reynolds Tobacco removed from Dancer-Fitzgerald-Sample in one of the most-publicized account shifts of the year. At the same time, Esty gave up RJR's $30,000,000-plus Camel cigaret line to BBDO. Other account gains included Colgate-Palmolive's Fab liquid, Noxell's Lestoil rug shampoo, Magnavox videodiscs, American Home Products' Dristan AF tablets, Genesee 12 Horse ale, Nabisco's Wheatsworth crackers and Schick Super II Ultrex razor.

The agency also lost Swift & Co. (processed meats), billing $8,500,000, to Grey Advertising.

Billings breakdown: Newspapers 6%, magazines 13%, supplements 5%, radio 8%, tv 59%, outdoor 7%, business press 0.5%, farm press 0.5%, transit 0.5%, p.o.p. 0.5%. The agency has 597 employes in two offices; a year ago it had 584 in two offices.

Foote, Cone & Belding

Gross Income	1979	1978
U.S.	$95,943,000	$75,675,000
International....	41,704,000	35,347,000
Total	$137,647,000	$111,022,000

Foote, Cone & Belding Communications, Chicago, reported gross income of $137,647,000 on 1979 billings of $918,108,000. Its 1978 gross income was $111,022,000 on billings of $740,517,000.

The agency's 1979 U.S. volume was $639,939,000. That figure is estimated to have included $500,000,000 in media, $50,000,000 in materials and services and $89,939,000 in capitalized fees. In 1978, the agency's U.S. volume was $504,752,000. That figure is estimated to have included $390,752,000 in media, $30,000,000 in materials and services and $84,000,000 in capitalized fees. The agency reported foreign volume of $278,169,000 in 1979 and $235,765,000 in 1978. It did not break down those figures.

FCB's figures include the billings and gross income of the following advertising subsidiaries: Jennings & Thompson/FCB, Phoenix; Aitkin-Kynett, Philadelphia; Albert Frank/FCB and

WE COUNT...

BIG APPLE

When you're selling in the #1 market, Bergen counts! It's the only New Jersey county in the New York SMSA, but Bergen has the best slice of the big apple's market.

For example: Bergen has the highest median household Effective Buying Income in the New York SMSA! What's more, Bergen tops Nassau and Fairfield too!

Sure Bergen's population is only 9.3% of the big apple, but count Bergen in for 12% of the EBI, and 12.9% of total retail sales. And in the New York suburbs, 45 cents of every retail dollar is spent in Bergen!

When you buy the #1 market, put The Record on your schedule. The Record has more circulation in Bergen County — daily or Sunday — than all the New York City and Newark newspapers combined. And that counts too!

Agencies with gross income over $15,000,000

(Continued from Page 24)

Wahlstrom & Co., Stamford, Conn.

FCB last year gained the entire British Airways account internationally, billing about $30,000,000; previously, it had handled only the $9,000,000 United Kingdom portion of the account. Other gains included Life Savers' Bubble Yum gum, billing $6,000,000, and resigned by BBDO; Borg-Warner Corp. (Bolens lawn and garden equipment), billing $4,000,000; Atlantic Richfield petroleum products; Adolph Coors Co. (new products and corporate), and Amana Refrigeration, billing $9,000,000, from Grey-North, Chicago. It also gained several new assignments from existing clients, including Sears, S.C. Johnson, Plough and Frito-Lay among others. It lost Sherwin-Williams, billing $4,000,000, to Doyle Dane Bernbach; Equitable (insurance); Speed Queen washers and dryers; Pedro Domecq wines and Jenn-Air grills and ranges.

Its major overseas gains, numbering over two dozen, included Gillette (France) Moulinex (Copenhagen), Burger Boy (Mexico), General Mills toys (United Kingdom), GFG Textiles and Cinzano (both Italy), Agfa film (Sweden). Its major overseas losses included Nicco Werke (Germany), Barclays Bank (South Africa), Pizza Hut (Australia), Hellmann's mayonnaise (Mexico) and Bombril (Brazil).

Billings breakdown: Newspapers 11.1%, magazines 20.1%, supplements 2.6%, radio 5.6%, tv 55.8%, outdoor 4.8%. FCB has 3,470 employes in 33 offices, including 2,210 in 9 U.S. offices. A year ago, the agency had 3,293 employes in 31 offices, including 2,024 in nine U.S. offices. The employes of Carl Byoir & Associates, an FCB pr subsidiary with 18 offices worldwide, are not included in the totals.

Grey Advertising

Gross Income	1979	1978
U.S.	$ 74,700,000	$65,200,000
International	31,600,000	25,100,000
Total	$106,300,000	$90,300,000

Grey Advertising, New York, is estimated to have had 1979 gross income of $106,300,000 on estimated billings of $710,000,000. It reported 1978 gross income of $90,300,000 on billings of $602,000,000.

AA estimated Grey's 1979 performance because the agency adopted a formula which includes the total income and billings of overseas agencies, several of which it does not own 100%. AA's income report specified that agencies adhere to an equity formula in determining overseas income and billings. The figures for 1979 supplied by Grey were: Gross income of $142,700,000 on billings of $951,300,000, which included $63,300,000 in foreign gross income and $453,000,000 in foreign volume.

The agency's 1979 U.S. volume of $498,300,000, included $471,300,000 in media and $27,000,000 in materials and services. The agency's 1978 U.S. volume of $434,700,000 included $410.700,000 in media, and $24,000,000 in materials and services.

Grey's 1979 foreign volume is estimated at $211,700,000. It reported 1978 volume foreign of $167,300,000.

The agency last year gained Swift & Co., billing $8,500,000, from William Esty Co.; Congoleum Corp.; Shearson Loeb Rhoades; Thompson Medical Co.; BSR (USA) Ltd.; Elaine Powers Figure Salons; General Foods (cereals), billing $3,000,000, from Benton & Bowles; Bristol-Myers' Drackett division (Windex and Behold), billing $6,500,000, resigned by Young & Rubicam; Borden Cremora and Eagle brands; H.J. Heinz (Homestyle gravy), and ABC (theatrical movies on tv). Other Grey units and their account gains: Grey-North added Venture Stores and CUNA Mutual Insurance Group; Grey-Western, James B. Lansing Sound and Alpine Electronics; Grey 2 added American Cyanamid, Central Savings Bank and *Ladies' Home Journal*, and Grey Medical added E.R. Squibb, Thompson Medical, Johnson & Johnson, Bausch & Lomb and SmithKline. Grey reported losing no accounts in 1979; Grey-North lost Amana (billing $9,000,000), and Grey Western, American Honda's motorcycle division.

Overseas, the major accounts gains were General Foods and Procter & Gamble in Chile; International Playtex (United Kingdom); Seagram (Japan and Italy); Airwick (Japan); Braniff (France); General Mills (France), and Carnation (United Kingdom). Major accounts lost: Holt-Lloyd (Holland) and ICI (United Kingdom).

Billings breakdown: Newspapers 6%, magazines 14%, radio 3%, tv 76%, outdoor 1%. The agency has 3,079 employes in 39 offices, including 1,482 in 6 U.S. offices. A year ago, the agency had 2,890 employes in 31 offices, including 1,440 in 6 U.S. offices.

KM&G International

Gross Income	1979	1978
U.S.	$30,220,000	$24,473,000
International	7,500,000*	6,550,000*T
Total	$37,720,000*	$31,023,000*T

*Estimated by AA.
T Restated.

KM&G International, Pittsburgh, is estimated to have had 1979 gross income of $37,720,000 on estimated billings of $245,100,000. Its 1978 gross was estimated at $31,023,000 on estimated billings of $195,321,000.

AA estimated the agency's foreign income and billings for both 1979 and 1978 since agency-supplied figures represented 100% of the billings and income of its overseas subsidiaries. AA revised the overseas figures on the basis of previous published reports listing the percentage of ownership KM&G has in those subsidiaries. The agency supplied the following figures: 1979 gross income of $40,622,000 on billings of $271,000,000, including $69,400,000 in overseas volume, and 1978 gross income of $32,989,000 on billings of $223,600,000, including $60,400,000 in overseas volume.

The agency's U.S. volume of $201,600,000 included $145,200,000 in media, $18,700,000 in materials and services and $37,700,000 in capitalized fees. Its 1978 U.S. volume of $163,200,000 included $117,500,000 in media, $17,100,000 in materials and services and $28,600,000 in capitalized fees. AA estimates KM&G had overseas billings (based on a percentage of ownership) of $43,500,000 in 1979 and $32,121,000 in 1978.

KM&G and its U.S. subsidiaries gained over 20 accounts including Shasta Beverages, billing $8,000,000, which moved to Botsford Ketchum from Hoefer, Dieterich + Brown; H.G. Park Inc. (sausages); Pillsbury Co. (flours, brownie mixes, new products); Ore-Ida Foods (frozen desserts, new products); Commonwealth of Pennsylvania (bureau of travel development); Randall's Supermarkets (Texas chain), American Chain & Cable, Smith Kline Instruments and California Raisin Advisory Board. It lost 11 accounts, including Kauffinan's de-

86 Proof Scotch Whisky. Distilled, blended and bottled in Scotland. Imported by Monsieur Henri Wines, Ltd., New York, N.Y.

Photographed in the Cafe Royal, Edinburgh, Scotland.

WHY THE SCOTS DRINK MORE BELL'S THAN ANY OTHER SCOTCH.

Because Bell's is blended with a high percentage of malt whiskies, which give a true "Scotch" Scotch taste.

Because a precise amount of the Bell's blend is matured in sherry casks, to give a mellow taste.

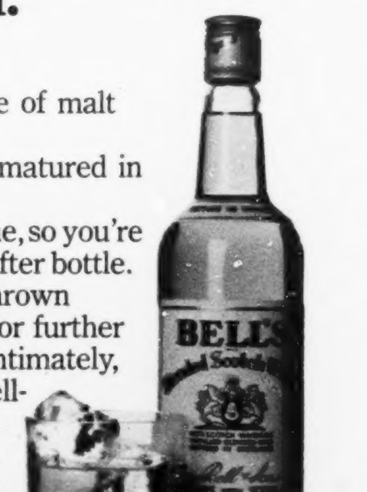
Because we use a *two-step* blending process, not one, so you're doubly assured of smoothness, time after time, bottle after bottle.

And because the blends in Bell's aren't merely thrown together and bottled, but are "married" in oak casks for further aging so they have time to get to know each other intimately, comfortably. That's why Bell's has such a mature, well-rounded taste.

The Scots are known to appreciate the taste of a great Scotch. And that's exactly why they drink more Bell's than any other Scotch in Scotland.

Taste.

Bell's. The best selling Scotch in Scotland.



Agencies with gross income over $15,000,000

(Continued from Page 28)

partment stores, Westinghouse Defense Systems, Clopay Corp., CBS Publications and Paradise Island. Its account gains overseas included Miro-Meccano, Carlsberg beer, Zanussi Products, Poulain chocolate, Montblanc pens.

Billings breakdown: Newspapers 9.5%, magazines 18.2%, radio 8.7%, tv 47.6%, outdoor 1.7%, trade papers 14.3%. The agency has 1,074 employes in 13 offices, including 804 in seven U.S. offices. A year ago it had 965 employes in 10 offices, including 776 in five U.S. offices.

Keller-Crescent

Gross Income	1979	1978
U.S.	$16,163,000	$13,925,725
Total	$16,163,000	$13,925,725

Keller-Crescent, Evansville, Ind., reported gross income of $16,163,000 on 1979 billings of $85,325,000. Its 1978 gross income was $13,925,725 on billings of $80,255,000.

The agency's 1979 volume included $21,686,000 in media, $21,985,000 in materials and services and $41,654,000 in capitalized fees. Its 1978 volume of $80,255,000 included $20,207,000 in media, $20,588,000 in materials and services and $39,460,000 in capitalized fees.

Keller-Crescent last year gained Arkla Industries, Bucyrus-Erie, Ever-Fresh Doughnut, Koehring Atomaster, Norge Co., Ohio Art Co., Analytic Equipment Co., Berwind Instrument Group, Decorating Den Systems, Great American Basic Commodities, Horizon Inc., Mallory Timers Co., Possum Trot Co., American Tredex Corp., Holiday Rambler Corp., Indiana Dept. of Commerce, Morganfield (Ky.) National Bank, Wickes Corp.'s Yorktowne division, Safeguard Engine Parts, Karl Schmidt Corp., Country Garden Mfg., Boye Needle Co., Innovator Associates.

The agency lost Addressograph-Multigraph, Merchants National Bank and Pyroil Co.

Billings breakdown: Newspapers 7.5%, magazines 8.3%, radio 4%, tv 39%, outdoor 3%, business press 8%, collateral 24.5%, other 5.7%. The agency has 590 employes in one office; a year ago it had 605 employes in two offices.

Kenyon & Eckhardt

Gross Income	1979	1978
U.S.	$33,481,698	$26,738,000
International....	25,750,000	15,000,000
Total	$49,231,698	$41,738,000

Kenyon & Eckhardt, New York, reported gross income of $49,231,698 on 1979 billings of $328,322,926. Its 1978 gross income was $41,738,000 on billings of $278,342,000.

The agency's 1979 U.S. volume of $223,322,926 included $188,317,465 in media, $19,591,424 in materials and services and $15,414,037 in capitalized fees. Its 1978 U.S. volume of $178,342,000 included $149,387,530 in media, $21,137,230 in materials and services and $7,817,240 in capitalized fees. The company reported foreign billings of $105,000,000 in 1979 and $100,000,000 in 1978 but it did not break down those figures. Results include the subsidiary, Bill Winn Productions Inc.

In the biggest U.S. account move in history, Kenyon & Eckhardt was named in 1979 to succeed Young & Rubicam and BBDO on the Chrysler Corp. automotive business which billed about $120,000,000 in 1978. In accepting the business, K&E resigned as agency for the $65,000,000 Lincoln-Mercury account and Ford Motor Co. corporate, billing $10,000,000. Y&R subsequently gained Lincoln-Mercury and Wells, Rich, Greene landed Ford corporate.

GOOD NEWS FOR PEOPLE 7'2" AND UNDER.
VOLKSWAGEN DOES IT AGAIN

Doyle Dane Bernbach Inc., New York, prepared this ad for Volkswagen.

Other U.S. account gains included Bristol-Myers' Excedrin, billing $10,500,000, from Y&R; Travel Network, Quaker State Rust Protection, New England Automated Clearinghouse, Timex Clock division, Prime Computer Inc., A.M. International's Infortex division, and Wells Lamont Corp. Its U.S. losses included Pabst Extra Light to Ogilvy & Mather/San Francisco and Kyoto Steak House. Overseas, it gained 28 new assignments, including Alisarda Airlines in France; Dryborough beer (United Kingdom); Bulgari (Switzerland); Nestle and Chesebrough-Pond's (West Germany); Estee Lauder (Middle East); Braniff Airlines (Hong Kong and Singapore), and Sasetru Foods (Argentina). Its eight overseas losses included Ford trucks (U.K.), Seagram (West Germany), Rolex (Hong Kong), Yardley (Thailand).

Billings breakdown: Newspapers 7%, magazines 12%, radio 11%, tv 65%, transit 5%. The agency has 2,182 employes in 68 offices, including 696 in 14 U.S. offices. A year ago it had 2,600 people in 62 offices, including 511 in eight U.S. offices.

Marschalk Co.

Gross Income	1979	1978
U.S.	$16,637,000	$14,382,000
Total	$16,637,000	$14,382,000

Marschalk Co., New York, a member of the Interpublic Group of Cos., reported gross income of $16,637,000 on 1979 billings of $110,969,000. Its 1978 gross income was $14,382,000 on billings of $95,928,000. (See McCann-Erickson income report for Interpublic's over-all results.)

The agency's 1979 volume is estimated to have included $66,000,000 in media, $21,000,000 in materials and services and $23,969,000 in capitalized fees. Its 1978 volume was estimated to include $54,000,000 in media, $18,000,000 in materials and services and $23,928,000 in capitalized fees.

THE MOST
WANTED
MAN IN KANSAS CITY!

MARK "MAD DOG" McCONE
a.k.a. PVC First Shift Editor

This nefarious ne'er-do-well is wanted by a long list of clients in several states for cutting, killing, wiping, taking and cheating. His most recent criminal record includes serving back-time in the can (film-chain gang) for taking group shots. He has since been at large after overpowering a guard band, securing his chroma key and escaping through the open gen lock. Anyone coming in contact with this person should consider him laid-back and harmless, but put a CVS Epic in his hands, and watch the frames fall.

If spotted, contact:
JIM GENTRY, MANAGING DIRECTOR
2450 Grand, Suite 400, Kansas City, MO 64108 816/274-8335
A subsidiary of Hallmark Cards, Inc.

PRODUCERS VIDEO CENTER

Agencies with gross income over $15,000,000

(Continued from Page 32)

The agency has 276 employes, compared with 268 a year ago.

Marsteller Inc.

Gross Income	1979	1978
U.S.	$37,767,900	$32,894,200
International	16,575,400	13,009,200
Total	$54,343,300*	$45,903,400*

*Fiscal year ended Sept. 30.

Marsteller Inc., New York, reported gross income of $54,343,300 on 1979 total billings of $362,468,000. The agency, acquired by Young & Rubicam last October, had 1978 gross income of $45,903,400 on total billings of $306,175,700.

The agency's 1979 U.S. volume of $251,913,000 was not broken down but AA estimated it to include $140,500,000 in media, $50,200,000 in materials and services and $61,213,000 in capitalized fees. Its 1978 U.S. volume of $219,404,300 is estimated to have included $130,200,000 in media, $40,100,000 in materials and services and $49,104,300 in capitalized fees. It reported foreign volume of $110,555,000 in 1979 and $86,771,400 in 1978.

Marsteller last year gained Home Insurance Co., Ethyl Corp., J. Ray McDermott & Co., Arthur Andersen Co., Colonial Penn Franklin Insurance Co., Playboy Book Club, Source Securities, Northern Telecom Systems Corp., Wheelabrator-Frye Inc., Peartree Imports, Salant Corp. (Thompson division), Seaman's Furniture Co., National Assn. of Realtors, American Home Shield, Farr Co., ARCO/Polymers Inc., Pittsburgh Brewing Co., PPG Industries' chemical group, Grumman Aerospace Corp., and New York City Business Marketing Group.

Accounts lost or resigned last year included Ashland Oil Inc., Columbia Pictures Industries, Ingersoll-Rand Co., Massey Ferguson, Sycor, Eriz Magnetics, Northwest Industries' Fruit of the Loom division, Chicago Board of Trade.

The agency also did not supply a breakdown of its billings for 1979 or 1978. At the close of its fiscal year last Sept. 30, Marsteller had 1,405 employes, including 954 in the U.S. A year ago it had 1,227 employes, including 824 in the U.S.

McCaffrey & McCall

Gross Income	1979	1978
U.S.	$16,805,000	$12,800,000
Total	$16,805,000	$12,800,000

McCaffrey & McCall, New York, reported gross income of $16,805,000 on 1979 media billings of $115,100,000. Its 1978 gross income was $12,800,000 on media billings of $102,200,000.

McCaffrey gained Air Canada, Mercedes-Benz of North America and St. Joe Minerals Corp. It lost Norman M. Morris Corp. (Omega watches) and the *National Enquirer*, both accounts it had added the year earlier.

Billings breakdown: Newspapers 12%, magazines 30%, radio 3%, tv 42%, outdoor 3%, other 10%. McCaffrey has 290 employes in one office; up from 238 a year ago.

McCann-Erickson

Gross Income	1979	1978
U.S.	$ 69,446,000	$ 59,610,000
International	180,980,000	151,433,000
Total	$250,426,000	$211,043,000

McCann-Erickson Worldwide, a member of the Interpublic Group of Cos., reported gross income of $256,426,000 on 1979 billings of $1,670,341,000. Its 1978 gross was $211,043,000 on billings of $1,407,120,000.

Interpublic, whose other units include SSC&B, Campbell-Ewald and Marschalk Co., had a total gross income of $384,685,000 on 1979 billings of $2,565,959,000. That total includes 49% of the gross income of SSC&B for the last four months of 1979 and 100% of SSC&B's gross for the same period. The SSC&B acquisition last September was the largest in history. Interpublic's 1978 gross was $302,315,000 on billings of $2,016,213,000.

McCann-Erickson's U.S. billings of $463,205,000 in 1979 are estimated to have included $320,000,000 in media, $77,000,000 in materials and services and $66,205,000 in capitalized fees.

In 1978, McCann's U.S. volume of $397,062,000 is estimated to have included $295,000,000 in media, $62,000,000 in materials and services and $40,062,000 in capitalized fees.

McCann reported 1979 foreign billings of $1,207,136,000, compared with $1,010,058,000 in 1978.

The agency last year gained Pabst Brewing Co., billing $20,000,000 from Young & Rubicam; Western Airlines, billing $12,500,000; Jeno's frozen pizza, billing $3,000,000; Straw Hat Restaurants (Los Angeles); Gillette Co.'s Atra razor, billing $8,000,000, from J. Walter Thompson Co.; Micom Data Systems; Levi Strauss' Activewear division, billing $2,000,000; Quebec Ministry of Tourism; Knoxville International Energy Expo; Heublein spirits group (Don Q rum, Lancers wine, Club cocktails, new products); Continental Telephone Marketing Group; American Express Gold Card, billing $8,000,000, from Ogilvy & Mather; Abbott Labs (Selsun Blue shampoo), billing $5,000,000, and Aderan of America Wigs.

The agency lost Miller Brewing, billing $85,000,000, to Backer & Spielvogel; CPC International's Best Foods division; Hitachi; Mirro Corp. Rollins Protective Services, and Combe Inc.

McCann's overseas account gains in 1979 included American Express, Deutsche Bank, Foodcorp Restaurants, Gillette Atra razor, Kentucky Fried Chicken (United Kingdom), Levi Strauss (five countries), Nestle (Chile), Quebec Tourism (Canada, U.K.) and Unilever Foods (Spain, Finland, Colombia).

Its overseas losses: Hot Point (U.K.), Noris Bank (West Germany) and Watson the Wine Merchant (Hong Kong).

McCann-Erickson has 5,863 employes, including 1,241 in the U.S.

Agencies with gross income over $15,000,000

(Continued from Page 34)

A year ago it had 5,555 employes, including 1,159 in the U.S.

Nationwide Advertising Service

Gross Income	1979	1978
U.S.	$16,660,781	$10,870,034
International	1,572,553	901,229
Total	$18,233,334	$11,771,263

Nationwide Advertising Service, Cleveland, an agency specializing in recruitment advertising, reported gross income of $18,233,334 on 1979 billings of $69,807,588. Its 1978 gross income was $11,771,263 on billings of $51,960,316. It reported 1979 net income of $3,919,657 and 1978 net income of $2,472,205.

Domestic volume in 1979 and 1978 was all in media. The agency reported international volume last year of $6,426,676, compared with $3,879,985 in 1978.

The agency last year gained American Airlines and Grace Petroleum in the U.S. It reported no domestic account losses last year.

Billings breakdown: Newspapers 88%, magazines 11%, radio 1%. The agency has 240 employes in 30 offices, including 195 in 23 U.S. offices. A year ago it had 220 people in 29 offices, including 189 in 24 U.S. offices.

Needham, Harper & Steers

Gross Income	1979	1978
U.S.	$41,000,000	$38,100,000
International	9,400,000	8,900,000
Total	$50,400,000	$47,000,000

Needham, Harper & Steers, New York, reported gross income of $50,400,000 on 1979 billings of $336,200,000. The agency's 1978 gross income was $47,000,000 on billings of $315,000,000.

The agency's 1979 U.S. volume of $273,600,000 included $195,300,000 in media, $38,100,000 in materials and services and $40,200,000 in capitalized fees. Its 1978 U.S. volume of $254,100,000 included $190,000,000 in media, $40,000,000 in materials and services and $24,100,000 in capitalized fees. Included in its results are billings of two U.S. subsidiaries, Deltacom and Tactical Advertising Group.

Needham, Harper's 1979 overseas volume of $62,600,000 included $60,400,000 in media and $2,200,000 in capitalized fees. Its 1978 overseas volume of $60,900,000 included $59,000,000 in media and $1,900,000 in capitalized fees.

Last October, NH&S acquired a substantial minority in a London agency, Bellamy, Nicholson, Reeves & Robertshaw (billing about $9,000,000) and set up a Far East holding company, Needham Standard Advertising Far East Ltd., Hong Kong, as part of an expansion plan in that area of the world. The London shop is now BNRR/Needham.

Accounts gained in the U.S. last year: Armour-Dial Co., billing $6,000,000, from Foote, Cone & Belding; Charles of the Ritz Group Ltd., billing about $1,000,000, from Kurtz & Tarlow; Gas Appliance Mfrs. Assn., billing $3,000,000, from Wallace-Wemberly-Destiche; U.S. Dept. of Agriculture's food and nutrition service, First International Services Corp.; Drackett Co., and American International Group Inc. The agency's U.S. losses included C.F. Mueller Co., billing $1,500,000; French Government Tourist Office; Lancome Cosmair; Visa U.S.A. Squirtco, Winston Tire Co.

Billings breakdown: Newspapers 5.8%, magazines 18.1%, supplements 0.6%, radio 4%, tv 65.5%, outdoor 0.3%, business press 4.9%, transit 0.1%, other 0.7%. The agency has 1,382 employes in 26 offices, including 844 in six U.S. offices. A year ago it had 1,358 employes in 20 offices, including 916, in five U.S. offices.

Ogilvy & Mather International

Gross income	1979	1978*
U.S.	$106,766,000	$ 89,783,000
International	99,453,000	78,606,000
Total	$206,219,000	$168,389,000

* Revised. See below for explanation

Ogilvy & Mather International, New York, reported gross income of $206,219,000 on 1979 billings of $1,392,591,000. Its 1978 gross income was $168,389,000 on billings of $1,131,855,000.

The agency's 1979 U.S. volume was $712,129,000. Although not broken down by the agency, volume is estimated to have included $568,129,000 in media and $144,000,000 in materials and services. Its 1978 U.S. volume of $598,853,000 is estimated to have included $480,853,000 in billings and $118,000,000 in materials and services. Ogilvy's foreign volume in 1979 was $680,462,000; in 1978, it was $533,002,000. The 1978 gross income and billings of the agency have been revised to include the figures of its U.S. subsidiaries not reflected in last year's report.

The company's U.S. subsidiaries include Ogilvy & Mather/2, Ogilvy & Mather Direct Response, Sussman & Sugar, Schiller, Ogilvy & Mather, Van Melick/Barrus (Houston) and Scali, McCabe, Sloves.

The agency last year gained Trans World Airlines, billing $30,000,000, after it was resigned by Wells, Rich, Greene; Kimberly-Clark diapers, billing $3,500,000; Smith Barney, Harris & Upham, billing $4,000,000; C. F. In Philadelphia, The Bulletin last year delivered more daily display advertising than any other newspaper: 23,972,999 lines!

National and retail advertisers overwhelmingly chose The Bulletin in 1979 to get their sales messages across to the daily newspaper readers in the Greater Philadelphia area.

They ran 23,972,999 lines in The Bulletin — a total of 5,920,192 more lines than they ran in the Inquirer.

That's a ratio of 57% for the Bulletin versus only 43% for the Inquirer.

Advertisers know that The Bulletin's daily circulation leadership means sales leadership for their products and services.

The more you reach, the better you sell.

Part-run advertisers know that The Bulletin's localized editions give them an exclusive weapon for reaching their prime prospects.

The more you target, the better you sell.

And, finally, for our nearly 1,500,000 daily readers The Bulletin's 1979 advertising dominance means better selection, better comparisons and more price options.

The more you know, the better you shop.

In the Greater Philadelphia area, The Bulletin delivers for its advertisers. And for its readers.

"Keep on delivering, Bulletin. That's why you're Number One."

Agencies with gross income over $15,000,000

(Continued from Page 38)

$74,000,000 in media, $27,000,000 in materials and services and $66,000,000 in capitalized fees.

Ross Roy last year gained International Paper Co. (merchandising), La-Z-Boy and Comshare Corp.

Billings breakdown: Newspapers 9%, magazines 18%, radio 24%, tv 48%, outdoor 1%. The agency has 467 employes in seven offices, including 454 in six U.S. offices. A year ago it had 511 people in 10 offices, including 497 in eight U.S. offices.

SSC&B Inc.

Gross Income	1979	1978
U.S.	$ 33,341,000	$ 31,055,000*
International	119,825,000	102,013,000*
Total	$153,166,000	$133,068,000*

* Restated. Explanation below.

SSC&B Inc., New York, reported gross income of $153,166,000 on 1979 billings of $1,021,614,000. Its 1978 gross income was $133,068,000 on billings of $887,567,000.

Last September, the largest agency acquisition in history occurred when SSC&B (including its 49% acquisition investment in SSC&B Lintas) became a member of the Interpublic Group of Cos.

Interpublic, whose other units include McCann-Erickson, Campbell-Ewald and Marschalk Co., had a combined gross income of $384,685,000 in 1979 on billings of $2,565,959,000. That total includes 49% of the gross income of SSC&B Lintas for the last four months of 1979 and 100% of SSC&B's gross for the same period. Unilever has the remaining 51% in SSC&B Lintas which Interpublic is expected to acquire sometime before the end of 1981. Interpublic's 1978 gross was $302,315,000 on billings of $2,016,213,000.

The 1979 and 1978 figures of Erwin Wasey Inc., an Interpublic unit which merged with SSC&B last year, are included in SSC&B's totals for both years. Excluding Erwin Wasey, SSC&B's 1978 figures were gross income of $127,900,000 on billings of $840,502,000, including foreign gross of $100,857,000 and foreign billings of $664,602,000.

SSC&B (including Erwin Wasey) had 1979 U.S. volume of $222,381,000. That total is estimated to have included $202,000,000 in media, $18,000,000 in materials and services and $2,381,000 in capitalized fees. The U.S. volume of SSC&B alone in 1978 was $175,900,000, including $160,200,000 in media, $15,000,000 in materials and services and $7,000,000 in capitalized fees. In 1978, Erwin Wasey reported gross income of $4,683,000 on capitalized billings of $31,236,000.

SSC&B's foreign volume, through SSC&B Lintas, was $799,233,000 in 1979 and $680,428,000 in 1978.

SSC&B last year gained Dun & Bradstreet and Mennen Co. It lost no accounts. Overseas, SSC&B Lintas gained Domesos in five countries; I.C.I. in three countries; Johnson & Johnson (Greece), Dr. Hahn (West Germany) and Remy Martin (Spain and Singapore). It did not report any account losses.

SSC&B has 3,188 employes, including 545 in the U.S. A year ago, it had 3,236 people, including 445 in the U.S.

J. Walter Thompson Co.

Gross Income	1979	1978
U.S.	$118,204,000	$107,170,000
International	135,677,000	144,300,000
Total	$253,881,000	$221,470,000

J. Walter Thompson Co., New York, reported gross income of $253,881,000 on 1979 billings of $1,693,000,000. Its 1978 gross income was $221,470,000 on billings of $1,476,000,000.

The agency's 1979 U.S. volume of $788,000,000 included $610,898,000 in media, $75,570,000 in materials and services and $101,532,000 in capitalized fees. Its 1978 U.S. volume of $710,000,000 included $560,386,000 in media, $68,463,000 in materials and services and $81,151,000 in capitalized fees.

JWT's foreign billings in 1979 were $905,000,000, compared with $766,000,000 in 1978.

JWT's account gains last year included S.C. Johnson & Son (Edge, Pledge, Favor, Step Saver), billing $9,000,000; Entenmann's (Warner-Lambert); Rollins Protective Services; Banana Bunch Sponsors; Sunbanks of Florida; Chemical Mfrs. Assn.; IBM (corporate print); and Wometco Home Theatre. It was also reappointed by the U.S. Marine Corps for its $10,000,000 account. Its U.S. account losses last year included Gillette Co., billing $25,000,000; Congoleum Corp., billing $4,000,000, which moved to Grey Advertising, and STP Corp., billing $7,000,000, now at Henderson Advertising.

During 1979, J. Walter Thompson Co. gained 296 new clients worldwide, as well as 330 new assignments from existing clients. After its parting with Gillette in the U.S., the agency was given additional overseas assignments in the shaving field by Warner-Lambert.

The agency last year acquired ED-95, a Dutch agency specializing in pharmaceutical and medical products; Yeoward Taylor & Bonner, London; World Wide Agency, Los Angeles, an agency specializing in recruitment advertising, and formed a new company, MRB International, after merging three of the United KIngdom's leading research agencies. In January of this year, it announced an agreement in principle to acquire Hill & Knowlton, the world's largest pr agency, and also agreed to acquire a majority interest in the Euro-Advertising agencies located in Bologna/Milan, Duesseldorf, London and Paris, whose combined billings were about $100,000,000 in 1979.

Billings breakdown: Newspapers 6.8%, magazines 12.9%, radio 5.4%, tv 54.7%, outdoor 1.6%, business press 2.9%, p.o.p. 1.8%, direct mail 0.6%, other 13.3%. The agency has over 6,200 employes in 67 offices. A year ago it had 5,835 people in 62 offices.

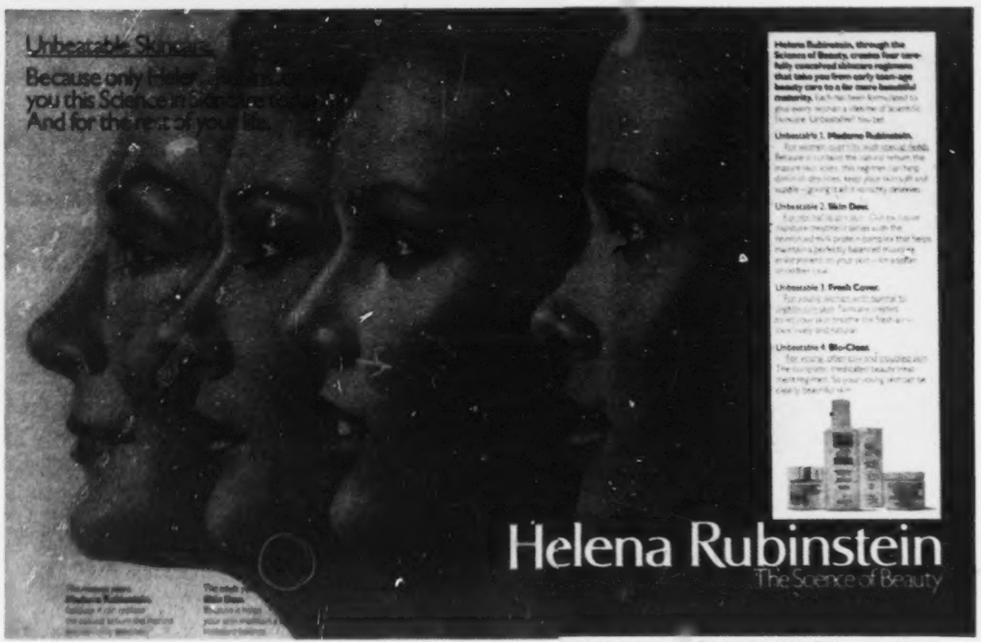
Tracy-Locke

Gross Income	1979	1978
U.S.	$15,520,700	$12,732,000
Total	$15,520,700	$12,732,000

Tracy-Locke, Dallas, reported gross income of $15,520,700 on 1979 billings of $110,367,100. Its 1978 gross income was $12,732,000 on billings of $90,587,000.

The agency's 1979 volume included $69,629,600 in media, $14,854,600 in materials and services and $25,882,900 in capitalized fees. Its 1978 volume included $55,555,700 in media, $11,866,300 in materials and services and $23,165,000 in capitalized fees.

Tracy-Locke last year gained Shasta Beverages (Capri Sun soft drink), AT&T Long Lines, Casa-Blanca Fan Co., American Home Video Corp., American TV & Communications Corp., Public Service Co. of Colorado, Multiple Allied Services Inc. and Denver Regional Transportation District. It lost Borden dairy and services account, billing about $5,000,000, to Della Femina, Travisano & Partners; Bama Food Products; Southern Union Gas Co.; Glaston Boat Co., and Aspen Skiing Corp.



Kenyon & Eckhardt Advertising, New York, prepared this ad for Helena Rubinstein's Skincare line.

Billings breakdown: Newspapers 9%, magazines 8%, radio 9%, tv 68%, outdoor 1%, business press 3%, p.o.p. 1%, direct mail 1%. The agency has 349 employes in three offices; a year ago it had 308 in three offices.

Wells, Rich, Greene

Gross Income	1979	1978
U.S.	$55,270,000	$44,052,000
International	1,347,000	1,299,000
Total	$56,617,000	$45,351,000

Wells, Rich, Greene, New York, reported gross income of $56,617,000 on 1979 billings of $377,641,000. Its 1978 gross income was $45,351,000 on billings of $302,488,000.

The agency's 1979 U.S. volume of $368,655,000 included $279,657,000 in media, $29,090,000 in materials and services and $59,908,000 in capitalized fees. The agency's 1978 U.S. volume of $293,824,000 included $214,492,000 in media, $24,675,000 in materials and services and $54,657,000 in capitalized fees. Its 1979 foreign volume of $8,986,000 included $8,009,000 in media, $583,000 in materials and services and $394,000 in capitalized fees. Its 1978 foreign volume of $8,664,000 included $7,509,000 in media, $709,000 in materials and services and $446,000 in capitalized fees.

Included in the agency's figures are the billings and income of Gardner Advertising, St. Louis; WRG/Gordon Luceno & Ranson, Dallas, and WRG/Townsend, Newport Beach, Cal., the latter agency being formed with the merger of WRG and the former Townsend & Associates last year when WRG gained Townsend's $18,000,000 Century 21 account.

In addition to Century 21, WRG gained Braniff Airlines, billing $18,000,000, when it merged with Gordon & Shortt; Ford Motor Co. (corporate); Ralston Purina's Butcher's Blend dog food; Diners Club, Citizen Watch Co., Procter & Gamble's Prell concentrate, billing $3,500,000, from Benton & Bowles; McGraw-Edison; Dallas Market Center Northwestern Trust; Continental Bank; Univance Career Centers; J. C. Penney Co.'s Great American Life Insurance and Handy Dandy Home Improvement Centers. Gardner Advertising gained Dad's root beer, Bubble Up and Dazey.

International Total

Billings and income claimed for foreign affiliates should be based on the parent's percentage of ownership. In cases where agencies own less than 100% of an overseas agency but claimed 100% of income billings, AA editors reduced the amounts claimed to match the percentage owned by the agency. This method is considered to be a fairer basis of comparison.

WRG last year resigned TWA, billing $30,000,000, in order to take Braniff. Other losses: King Cola, Ferrero USA (Tic Tac mints) billing $2,000,000, and *Us* magazine. Overseas, WRG gained Braniff International and Chaumet.

Billings breakdown: Newspapers 11%, magazines 16%, radio 5%, tv 62%, outdoor 6%. WRG and its subsidiaries have 961 employes, including 761 in eight WRG offices and 200 in three Gardner offices. A year ago, the agency and its subsidiaries had 671 employes, including 483 in two WRG offices and 188 in three Gardner offices.

Young & Rubicam

Gross Income	1979	1978
U.S.	$149,742,000	$118,089,000
International	97,853,000*	85,735,000
Total	$247,579,000*	$203,824,000

*AA estimate

Young & Rubicam, New York, is estimated by ADVERTISING AGE to have gross income of $247,579,000 on 1979 billings of $1,921,073,000. AA permitted the agency to claim 100% of Marsteller Inc.'s 1979 billings, but revised the parent agency's income total to reflect the last quarter of Marsteller's income in 1979 since the acquisition by Y&R took effect last Oct. 1.

The figures supplied by Y&R that reflect Marsteller's income for the full year were as follows: 1979 gross income of $288,017,000, including $173,533,000 in the U.S. and $114,484,000 overseas. In 1978, Y&R's gross income was $203,824,000 on billings of $1,359,506,000.

The agency's 1979 U.S. volume (including Marsteller) was $1,157,465,000. That figure was not broken down, but AA estimated that it included $745,000,000 in media, $261,000,000 in materials and services and $151,465,000 in capitalized fees. The agency's 1978 U.S. volume of $787,654,000 was estimated to have included $560,654,000 in media, $127,000,000 in materials and services and $100,000,000 in capitalized fees.

The agency's 1979 foreign volume (Marsteller included) was $763,608,000; its 1978 foreign volume was $571,852,000.

Also included in Y&R figures are the billings and gross income of the following subsidiaries: Wunderman, Ricotta & Kline; Sudler & Hennessey; Hutchins/Y&R; Sive Associates; Creswell, Munsell Schubert & Zirbel; Brewer Advertising; Rives, Smith, Baldwin & Carlberg; W. M. Zemp & Associates; Frye-Sills; Cato Johnson USA, and Stone & Adler.

Y&R last year gained Ford Motor Co.'s parts division and Lincoln-Mercury division, billing $65,000,000, after it had been fired as Chrysler's Chrysler/Plymouth division agency, billing about $55,000,000. The Chrysler account, as well as the company's $80,000,000 Dodge division account then at BBDO, were consolidated at Kenyon & Eckhardt, which resigned Ford and Lincoln-Mercury, in the biggest account shift in history. Other accounts gained by Y&R included Curtis Mathes Co., billing $1,000,000; West Bend Electric Co., billing $5,000,000; Jenn-Air Co., $2,000,000; Miller Brewing Co. (new products); Richardson-Merrell's Complete denture cleaner, billing $5,000,000; American Chicle's Certs breath candies, billing $10,000,000, and Ralph's Grocery Co. (supermarkets).

In addition to losing Chrysler, Y&R lost Pabst Brewing, billing $25,000,000; Sperry Rand (corporate), billing $5,000,000, to Scali, McCabe, Sloves; Arrow shirts, billing $1,600,000; General Electric major appliances, billing $14,000,000, and Uniroyal's Stride Rite division, billing under $1,000,000. It resigned $30,000,000 in Bristol-Myers billings.

Overseas, Y&R's account gains included Buxted Poultry Ltd. and K. Shoemakers Ltd. (England); Maison Phenix (France); Citibank (Italy); KVIKK (Norway); Estee Lauder (Austria); Brooke Bond (Canada); Johnson & Johnson (Argentina); Vergel Brandy Co. (Mexico); General Foods (Brazil); Simpson Pope (Australia).

Billings breakdown: Newspapers 9.3%, magazines 14.8%, supplements 0.6%, radio 4.6%, tv 51.5%, outdoor 1.3%, business press 5.5%, farm press 1%, transit 0.2%, p.o.p. 0.6%, direct mail 3.4%, other (cable, Yellow Pages, sales promotion, collateral) 7.2%. The agency has 6,250 employes in 96 offices, including 3,650 in 31 U.S. offices. A year ago it had 4,615 employes in 65 offices, including 2,550 in 25 U.S. offices.

COUPONS?

SMART MARKETERS FIND OUT WITH
THE MILWAUKEE JOURNAL
THE PERFECT TWO-IN-ONE
TEST MARKET

Marketing strategies don't have nine lives. That's why a leading pet food manufacturer looked to The Milwaukee Journal for the right footing!

The Journal delivered 10¢ and 15¢ versions of the same ad to geographically profiled markets — simultaneously! The client discovered each coupon offer's impact upon the Milwaukee market — a large, balanced test market ideal for tightly controlled experiments within one SMSA.

Marketing strengths and successes were located before the big national roll-out. The client saved money and formed a strategy sure to land on its feet!

Wally Just - The answer man! He'll help you find out more about your product, your customers and our advanced testing capabilities - from computer-assisted Target Marketing to simple A/B split-run advertising.

Target Marketing - The Journal's computerized method of splitting the coverage area into 58 separate market cells. You select your prospects by age, income and occupation - and target marketing will do the rest!

New mountain on the outside.
New taste on the inside.
Introducing a new Busch Beer. On the outside, there's a bold new label. On the inside, there's a brand new beer. Brighter. Smoother. More refreshing. Born of costly, natural ingredients and brewed the slow, cold natural way. So don't just reach for a beer.
Head for the mountains.

Needham, Harper & Steers, Chicago, is agency for Anheuser-Busch's Busch beer.

of the Green Bay ADI

Green Bay
APPLETON

The 4-county Appleton Metro Market is dominant in the ADI accounting for more than one third of the entire potential a far bigger share than Green Bay's.

The major ADI dailies, The Post-Crescent of Appleton, and the Green Bay Press-Gazette, deliver different segments of the ADI. More important to advertisers — the Post-Crescent delivers the biggest share by far.

AREN'T YOU MISSING SOMETHING?

The naked truth is if you aren't buying Tallahassee/Thomasville, you're missing a lot of exposure in the Florida and south Georgia market — 128,700 households (ARB '79). In fact, Tallahassee alone is ranked 37th in the nation in per household retail buying power.* Now that's a lot of scratch. And the Tallahassee/Thomasville market ranks 6th among the fastest growing metros in the country.**

WCTV is your best buy to reach this important market. Here are some bare facts. WCTV has been the number one station in this market for over 24 years, delivering a whopping 53% of the Tallahassee/Thomasville market (ARB Nov. '79). And WCTV has a wide reach of 48 counties in north Florida, south Georgia, and south Alabama as well. And we deliver an important youth market also. In our [illegible] home metro county, the average age is 24.4.*

So if you've got something to sell, expose yourself in the Tallahassee/Thomasville market with WCTV. The station with real coverage.

*Sales Marketing Management Survey—July, 1979

**Sales Marketing Management Survey—October, 1979

If you're not buying Tallahassee/Thomasville, you're missing a lot of Florida, south Georgia, and south Alabama.

When a man's into flying, he's

Ziff-Davis Network men are prime examples.

Whether they're touching down gently on a weed-patched strip, or mastering a tricky slope, or freezing a darting image on film… their intense involvement is a clear reflection of their need to get the most out of life. Now.

These are men who pursue performance and excellence, and willingly invest their money to achieve it. Not only in their leisure activities, but on all those quality products and services that add up to the good life.

For example if you bought Flying, Popular Photography and Skiing, you'd get a greater concentration of men who own an imported car, drank any wine in the past month or took a foreign air trip since 1973 than Playboy, Newsweek, Esquire, Time, Sport, Penthouse, Sports Illustrated or U.S. News.

To reach these upscale customers, the Network offers 99 combinations of three or more magazines with a total audience of 10 million men° who have what it takes to buy what you're selling; 72% are in the acquisitive 18-34 age group; 50% have

Now your sponsored film can reach hundreds of Cable TV systems - with an audience of millions - all at the same time.

Modern will send it to cable systems via satellite. Every day we beam five straight hours of the Modern Cable Programs, sponsored shorts and Viewpoint interviews.

The TV systems use the programing free of charge. They can either send it out directly—which most of them do—or tape it for use later on. And they certainly do use it! They tell us that they want it because it's informative, educational and gives their subscribers variety. And, so systems know exactly what's coming up, we send them a bi-weekly schedule.

We also send them material to use in promoting our programming to their subscribers.

This is truly a low-cost way to have your film reach a mass audience. Hundreds of cable TV systems are already receiving satellite transmissions, and the number is growing daily. Since you pay only for having your film transmitted, you pay no more when additional systems receive it—and additional viewers see it.

Get a free brochure that gives you all the details. Write Modern at 5000 Park St. North, St. Petersburg, Florida 33709. (813) 541-7571. Or call the sales office nearest you.

TYLER OR DALLAS

LONGVIEW OR DALLAS

WACO OR DALLAS

MARSHALL OR DALLAS

ABILENE OR DALLAS

BRYAN OR DALLAS

When you buy Dallas, you'd better know the difference between Tyler, Texas and Tyler Street.

Buying a market you're not familiar with is at best, difficult. And with all the claims made by the competition about being number one everywhere in the state, it's hard not to believe them.

But remember this, when you buy the Morning News, you get almost a third of your reach outside the Dallas County Trade Area. In places like Tyler.

So if you want to reach the people of Dallas – like the ones that live on Tyler Street, you need the Dallas Times Herald. We'll deliver 21,000 more households in Dallas County than the competition. Because in the Times Herald, you get exactly what you pay for. Dallas. And more of it.

So go ahead and tell your media director you bought Tyler, Abilene, Marshall and Bryan. But only the ones with Dallas zip codes.

Dallas Times Herald
The newspaper Dallas can be proud of.

Represented nationally by Branham Newspaper Sales, Inc

Agencies with gross income under $1,000,000

rect mail 1%. Employes: 26.

Heinz slow growth behind juggling tactic?

By NANCY GIGES

NEW YORK—A report from a committee directed to investigate improper income management practices at H.J. Heinz Co. may serve to highlight the troubles the Heinz U.S.A. division has had over the years in its efforts to become a more aggressive food marketer.

Although the report, due next month, is not expected to name the some half-dozen vendors that "banked" Heinz money as part of an income-juggling practice, ADVERTISING AGE has learned that as far back as 1975, executives at Ketchum, MacLeod & Grove, a Heinz agency, were at times expected to come up with some quick advertising or pr programs to account for money that had been sent over by Heinz.

Court records relating to the Heinz/-Campbell Soup antitrust litigation also show that Leo Burnett Co., the other major Heinz U.S.A. agency, was asked for records that would show its financial arrangements with Heinz.

▪ The reported income-juggling practices through advertising agencies and marketing consultants were arranged to assure Heinz U.S.A. managers that they would get their results-related bonuses even in lean times. When they met their goals in one specific period, the operating managers would pre-pay expenses to get a head start on the next bonus period.

Another improper accounting practice for the same bonus-related reasons involved false dating of invoices in order to make sales appear to have been completed in a subsequent period.

Burnett and Ketchum officials said they had no comment on the subject. Agencies that work for the division or other Heinz subsidiaries that were asked if they were involved, Doyle Dane Bernbach and Grey Advertising also had no comment. An exec at Tracy-Locke, which handles new products, said he was not aware of the practice. No one at Warwick, Welsh & Miller (Heinz beans) was available for comment.

Sources note that from an agency standpoint, there is nothing illegal about taking money in advance, although one executive questioned whether there may be certain tax consequences from reporting income in a period before it is earned.

For its part, Heinz has notified the Internal Revenue Service that there may have been such tax consequences, and the Securities & Exchange Commission is investigating whether disclosure laws may have been violated.

When Heinz learned of the prac-

New brew of Olympia ready for national roll

By JOHN REVETT

LOS ANGELES—Olympia is out to grab a share of the superpremium "growing end" of the beer business nationally, while sending a "rampaging armadillo" after a bigger share of the Texas market with Lone Star beer.

The Washington state-based brewer will announce its new superpremium brew and introduce new agency stars this week as it meets with Olympia distributors for the first time in three years at a conference here, to be followed by press previews in New York March 28.

Beer industry sources believe the company is going with the name Medallion for the superpremium. The label may prominently display the Olympia name as well, sources say. Several other names also have been researched and tested by the brewer, including Steuben, Maxx and Charter's.

While Olympia kept the name under tight wraps last week, even from some of its biggest distributors, it was learned that Chiat/Day, Los Angeles, is handling the superpremium and has created a drive that Olympia executives are eager to unveil to distributors.

▪ Sources also said a new Texas push for Lone Star is expected to strengthen Olympia ties with another Los Angeles agency, Keye/-Donna/Pearlstein, which picked up Lone Star early this year (AA, Jan. 20).

KDP had been on special creative assignment with Chiat/Day and Scali, McCabe, Sloves, New York, which is handling Olympia's new Grenzquell import, while Dancer Fitzgerald Sample continues with Olympia regular and Olympia Gold light.

The first campaign from KDP for Lone Star regular was described by sources as "pretty wild." In it a giant armadillo goes on a spree, breaking into houses and bars in search of Lone Star beer. The commercials will break soon.

The push by Olympia into the superpremium field is expected to

(Continued on Page 88)

Mmm!
What a tan!

Mmm! What a Tan!, 3M Co.'s new line of suntan lotions and oils, will be introduced nationally this spring with a $2,000,000-plus tv and radio campaign. Dancer Fitzgerald Sample, New York, is the agency. (*See story, Page 86*).

Stores eye credit detours to reach eager consumers

An Advertising Age roundup

Credit card companies, retailers and others who offer consumer credit are struggling through the new government restrictions, to reach a new accommodation with the still-eager American consumer.

Although President Carter tightened the screws on credit in an effort to cool down inflation, there are indications that Americans will continue to use credit to buy things now that might cost more later.

"In the past few years the people have learned to manage," said Chicago-based consumer researcher Leo Shapiro. "The activities of the government are just one more damn thing to be managed."

He said just-completed research indicates 95% of consumers expect their incomes to stay the same or increase this year, while 80% expect that money to buy less. "The consumer knows the time to buy is now," Mr. Shapiro maintained.

▪ But those who supply the credit are trying to decide how to deal with the government's restrictions, which penalize hikes in credit above a March 14 base point.

Credit card companies predicted last week the adjustments will be short-lived, and that the search for customers will continue.

Retailers are taking fresh looks at their credit programs, though some noted that the high cost of money has already led to some trimming back of credit programs.

The Woolworth and Woolco divisions of F. W. Woolworth, as an example, had already discontinued its "Flip" program that encouraged cash customers and bank cardholders to try "instant credit."

At Sears, Roebuck & Co., where 57% of merchandise sales last year were on credit, a spokesman said the No. 1 retailer might reinstitute closed-end accounts (using extended payment plans), which would be excluded from the new government restrictions. Sears

A matter of taste

Heublein will lodge ad protest

By JOHN J. O'CONNOR

NEW YORK—Heublein Inc.'s spirits group plans to lodge a protest with the U.S. Bureau of Alcohol, Tobacco & Firearms over a Schenley ad that promotes Cocktails for Two as the only prepared cocktail having "taste."

As the market leader in prepared cocktails with its Club and Heublein brands, the Hartford, Conn.-based Heublein unit was stung by the Shaller Rubin Associates-created ad that ran March 14 in 40 to 50 major dailies.

"Every organized market research project we've conducted indicates that Schenley's Cocktails for Two don't have a taste edge on our products," a Heublein spokesman said. "We think the claims being made in Schenley's ad are essentially puffery and unsupportable from our standpoint."

The Schenley ad, headlined, "Introducing the missing ingredient in ready-made cocktails. Taste!," also didn't sit well with Henry J. Gerfen, president of Mathieu, Gerfen & Bresner, the agency for Glenmore Distilleries' Old Mr. Boston cocktails.

Mr. Gerfen called the Schenley copy—"Let's face it. Over the years the taste of ready-made cocktails didn't make it."—an example of "ash-canning" the competition.

BATF has strict regulations against disparagement of a competitor's product. Should it side with Heublein, the bureau could ask Schenley to halt such ads. Schenley would face possible heavy penalties if the ads continued to run.

The Schenley "introducing" ad has a confusing side to it as well. It could leave the reader with the impression that a reformulation of the product has brought about the claimed taste breakthrough. However, the products are no different than they were when they went on the market three years ago, a

Summer of pilots set

Agencies view fall tv fare

By BOB MARICH and COLBY COATES

LOS ANGELES—Police/detective shows with strong central characters and movies transformed [illegible] tv series are the trends for [illegible] spotted by agency execu[illegible]n two days of meetings w[illegible]etwork brass here.

Agency executives who made the trek for a preview of the fall network tv season were impressed by "a young, aggressive" NBC, somewhat troubled by ABC's presentation and discovered CBS series development was heavy with divorce-themed sitcoms.

The networks seem to be snapping up development projects from each other, with Vietnam war-themed comedies, cowboy and animal shows, and ripoffs of "Dallas" currently in fashion, agency execs said.

▪ Both CBS and NBC won kudos from the agency execs for the quantity and quality of their upcoming made-for-tv movies and miniseries. "They had very impressive lists," said one buyer, describing the 50 or so projects mentioned as "a long way from the back lot garbage we've seen lately."

The execs admitted to some surprise when the networks failed to talk much about next fall's theatrical movie packages, but they claimed to be even more dismayed by ABC's presentation that dwelled almost exclusively on series projects, with nary a mention of movies or miniseries.

Said one buyer, "Of the three I would have thought that ABC's presentation would be the strongest." Instead, "they were subdued, almost laid back." He continued, "What I can't decide is whether they [ABC] are not talking because they want to make more

Ex-jocks, humor a Natural: A-B

By JOHN J. O'CONNOR

NEW YORK—Cloning struck the beer advertising scene over the weekend as Anheuser-Busch and several retired sports stars embarked on the new Natural Light campaign (AA, March 10), which mirrors the style and humor of the much-acclaimed Lite commercials by Miller.

With plenty of gusto—to borrow a word from the folks at Schlitz—the ex-jocks, including the three defectors from the Miller's Lite team, told reporters at the St. Moritz Hotel how they switched to Natural Light "from the other light beer" on the strength of having submitted to a taste test (for which they were paid).

▪ After he and other Natural Light team members had told of their conversions, defector Nick Buoniconti, former Miami Dolphins football star, said "he was not doing it just for the buck." Looking fit after peeling off 30 lbs., he insisted he had become a spokesman for the product "because it tastes better."

How much is Anheuser-Busch paying him? "The same amount Miller was," said the man who hasn't been used in Lite spots for about two years. According to beer industry sources, the going rate for an appearance in a Lite commercial is between $5,000 and $7,000.

One exec scoffed at the thought that Mr. Buoniconti, baseball great Mickey Mantle and former heavyweight champion Joe Frazier would defect for that kind of pay. "I have it on good authority," he said, "that Anheuser-Busch of-

(Continued on Page 83)

Natural Light regulars Norm Crosby and Ray J. Johnson are joined by former ballplayers Walt Frazier and

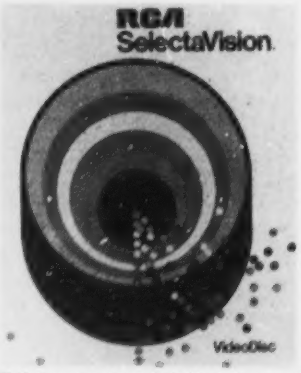
Mickey Mantle in new commercials similar to the humorous spots done for Miller's Lite.

RCA: Our disc system will be 'the one'

CHICAGO—RCA Consumer Electronics, perhaps sending an early warning signal to Magnavox, Zenith and anyone else thinking about entering the videodisc business, announced it would pull out all the stops in its SelectaVision videodisc player introduction next year.

While refusing to reveal a figure, Jack Sauter, vp-general manager of the Indianapolis-based RCA consumer division, said at a press conference here last week that the first year ad plans call for "the largest, most comprehensive introduction effort RCA has ever undertaken." The company spent about $7,000,000 to introduce its SelectaVision videocassette recorder in 1977-78, according to Leading National Advertisers.

The company also made official what most in the industry expected when it named Leo Burnett Co. agency for the videodisc player. The agency also handles RCA's color tv and vcr businesses. Mr. Sauter said RCA did not interview any other agencies. "We did not have the time to bring up another agency," he said. "We have a very, very complex distribution system and Burnett knows this system very well."



Rainbow-colored balls fall out of concentric circles in logo design.

▪ While Burnett is developing the hardware campaign and initial software advertising, another agency may be named later this year to handle the software account.

Mr. Sauter expressed confidence that RCA's videodisc system, which Zenith recently adopted (AA, March 10), will be "the one" surviving system in the consumer market.

Although Magnavox Consumer Electronics, Fort Wayne, Ind., was first out in the market with its noncompatible Magnavision system, the RCA exec predicted Magnavox would not have the marketing muscle to compete with SelectaVision. "Remember, we've got very capable and powerful backing," Mr. Sauter said. #

Giant says scanner spots coupon woes

By STANLEY E. COHEN

WASHINGTON—With double couponing flaring up in Washington and elsewhere, Giant Food, a leading grocery chain here, went to the Grocery Manufacturers of America last week as the first step in an effort to persuade food marketers to cut their prices instead of escalating their promotional wars.

Giant officials stressed that it was only a coincidence that their move came during a week when newspaper food sections bulged with competitive ads from Giant, Safeway, A&P and Grand Union picturing their offers of double face values for coupons as another effort on their part to help fight inflation.

Earlier this month, Giant was first to announce price freezes on house brand foods and generic drugs, but others met the competition within days. A&P started the double couponing here.

Giant's decision to take a stand for price cutting instead of coupons began emerging several months ago, officials said.

It was backed by cost data that was accumulating from the checkout scanning system in all Giant stores. "This data showed clearly that couponing is costly to administer, that it raises serious problems about discipline with our help, and it is discriminatory in the sense that it works better for the rich than the poor," an executive explained.

▪ Giant's case has been dramatized in a 20-minute film produced by the chain. It includes interviews with Esther Peterson, President Carter's adviser on consumer affairs (and former Giant vp for consumer affairs), as well as with Giant customers by Odonna Matthews, who is in charge of Giant's consumer program. The film was completed early last week. "George Koch, president of Grocery Manufacturers of America, invited us to show it to his people; about a dozen people saw the film," a Giant executive said.

Detroit tops spot tv gains with 22.7%

By MAURINE CHRISTOPHER

NEW YORK—Detroit, Tampa and Baltimore paced the spot tv price increases in the last SQAD report, but all the top 20 markets except Washington and San Francisco showed double-digit gains over year-ago levels.

The hikes ranged from 22.7% in Detroit and 19%-plus in Baltimore and Tampa to 9.7% in San Francisco and 5.4% in Washington.

These cost per thousand household rating point estimates are based on buying by a sample of 14 major ad agencies for data received by March 14. This is a special midmonth computer update to the monthly report published at the beginning of each month.

A letter from Marvin Richfield, president of Spot Quotations & Data, explained to subscribers that they were receiving this update at no extra charge in order to get the results of "the current heavy buying activity" into their hands as soon as possible.

Many buys were made for March starts in the first 10 days of the month, which caused more than the usual price pressure and preemption notices, Mr. Richfield pointed out.

▪ Mr. Richfield attributed the double-digit hikes to fairly obvious reasons. "First, the need to sell products at the retail level," he said. "Second, spring is the second strongest spot tv demand period of the year. Third, the networks are virtually sold out, with no rumors of major clients asking for relief. Fourth, each month from March on, a number of states have presidential primaries regulated by the Federal Communications Commission, which calls for the 'lowest unit rate' being made available to candidates for 45 days before the primary election."

The researcher cautioned that the monthly price data for the spot transactions are highly perishable. He noted that March presidential primaries affected price levels in Illinois, Florida, Massachusetts and South Carolina and that politicians' dollars will be a factor in many other states in April in varying degrees.

Late news—the second most valuable spot time in most markets—looked particularly healthy in this report. Mr. Richfield forecasts even more pressure on it and the late fringe period following it, particularly if ABC-TV's upcoming 11:30 p.m. (EST) newscast starts a network trend.

In New York, cpp quotations for late news 30s ranged from $225 for March to $230 for May. In Los Angeles, the comparable figures were $156 and $161, with Chicago next at $134 and $138. Fourth was Boston at $126 and $129. The news estimates and all other breakouts in this buying guide, except prime time and daytime, include schedules on independents as well as affiliates. #

Free world ad total topped $70 billion in 1977

New York—Total advertising expenditures throughout the non-Communist world exceeded $70 billion in 1977, according to a study recently released by the International Advertising Assn. and Starch INRA Hooper (AA, March 17). This figure represents an $11 billion increase over expenditures in 1976.

Maintaining its uncontested place as world leader in ad expenditures, the U.S. spent more than $38 billion—54% of the world total—on media advertising during 1977.

- Japan ranked second, spending almost $6.25 billion. West Germany came in third, spending more than $2.75 billion. The United Kingdom, France and Canada each spent more than $2,000,000 on advertising. Brazil, the Netherlands, Sweden and Australia each spent upwards of $1 billion.

While the total combined expenditures of the above 10 countries represented 87% of the worldwide total, 21 other countries spent more than $100,000,000 in advertising.

With the exception of Latin America, where television is used heavily, print ranked as the dominant media.

Per capita expenditures in 1977 averaged $28.07, up from $24.23 in 1976. While the U.S. reported per capita expenditures of $175.83, up from $156.69 the year before, six other countries, most of them European, showed expenditures of more than $100.

The lowest per capita expenditures were in the less developed countries of Africa and Asia, where Ethiopia came in last at 4¢ per capita expenditure.

The U.S. spent more than 2% of its gross national product on media advertising, and 20 other countries spent in excess of 1%. Ethiopia again was at the low end, spending 0.04% of its GNP on advertising.

The study, which covers ad expenditures for 86 countries, is the first to be conducted on an annual basis; previously it was handled biennially.

The information reported was supplied by IAA members, local IAA chapters and other professional groups in each country. In some cases, particularly in the less developed countries, where industry sources are not available, the data is based on estimates by "knowledgeable advertising practitioners."

For the first time, the study provides market information for 55 countries, such as number of newspapers, number of magazines, number of tv sets, number of radios and number of cinemas.

Copies of the report are available from Starch INRA Hooper, Department IAA, 566 E. Boston Post Rd., Mamaroneck, N.Y. 10543. Cost is $45 per copy for IAA members and $60 for nonmembers, plus $1 per copy for the U.S. and Canada and $3 for other countries for postage and handling. #

'Cosmo' sets 'Living' debut

New York—The premiere issue of *Cosmopolitan Living*, a 204-page spring/summer edition that sells for $1.95 on newsstands, has made its debut.

Publisher Louis E. Porterfield noted that the Hearst Special Publication magazine, geared to help 7,720,000 *Cosmopolitan* readers "with specific areas" of their lives, represents "one of the most successful advertising launches in magazine history." The issue carries approximately 115 ad pages, including an eight-page Maybelline makeup guide. Mr. Porterfield said the spin-off will "fill the needs of many, many '*Cosmopolitan* girls' who consider entertaining and decorating a priority in their lives." #

Rush joins Dow Jones to direct live broadcasts

Robert B. Rush, formerly vp-market development, NBC Radio Network, has joined Dow Jones & Co., New York, as director of broadcast services. Mr. Rush will direct the conversion to live broadcasts of the "*Wall Street Journal* Business Report" to 50 top radio market stations later this year.

The live newscast will originate from Dow Jones' New York studio and be transmitted via an Associated Press communications satellite to subscriber stations. The report, started in 1976 as a teleprinter service, now goes to 276 stations. Six of the 17 daily live broadcasts will carry a national commerical and leave room for local sponsors. The remaining 11 shows are intended for local sponsorship alone.

Air Time sets pageant

Air Time International has cleared seven tv stations for the broadcast of the 29th Miss World contest, to be hosted by George Burns. The stations are: WPIX-TV, New York; KHJ-TV, Los Angeles; WGN-TV, Chicago; WTAF-TV, Philadelphia; KRON-TV, San Francisco; KWGN-TV, Denver; XETV, San Diego, and KTCM-TV, Helena, Mont.

The theme of the contest is "Beauty with a Purpose." Proceeds will go to children's charities around the world.

Retailers expanding their private label programs

(Continued from Page 3)

To promote the Red River name, Neiman's sponsors Saturday chili cookouts at shopping malls and has gone so far as to buy a Longhorn prize steer whose name was, coincidentally, Red River. He, too, tours the malls.

The retailer also puts its regular Neiman-Marcus brand on items as stores have traditionally done. For instance, the store last fall conducted a promotion for hand-knitted sweaters, many of which carried the Neiman-Marcus label and most of which were imports. Additionally, some European resources, as well as domestic knitter Joan Vaas, were represented.

These types of programs, identified exclusively with Neiman's, Mr. Miller believes, will become even more important as the store continues to expand nationwide at the projected rate of two new units a year between now and 1983. They also will improve its profit margins.

Mr. Miller continued, "We'll soon be opening in White Plains, N.Y. Every label there is already sold in Westchester County so we have to give customers a good reason to come into our stores." The new store will replace CHH's Bergdorf Goodman unit, which failed to draw shoppers.

▪ That can best be done by merchandising the N-M image, though not to the exclusion of all other labels. "Bill Blass, Galanos and others are still important to us. Top flight designers will always be important to us," he asserted.

Retail profit margins, like others in these inflationary times, are getting narrower and narrower, Mr. Miller finds. He blames much of this on the fact that certain specialty stores will cut prices on designer names to attract customers, thereby forcing department stores to do the same or fail to make sales.

At the same time, he said, retailers have given over much of the control of their stores in the last 10 years to the manufacturers who increasingly demand more space and other advantages. Private label goes far toward offsetting much of this.

Norman Chesler, vp-marketing, I. Magnin, San Francisco, agrees, though he observes that the trend toward private label is reminiscent of the mid-1950s when store labels were what made that store special. The Saks Fifth Avenue name was said to be better known then than any designer name.

But as variety blossomed in the 1960s, attraction to private label lessened.

▪ Mr. Chesler agrees that attraction is being rekindled partly because of the department stores' difficulty competing with discounters on designer and brand name goods.

Unlike department stores, discounters offer little service, have no fixturing and sell on a cash-and-carry basis. "Obviously, we can't sell at the same price they can but sometimes we have to," he said.

However, there are several drawbacks to private label. One, Mr. Chesler said, is that it costs more to advertise and promote than manufacturer names where there are built-in costs for catalogs and co-op ads. Also, stores will sometimes create their own monsters by advertising their brands off price to create store traffic, thus negating the price advantage of private label.

Other disadvantages are the high costs of buying trips because so much private label merchandise is imported from Europe and the Far East. On top of that, imported merchandise is paid for prior to delivery, while domestic goods usually are on the store floor and selling before the bills are paid.

But even factoring in these drawbacks, there's still a better return on investment with imports, maintains Jim MackIntosh, director, import operations, J. L. Hudson, Detroit, where 95% of all imports are for private label merchandise.

Hudson's views private label as a valuable tool for the 1980s in light of shrinking profit margins. But the retailer has yet to commit itself to a program similar to Neiman's, preferring at this time to remain in private label on an item basis, as is Magnin's. But a Hudson's exec noted the store is considering scaling up to the Neiman's approach.

At Bloomingdale's, private label is being given treatment similar to Neiman's. The Bloomies name has been showing up on all sorts of merchandise—even toilet tissue—for the last five to six years.

In effect, we have our own designer name and product I.D. allied to our store," according to Lester Gribetz, exec vp-general merchandise manager. The store's intentions are to expand this program in the 1980s.

Both Bloomingdale's and Neiman-Marcus brought out their own fragrances last fall. Bloomingdale's entry was under the Bloomies label while Neiman's was under the name Volage. Both brands will be extended this year with the Bloomies name showing up on soaps and treatments.

▪ Mr. Gribetz said other areas that his store will plumb more fully are apparel and home furnishings. For example, the store will run a China show this September. Included will be a jacquard print with the name Bloomies on pillows and scarves.

"The store's name on a product makes us an arbiter of taste on one hand but it also tells the customer we stand behind what we're selling," said Mr. Gribetz. #

Individual brand promotion the safe way to go

OAKLAND—Safeway Stores is taking another turn—this one toward an upscale image with ad focus on individual Safeway brand products—in its continuing effort to put more sparkle in the Safeway "S" logo chainwide (AA, March 17).

The first sign of the latest shift by the nation's largest supermarket chain came last spring with the introduction of a new line of premium-price Great Escapes frozen dinners in most of Safeway's regional divisions covering 29 states. Great Escapes entrees are backed by tv and radio via Safeway's corporate agency, Botsford Ketchum, named to that job as marketing consolidation began replacing regional efforts.

It now appears that "corporate agency" is taking on a new meaning at Safeway as its brand-by-brand marketing starts to build up.

Now being added to the Great Escapes drive is a campaign for Safeway pantyhose that's expected to be used in all seven Safeway divisions. Commercials from Botsford display a fashion flair seldom associated with supermarket advertising—they feature a shapely young woman who introduces herself as a fashion model.

"You see, this is my living," she says with a flash of a Safeway pantyhosed leg. "With these legs and Safeway pantyhose, it's not a bad living at all."

▪ Safeway spokeswoman Felicia Del Campo said the chain is still officially leaving decisions on use of the commercials up to division heads, but indicated that it's expected that all of the divisions will be using the Botsford spots.

More of the same is planned for individual Safeway products. "We'll continue to highlight single Safeway products with high quality advertising," Ms. Del Campo said. Exactly what products will get the treatment next was not divulged.

It's not just a fashion image that Safeway is aiming for with this nontraditional brand-by-brand approach instead of the "greater savings" market basket advertising used by most supermarkets when they take to the airwaves. The chain also has backed its PDO (Photos Developed Overnight) service with commercials via Ralph Kent Cooke Advertising, Los Angeles, in western divisions. And the introduction of the Safeway Scotch Buy line of discount items was introduced with a chainwide campaign from Cooke.

▪ Sources in the supermarket business familiar with Safeway's tactics say that the main benefit of the more standardized approach—as seen chainwide in use of the "Everything you want in a store and a little bit more" slogan (which, like the new Safeway "S" logo, is required for all divisions)—is that the nation's mobile population is made to think of Safeway as a kind of "home" supermarket wherever they are.

Safeway has had some trouble with division marketing people over use of the chainwide ad approach, however, and regional division executives occasionally veto ads. Local execs in Southern California decided against using Botsford's Great Escapes commercials, which reportedly were viewed as "having very good production quality" but not enough direct "punch," according to one regional source.

But Safeway regional execs contacted said they expect the new pantyhose commercial will be used enthusiastically by the regions. #

This Flash Report of newspaper advertiser investment, compiled for ADVERTISING AGE by Media Records, is derived from tabulations that cover 35 dailies and 25 Sunday editions in 15 cities—Atlanta, Baltimore, Boston, Chicago, Cleveland, Dallas, Denver, Detroit, Los Angeles, Miami, New York, Philadelphia, Pittsburgh, San Francisco and Washington. The report indicates marketplace strengths and weaknesses.

Jan. newspaper spending rises 14%

NEW YORK—Advertising expenditures in daily newspapers went up 14% in January to $1.1 billion compared with the same month a year ago, according to the Newspaper Advertising Bureau.

For the month, national advertising gained 13.8% to $361,000,000, and retail gained 13% to $548,000,000. The bureau's figures are based on estimates of newspaper advertising spending from measurements by Media Records in its index cities, plus other data.

According to the January Flash Report prepared for ADVERTISING AGE by Media Records, public service utilities showed a hefty 39.2% increase in dollar spending during January, 1980, compared with January, 1979. Not far behind were banks and trust companies with 33.6% and sporting and leisure time equipment with 33.3% gains for the same period.

▪ Of the 16 categories monitored for AA by Media Records, only one, department stores, was down for January ad volume in the 15 cities whose newspapers are measured (see chart). The category dropped 0.8%.

Despite its percentage loss, department stores continued as newspapers' leading dollar category. It was followed in the top five dollar rankings by furniture and furnishings, food stores, amusements and general merchandise stores.

Percentage gains of 15 or better also were registered by building materials and hardware (20.2%) and real estate (15.7%). #

AAF to give awards for public service ads

WASHINGTON—The American Advertising Federation plans a national awards competition for public service advertising.

AAF Good Sam awards, for Good Samaritan, are to be presented to winning entries at the local, regional and national level, AAF said. The contest is to feature three general categories—fund raising, volunteer recruitment and public education and information.

To qualify, entries into the competition must have been distributed to the media between Jan. 1, 1979, and the entry deadline of next June 15.

AAF will host award ceremonies next September in Washington. First place winners will receive signed and numbered serigraphs (silk screen prints) created especially for the competition by designer and artist Vittorio Fiorucci. Merit winners will receive a certificate designed by Mr Fiorucci incorporating the serigraph design.

▪ AAF president Howard Bell said his association's intent is "to encourage more advertising and media professionals to contribute their time and skills to this advertising in the public interest.

"We believe that one effective way to achieve this goal is to offer national recognition for outstanding work in the field," Mr. Bell said. "In the end, everyone benefits: The public service cause, the advertising and media professionals and the advertising industry itself." #

RIAA forms video unit

Recording Industry Assn. of America, New York, has formed an RIAA/Video division for members involved in the videocassette and videodisc fields. RIAA president Stanley Gortikov and Stephen Traiman, executive director, will hold similar posts with the new unit. The division's duties will include certifying gold and platinum videorecord awards as RIAA does with audio recordings. ITA Inc. earlier said it will present awards to vcrs and discs selling $1,000,000 at retail (AA, March 3).

During April:
10,000 free trips from United.
Play United's "Take-off" game on every flight.
Fly the friendly skies of United.

What is expected to be another round of airline promotional warfare was kicked off by United with this Take-off game.

United sets off promotion war

Competitors ready games

NEW YORK—The competitive draft from United Airlines' latest promotion may drag the rest of a reluctant domestic industry into a new merchandising age of sweepstakes, giveaways and other promotional tools borrowed from the local burger shop.

While both American Airlines and Trans World Airlines sought to block United's Take-off game, a sweepstakes that will award at least 10,000 free round trips to passengers and nonpassengers alike, both carriers have created contests of their own for possible use.

Neither line filed proposals with the Civil Aeronautics Board last week, but Florida officials were notified (because of lottery laws) by American that a sweepstakes promotion was to start April 10.

"American does not believe in giveaway programs that don't make economic sense, but we can't allow our market share to erode either," a spokesman for the airline said. American had filed a letter of protest with the Civil Aeronautics Board in which it characterized the United program as discriminatory and the ads as deceptive. But CAB approved United's promotion, although it later asked to see United's spots in what it called a routine check.

An exec at a leading printer of game coupons reported that a number of other airlines had at least explored the possibility of ordering their own scratch-off tick-

(Continued on Page 76)

Slump forced United move

ELK GROVE VILLAGE, ILL.—United Airlines, faced with sagging sales, is taking a calculated risk in heating up the promotional battles with its new sweepstakes promotion. At stake is the "friendly skies" image that helped propel it to No. 1 among U.S. airlines.

Frederick Heckel, United vp-advertising, indicated that United's promotional flurry is a short-term move and that the "fly the friendly skies" theme will soon figure more prominently in United's advertising plans.

"We're not going to give up 'the friendly skies' for discounts and promotions," said Mr. Heckel. "United built its image on the phrase, and once the industry calms down, we'll return to it."

Other United officials at its headquarters here emphasize the airline's recent move to long-haul route structures and its entry into the Florida market as a key to its long-range positioning.

They expect the promotion and discount wars will cease by the end of the year.

Some industry observers believe United has created many of its own problems. Its controversial new travel agent compensation plan schedule to start in June,

PM entry heats ultra low-tar fray

By SAM HARPER

NEW YORK—As R. J. Reynolds Tobacco's Now and American Brands' American Tobacco Co.'s Carlton square off for yet another marketing battle in the ultra low-tar segments, Philip Morris U.S.A. is planning to wrest the "lowest" in tar claim from Carlton with Cambridge, a new smoke that has less than 1mg tar. It is being announced this week here, and is expected to be in full distribution in May.

PM could conceivably spend as much as $50,000,000 on the new brand, or about as much as it invested in the 1976 introduction of its highly successful Merit brand. However, with Carlton posting a 50% gain in unit sales last year, PM's investment in the burgeoning segment could well be worth it.

Cambridge will be available in 80mm soft pack, 85mm box and 100mm lengths, with tar levels of

FTC opens industry dialog

WASHINGTON—As Congress looked for ways to break the deadlock over the future of the Federal Trade Commission, FTC's top staff last week held the first of a series of meetings designed to improve its working relationships with ad industry associations.

American Advertising Federation president Howard Bell and exec vp Jonah Gitlitz were at FTC Wednesday for a "brown bag" luncheon with top staffers representing FTC's bureau of consumer protection. Mr. Bell would confirm only that the agenda included a frank discussion of the steps FTC could take to avoid the polarized relationship that has contributed to the current confrontations between business and the commission.

• Meanwhile, the congressional leadership mobilized to keep the FTC deadlock from escalating to a crisis that could have forced commission employes to go without pay.

They rammed through in a single day an emergency transfer of $9,800,000 to keep FTC in operating funds through the end of April, despite a bid by House conservatives to scuttle the bill.

Rep. Silvio O. Conte (R., Mass.), ranking Republican on the House appropriations committee and a supporter of the funding plan, warned House members they were voting to "kill the FTC" or keep it "alive." The measure cleared 216 to 201. President Carter signed it, warning he would veto any bill that "crippled" FTC.

That same day, negotiators from the Senate and House had their first public working session to reconcile conflicting versions of vital legislation that extends FTC's life. They quickly agreed to a series of important, but noncontroversial, changes in FTC operating procedures, but quit for the day without taking up the tough issues that lie behind the deadlock: The one-house veto strongly supported by House members but opposed by the Senate and the Senate's demand that FTC be barred from writing rules against "unfair" advertising.

Placing limits on FTC's ability to attack ads that are "unfair" rather than false or deceptive has become a top priority for ad industry groups.

The FTC meetings with ad groups have been organized by Albert Kramer, chief of the bureau of consumer protection, with AAF as the first invited guest. The Assn. of National Advertisers and American Assn. of Advertising Agencies have been invited to separate meetings in April.

Mr. Bell said the ground rules prevent him from reporting what went on, but that much of the conversation concerned what FTC could do to prevent unnecessary confrontation situations. A "lot of constructive ideas" were discussed, Mr. Bell said, and the meeting "was very helpful."

He also said he believes the commission is making an attempt to improve its communications with the industry, indicating a trend toward being more cooperative in

last minute news

NH&S gets Polaroid creative assignments

CAMBRIDGE, MASS.—Polaroid Corp. has awarded a creative assignment to Needham, Harper & Steers, Chicago, after speaking to a number of agencies. Assignment involves its Sonar instant cameras and "supplemental creative" to the Jim Garner/Mariette Hartley spots for the One-Step instant camera by DDB. Polaroid vp-advertising Theordore N. Voss stressed that NH&S was picked because of "the talents of Keith Reinhard," exec vp-creative services director. The company also expects to name an agency for its medical cameras and film; several shops have been contacted.

Rasor named to handle Jeep for Compton

NEW YORK—Richard Rasor, who resigned as exec vp-general manager of J. Walter Thompson's Detroit office in October, 1978, has been named exec vp, Compton Advertising, responsible for Jeep and other business. To staff Jeep, Compton also added William Williams as vp-account supervisor from a similar post at JWT on Ford cars and trucks, and Lyle Greenfield as associate creative director, from William Esty.

Schlitz moving Tribute Light into test

MILWAUKEE—Jos. Schlitz Brewing Co. next week will begin test marketing a new light brew, Tribute Light, in Providence, Beaumont, Tex., Raleigh, and Tucson, Ariz. "Pay yourself a Tribute" is the theme of a heavy broadcast and print campaign running April 8 through June 29. B&B, New York, handles.

GF narrows fifth agency search to Bates, FCB

WHITE PLAINS, N.Y.—General Foods reportedly has narrowed the list of contenders for its fifth major agency to Ted Bates & Co. and Foote, Cone & Belding. The new shop will start with an estimated $10,000,000 in billings.

Eller to head Charter unit

By **BERNICE KANNER**

NEW YORK—After years of rumblings that Charter Co. would unload its economically lackluster publishing subsidiary, the Jacksonville, Fla., conglomerate took a surprising step last week. It struck a partnership deal with communications dynamo Karl Eller to form a new company with the avowed aim of becoming a broad-based media giant.

The 52-year-old Mr. Eller, a well-respected, energized and capitalized maverick, will be chairman-chief exec of Charter Media Co., which comes into being April 1.

This new and for-now quasi-private company, headquartered in Phoenix, will include such Charter magazines as *Ladies' Home Journal* and *Redbook*, its subscription fulfillment Data Services and its six radio stations, as well as KIOI (fm), a San Francisco station recently purchased by Mr. Eller for about $12,000,000.

The Federal Communications Commission must approve the transfer of broadcast properties; once approved, these will be phased into Charter Media. Charter's stations include WOKY and WMIL (fm) in Milwaukee; WMJX (fm), Miami; KCBQ, San Diego; KSLQ (fm), St. Louis, and WDRQ (fm), Detroit.

■ Mr. Eller, who orchestrated the sale of his Combined Communications Corp. to Gannett Co. for $360,000,000-plus last June, will own 50% of the outstanding stock of the new company. Charter will hold the other 50% along with preferred stock, some of which would be convertible.

Charter's Dayton Press, an unprofitable printing plant, and its profitable Direct Marketing operation remain part of the energy and insurance syndicate, not Charter Media.

Fred C. Danneman continues as president of Chartcom, the communications subsidiary of Charter and the parent of Charter Publishing, and Thomas Kenney stays as exec vp of the publishing unit.

Mr. Kenney was promoted from senior vp-general manager earlier this month following the resignation of president Peter Bonanni over "differences in priorities in terms of achieving company growth" (AA, March 17). Additional appointments within CMC are expected in April.

Although *Sport* is counted in

How Washington's new credit guidelines affect the American Express Card

American Express supports the new government guidelines and is complying with them.

In fact, the basic idea behind the American Express Card reflects the same spirit and intent of these measures.

That's because the American Express Card is different from credit cards. It's a charge card. It offers no revolving, open-end credit.

You are expected to pay your bill in full every month. Since this helps you live within your means, you don't get in over your head.

That's why our Cardmembers can continue to use the American Express Card in the manner in which they always have ...responsibly.

Taking credit

American Express is running newspaper ads in 21 markets to voice support for recent government moves to curb credit growth—moves which don't affect the American Express Card at all, the company says, since its card extends no revolving credit privileges. The agency is Ogilvy & Mather.

Group W pullout threat stuns Ted Turner

By **MAURINE CHRISTOPHER**

NEW YORK—"Bad news travels fast," said Ted Turner when asked if he were in a financial bind on his new Cable News Network now that Group W has threatened to pull out of the deal. That arrangement would have brought him $20,000,000 to help finance his 24-hour-a-day program service.

"Not at the moment," he said, though obviously he feels like a besieged fighter surrounded by enemies "who hope we don't succeed, but the Flag is still flying in Atlanta." (He spoke of Francis Scott Key watching the battle in Baltimore and writing the "Star Spangled Banner.")

Mr. Turner's latest headache stems from Group W's warning that the deal to buy WRET-TV, Charlotte, will not be completed if there is not a "valid and regular license" by September. Early in March the Federal Communications Commission put the station on a short-term license of 18 months and ordered continued monitoring of its compliance with minority-hiring regulations.

Still, Mr. Turner was optimistic that the roadblock to the sale—which hit hard just as he was breathing more easily after forcing RCA Americom to put CNN on Satcom I—could be cleared away in time for a June 1 CNN kickoff as planned.

Mr. Turner's lawyers have told him that the FCC has already approved the transfer document shifting WRET-TV to Group W and he believes his "minor problems" with the license would not carry over to the new owners. The transfer order had not been published as of presstime and Turner execs hadn't seen it yet.

However, if there still are problems with the license that would affect Group W, Mr. Turner said he would go back to the FCC "and ask them to give us a hand." An FCC attorney told ADVERTISING AGE that reconsiderations of short-term renewals are possible, but tough to pull off.

In any event, Mr. Turner said there are other alternatives for money if the Westinghouse sale falls through. Another large broadcast group that lost out to Group W in the bidding for WRET-TV when he put the station on the market has already called in to say it wants to buy it if Group W doesn't.

In addition, Mr. Turner noted that "a lot of people have approached me to invest with us." Besides WRET-TV and CNN, his various properties include WTBS, Atlanta, the baseball Braves and part of the basketball Hawks. #

Brown brings show biz style to Wisconsin primary

By **JACQUES NEHER**

CHICAGO—With both President Carter and newly invigorated Sen. Edward Kennedy opting to lay off Wisconsin and instead make Pennsylvania their next major battleground on April 22, California Gov. Edmund Brown Jr. has "gone Hollywood" in a major Wisconsin effort for the Democratic presidential nomination that most view as his last stand.

Gov. Brown, tapping one of the best-known resources of his own state, enlisted Oscar-nominee Francis Ford Coppola and his brother August to produce four tv spots, most of which have run for the past two weeks in Wisconsin markets. By the April 1 primary election, the Brown campaign will have spent about $150,000 for broadcast media.

In contrast, the Carter and Kennedy camps planned only four-day media campaigns and were expected to spend less than $45,000 each in the state.

The Brown spots, while receiving reviews ranging from "strange" to "quite interesting," presented a sharp departure from the relatively straight issues and image political advertising offered so far this year by the other presidential candidates.

■ One spot, dealing with inflation, shows a dollar bill being squeezed through a pair of washing machine rollers, with the resulting bill only a tiny version of the original. Another commercial, which promotes the reindustrialization of the country, features a slowly turning wedge of apple pie. As it turns, shots of an imported car, wristwatch, shoe and television are flashed in almost subliminal fashion. When the wedge's back crust faces the camera, it reveals a sticker: "Not made in the U.S.A."

Straightforward in contrast, a

FTC mulls food ad rule exemptions

WASHINGTON—The Federal Trade Commission has been asked by its top consumer protection official to consider exempting advertisers from portions of a major new food ad rule if they agree to run consumer education messages.

FTC consumer protection bureau director Al Kramer included the suggestion in the final staff recommendation to the commission urging it to enact the food ad rule.

■ Known as Phase I of FTC's food program, the proposals concentrate on energy and weight-control claims, fat and cholesterol claims, and foods that are billed as "natural, organic or health foods."

Phase I is all that's left of what started out in 1974 as an ambitious plan to rationalize marketplace confusion over food claims. Phase II, which would have set standards for foods claiming to be "nutritious" and Phase III, which was aimed at getting more nutrition information into ads, are about to be terminated (AA, March 3) by an FTC that is under pressure to find remedies that rely less on direct government regulation.

Higher prices driving consumers from liquor

By JOHN C. MAXWELL JR.

It would appear that the liquor industry saw little growth in consumption for 1979.

In fact, with inventory reductions after the big buildup in 1978 in anticipation of price increases, as well as the drawdown due to high interest rates, we feel that industry sales actually were down by a couple of percentage points.

▪ Part of the problem relating to consumption, along with the current economic stagflation, is the fact that the industry has raised prices substantially over the last two or three years—about 20% or so over this period. This appears to be bringing about resistance by consumers, who may be switching to products such as domestic wine for gift-giving.

As far as sales volume of individual brands is concerned, there was some movement, particularly in the second tier of the top ten. Heublein's Popov moved substantially from the No. 13 position in 1978 to the No. 7 position in 1979 with a gain of 24%, the biggest percentage jump in the industry.

Smirnoff and Bacardi are neck and neck in the No. 1 position, and Bacardi again grew the most, using absolute volume rather than percentages.

Some of the other big gainers within the industry included Seagram's gin, which went from 15th position to 12th, and Brown-Forman's Jack Daniel's, which moved from 19th to 16th.

▪ In the company area, Seagram's enormous advertising budget, the largest in the industry, did not prevent the company's major brands from receding in volume, with the exception of Seagram's gin. Brown goods, particularly blends, have been going down for years; and advertising and promotion will not turn the tide. We believe this points up the old saying, "You can't push against a string."

It is interesting to note that some premium products such as Seagram's Chivas Regal and Liggett Group's Wild Turkey showed no growth in 1979. We believe this is reflective to a degree of the argument that a slowdown in the eating-out market would have adverse ramifications for consumption of premium products.

As we pointed out previously, about 30% of the liquor industry's volume is consumed outside the home. Further, premium products are used preponderantly when the buyer is on an expense account or trying to impress somebody. We feel that as long as the eating-out market's downtrend continues, this certainly will have an adverse impact on growth of premium labels.

Heublein's products were up pretty much across the board, and it continues to be one of the more successful houses in the industry.

Over-all, the industry was a mixed bag in 1979. Brown goods, led by domestic whisky, continued to decline with the exception of such premiums as Jack Daniel's. The same sort of scenario applies to the scotches, with premiums such as Johnnie Walker continuing to move ahead while medium price scotches were off by several percentage points. Canadians were also down slightly, with imported gin about the only major category to show gains.

As in the past, the specialty areas such as cordials, liqueurs, brandies, etc., showed good gains. One of the real success stories has been Schenley's Cocktails for Two. Our tables show that this product, introduced about 28 months ago, hit 900,000 cases in 1979. #

Mr. Maxwell is with Lehman Brothers Kuhn Loeb Research.

The liquor industry

More advertisers hear call for captioned spots

FALLS CHURCH, VA.—Tv Advertisers are beginning to follow the lead of ABC and NBC and include on-screen captions for hearing-impaired viewers.

The list of advertisers in the captioning project grew by three last week with the announcement that Bristol-Myers, AT&T and Seiko Time Corp. will begin captioning some or all of their tv spots in April. Sears, Roebuck & Co. was already signed up for the project.

Sears, AT&T and B-M are among the nation's biggest users of tv advertising. Announcements of more advertiser signups are expected, according to the National Captioning Institute, the nonprofit organization that already captions a minimum of five hours per week of prime time programing on ABC and NBC, plus public tv programs.

Separately, the institute said IBM is the first corporate tv sponsor to pay to have a "special" captioned. The show is "IBM Presents Baryshnikov on Broadway" (to appear April 24 on ABC). But the institute said IBM had not ordered captions for its spots that will appear in the show.

The on-screen captions can only be seen on tv sets equipped with special decoding devices. Sears, the only supplier of the decoders, began delivering units earlier this month. Initial sales figures aren't expected to be available until mid-April. About 14,000,000 Americans are hearing-impaired, according to the institute.

The institute charges $165 per spot for captioning services. Captions normally carry no more than 145 words per minute of air time. Ad copy is edited to fit by the institute staff, subject to approval by the advertiser and agency.

B-M and Seiko will caption all their tv commercials, an institute official said. AT&T will caption its "informational" commercials. #

JWT gets Swedish shop

J. Walter Thompson Co. AB, the giant agency's Swedish company, has acquired Stein Schjaerven AB, a 5-year-old agency in Stockholm that bills about $1,000,000, and will merge it into JWT's Stockholm office this spring. JWT's Hakan Verner-Carlsson will be chairman and Matts Bjerne of Stein Schjaervon, general manager.

Marketing shop to open

William D. Hull, formerly vp-research director, and Theresa Gacek, formerly vp-associate research director, at J. Walter Thompson Co., Chicago, will open Strategic Marketing Inc. on April 1. Specializing in custom consumer research, the new company will be at 208 W. Willow, Chicago, 60614.

FTC drops nutrition issue in industry's lap

By RICHARD L. GORDON

WASHINGTON—The Federal Trade Commission is giving the food industry 90 days to come up with plans for a voluntary alternative to more food ad regulation.

The commission is calling for industry offers in a notice to be published this week at the same time it offers to dump the most controversial portions of its proposed food ad rules.

▪ Initial reaction from Grocery Manufacturers of America president George Koch was positive. FTC's call for voluntary proposals will have the immediate effect of stimulating consideration of the industry's role in nutrition education, he said.

The offer to scrap Phases II and III of the proposed food ad rules, which had been strongly opposed by the industry, shows the commission "is recognizing reality," the GMA president said.

Chairman Michael Pertschuk began signaling a change in food ad tactics at FTC more than a year ago (AA, March 12, '79), when he urged food advertisers to consider bigger voluntary efforts to get diet and nutrition information to the public.

He told ADVERTISING AGE last week that industry failure to agree on a plan acceptable to FTC would probably force the commission to look at fresh regulatory approaches, or recommend that Congress take legislative action.

The chairman said a possible solution would be industry commitment to a major mass media nutrition education campaign, a permanent program that would emphasize the importance of a balanced diet.

While stepping back from food ad rule proposals FTC first published six years ago, Mr. Pertschuk tried to keep the pressure on the industry by warning that public concern about nutrition and health "won't go away."

"It's quite possible that some people, looking at FTC's political problems, will think that FTC isn't alive and can be ignored," he said. "That would be a mistake."

▪ The commission showed no inclination to pull back from Phase I of its food ad proposals. Its top staffers sent final recommendations to the five FTC members last month and strongly urged the rule be enacted (AA, March 31).

Phase I sets disclosure standards for food that claim they provide "energy," make diet

New York express

New York's streets are more popular with bicyclists as the transit strike creates massive problems, but Frankie Cadwell, president of Cadwell Davis Savage, a daily bike rider for the past ten years, just keeps doing her thing to get to and from her office.

American, TWA join United

Games airlines play

By JOSH LEVINE

NEW YORK—The age of the flying casino has dawned.

American Airlines and Trans World Airlines have stopped spectating as United Airlines passengers and others scratched off United Take-off game coupons in the hope of winning one of 10,000 free trips.

Both airlines announced last week that similar game promotions will be available on their flights and by mailed request starting April 10 (AA, March 31).

United confirmed it is "seriously considering" extending its sweepstakes offer to May 9 in order to match American and TWA. The offer is currently scheduled to end April 30.

"The Great American Game," the more ambitious of the two promotional responses to United, offers 10 month-long passes for unlimited travel on American, 10,000 free round trips, 10,000 certificates that upgrade an economy class passenger to first class, and 29,900 bonus certificates worth a free drink or a free movie headset.

TWA's "Win the World on TWA" game parallels United's promotion with a slight twist—winners of a free round trip are eligible for a drawing that will award one trip for two once a year for the rest of the winner's life.

Neither airline expressed great enthusiasm for the programs that will consume most of their advertising budgets for the next month; both joined reluctantly, rather than leave the promotional glory to United.

United passed out its first game tickets to passengers last Tuesday. As of late last week, Marden-Kane, United's fulfillment shop, had received more than 250,000 mail requests. Earlier, United predicted the number of mailed-in entries would reach 500,000 during the entire promotion.

"Reservations are stronger than they've been all year," said John Zeeman, United's vp-passenger marketing. "There's no way to pinpoint the reason, but we think it is because of the Take-off game."

Leo Burnett Co., Chicago, is the United agency.

The same magnetic effect pulled a reluctant American into a half-fare coupon promotion launched by United last summer. TWA held out, but countered with a "kids fly

P&G, B-M roll hair care items

By NANCY GIGES

NEW YORK—Procter & Gamble Co. and Bristol-Myers are both rolling national with two major new hair care products.

P&G is making its expected expansion of Pert shampoo (AA, Feb. 4), and B-M is bypassing test markets to introduce Clairol Small Miracle hair conditioner. B-M is promising $16,000,000 in advertising and promotion support, with $8,500,000 going into tv and couponing. P&G is expected to invest more than $15,000,000 in advertising to back its entry.

Pert, which tested in Tennessee and Wisconsin for about a year, is a creamy pearlescent liquid in a bright green bottle. It is aimed at frequent shampooers, with ad copy stressing its gentleness. The theme line in current commercials: "Bouncin and behavin'." Said to have conditioning properties, Pert will hit the market about the same time as Helene Curtis Industries' new Suave conditioning formula shampoo (AA, March 24). Tv support breaks in June for Suave, out of James Jordan Inc.

Introductory 60-second tv spots for Pert (by Compton Advertising) break May 26 and are set to reach 90% of the target audience six times a month. During the first year, 125,000,000 coupons will be distributed and 1½-oz. samples will be mailed in July.

▪ During the past decade, P&G has made several unsuccessful attempts to introduce a cosmetic shampoo entry. Pert is the only brand that has performed well enough to expand out of test. The Cincinnati marketer is telling the trade Pert has been shifting between the No. 1 and No. 2 positions (with P&G's own Head & Shoulders) in test markets.

Clairol Small Miracle, available in regular and extra body formulas, comes in three different sizes. Tv support set to break June 2 is scheduled during late night and prime time. It is intended to reach 85% of its target audience five times a week, according to trade

last minute news

BBDO reported getting share of Timex

MIDDLEBURY, CONN.—Timex Corp. plans to add BBDO as a second agency for an estimated $5,000,000 portion of its $13,000,000 men's and ladies' watches account at Grey Advertising, according to a source. BBDO and Timex could not be reached for comment because the offices of both were closed last Friday.

Keller Crescent to open branch in Dallas

DALLAS—Keller Crescent, based in Evansville, Ind., is opening a new office in Dallas within the next few months. The shop will be a full-service branch, according to sources, and located in Las Colinas, near DFW airport, also home of Bozell & Jacobs/Southwest.

'Hometown' campaign keeps Pizza Hut at FCB

WICHITA—Pizza Hut will retain its current agency, Foote, Cone & Belding, Chicago, on the strength of a campaign that attempts to reposition the chain as a local pizzeria rather than a franchised chain. Theme line of a drive to break in early May is: "Your hometown Pizza Hut." National launch of new Pan Pizza will be a part of the drive. Several of the seven New York shops that pitched the $14,000,000 national account expressed surprise at the decision, citing indications from the chain of widespread dissatisfaction with FCB.

Nets shuffle in last lap of prime time race

By COLBY COATES

NEW YORK—Stunting and shuffling and juggling their way to what may be the closest ending to a prime time tv race since CBS nipped NBC by one-tenth of a ratings point in 1964-65, the three networks are doing double strategic duty as they also make the crucial decisions on next fall's prime time schedules.

Over the next three weeks the networks will determine how to fill a minimum of 16½ prime time hours. Should the Nielsens continue to go awry for some second and third season entries, as many as 21½ prime time hours might demand relief from current occupants.

Nevertheless—and as much as the networks and buyers deplore it—there is a race to be run and 14 days left to scrap it out. At this point, ABC and CBS are in a dead heat, each with a 19.5 rating and 31.3 share.

Ratings aside, the CBS view is that because of what the network has done this year in wounding ABC's four-year monopoly on the top spot, that network already is a winner. However, all three networks have ordered up enough specials, movies and series changes to make the next two weeks reminiscent of two sweeps weeks.

- In general, agency execs think ABC will pull it out on the strength of its April 14 Academy Awards telecast, which starts at 9 p.m. (EST) this year for an extra hour's worth of ratings. Whichever way it goes, the April 22 Nielsen ratings will tell the tale.

Looking to next September, ABC probably will replace four hours at the outset, with at least one additional hour needing surgery before December, sources said.

ABC's more immediate problems are very familiar—the opening 8 a.m.-to-9 p.m. hour on Friday and Saturday plus the two-hour Sunday wasteland that starts at 7 p.m. Recent attempts to plug some of those gaps—"When the Whistle Blows," "Galactica 1980" and "Tenspeed & Brown Shoe"—have been written off by some buyers, though ABC may still nurture a shred of hope for "Tenspeed," if it finds another time period.

"Laverne & Shirley" and "Mork & Mindy" represent major question marks, sources say, with "Angie" and "The Associates" seen as weak sisters. One buyer thinks "Mork" is "really wearing thin" and that it will be shifted to an 8:30

Big St. Pauli Girl drive due

C&W gets the Blue Nun habit

By JOHN J. O'CONNOR

NEW YORK—Blue Nun has left Jerry Della Femina after 11 years, and St. Pauli Girl wants to be a "10" in the eyes of *Playboy* readers.

While the foregoing reads like an item in a gossip column, it reflects, however briefly, two noteworthy developments in the alcoholic beverage market during the last week.

Citing Cunningham & Walsh's "creative product," Schieffelin & Co. culminated a review by tapping the agency to handle Blue Nun imported white wine, a $2,500,000 account that was revered by Della Femina, Travisano & Partners.

Meanwhile, Carlton Sales Co., a unit of Foremost-McKesson Wine & Spirits Group, has given up its wines and spirits to sister units to devote all its efforts to St. Pauli Girl imported German beer. Its determination to make the beer a major factor in the imported market will be evident via a five-page single gatefold ad in the July issue of *Playboy*. The ad was described by Henderson Advertising, Greenville, S.C., as the "largest inside single gatefold in the magazine's history."

To lose Blue Nun, a brand as closely identified with the agency as Mr. Della Femina himself, has to be upsetting to the shop.

From a 60,000-case brand in 1969, Blue Nun over the next 10 years became the nation's No.1 selling imported white wine principally because of Della Femina's award-winning, humorous radio commercials featuring the team of Jerry Stiller and Anne Meara. Those spots, replaced in 1978 by tv commercials without the comedy team, succeeded in getting across the message that Blue Nun was the right wine with any meal.

Several months ago, the agency and Schieffelin began to clash over advertising and pricing strategy for Blue Nun, which was unseated as the leading imported white wine last year by Banfi Products' Riunite. According to *Impact*, a wine and spirits newsletter, its forthcoming rankings will show Riunite white with sales last year exceeding 1,500,000 cases, compared with 1,225,000 for Blue Nun.

Mr. Della Femina said he was

(Continued on Page 76)

McCann gets Coke's 'sympathy' on Petri wine ad

SAN FRANCISCO—McCann-Erickson here has broken a new campaign for client United Vintners' Petri Wineries that directly compares its brand with Taylor California Cellars wine.

The newspaper ad, which ran in Los Angeles and is set for other markets, calls Taylor a wine that "puts on airs by comparing itself to Almaden, Sebastiani and Inglenook" (AA, March 31).

Taylor, of course, is a product of Coca-Cola Co.'s Wine Spectrum and the wine that broke from tradition to first use comparative advertising. McCann is Coca-Cola Co.'s major agency (New York and Atlanta offices).

Has the campaign raised any eyebrows at the giant cola company?

Atlanta-based Albert E. Killeen, Coca-Cola vice-chairman, corporate marketing director, and president of the Wine Spectrum, issued the following statement:

"Being a man of compassion, McCann-Erickson has my full and complete sympathy for having been given the impossible assignment by their client, Heublein, owners of both the Petri and Inglenook brands, to somehow, some way, find a basis of favorable comparison between Petri, their low-priced jug wine, with the Wine Spectrum's Taylor California Cellars, a premium brand.

"McCann's difficulty was further compounded because Heublein apparently has not been able to favorably compare Inglenook Navalle, their premium jug wine, supposedly a far superior wine than Petri, with Taylor California Cellars.

"However, McCann is to be congratulated on solving this dilemma by pointing out to Los Angeles consumers that the Petri wine jug does have a handle in the event that a consumer would ever be disposed to remove it from the shelf and does have a screw cap closure in the event a consumer would ever wish to open it and drink therefrom."

- Charles Hamm, McCann vice-chairman in New York and the key contact with Coca-Cola, observed that such client situations occur sometime and indicated it's all part of doing business.

Dan Rosenthal, Petri account exec in McCann's office here, said that he hadn't heard any complaints. #

Strike hits N.Y. stores; ads cut

NEW YORK—The transit strike hasn't crippled retail business here, but it is forcing changes in store hours and advertising and causing some sales slippage.

During the pre-Easter selling period last week, many stores dispensed with late evening hours and closed early to accommodate employes. Early closings also reflected lighter store traffic.

- And as consumer traffic fell off, stores either canceled or delayed local advertising.

Robert Gottlieb, senior vp-director marketing at Gimbel's, put "some ads on hold, mainly nonpromotional things not keyed for Easter, such as regular price jeans or slacks ads." However, he added that he had not planned much advertising for early in the week anyway. He felt late week business should be helped by the return of the Long Island Railroad, which was on strike until April 2.

(Continued on Page 76)

Minority marketing looking to the 1980s

(Continued from Page S-19)

has found that advertisers of products have largely overlooked the publication and the audience it reaches.

Said Preston J. Edwards, publisher, "We've had a very difficult time being recognized as a good product medium. We've proved we're a good recruitment magazine, but not product."

Mr. Edwards attributed the problem to an advertising community that "doesn't address itself to specific markets of blacks, lumping them instead into the general market. Sure, young black people are part of the general market, but there are segments within that market too."

While recruitment ads have helped keep the magazine alive (total circulation is 254,818 nationwide), Mr. Edwards wants more product advertising.

Ford Motor Co., Chevrolet, Panasonic, Atlantic and Johnson Cosmetics Co. have advertised in the publication and Mr. Edwards hopes other product advertisers will come on board.

Like the *Black Collegian*, a Chicago-based publication, *Dollars & Sense*, targets a particular segment in the black market—the black professional and the black businessman.

Now in its sixth year, the magazine, published every other month, claims a circulation of 110,000, mostly in the Chicago area with nominal circulation nationwide.

Its audience, according to national sales manager Yvette P. Jackson, is primarily executives or administrators with a median income of $25,000.

Published by National Publication Sales Agency Inc., the magazine has a good advertising mix—most of which comes out of Chicago. However, like other minority targeted publications, a broader advertising mix is sought but not always easy to find.

The Sheridan Broadcasting Network is reaching out to capture the black audience. Linking 84 radio stations, it is the largest, completely black-owned news network operation in the U.S.

Formerly known as the Mutual Black Network, the ownership was changed last August with the purchase by the Sheridan Broadcasting Corp.

All employes involved in the collection and dissemination of the news are black. There is a staff to cover the White House and Capitol Hill. There are two daily sports programs and the network plans to send a staff to Moscow to cover the summer Olympic Games.

"We have been receiving acceptance as a media vehicle," said Skip Finley, exec vp and general manager of the network. "However, we don't like to be told we're not going to get an opportunity to pitch.

"One problem we have is that when advertisers buy network radio, they don't necessarily buy the black network. Because of the small [12%] size of the black population compared to the over-all population, this presents marketing implications in the measurement and consumption of products. Some folks feel they don't need to advertise to the 12%."

- Another problem they confront is that advertisers rank markets by black population and, of the top 100 black markets, there are about 15 or 16 with no black station.

"That's a large difference between us and ABC, CBS or NBC," said Mr. Finley. "If you were to compare our affiliates on a map to where other network affiliates are, you'll see ours are very, very heavy in the Southeast and very limited towards the Midwest or mountain states in the Northwest."

Advertisers include the U.S. Army, Johnson Products, AT&T, Kodak, Chevrolet, ABC-TV, Maxwell House coffee, Campbell soup, McDonald's, Pillsbury and Burger King, which is one of the largest.

"The advertisers' resistance has deteriorated somewhat with the help from the Four A's," says Mr. Finley. "And our selling has become more marketing oriented and more professional. Now we're in a better position. The measurement of radio audiences, specifically blacks, has improved. As the years passed, more blacks, like myself, got experience in the industry and we can address more issues in a more professional manner.

"I think the future is bright for us," he says. "If you take a look at the total black consumers you find that a majority now has an income of $10,000, which is not a high figure in itself, but it speaks for some economic growth, as opposed to 15 years ago. That's why there is going to be a lot of growth for this segment of the black market." #

SKIP FINLEY

Minority readership poll

Ebony, *Jet* and *Essence* continue to be the most widely read magazines among black women.

These magazines have substantially higher readership than the next group of magazines read by black women, *Better Homes & Gardens*, *Good Housekeeping*, *Women's Day* and *Family Circle*.

People is read by 15% of the black women of America.

These findings are based on the cumulative results of a series of national studies as part of the Lee Slurzberg Research (LSR) National Black Omnibus Poll in 1979.

The company conducts a national probability sample of black men and women on behalf of participating clients who sponsor the ongoing poll. The poll has been conducted by LSR since 1971.

Among black men, the pattern of readership is somewhat different after the two major national black publications—*Jet* and *Ebony*.

Sports Illustrated is the third most popular magazine among black men as it has been for the past three years in the LSR National Black Omnibus Poll.

After that, *Black Sports*, *People* and *Black Stars* are the next most widely read magazines among black men. #

Aftertaste

Pizza Hut review ends in bitterness; exec exits

WICHITA—Don McCullough, Pizza Hut senior vp-marketing, has resigned as a result of the company's decision to retain Foote, Cone & Belding, Chicago, as agency for its $14,000,000 national account.

But Mr. McCullough's resignation is only a part of the fallout from one of the most controversial agency reviews in years. The aftershock of Pizza Hut's decision has left its marketing execs tight-lipped, franchisees confused and the six New York agencies that pitched the account fuming.

The first shock hit Pizza Hut April 5, the day after the decision was made, when Mr. McCullough resigned. He told ADVERTISING AGE late last week that the agency decision was "only one of a variety of disagreements over the past year."

The second bombshell was the report that two other Pizza Hut execs—Al DiMarco, vp-advertising, and Jim Palmer, advertising manager—asked to be relieved of advertising duties, requesting transfers to other PepsiCo subsidiaries. A Pizza Hut spokesman responded that both men were still at the company and had "no plans to leave as far as I know."

So far, Graham Butler, Pizza Hut group vp, has not named Mr. McCullough's replacement, but Bud Gates, former senior director-corporate marketing, has been promoted to vp-marketing.

- While Pizza Hut was attempting to put its corporate house in order last week, the six agencies that poured a reported $500,000 (combined) into their presentations expressed bitterness and shock over the company's decision to retain FCB. "We've been had," said one agency exec.

"From the very beginning, Pizza Hut execs made it clear Foote, Cone was out," the exec continued. "When we saw how they felt, we went all out. But they didn't play by the ground rules."

Another exec insisted that Pizza Hut told its franchisees the week of Feb. 18 that FCB was out. "The franchisees cheered, we were told by Pizza Hut execs," he added.

The confusion apparently started when FCB presented its campaign April 3 to the Pizza Hut agency selection committee, composed of Messrs. McCullough, DiMarco, Palmer, Butler and two representatives of the International Pizza Hut Franchise Assn. (IPHFA).

Mr. Butler headed the committee, but only Messrs. Butler, McCullough, Jim Winter (IPHFA director) and Bud Fulkerson (IPHFA marketing directors were permitted to vote.

last minute news

Bonanni named CBS Publications group publisher

NEW YORK—Peter Bonanni, who resigned as president of Charter Publishing Co. last month (AA, March 17), has been named vp-group publisher, women's group, CBS Publications, and publisher of *Woman's Day*. Earlier a one-time vp-associate publisher at *WD*, Mr. Bonanni, 47, succeeds George Allen, 65, who moves to the new post of senior vp-magazines, responsible for CBS' men's, women's, special interest and acquisition and development groups.

Sellinger expected to appear in Schlitz spots

MILWAUKEE—Jos. Schlitz Brewing Co. is readying a new campaign for its troubled flagship brand, and it reportedly will include taste test invitations and feature president (and newly named ceo) Frank Sellinger. Ads are due to break in three or four weeks, via JWT, Chicago.

Alternate Olympics tv fare proposed

NEW YORK—20th Century-Fox Sports is suggesting as alternative fare, if the Moscow Olympics are not shown in the U.S., "a king and queen of gymnastics" tv series with the U.S. Gymnastics Federation, an amateur boxing competition with Olympians from eight nations and other events. Meanwhile, another enterprising tv packager is awaiting word from the Carter administration and the three tv nets on proposed pooled coverage

Cigaret marketers take the low road as the competition for the ultra low-tar segment grows fierce. These brands may generate expenditures of $150,000,000 during the next 12 months.

Three stake lowest claim as massive battle begins

By SAM HARPER

NEW YORK—"Carlton is lowest." "Introducing the lowest. Now." "Introducing Cambridge Box: The lowest tar ever."

In a succession of rapid-fire new product launches, coupled with intensive advertising, American Tobacco Co. (Carlton), R.J. Reynolds Tobacco (Now) and Philip Morris U.S.A. (Cambridge) have begun to wage one of the cigaret market's biggest battles ever over an ad claim.

Before the dust settles somewhat, the three cigaret makers over the next 12 months will have spent perhaps as much as $150,000,000 combined in advertising and promotion support for the three brands.

There is a strong possibility all three brands will move to zero tar at some point in the coming months, and there also is the likelihood American Tobacco will once again resort to the lawsuit as a weapon to preserve Carlton's hold on the "lowest" claim.

- With their newest line extensions, American Tobacco and Reynolds will be spending at levels far in excess of their combined $50,000,000 outlay last year. PM's new Cambridge very easily may be the most expensive cigaret brand introduction in history. The Cambridge advertising and promotion outlay could average out to more than $1,000,000 a week over the next year, a source speculated.

Cambridge is staking its claim to the lowest with an 80mm cigaret at less than 1mg. The two other Cambridge styles are an 85mm at 1mg and 100mm at 4mg tar. Although PM is known to have a Cambridge menthol in two styles, it apparently elected to hold them back for now.

American expects to hold onto its "lowest" claim with a new 0.06mg tar extension of Carlton. Now announced distribution of a product that is less than 0.1mg tar last week. Both carry "lowest" advertising theme lines in accompanying campaigns, and both followed the news of PM's Cambridge launch (AA, March 31).

Though RJR's marketing moves of late are aimed at halting the eye-popping growth rate of Carlton,

Xerox goes retail

Plans chain of 'supermarkets' for automated offices

DALLAS—Xerox Corp., resetting its sights to encompass low end users for the first time, has gone after the market with a vengeance, moving into the small business equipment market with new retail stores and unveiling new products.

It opened the first store here last week and another six are planned before September.

- "This is not a factory outlet the way IBM, National Equipment Corp. and Data General's are," said Sanford Garrett, analyst with Paine Webber, New York. "It is much larger in scope. It is the first full-fledged honest-to-God retailer for all the needs of an automated office.

"It is a way of getting into bed with a whole new class of users," he added.

Xerox broke page ads in Dallas papers and plans tv, radio and heavy direct mail support. The company declined to say how much is being spent on the campaign. Needham, Harper & Steers, New York, is handling the advertising. Kobs & Brady, Chicago, is doing the direct mail.

Brother Dominic (Jack Eagle), who is strongly identified with Xerox copiers, appears in the introductory newspaper pages pushing a shopping cart filled with items from the store, including a Xerox typewriter. The character is more prominently featured in small-space ads with headlines such as "In the beginning there shall be bargains." Brother Dominic also was on hand to help Xerox executives with their store's grand opening.

"If this flies, their advertising nationwide will pick up very sharply," Mr. Garrett said. "The advertising aspect is very important."

Xerox opened its first "office supermarket" with the debut of the Xerox 550 copier. With a price tag of $1,195, the company claims it is the cheapest bond copier out.

Other new products which seem to put Xerox primarily against IBM include the Xerox 510 small business computer, selling from $12,500 to $13,800 and said to be comparable to the IBM 5120, and a new Xerox self-correcting electric typewriter (made by Remington), selling for $990 and said to be comparable to the IBM Selectric. (The widely advertised Xerox 800 series electronic word processors selling from $4,500 to $12,200 also are available at the store.)

Kodak shooting at 35mm model?

By LOUIS A. FANELLI

NEW YORK—The intensely competitive, Japanese dominated 35mm camera market soon may become a battlefield, as rumors persist that Eastman Kodak Co., the U.S. photographic giant, may once again enter that market.

Talk of Kodak's entry into the growing market has heightened with the filing by Kodak of a technical disclosure outlining plans for a 35mm film cartridge.

Since it is unlikely that a 35mm cartridge would be adaptable to cameras currently being produced, there has been some speculation that Kodak would introduce a camera as well. Further speculation indicates that Kodak plans to introduce a major product at the time of its 100th anniversary celebration later this year.

The company first marketed a line of 35mm cameras in 1934. The last cameras of that type were taken off the market in 1969.

When a Kodak spokesman was asked whether a 35mm camera was coming, he would only say that "the company has not announced any 35mm cameras."

A Wall Street analyst indicated that if the company were to market the camera it would most likely sell for about $100, thereby attracting a significant portion of the amateur market while undercutting the Japanese makes.

"The Japanese are always trying to bring the price of 35mm cameras down," another analyst said. "It is becoming a consumer item, which is a very significant breakthrough."

While sales of 35mm cameras have risen from 1,900,000 in 1978 to an estimated 2,300,000 last year, both 110 pocket and instant cameras—Kodak's mainstay—have declined in sales.

According to the 1979-80 *Wolfman Report*, instant cameras fell from a high of 8,200,000 in 1978 to an estimated 7,000,000 in 1979. At the same time, 110 camera sales fell from 9,100,000 in 1978 to 8,000,000 last year.

Industry sources said that the lower prices, coupled with the advancements in 35mm photography, have made picture-taking a relatively simple task, thereby adding to its appeal.

In addition, the unprecedented increases in advertising, plus the use of celebrities endorsing the products, have given 35mm cameras enormous exposure.

One analyst noted that when people now walk into a camera store they don't ask for the camera by name, but rather ask for the camera used by a specific celebrity endorser.

Sign of spring

Opening day of the Major League Baseball season is marked by a newspaper ad for Lorillard's Kent III cigaret brand running in 26 big league cities nationwide. The outdoor board is superimposed on a photo of Yankee Stadium that has been retouched to represent a generic stadium. Ad calls Kent III the most successful new cigaret since 1976. Foote, Cone & Belding, New York, is the agency.

Recession? Some smoke, no fire

By BERNICE KANNER

NEW YORK—There are some preliminary signs of an economic slowdown, but few if any media are hurting—yet.

What are those signs? First, some slippage of ad pages in upcoming issues of consumer and business magazines—the women's service and newsweeklies are two categories expected to come in shy of last year's page counts. Second, a shifting of dollars from marginal to lead brands, and third, a movement on the part of advertisers to keep their media plans flexible coupled with an over-all heightened wariness.

- "So far, agencies, regardless of size, haven't been complaining of budget cuts," said Harry Paster, senior vp, American Assn. of Advertising Agencies. "But at the same time we hear of clients not wanting to make long-term commitments, saying they want to be able to get out of things. Everybody's kind of jittery."

Those jitters have translated into a "spotty" second quarter so far for the business press, according to Charles Mill, president of American Business Press. Although "industrial budgets are being looked at sharply, the general business books have not been hit yet," said Mr. Mill, who pointed to softening in some areas such as housing and medical publications. (The latter, he feels, has more to do with the government's blockage of new drug introductions than any recession.)

McGraw-Hill Publications president Paul McPherson confirmed "selective softening" in the housing and construction field but was encouraged by the giant business publisher's performance so far.

"We're seeing a reluctance on the part of advertisers to send in complete contracts and more rush insertion orders," he said. The end result is page tallies comparable to last year's. Mr. McPherson is holding fast to an earlier forecast of 10% to 15% revenue growth for the year—"at least for now," he added.

- *Newsweek* publisher Chuck Kennedy had "budgeted and planned for a relatively modest decline" this year and got through the first quarter with no signs of cutbacks. Now he sees no "serious" erosion in bookings and expects to end the year "ahead in revenues if not in pages."

Rival *Time* reported that its half-year count is just about even with last year, minus the unique 64-page Gulf + Western annual report insert that ran in February, 1979. The newsweekly ran ahead of last year in the first quarter.

Nets' upfront tally looks good

By COLBY COATES

NEW YORK—Network tv, only a fall prime time schedule away from kicking off its annual upfront selling season, remains calmly confident about its profitable fate, even though fact and fiction suggest recessionary times are at hand.

Last year's bull market won't develop so swiftly, network execs say, but a thoughtful, more strategic-oriented marketplace will produce the same results—upfront prime time sales in the neighborhood of $1.6 billion.

Although this year's upfront total only equals 1979 business (and is actually a decline in real dollars), it is logical if more dollars will be withheld for scatter buys, as execs insist. The revenue outlook is solid, barring advertiser decisions to trim back, but profitability remains an enduring concern as programing costs soar.

- Artful upfront deals rather than the panicky buys of last year will be the norm, network and agency execs agree.

For example, Ford, in recent negotiations with CBS over the size of its National Football League package, decided to give up its exclusivity rather than add some minutes as CBS requested. Instead, Ford will spread some money into baseball while CBS splits nine minutes among three automotives. "Five or six domestic and foreign automotives are talking to us," said CBS-TV Network vp-sales Paul Isacsson, who said, "CBS still comes out just fine."

In fact, fine and dandy is as good a way as any to describe how the network sales teams think they will do in the coming months. Many positive indicators already are in place.

The short-term scatter market, though a tad slower to develop, is still yielding cpm's that are substantially higher than last year's upfront business.

- Moreover, as third quarter options have fallen due in the last few weeks, network execs have seen renewal rates that have left them "amazed, pleased and thrilled," and "hard pressed to single out any one cutback of consequence." One street report speculated that all but $1,000,000 of $30,000,000 in CBS options was picked up by advertisers.

In the weeks prior to the release of the fall schedules, network execs traditionally man the phones and pound the pavement, assem-

Reynolds is magazine pacesetter

NEW YORK—R. J. Reynolds Industries, the biggest magazine advertiser for 10 of last year's 12 months, continued to set the pace in the first month of 1980, a month when magazine ad expenditures rose 14% and ad pages climbed 3%.

Though healthy, these increases reflect a slight softening following the high demand of late fall and three years of 20% increases or better industrywide.

A new runner-up emerged in Philip Morris. In December, the cigaret marketer held fourth place. Now, with a 28% spending hike, it bounded to second spot, displacing Seagram Co. Ltd., which slipped to third place, and General Motors Corp., which dropped to fourth. Procter & Gamble advanced from ninth to fifth place with a 5% budget boost, and CBS held sixth place with a 6% increase. Newcomer B.A.T. Industries increased its magazine allowance 42% and wound up in seventh place, and Time Inc. upped its magazine dollars 99% to take eighth place.

General Foods, which had ranked fifth in December, took ninth place with a 22% increase in its magazine spending and Loews Corp. fell two spots with no additional magazine spending.

Ford Motor Co., which held sixth place a month earlier, and American Brands, which ranked 10th, missed the January top 10.

With a 52% increase in spending, cigarets and tobacco surged to the lead position of the product categories supporting magazines, displacing beers, wines and liquor, which slipped to fourth place. Publishing and media, which ranked eighth a month earlier, zoomed to become the second largest category.

Data in the accompanying chart was compiled by the Leading National Advertisers for the Publishers Information Bureau and ADVERTISING AGE. #

"The Nation's Number One Producer of Nationally Sponsored Radio Programs"

In Ad Age

50 years ago this week

APRIL 12, 1930

National advertising for used cars was launched by Buick Motor Co. last week with a full page in the *Literary Digest* asking, "Who ever thinks of asking, 'Did you buy your Buick new?'," and urging purchase from Buick dealers. Some 75% of cars Buick dealers take in trade are Buicks, the company says.

* * *

Reporting that 46% of Coca-Cola advertising goes into outdoor, Turner Jones, vp and ad director, urged development of a method of chocking outdoor circulation. "We are as much in the dark about outdoor advertising circulation," he said, "as we are about radio; that is a vast and beautiful mystery today."

* * *

General Foods has begun a test in Springfield, Mass., of frozen foods under the Birds Eye label. Included are 16 varieties of fresh meats, three seafoods, two vegetables and three fruits.

* * *

Following a study of prices men expect to pay, Marshall Field & Co., Chicago, has put the following standard scale in effect in its basement store: Overcoats and suits, $35; ties, $1; hosiery, 55 cents; shoes, $6.50; pajamas, $2.50; sweaters, $5; underwear, $2; handkerchiefs, 25 cents.

* * *

Tony Gutierrez, Passaic, N.J., cigar manufacturer, has perfected a method of printing on Cellophane. Special machines which do the printing will be leased out.

* * *

Z. L. Potter Co., Syracuse agency, has announced that it will appoint local representatives to get its clients' retailers to run local tie-in copy. The reps will get 5% commission on all local space.

* * *

Col. William Cooper Procter, president of P&G, in an interview with Sturges Dorrance, head of the New York Agency of Dorrance, Sullivan & Co.:

"To advertising must go major credit for the plan which makes it possible for the company to guarantee a minimum of 48 weeks' work per year" for more than 10,000 P&G employes, regardless of seasonal or cyclical depressions.

* * *

Reid, Murdoch & Co., producer of Monarch food products, has outfitted a specially designed all-metal three-motor Ford monoplane to show its complete line of 325 products to the trade and public. Dealers and school teachers get special invitations to visit the plane; newspaper ads invite the public at specified times.

APRIL 11, 1955

Coty Inc. has filed a suit in federal court in New York against Revlon, Wm. H. Weintraub ad agency and CBS, alleging misuse of an advertising theme, trademark and copy claims. The suit, which Coty calls "the first of its kind," accuses Revlon of using tv advertising which duplicates Coty lipstick claims for products which do not merit such claims.

* * *

The Rev. Charles Howard Graf, pastor of St. John's In the Village Church in New York, who quit the board of directors of American Church Union because of a "barely legal" puzzle contest the union is sponsoring, wrote AD AGE: "Of every $5 of 'contributions' through the contest, $4 will go for expenses. A pretty price to pay for sweet charity."

The national puzzle contest, operated by Keith S. Sutton, has been placing its advertising through S. Duane Lyon Inc.

* * *

The Federal Trade Commission has rebuffed a hearing examiner who ruled that the terms "milder," "soothing and relaxing" and "no unpleasant aftertaste" in Chesterfield cigaret advertising are "permissible puffery." The FTC, in reviewing its hearing examiner's ruling, said that it does not agree that these are "laudatory, harmless or mere puffing terms," and ordered further hearings.

* * *

James Thomas Chirurg, head of a Boston agency, published its annual report for 1954 this week, and told AD AGE he does not see why all involved, including clients and employes of the privately owned company, "shouldn't know the facts and figures about our agency." The Chirurg agency has been publishing an annual report since 1945. Needham, Louis & Brorby, Chicago, is the only other privately owned advertising agency to follow this procedure.

* * *

Top five Nielsen-rated radio shows for two weeks ending Feb. 26, 1955: "Amos 'n' Andy" (Brown & Williamson); "Jack Benny" (Lucky Strike, CBS); "You Bet Your Life" (DeSoto-Plymouth Dealers, NBC); "Lux Radio Theater" (Lever Bros., NBC); "Our Miss Brooks" (Toni, CBS).

APRIL 3, 1970

The Interpublic Group of Companies, which includes McCann-Erikson, Erwin, Wasey & Co. and Marschalk Co. among other agencies, will announce next week that it will go public, offering about 27% of its stock. It billed $727,260,000 in 1969, with profits of $4,778,000. The offering price is not yet known.

In Chicago, Victor Drumm, sales vp of Cahners Publishing Co., Boston business paper publisher that hit $70,000,000 in sales last year, announced "there is a pretty good chance" that the company will go public.

* * *

Armstrong Cork Co., declaring that "pablum programing" is driving millions—especially those from higher income homes—away from tv sets, has canceled all tv advertising and will concentrate its advertising in magazines.

* * *

A campaign to introduce L'eggs, a new line of one-size super-stretch stockings, has been launched by Hanes hosiery. The company has abandoned traditional hosiery marketing and is packaging the stockings in plastic eggs about three times the size of hen eggs, housed in a free-standing floor display.

* * *

The value and future of independent buying services in the broadcast field was the subject of a spirited debate before the Broadcast Advertising Club of Chicago. Sam Vitt, president, Vitt Media International, sees the services as the wave of the future; Thomas J. Glynn, vp and director of media at J. Walter Thompson Co., Chicago, sees them as doomed because "the professionals just aren't there."

50	GGK	17.8	118.4

*D'Arcy-MacManus & Masius figures exclude de Garmo, which was merged into the D'Arcy New York office in January.

†Figures include 20% ownership in Gestion et Recherche Publicitaire, a French agency group comprising B&B Publicite, Feldman, Calleux and Concurrence.

††Groupe RSCG includes the main Paris agency, RSCG, plus Chevassus & Vadon, Dire, Immediat and four smaller units.

Foreign ad shops earn stripes during 1979

By CRAIG ENDICOTT

CHICAGO

Despite the global slowdown in economic activity toward the end of 1979 and the strengthening of the dollar, the international advertising market proved its 1978 spurt against U.S. domestic advertising activity was no fluke by again surpassing gross income and billings generated within the U. S. in 1979.

But just barely. Foreign agencies, many of which are subsidiaries or affiliates of U.S. parents, tallied gross income of $3.27 billion on billings of $20.8 billion in ADVERTISING AGE's 22nd annual survey of foreign agency gross income and billing. This compared favorably to total U.S. domestic gross income of $2.92 billion on billings of $20.3 billion.*

The overseas shops on a year-to-year basis did extremely well in 1979, improving 19% in gross income over $2.55 billion in 1978 and 18% in billings over the $17.67 billion reported in 1978.†

Overseas shops, which got a big lift in 1978 from a favorable dollar exchange rate, saw the tables somewhat reverse last year, though strong currencies like the German Mark (it appreciated 8.5% in 1979 compared to 22% in 1978) and the Swiss Franc (up 7% compared to a 39% increased in 1978) kept the smiles beaming in the corporation offices of parent agencies in the U.S.

- The Japanese yen, however, slipped by 4% in 1979 compared to a whopping 40% appreciation against the dollar in 1978. For the largest Japanese agency, Dentsu Inc., which also ranked No. 1 in the world in 1979, this decline in the yen from 204 to 212.4 per dollar meant a yen growth of 14% in gross income translated into a dollar growth of 9.8%.

On the brighter side was Brazil, where despite a 35% depreciation of the cruzeiro against the dollar (this does not take into the account the cruzeiro's plunge at year end from 23.7 to 38.8 to the dollar following a devaluation), agencies stayed well ahead of the downward currency spiral by keeping up with inflation—which marked about 80% by year end. The 31 agencies reporting in both 1978 and 1979 from Brazil, for example, measured a total increase in gross income of 64% in dollar terms! Now that should make anyone proud, but it also illustrates how fickle the dollar as a common denominator can be when figuring in highly inflated currencies.

- On a more auspicious note, one country that reported in 1978 was a no-show in 1979: Iran, a glaring example of the dangers of agency investment abroad. Both McCann-Erickson and BBDO International, with strong offices in Teheran, have closed down until things cool off. Nicaragua is another example of how insurrection can

(Continued on Page S-8)

Kickers, the French shoe for kids, is now being distributed to four company-owned stores in London and at a test site in Florida. So why not create advertising that can travel, too. That's just what Createurs Associés did, piecing together footage from a U.S. skateboard park and hand gliders to show French tv commercial watchers just how much you can kick Kickers around.

---

*The U.S. figures just represent domestic business. Foreign income of U.S.-based ad agencies alone accounts for about $1.20 billion gross income and about $8.27 billion in billings, giving U.S.-based agencies grand totals of $4.10 billion and $2.8 billion, respectively (based on the reporting of 679 agencies in the ADVERTISING AGE's March 19, 1980 special U.S. agency profile issue.

†AA applied the 1979 exchange rates also to 1978 local currency figures in the various countries in order to factor out the fluctuation of the local currencies against the dollar. This procedure gives a more accurate assessment of an agency's growth in each market.

International Agency Profiles

grande classe
AU BON MARCHÉ

Children, always popular subjects for advertisers, stepped out even more boldly in 1979, proclaimed the "Year of the Child" by the United Nations. The French seem to have a special gift at capturing the free spirit of children as exhibited in ad photos at left by award-winning photographer Sarah Moon for Cacharel via Paris agency Ideodis, and the Au Bon Marche back-to-school poster that typifies the enfant terrible nature that often surfaces in ads produced by Roux Seguela Cayzac & Goudard, the No. 2 French agency and probably the most controversial—as the title of the book written last year by agency partner Jacques Seguela shows: "Don't tell my Mother I'm in Advertising; She Thinks I'm a Pianist in a Whorehouse."

A comprehensive view of the agency business is presented in the following section, in which ADVERTISING AGE has prepared profiles of international agencies, including their gross income and billings in 1979 and 1978, accounts won and lost, media mix, total employes. The agency profiles are arranged alphabetically, by country. A table listing the average annual rate of exchange per country used in converting local currency to dollars is found below.

ARGENTINA

The same 1979 rate of .000852 dollars to the Argentine peso was also applied to local currency reported for 1978 income and billings in this issue. This procedure factors out a 43% depreciation of the peso against the U.S. dollar based on peso's 1978 exchange rate of .0015.

Casares Grey & Asociados, Buenos Aires, reports gross income of $4,349,000 on billings of $28,994,000 for 1979, compared with gross income of $1,399,000 on billings of $9,325,000 for 1978. (In local currency, gross income was Ps 5.104 billion on billings of Ps 34.030 billion in 1979, compared with gross income of Ps 1.642 billion on billings of Ps 10.948 billion in 1978.) Media breakdown: Newspapers 8%; magazines 4%; radio 12%; tv 72%; outdoor 3%; cinema 1%. Employes: 121. Accounts gained: Inda Hnos/Sol Jet (Alpargatas). Account lost: Audinac.

Cicero Publicidad, Buenos Aires, reports gross income of $1,618,800 on billings of $8,094,000 for 1979, compared with gross income of $511,200 on billings of $2,556,000 for 1978. (In local currency, gross income was Ps 1.9 billion on billings of Ps 9.5 billion in 1979, compared with gross income of Ps 600,000,000 on billings of Ps 3 billion in 1978.) Media breakdown: Newspapers 45%; magazines 14%; radio 4%; tv 26%; outdoor 2%; business press 3%; transit advertising 1%; point of sale 4%; cinema 1%. Employes: 47. Accounts gained: Fine wines—2 Estribos, Sea Village, Manantiales—Inmobitalia Overseas.

Gomez Ferran Inter-Americana, Buenos Aires, part of Kenyon & Eckhardt Intl., reports gross income of $1,820,000 on billings of $10,070,000 for 1979, compared with gross income of $660,000 on billings of $3,300,000 for 1978. (In local currency, gross income was Ps 2.136 billion on billings of Ps 11.819 billion in 1979, compared with gross income of Ps 40,000,000 on billings of Ps 220,000,000 in 1978.)

Gowland/McCann-Erickson, Buenos Aires, reports gross income of $707,160 on billings of $23,039,173 for 1979, compared with billings of $7,984,944 for 1978. (In local currency, gross income was Ps 830,000,000 on billings of Ps 27.041 billion in 1979, compared with billings of Ps 9,372 billion in 1978.) No gross income was reported for 1978. Accounts gained: American Home Products (Kolynos toothpaste, Van Ess deodorant), Dow Chemical—Indokuim, L'Oreal. New assignments: BAT—new product.

Johnson/Benton y Bowles, Buenos Aires, reports gross income of $1,634,230 on billings of $5,657,280 for 1979, compared with gross income of $439,547 on billings of $1,453,388 for 1978. (In local currency, gross income was Ps 1.918 billion on billings of Ps 6.640 billion in 1979, compared with gross income of Ps 515,900,000 on billings of Ps 1.705 billion in 1978.) Media breakdown: Newspapers 28%; magazines 23%; radio 15%; tv 18%; cinema 1%; graphic production 15%. Employes: 38. Accounts gained: BASF audio cassettes, tapes and chemicals, Ostrimet metallurgical constructions, Banque Nationale de Paris, Banco do Brasil. Account lost: Mercedes-Benz trucks.

Lintas Limitada, Buenos Aires, reports gross income of $3,973,000 on billings of $26,595,000 for 1979, compared with gross income of $1,785,000 on billings of $11,976,000 for 1978. (In local currency, gross income was Ps 4.664 billion on billings of Ps 31.215 billion in 1979, compared with gross income of Ps 2.095 billion on billings of Ps 14.056 billion in 1978.) Media breakdown: Newspapers 4%; magazines 11%; radio 12%; tv 70%; outdoor 1%; cinema 2%. Employes: 69. Accounts gained: Salvo refrigerators and washing machines.

Walter Martinez, Buenos Aires, reports gross income of $326,316 on billings of $2,952,180 for 1979, compared with gross income of $272,640 on billings of $1,533,600 for 1978. (In local currency, gross income was Ps 383,000,000 on billings of Ps 3.465 billion in 1979, compared with gross income of Ps 320,000,000 on billings of Ps 1.8 billion in 1978.) Media breakdown: Newspapers 30%; magazines 15%; radio 25%; tv 30%. Employes: 22.

Ortiz, Scopesi & Cia., Buenos Aires, part of the Ogilvy & Mather network, reports gross income of $6,134,400 on billings of $26,213,487 for 1979, compared with gross income of $1,661,400 on billings of $7,085,767 for 1978. (In local currency, gross income was Ps 7.2 billion on billings of Ps 30.757 billion in 1979, compared with gross income of Ps 1.95 billion on billings of Ps 8.317 billion in 1978.) Media breakdown: Newspapers 16%; magazines 9%; radio 12%; tv 47%; outdoor 3%; point of sale 3%; cinema 10%. Employes: 100. Accounts gained: Bodegas y Vinedos Arizu, Lever y Asociados S.A.C.I.F., Morgan Guaranty Trust Co., Productos Roche S.A.Q.I. Account lost: Sol Jet.

Solanas, Buenos Aires, reports gross income of $1,300,152 on billings of $18,573,600 for 1979, compared with gross income of $566,205 on billings of $7,077,564

(Continued on Page S-10)

Foreign exchange rates in issue

ADVERTISING AGE editors used the exchange rates in these tables to determine dollar equivalents for both 1979 and 1978. This provides a more accurate assessment of an agency's year-to-year income and billings growth than applying different exchange rates to each year, since the AA procedure factors out a local currency's fluctuations against the dollar.

Foreign currency movement against the dollar did cool considerably in 1979 compared to 1978: the Deutschemark, for example, appreciated at an 8.5% clip in 1979 compared to 22% in 1978; the Swiss Franc was up only 7% (39% in 1978), while the Japanese Yen depreciated 4% (40% advance in 1978).

The exchange rates listed here actually are average annual rates of exchange determined by totaling the exchange rates per country at the end of each month and dividing by the number of months. In this issue, average annual exchange rates for 1979 and 1978 are given in the paragraph lead-ins to the agency profiles for most countries to illustrate the rise and fall of the dollar in each currency.

Local currency figures, however, are supplied in each profile.

Country	Currency	Rate
Argentina	peso	.000852

Agency resumés from 67 nations

Figures shown in this table of agencies ranked by gross income and in tables on the International Section 2 cover represent the best information available to Advertising Age and are constructed either from answers to questionnaires (sometimes revised on the basis of other information) or on the best data available. All material on this and following pages is copyrighted, 1980 Crain Communication Inc. Quotation or reproduction in whole or in part without written permission is expressly prohibited. A blank space indicates no gross income was reported by the agency or estimated by AA. Also figures listed under 1978 are based on the same exchange rates used to determine the dollar equivalent of an agency's gross income for 1979. More complete data, including total billings, media breakdown, accounts gained and lost and local currency equivalents for 1979 are provided in the ensuing profiles.

Foreign ad agencies earn their stripes in '79

(Continued from Page S1)

rule agency billings; the two agencies reporting 1979 financial yearend results from that Central American nation showed an aggregate loss in gross income of 93% from 1978 performances.

- But such political and economic winds have done little to dampen U.S. agency involvement abroad. Foreign operations of the top 10 U.S. agencies ranked by world gross income in 1979 claimed 50.4% for their world total gross income.

J. Walter Thompson, the U.S. leader, increased its foreign contribution to 54% of its total world gross income in 1979 compared to 52% in 1978; McCann-Erickson, No. 2 on the U.S. charts, upped its foreign ante 1% in 1979 to 73% of its total world gross income; SSC&B Inc., No. 6 on the U.S. world chart, now gains 78% of its gross income from abroad, primarily from its London stronghold; and D'Arcy-MacManus & Masius, No. 10 on the list, attributes 55% of its gross income to foreign shops today.

- The one real threat these agencies seem to face abroad, especially in the Third World, where much of the global growth will probably be in the next decade, is being legislated out of a country. Advertising in much of the Third World is considered by government authorities as part of the vital communications sector. Foreign influence in that sector is frowned upon. Already, India has limited ownership among outside agencies to 40% of a domestic shop, while a number of South American countries hold the line of foreign involvement at 20%.

JWT, whose network outside the U.S. generated gross income of $135,700,000 in 1979 against $118,200,000 in domestic gross income, came in No. 2 in the world with total gross income of $253,900,000. JWT's gross income and billings should get a healthy boost when it consolidates Euro Advertising, just purchased this year, into its totals in 1980.

The U.S. continued to dominate the world top 50 chart, notching 30 places, down from 32 a year ago, followed by Japan with 11 (down 1), France 4 (up one), Brazil 2, and one each in West Germany and Switzerland. Newcomers to the chart this year include the Groupe RSCG in France, whose Paris shop, Roux Seguela Cayzac & Goudard is No. 2 behind long entrenched Publicis, and two fast-growing agencies from Sao Paulo, Brazil, MPM/Casabranca and Alcantara Machado Periscinoto.

Outside the U.S., Japan, with Dentsu loading the dice, is heads above its challengers for the title of best advertising performance charted by gross income. Japan ran up a combined total gross income of $948,703,894 for the 33 agencies reporting in the issue, and some 37% of that came from Dentsu. It attributes Japan's overall advertising performance in 1979 (total ad spending topped the $9.41 billion mark) to aggressive management policies on the part of advertisers and media to cope with Japan's strongly domestic market-oriented sales drives by marketers, which were guided by the government's jawboning policy aimed at easing Japan's increasing frictions with Western trade partners.

As stated, the No. 1 agency in the world in 1979 (ranked by gross income) is Dentsu Inc. of Japan with total gross income of $352,790,000 on total billings of $2.437 billion. Dentsu has clung to its top spot since its supplanted JWT in 1973.

West Germany, led by H. K. McCann's $35,399,587 in gross income among 42 agencies reporting, came in second with an aggregate gross income of $382,574,689.

Britain, No. 3, paced by JWT's $33,180,000 among 45 agencies reporting, came in at $355,039,679 gross income; France, No. 4, again was paced by Publicis's $29,215,000 among 41 agencies reporting total gross income of $343,267,700.

Brazil, which had surged to the 5th slot in 1978 from No. 7 the previous year, dropped anchor to keep the status quo with total gross income of $162,930,468 from 21 agencies, some $23,100,000 of that coming from leader, MPM/Casabranca, replacing former leader, Alcantara Machado Periscinoto ($20,800,000).

- Australia kept a hold on No. 6 with gross income of $143,744,921 for 30 agencies, though in U.S. dollar terms was not helped at all by the A-dollar's 2% decline. George Patterson Pty. Ltd., a Bates agency, again outraced the field with $19,200,000 gross income.

Canada, No. 8 a year ago, climbed a notch to No. 7 as 30 agencies reported total gross income of $105,498,053, with Foster Advertising of Toronto remaining in the driver's seat with $11,552,000 of the total.

The Netherlands slipped a notch to No. 8 with a tally of $103,586,756 from 31 agencies paced again by FHV/BBDO with $9,252,800. Italy retained the No. 9 spot with $70,044,736 in gross income, $7,073,000 of that coming from market leader McCann-Erickson Italiana, which had to stave off challenges from JWT and Young & Rubicam. Sweden closed out the top 10 list with total gross income of $69,961,803 registered by 24 agencies, the leader of which was Ted Bates ($6,986,000). Bates narrowly won out over O&M affiliate, AB Svenska Telegrambyran STB, last year's piper.

Big world agency groups (000,000)

Worldwide Advertising & Marketing	—	412.5

NOTE

While this compilation of 754 agencies around the world is not a comprehensive list, in most cases the top strata with the bulk of the billings in each market are represented, and their year-to-year performance is a strong statement on the performance of advertising in that local market.

AA estimated billings and gross income in a number of cases either because forms were incomplete, reporting practices in the local markets discourage participation, or fear that financial results made public might be used against an agency by local government officials.

AA also was forced to occasionally estimate a parent shop's ownership in another agency in order to comply with the methodology used to compose the Top 50 chart. That method is to permit a parent shop to include in its gross income and billings *only* the percentage of its ownership in their foreign agencies.

ARGENTINA

(Continued from Page S-3)

Palette es su estilo.

"Palette is your style" says this Ortiz, Scopesi y Cia ad for bedspreads made by Alpargatas, one of Argentina's biggest producers of textiles and footwear.

for 1978. (In local currency, gross income was Ps 1.526 billion on billings of Ps 21.8 billion in 1979, compared with gross income of Ps 664,560,000 on billings of Ps 8.307 billion in 1978.) The 18 week Charles Atlas course as paid for by H.M.Government.

The Professionals

This K&E campaign challenges 18-23 year olds who are possibly bored with life and in dead-end jobs to shape up, a la Charles Atlas, by joining the British army where they can become fit enough to "run for 10 miles in full battle kit carrying a 9 lb. rifle."

Foote, Cone & Belding, London, reports gross income of $9,946,463 on billings of $66,342,909 for 1979, compared with gross income of $8,872,893 on billings of $59,182,197 for 1978. "Barry Day, with the help of his friendly competitors, has put together a marvelous collection of advertisements of the past quarter-century. Delightful to advertising people and rewarding to any student of human behavior, this book demonstrates the magic which is produced by the creative combination of art and science."

Leonard Matthews

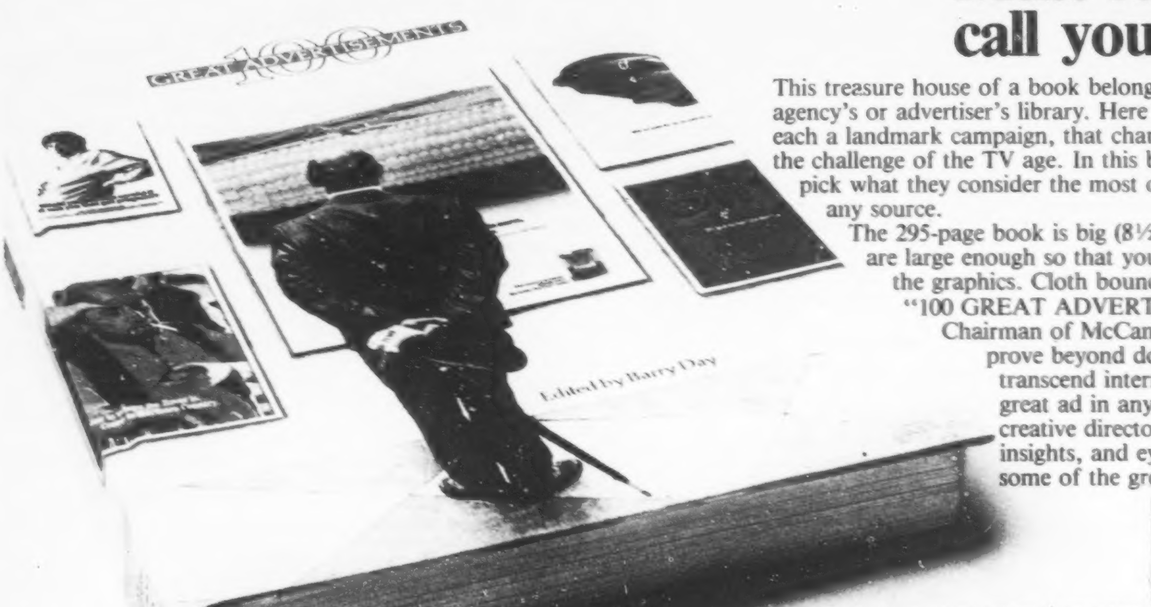
100 GREAT ADVERTISEMENTS

Must reading if you call yourself creative...

This treasure house of a book belongs on every creative shelf and in every agency's or advertiser's library. Here are the 100 ads from 49 different agencies, each a landmark campaign, that changed the course of print advertising to meet the challenge of the TV age. In this book, nine great agency creative directors pick what they consider the most outstanding work of the last 25 years from any source.

The 295-page book is big (8½" x 12") and pictorial. Ads (30 in full color) are large enough so that you can savor the copy and feel the impact of the graphics. Cloth bound, hard cover. Printed on fine art paper. "100 GREAT ADVERTISEMENTS" is edited by Barry Day, Vice Chairman of McCann-Erickson International. The selections prove beyond doubt that great advertising concepts transcend international barriers and that a great ad is a great ad in any idiom. Along with their selections these top creative directors reveal their own advertising philosophies, insights, and eyewitness anecdotes surrounding the birth of some of the greatest campaigns on both sides of the Atlantic.



SPECIAL MAIL ORDER PRICE AND MONEY BACK GUARANTEE

Published at $30 retail, "100 GREAT ADVERTISEMENTS" is specially priced for mail order at $24.95, plus $2.00 for handling and shipping. We are so sure you will want to keep this outstanding book as a permanent addition to your library that we offer a full money-back guarantee. Return it in 30 days if dissatisfied for any reason. Please complete and mail the coupon right away.

Cloth bound... 295 pages, scores of photos including 30 in full color... Luxurious 8½" × 12" size... Money back guarantee.

Up until now, you couldn't tell whether this was the frontside of a Ritz cracker or the backside of a Ritz cracker. Even worse, you couldn't tell whether this was the front or the back of one of the many pretend Ritz's. Fortunately for us all, Mr. Christie has taken steps to clarify the Ritz riddle. This is indeed the back of a real Ritz and once you turn the page you'll know why.

"The Ritz Riddle" and "The Ritz Riddle Resolved" headline two back-to-back four color page ads created for the Christie, Brown & Company, Ltd. (Nabisco in the U.S.) product by McCann-Erickson Advertising of Canada, Ltd., Toronto.

J.Walter Thompson, Toronto, reports gross income of $9,380,000 on billings of $62,000,000 for 1979, compared with gross income of $8,194,000 on billings of $54,629,000 for 1978. Only butter tastes like butter.
Sorry Marge!

Butter promo churns sour

After 30 years of watching heavy promos for margarine, the Canadian butter industry decided to hit back with a C$9,000,000 annual ad budget, and found it churned up a political controversy. The problem is that the federal government put up half the money needed for the "Only butter tastes like butter" campaign. "If the government can provide us with money without telling us what to do with our advertising dollar, we'll be pleased to accept it," says an unrepentant Alex Bell, president of the Dairy Bureau of Canada, which engineered the campaign. Claude Chevalier, chief exec at the Bureau, said that the campaign slogan originated in Canada and is being used now in Europe as well, because of a meeting of the International Butter Council Mr. Chevalier attended last year. One of the best uses of the slogan is seen in ad at left, which is presently appearing in the U.K.
